As noted below under the heading "INSPECTION OF RECORDS; INVESTIGATIONS", the compromise agreement specifies (section 12(d)) that the Administrator may elect to enter into an agreement with the Secretary providing for Department of Labor entities specified in the agreement to carry out certain responsibilities of the Administrator relating to the monitoring of compliance (section 12(b)), and the conduct of any investigations necessary to determine compliance (section 12(c)). The compromise agreement also (section 15) assigns to the Secretary primary responsibility for promoting the development of employment and job training opportunities and joint responsibilities with the Administrator with respect to outreach and public information and assisting veterans and employers in applying to participate in the new program, and (section 14) authorizes the Secretary to provide certain employment counseling services.

An important goal of the Committees has been to minimize the administrative obstacles to swift implementation of the program, in order that veterans and employers might be brought into the program as expeditiously as possible, consistent with the emergency nature of this legislation.

The Senate amendment (new section 2102(c)), but not the House bill, would provide that the Secretary of Labor shall carry out the Secretary's responsibilities through the Assistant Secretary of Labor for Veterans' Employment established under section 2002A of title 38.

The compromise agreement (section 4(b)) contains this provision.

ELIGIBILITY FOR PROGRAM

The House bill (section 3(1)) would provide eligibility for veterans of the Vietnam era, as defined in section 101(29) of title 38 (the period beginning August 5, 1964, and ending on May 7, 1975), and for disabled veterans entitled to receive service-connected disability compensation from the VA for a disability incurred or aggravated any time after August 4, 1964.

The Senate amendment (new section 2103(a)) would provide eligibility for veterans of World War II (defined in section 101(8) of title 38 as the period beginning December 7, 1941, and ending December 31, 1946), the Korean conflict (defined in section 101(9) of title 38 as the period beginning June 27, 1950, and ending January 31, 1955), and the Vietnam era. Service during those periods would be specifically defined by reference to entitlement standards established under the GI Bills of those periods—generally, that the veteran was discharged under conditions other than dishonorable, and met certain minimum-service requirements: World War II—90 days; Korean conflict—90 days; and Vietnam era—180 days. These minimum service requirements would not be applicable to veterans discharged for service-connected disabilities.

Under both the House bill (section 5(a)) and the Senate amendment (new section 2103(a)), eligibility would further be conditioned upon the veteran having been unemployed not not less than 15 of the last 20 weeks at the time of applying for participation in the program. A veteran would be considered "unemployed" when the veteran is without a job (to be determined, under the House bill, in accordance with the criteria used by the Bureau of Labor Statistics of the Department of Labor) and wants and is available for work. Under the Senate amendment, but not the House bill, eligibility would be further conditioned upon the veteran being unemployed when applying to participate. As an alternative to unemployment for 15 out of 20 weeks, the Senate amendment, but not the House bill, would provide eligibility to an unemployed veteran who has been terminated or laid off from employment, is eligible for or has exhausted entitlement to unemployment compensation, and has no realistic opportunity to return to employment in the same or a similar occupation in the geographical area where the veteran previously held employment.

The compromise agreement (section 5(a)) would provide eligibility for a Korean conflict or Vietnam-era veteran who is unemployed and has been unemployed for at least 15 of the 20 weeks immediately preceeding the date of application for participation in a program of job training. The term "Korean conflict or Vietnam-era veteran" would be defined to mean a veteran who served for one day or more during either of those periods and who (1) has served at least 181 days or (2) was discharged from service for a service-connected disability or is entitled to compensation for a service-connected disability. The term "unemployed" would apply to any period during which the veteran is without a job and wants and is available for work.

Although the compromise agreement does not contain the language from the House bill mandating the use of criteria from the Bureau of Labor Statistics in determining whether a veteran is without a job, it is the Committees' general contemplation that these criteria will be applied. However, the Committees wish to emphasize their intention that the fact that a veteran is or has been a "discouraged worker"—i.e., one who ceased looking for work because he or she believed none was available—should in no way preclude participation in the new program.

VETERANS' APPLICATIONS

Both the House bill (section 5(b)) and the Senate amendment (new section 2103(b)) would require that veterans seeking to participate in a program of job training submit an application in such form and containing such information as is prescribed administratively. The Senate amendment, but not the House bill, would require the application to specify the training objective to be pursued.

The compromise agreement (section 5(b)(1)) follows the House bill with modifications that would clarify that a veteran's application is not for participation in a particular employer's program of job training and would require that an application contain the veteran's certification regarding unemployment status and military service requirements.

APPROVAL OF VETERANS' APPLICATIONS

The House bill (section 5(b)) would provide that an application of a veteran may not be approved if it is found that the veteran is already qualified for the job for which the training would be provided.

The Senate amendment (new section 2103(b)) would provide that a veteran's application must be approved unless it is found that the veteran either is not eligible or is already qualified for the specified training objective. In addition, under the Senate amendment, a veteran who has been determined to be eligible would be certified as such and would be furnished with a copy of a certificate of eligibility for presentation to an employer offering a program of job training.

The compromise agreement (section 5(b)(2)) follows the Senate amendment with three modifications:

First, the provision for disapproval of the veteran's application if the veteran is already qualified for the training objective is deleted. The Committees recognize that at this early stage of determining a veteran's basic eligibility, it would often be premature to require veterans to commit themselves to a particular training objective. The goal of precluding the payment of training assistance under this legislation on behalf of veterans who are already qualified in the proposed field of training should be adequately served by the requirement, derived from the House bill and contained in section 7(d)(4) of the compromise agreement (discussed below), that an employer certify that training will not be provided to veterans who are already qualified.

Second, approval of the veterans' application could be withheld if the Administrator determines that such withholding of approval is necessary in order to limit the number of veteran participants in a program of job training under this measure where it is determined that sufficient funds are not available to permit that veteran's participation. This change is designed to clarify the Administrator's authority to ensure that spending under the program does not exceed the funds appropriated. It corresponds to section 9 of the compromise agreement, which gives the Administrator authority to withhold or deny approval of an eligible veteran's entry into a program of job training on the basis of funding limitations. Thus, the Act contains two separate mechanisms for controlling obligations within the bounds of available funds: as an initial safeguard, the pool of veteran appli-

cants having certificates may be limited, and, at a subsequent point in the pre-obligation process, the entry of veterans previously certified as eligible into VA-assisted training may be postponed or stopped in order to keep obligations within those bounds.

Third, the certificate of eligibility furnished to the veteran would be valid for only 60 days, would be required to specify the dates of issuance and expiration, and could be renewed upon application by the veteran. This provision is designed to provide both the Administrator and employers with a mechanism for ensuring that a veteran's eligibility is reasonably current and the Administrator with a further mechanism for estimating potential obligations of funds. Consistent with the provisions of section 10 of the compromise agreement, the Committees intend that the certificate also specify that it is subject to the availability of funds, that a veteran may not enter an approved program of job training under it until the employer has given the VA two weeks notice of intention to enter the veteran into such training, and any other matters that would be useful from the standpoint of the effective implementation of this legislation.

DURATION OF ASSISTANCE

The House bill (section 5(c)) would provide that training assistance could be paid for a period of up to twelve months in the case of a veteran with a service-connected disability rated at 30 percent or more, or, in the case of any other eligible veteran, for a period of six months with up to an additional six months of assistance available at the discretion of the Administrator.

Under the Senate amendment (new section 2104(b)), the maximum period of assisted training would be twelve months, except that an additional six months could be allowed for veterans with service-connected disabilities rated either at 30 percent or more or at 10 or 20 percent if the veteran has been determined to have a serious employment handicap under section 1506 of title 38, relating to vocational rehabilitation for certain veterans with service-connected disabilities.

The compromise agreement (in section 5(c)) contains the following maximum training-period provisions: fifteen months—across the board, without the need for individual extensions—in the cases of certain veterans with service-connected disabilities rated either at 30 percent or more or at 10 or 20 percent if the veteran has been determined to have a serious employment handicap under section 1506 of title 38, and nine months in the cases of other veterans.

EMPLOYER JOB TRAINING PROGRAMS

The House bill (section 6(a)) would provide that, to qualify as a program for which assistance may be paid, a program of job training must provide training for a period of at least six months. Under the Senate amendment (new section 2104(a)), an assisted program must generally be for no less than six months, except that a program of between three and six months could be approved where the purposes of the program would otherwise be met.

The compromise agreement (section 6(a)) follows the Senate amendment.

The House bill (section 6(b)) would provide that an eligible veteran may select an approved program of job training with any employer. Under the Senate amendment (new section 2105(c)), an eligible veteran may accept an approved program offered to the veteran by any employer.

The compromise agreement (section 6(b)) provides that a veteran approved for participation and having a current certificate of eligibility may enter any approved program offered to the veteran by the employer.

The Senate amendment (new section 2104(a)), but not the House bill, would require that in order to qualify as a program of job training, an employer's program must offer training in an occupation in a growth industry, an occupation requiring the use of new technological skills, or an occupation for which demand for labor exceeds supply.

The compromise agreement (section 6(a)(1)) contains this provision. The committees intend that the Administrator shall construe these terms liberally—that is, in the case of an occupation with respect to which there is some doubt as to whether it should be included in one of these three categories, that doubt should be resolved in favor of including it. In case of such doubt, it might be useful for the Administrator to consult with the Secretary of Labor or other appropriate entity in construing the statutory terms.

APPROVAL OF EMPLOYER PROGRAMS

APPROVAL PROCESS

The House bill (section 8) would establish basically a two-step approval process for programs of job training. First, the employer would submit a written application containing a certification that certain criteria would be met; and, second, the Administrator would be required to conduct an investigation regarding the criteria for approval in order to determine whether the criteria are met.

The Senate amendment (new section 2105(c)) would require the employer to submit with the application a certification that all applicable criteria for job training programs would be met, and would essentially eliminate the requirement for the second step under the House bill, by mandating generally that a proposed program of job training with respect to which the application and certification comply on their face with the requirements of the legislation be approved without the need for any prior investigation. Investigation would be authorized, but not required, and approval of the proposed program being investigated could be withheld pending the outcome of the investigation, whereupon, depending on the outcome, the program could be disapproved.

The compromise agreement (section 7(a)(2) and (g)) follows the Senate amendment. The Committees believe that this approach will minimize administrative difficulties, enhance the attractiveness of the program to employers, and expedite implementation of the program. To the extent that such limited prior approval proves to be a less effective safeguard than mandatory prior investigation, the Committees believe that the post-approval safeguards in the compromise agreement—including the authorities regarding inspection of records, monitoring, investigation, discontinuance of approval, periodic certifications connected with each payment of assistance, and overpayment remedies with respect to both employers and veterans, as well as the availability of civil penalties under the Federal False Claims Act (31 U.S.C. § 3729-31) and criminal penalties under the Federal False Statement Act (18 U.S.C. § 1001)—should be sufficient to ensure that the requirements of this legislation will be able to be properly enforced so that limited resources will not be expended for nonqualified programs of training.

CRITERIA FOR APPROVAL OF EMPLOYER PROGRAMS

Both the House bill (section 9) and the Senate amendment (new section 2107) would preclude assistance to programs of job training for employment in seasonal, intermittent, or temporary jobs (the House bill, but not the Senate amendment, providing an exception for seasonal jobs as determined to be appropriate), for employment under which commissions are the primary source of income, for employment involving political or religious activities, or where the training program would be carried out outside the United States. The House bill (section 6(b)), but not the Senate amendment, would exclude employers other than for-profit private employers. The Senate amendment (new section 2107(4)), but not the House bill, would exclude federal agencies.

The compromise agreement (section 7(b)) follows the Senate amendment.

The House bill (section 8(b)(3)) would require the employer to certify that there is a reasonable certainty that a position of the type for which the veteran is to be trained will be available to the veteran at the end of the training period.

The Senate amendment (new section 2105(b)(1)) would require the employer to certify that the employer has planned for the employment of the veteran in an appropriate position at the conclusion of the training period, and that the employer has no reason to expect that such a position will not then be available to the veteran on a stable, permanent basis.

The compromise agreement (section 7(d)(1)) follows the Senate amendment.

Both the House bill (section 8(b)(1)) and the Senate amendment (new section 2105(b)(2)) would require the employer to certify that veterans participating in its program of job training will be paid no less than other employees in such a program or, under the Senate amendment, a comparable program.

The compromise agreement (section 7(d)(2)) follows the Senate amendment.

The House bill, but not the Senate amendment, would require a pre-approval finding, upon investigation, that the program of job training will not be given to veterans who are already qualified for the job for which training is to be provided.

The compromise agreement (section 7(d)(4)) follows the House bill, with an amendment modifying this provision so as to require that the matter be included in the employer's certification (rather than necessarily be subject to pre-approval investigation). The Committees note that this provision is intended only to require the employer to conduct a reasonable, good-faith inquiry into a veteran's qualifications, and that section 8(c) of the compromise agreement would impose upon the veteran, and not upon the employer, liability for overpayments to the employer which result from false or incomplete information furnished to the employer by the veteran.

The House bill (section 8(c)(1)), but not the Senate amendment would require a pre-approval finding, upon investigation, that the job for which training is to be provided is one in which progression and appointment to the next higher classification are based upon skills learned through organized and supervised training on the job rather than on factors such as length of service and normal turnover.

The compromise agreement (section 7(d)(5)) contains a provision requiring the employer to certify that the job in question is one that involves significant training.

The House bill (section 8(c)(10)), but not the Senate amendment, would require a pre-approval finding that the training program will be stated in a written agreement signed by the employer and the veteran, and that a copy of the signed agreement will be provided to both the veteran and the VA.

The compromise agreement (section 7(d)(11) follows the House bill with an amendment modifying this provision so as to require that the matter be included in the employer's certification (rather than necessarily be subject to pre-approval investigation) and to refer to a copy of the employer's certification under this subsection (subsection (d) of section 7 of the compromise agreement) rather than a written agreement.

Six other approval criteria which were included in substantially similar form in both the House bill (section 8(c)), as matters requiring pre-approval findings but not certification, and the Senate amendment (new section 2105(b)), as matters subject to certification, are included in the compromise agreement. These criteria relate to the nondisplacement of current or laid-off workers (paragraph (3) of section 7(d)), the adequacy of training content (paragraph (6)), the full-time employment of participating veterans (paragraph (7)), the length of the period of training as compared to that customarily required by employers (paragraph (8)), the availability of adequate training facilities (paragraph (9)), and the maintenance of records adequate to show employer compliance (paragraph (10)).

The House bill (section 8(c)(11)) would authorize the imposition of additional criteria as to which pre-approval findings would be required. The Senate amendment (new section 2105(b)(10)) would similarly authorize additional criteria as to which certification, rather than pre-approval findings, would be required.

The compromise agreement (section 7(d)(12)) contains a provision authorizing additional criteria that the Administrator determines are essential for the effective implementation of the program established by the compromise agreement.

The Committees note their intention that this authority to impose additional criteria is intended to meet unforeseen problems clearly necessitating the imposition of additional requirements. The Committees stress that this provision is not intended to give the VA authority to impose undue restrictions as was done with respect to the targeted delimiting date extension program (enacted in section 201(a) of Public Law 92-72) and required Congressional action (section 201(a) of Public Law 97-306) undoing the restrictions and extending the program for a year.

The Senate amendment (new section 2105(b)(3)), but not the House bill, would require the employer's certification to indicate the number of hours of training and to describe the training content of the program and the training objective.

The compromise agreement (section 7(e)) contains this provision with amendments requiring that the certification also specify the length of the program and the starting rate of wages and describe any agreement the employer has entered into under section 8 of the compromise agreement, relating to the provision of training through educational institutions.

The compromise agreement (section 7(f)) would also clarify that generally each of the matters specified in section 7(d)(1) through (11) of the compromise agreement as requiring employer certification prior to approval of a program of job training (i.e., not including matters that may be administratively required to be certified under paragraph (12) of section 7(d)) shall be considered to be affirmative substantive requirements. However, for purposes of section 8(c) of the compromise agreement, relating to overpayments, only the matters covered by paragraphs (1) through (10) would be considered requirements. Thus, a failure to provide a participating veteran with a copy of the employer's certification would not be grounds for an overpayment. For the purposes of section 11 of the compromise agreement, relating to the discontinuance of approval of veterans' participation in employer programs that fall out of compliance with requirements established under this legislation, the matters covered by all twelve paragraphs of section 7(d) would be considered such requirements. Hence, failures to provide participating veterans with copies of the employer's certificate and to meet requirements established administratively under the authority in paragraph (12) could, by virtue of section 7(f)(2)(B), result in discontinuance of approval.

The Committees note, with respect to the requirement (under subsections (d)(1) and (f) of section 7 of the compromise agreement) that the employer plan for the permanent employment of the veteran after training, that it is not their intention that an employer's failure to continue a veteran's employment after the completion of training should, in and of itself, result in the creation of an overpayment. An overpayment on the basis of subsection (d)(1) would result only where there is an affirmative finding, based upon an investigation or other action under section 12, that the employer had in fact, at the time of making the certification under subsection (d), failed to make plans for the continuing employment of such veterans as may complete training under the employer's program, had made other plans inconsistent with such continuing employment, had no reasonable basis at that time for expecting that a position would be available to the veteran on a stable and permanent basis at the end of the training period, or did have some affirmative basis for expecting that such a position would not then be available. In the making of such an affirmative finding, the record of the employer in continuing or not continuing the employment of veterans would certainly be relevant.

PAYMENTS TO EMPLOYERS

Computation of Amounts

The House bill (section 7(a)) would provide that the amount paid to an employer on behalf of a veteran for any period may not exceed 50 percent of the wages paid for that period, computed on the basis of the starting wage rate.

The Senate amendment (new section 2108(a)) would provide that the amount paid to an employer on behalf of a veteran may not exceed the lesser of 50 percent of the wages paid during the training period in question, or a specified annual dollar limit. That limit would be $9,000 in the cases of certain veterans with service-connected disabilities (including all veterans with disabilities rated at 30 percent or more, as well as those rated 10 to 20 percent disabled who have been determined to have a serious employment handicap under section 1506 of title 38), and $6,000 in the case of any other veteran.

The compromise agreement (section 8(a)) provides that the training assistance amount paid to an employer on behalf of a veteran for any period shall be 50 percent of the veteran's wages for that period—not counting any increase over the starting rate and without regard to overtime or premium pay—up to a total of $10,000 payable on behalf of any individual veteran.

The Committees stress that the rule relating to overtime and premium pay would apply regardless of the frequency or regularity with which such pay is paid for the job for which training is being provided.

Payment Periods

Both the House bill (section 7(b)) and the Senate amendment (new section 2108(a)) would provide for payments to be made to employers on a quarterly basis. The Senate amendment (new section 2108(b)), but not the House bill, would authorize the making of payments on a monthly, rather than quarterly, basis to private, for-profit businesses with 500 or fewer employees.

The compromise agreement (section 8(a)(1) and (3)) follows the Senate amendment with an amendment deleting the requirement that businesses be private and for-profit and establishing a requirement that the Administrator set a numerical limit by regulation.

The Committees recognize that cash flow problems sufficiently significant to warrant monthly payments may vary from one type of business or industry to another. Thus, the Committees believe that the Administrator should have considerable latitude in setting such limits, with the goal of attracting employers with relatively few employees into the program established under this legislation.

Certifications

Both the House bill (section 7(b)) and the Senate amendment (new section 2108(c)) would provide that no payment for a period of training may be made until individual certifications have been received from both the employer and the veteran. The veteran would be required to submit a certification as to the veteran's actual employment and training with the employer during the training period for which payment is to be made; and the employer would be required to certify that the veteran was employed and progressing satisfactorily during that period. The Senate amendment (new section 2108(c)(2)(B)), but not the House bill, would require the employer to indicate, in the first of these periodic certifications, the date on which the employment of the veteran began.

The compromise agreement (section 8(b)) contains these provisions with two modifications. First, each periodic certification by an employer would be required to include an indication of the number of hours worked by the veteran during the period for which payment is to be made; and, second, the employer's initial certification would be required to indicate the starting rate of wages paid to the veteran.

The House bill (section 7(a)), but not the Senate amendment, would specify that payments to employers employing disabled veterans may be used for the purpose of defraying the costs of making structural changes to the employer's workplace to remove architectural barriers.

The compromise agreement does not contain this provision.

The Committees note that nothing in the language of the compromise agreement would preclude employers from using training assistance payments to make reasonable accommodations to the needs of disabled veterans, which in the cases of certain types of disabilities (for example, blindness and deafness) would not necessarily be structural. The compromise agreement, in providing that the purpose of such payments is to assist employers in defraying the cost of necessary training, specifies no limitations on the uses to which payments may be put by employers.

OVERPAYMENTS

The House bill (section 7(c)) would provide that, if a willful or negligent false certification by either an employer or a veteran were to result in an overpayment of training assistance, the amount of the overpayment would be a liability to the United States of the party making the false certification, subject to collection in the same manner as any other debt due to the United States.

The Senate amendment (new section 2109(b)) would provide that, if a certification or application which was false or clearly unsupportable in any material respect were to result in an overpayment of assistance, the party submitting that certification or information would be liable for the overpayment. As in the House bill, the overpayment could be collected in the same manner as any other debt due to the United States.

The compromise agreement (section 8(c)(1)(A)) would provide that an employer would be liable for any overpayment of assistance resulting from a certfication, or information contained in an application, submitted by an employer that was false in any material respect. Also (under section 8(c)(1)(B)), if the Administrator finds that the employer has failed in any substantial respect to achieve compliance with any requirement (including matters deemed to be requirements for this purpose by virtue of section 7(f)(2)(A) of the compromise agreement—clauses (1) through (10) of section 7(d)) established under the compromise agreement (unless the employer's failure is the result of false or incomplete information provided by the veteran), any payment for the period of noncompliance would be an overpayment for which the employer would be liable.

A veteran's liability (section 8(c)(2)) for an overpayment would depend upon a finding by the Administrator that the veteran submitted material which was willfully or negligently false in any material respect in a certification or application submitted by the veteran to the Administrator or in information provided to an employer.

The compromise agreement (section 8(c)(3)) would further provide that overpayments recovered would be credited to funds available for payments under the compromise agreement and that, if no such funds remain, the amount of the overpayment recovered would be deposited into the U.S. Treasury. Finally, the compromise agreement (section 8(c)(4)) would authorize the Administrator to waive, in whole or in part, any such overpayment, in accordance with the terms and conditions of section 3102 of title 38, which authorizes waiver of recovery of claims under laws administered by the VA whenever the Administrator determines that recovery would be against equity and good conscience, and where application for relief from recovery has been made within 180 days of the date of notification of the indebtedness to the debtor.

Civil penalty

The Senate amendment (new section 2109(c)), but not the House bill, would authorize the administrative imposition of a civil penalty (up to $1,000 for each individual wrongfully employed in a program of job training under the Senate amendment), after an adjudication determined on the record after opportunity for an agency hearing, on an employer who has, willfully or with reckless disregard of the facts, made a false certification or has caused the administering agency to give approval contrary to the requirements of the legislation. Actions to impose such a penalty would be reviewable in the Federal courts.

The compromise agreement does not contain this provision.

The Committees note the existence of general authority, under the False Claims Act (31 U.S.C. §§ 3729-31), regarding the assessment and collection of civil penalties, as well as criminal sanctions (18 U.S.C. § 1001), through judicial rather than administrative processes, in cases of knowingly false, fictitious, or fraudulent claims or statements made to representatives of the Federal Government. The Committees strongly urge the Administrator (and, where appropriate, the Secretary of Labor) to ensure that, whenever in the implementation of the compromise agreement evidence of a violation of such a statute comes to light, the matter is vigorously pursued and, where appropriate, referred to the Department of Justice for action.

The Committees also note the existence of authority for the Department of Justice to provide, at the request of the agency involved, certain legal services in conducting investigations and examining witnesses, in connection with a claim before the agency (28 U.S.C. § 514), and believe that this authority may prove useful in determining whether any particular employer has acted knowingly and willfully in connection with the submission of a false claim, has submitted fraudulent materials, or has otherwise demonstrated conduct which would render that employer subject to the civil or criminal penalties noted above, or to any other applicable sanction established by law or regulation. In all such matters, the Committees urge prompt and full cooperation between the Administrator (and, where appropriate, between the Secretary) and the Attorney General, consistent with the terms and provisions of sections 514 and 516 (regarding representation by the Attorney General in any action in which the United States is a party) of title 28, and of applicable interagency agreements.

ENTRY INTO PROGRAM OF TRAINING

As noted above in the discussion of section 5(b) of the compromise agreement, under the subheading "Approval of Veterans' Applications", the compromise agreement (section 9) authorizes the Administrator to withhold or deny approval of a veteran's entry into an approved program of job training when necessary to avoid incurring obligations in excess of the funds available. The compromise agreement also requires that employers give the VA two weeks notice prior to a veteran's entry into VA-assisted training. That notice is intended to enable the Administrator to withhold or deny approval for the purpose of ensuring that obligations are not incurred in excess of available funds.

PROVISION OF TRAINING THROUGH EDUCATIONAL INSTITUTIONS

The Senate amendment (new section 2106), but not the House bill, would permit an employer to enter into an arrangement or agreement with an educational institution that has been approved for the enrollment of veterans under chapter 34 of title 38 for that institution to provide the program of training (or a portion thereof). When such an arrangement or agreement has been entered into, the application of the employer would be required to disclose that fact and describe the training to be provided by the institution.

The compromise agreement (section 10) contains this provision with amendments deleting any reference to "arrangements".

DISCONTINUANCE OF PAYMENTS FOR UNSATISFACTORY CONDUCT OR PROGRESS

The House bill (section 10), but not the Senate amendment, would authorize the Administrator to discontinue payments on behalf of a veteran based upon a finding by the Administrator that the conduct or progress of the veteran is unsatisfactory due to circumstances within the control of the employer.

The compromise agreement does not contain this provision. The Committees note that, under section 8(b)(2)(A) of the compromise agreement, quarterly payments may not be made until the Administrator has received from the employer a certification that the veteran was employed by the employer during the period for which payment is to be made and that the veteran's performance and progress during that period were satisfactory. The Committees also note that such a certification is subject to investigation under section 12(c) and overpayment collection under section 8(c).

DISCONTINUANCE OF APPROVAL OF PARTICIPATION IN CERTAIN EMPLOYER PROGRAMS

Both the House bill (section 11) and the Senate amendment (new section 2109(a)) would provide a mechanism for the disapproval of further participation by veterans in a program of job training which, subsequent to its approval, has fallen out of compliance with any of the requirements established under the legislation. The Senate amendment would authorize such disapproval (while the House bill would mandate it), and would establish a notice and hearing process to govern the disapproval process.

The compromise agreement (section 11) follows the Senate amendment.

INSPECTION OF RECORDS; INVESTIGATIONS

Both the House bill (section 12) and the Senate amendment (new section 2111(a)) would authorize examinations of the records and accounts of participating employers. The Senate amendment (new section 2111(b)) would also authorize the monitoring of program participants in order to determine compliance with the program requirements and investigation of any matter deemed necessary to determine compliance.

The compromise agreement (section 12(a), (b), and (c)) follows the Senate amendment with an amendment adding a provision (section 12(d)), derived from the Senate amendment (new section 2102(b)), authorizing, but not requiring, the Administrator to enter into an agreement with the Secretary of Labor to provide for the administration of the provisions regarding monitoring and investigations, or any portion of those provisions, by the Department of Labor. Duties undertaken by the Department of Labor pursuant to such an agreement would be au-

thorized to be carried out by any appropriate branch of the Department of Labor, notwithstanding the general requirement, contained in section 4(b) of the compromise agreement, that the responsibilities of the Secretary of Labor under the compromise agreement be carried out by the Assistant Secretary of Labor for Veterans' Employment.

COORDINATION WITH OTHER PROGRAMS

The House bill (section 14) would provide that a veteran may not receive benefits both under the House bill and under chapters 31 (relating to training and rehabilitation for veterans with service-connected disabilities), 32 (relating to post-Vietnam era veterans' educational assistance), 34 (relating to the so-called "Vietnam-era GI Bill"), or 35 (relating to survivors' and dependents' educational assistance) of title 38, or chapter 107 of title 10 (relating to educational assistance for current enlistees), for the same period.

The Senate amendment (new section 2108(d) (1) and (2)) would similarly preclude simultaneous payments of assistance under the Senate amendment and under chapter 31 or 34, under chapter 36 (which includes provisions for the payment of Vietnam-era GI Bill benefits for correspondence courses and for apprenticeship or other on-job training) of title 38, or where the employer is receiving any other form of assistance on account of the training or employment of the veteran. The Senate amendment (section 2108(d)(3)), but not the House bill, would prohibit the payment of assistance under the Senate amendment where the veteran on behalf of whom assistance is to be paid had already completed a program of job training under the program that would be established by the Senate amendment.

The compromise agreement (section 13) follows the Senate amendment with additional references, derived from the House bill, to chapters 32 and 35 of title 38.

COUNSELING

The House bill (section 16), but not the Senate amendment, would require the Administrator and the Secretary of Labor to provide counseling services, upon request, to eligible veterans in order to assist them in selecting a suitable program of job training.

The compromise agreement (section 14) contains this provision, with an amendment authorizing, rather than requiring, the provision of such counseling services.

INFORMATION AND OUTREACH; USE OF AGENCY RESOURCES

Both the House bill (section 15) and the Senate amendment (new section 2110) would provide that the responsibilities for information and outreach would be shared between the Veterans' Administration and the Department of Labor. Information and outreach activities would be targeted toward both veterans and employers; would be coordinated with services and opportunities provided for under chapters 41 (relating to job counseling, training, and placement services for veterans) and 42 (relating to employment and training of disabled and Vietnam-era veterans) of title 38, and with resources and programs available under the Job Training Partnership Act (Public Law 97-300) and would emphasize reliance on disabled veterans' outreach program specialists and other personnel appointed under relevant provisions of title 38. The Senate amendment, but not the House bill, would require coordination of such information and outreach efforts with the Small Business Administration and with the Department of Education, would require the administering agencies to assist veterans and employers in completing applications and certifications, and would require the administering agencies to endeavor to achieve an equitable regional distribution of the limited training funds available.

The compromise agreement (section 15) would require the Administrator and the Secretary of Labor to conduct jointly an outreach and public information program directed to both veterans and employers, as well as to educational institutions and labor unions, and would assign to the Secretary of Labor primary responsibility for promoting the development of employment and job training opportunities. It would require the Administrator and the Secretary to coordinate outreach and public information activities with other job counseling, placement, job development, and other services available through the VA and the Department of Labor, as well as with similar services offered by other public agencies and organizations (including Federal agencies).

It would require the Administrator of Veterans' Affairs and the Secretary of Labor to make available sufficient personnel for facilitating effective implementation and to provide assistance to veterans and employers making applications and completing certifications. Further, it would require the Secretary to make maximum use of personnel currently available through the Office of the Assistant Secretary for Veterans' Employment and resources under the Job Training Partnership Act. Finally, the Secretary would be required to request and obtain certain information from the Small Business Administration in order to promote maximum training opportunities for veterans.

The Senate amendment (new section 2110(b)), but not the House bill, would require efforts to achieve an equitable regional distribution of training opportunities.

The compromise agreement does not contain this provision. However, the Committees note their belief that it would be useful for consideration to be given to developing a mechanism, if feasible, for equitable distribution.

AUTHORIZATION OF APPROPRIATIONS

The House bill (section 19) would authorize the appropriation to the VA of $25 million for fiscal year 1983, $150 million for fiscal year 1984, and $150 million for fiscal year 1985, to carry out the House bill.

The Senate amendment (section 102) would authorize the appropriation to the VA of a total of $150 million for the purpose of making payments to employers under the Senate amendment.

The compromise agreement (section 16) would authorize the appropriation of $150 million for each of fiscal years 1984 and 1985 for the purpose of making payments under the compromise agreement, to remain available until September 30, 1986. The Committees note that these amounts have been specifically approved by the Congress for the purpose, in H. Con. 91, the First Concurrent Resolution on the Budget for Fiscal Year 1984, and that such amounts have been set apart in that resolution from other amounts provided for in Function 700 for veterans' benefits and services generally.

The Committees expect that, if additional personnel ceilings and funds are necessary for the effective implementation of the provisions of the compromise agreement, the VA will request such additional ceilings and funds.

TERMINATION OF PROGRAM

The House bill program would (under section 18) be open to new veteran applicants during the 15-month period beginning July 1, 1983, and ending September 30, 1984. No assistance would be authorized to be paid after September 30, 1985.

The Senate amendment program would (under new section 2112) be open to new veteran applicants during the 12-month period beginning October 1, 1983, and ending September 30, 1984. No assistance would be authorized to be paid for any program commencing after December 31, 1984. The Senate amendment (section 101(c)) would also provide that, in the event that funds are not both appropriated and made available by the Office of Managment and Budget (OMB) on or before the effective date, October 1, 1983, the termination dates for the program would be extended by periods equal to the period beginning October 1, 1983, and ending on the date funds are made available by OMB.

The compromise agreement (section 17) follows the Senate amendment.

EXPANSION OF TARGETED DELIMITING DATE EXTENSION

The House bill (section 13), but not the Senate amendment, would permit veterans, in lieu of participating in a program of job training, to pursue at an educational institution approved under chapter 34 of title 38 a full-time program of training with a vocational objective or a full-time associate degree program with a vocational objective. Such programs would be required to be of at least six-months duration and in an employment field where it is found that there is a specific level of probability of long-term employment. Payments for periods of such training would be made monthly to reimburse the veteran for the cost of tuition, fees, books, supplies, and equipment, but could not exceed $500 a month. Not more than $25 million could be obligated for such a program in any fiscal year.

The compromise agreement (section 18) would authorize the VA to provide educational assistance, using up to $25 million of funds appropriated under the compromise agreement, for the pursuit of an associate degree program (meeting the applicable title 38 requirements for such degree programs) with a predominantly vocational content. This assistance would be in the same amounts and be available under the same terms and conditions as are applicable to the pursuit of vocational objective courses under the targeted delimiting date extension provisions (section 1662(a)(3) of title 38) that were enacted in Public Law 97-72 and amended by Public Law 97-306 to provide certain Vietnam-era veterans whose GI Bill eligibility periods have expired a further opportunity to use their GI Bill benefits for vocational training. Thus, such assistance could be made available, until not later than December 31, 1984, for all Vietnam-era veterans who ever established GI Bill eligibility under chapter 34 of title 38 except in those cases in which it is determined that the veteran is not in need of the course involved in order to obtain a reasonably stable employment situation consistent with the veteran's abilities, aptitudes, and interests.

A ceiling of $25 million of the total of the amounts appropriated under section 17 for both fiscal years 1984 and 1985 would be placed on expenditures for such assistance; no statutory minimum would be established for such expenditures.

This assistance—as in the case of GI Bill educational assistance and contrasted with training assistance in connection with veterans' participation in programs of job training under the compromise agreement (which is payable to veterans' employers)—would be payable to veterans.

EFFECTIVE DATE

The House bill would (under section 19) take effect on July 1, 1983. The amendments to title 38, United States Code, that the Senate amendment would make to add a new chapter 44 would (under section 102) take effect on October 1, 1983.

The compromise agreement (section 19) has an October 1, 1983, effective date.

The Committees intend that the VA and the Department of Labor develop now the necessary regulations and procedures for implementing this legislation and expect that the entire $150 million authorized for fiscal year 1984 will be appropriated in the continuing resolution for fiscal year 1984. If the VA and the Department thus make the necessary preparations and funds are so appropriated, the program could begin on or about October 1, 1983.

VAREC REORGANIZATION

The Senate amendment, but not the House bill, would exempt the planned administrative reorganization of the Veterans' Administration Rehabilitation Engineering Center (VAREC) from the requirement, established under section 210(b)(2)(A) of title 38, that such reorganizations be proposed in a detailed report submitted to the appropriate Committees of Congress not later than the date that the President's budget is transmitted and not commence until the following October 1.

The compromise agreement does not contain this provision.

Mr. BAKER. Mr. President, I move that the Senate concur in the amendments of the House.

The motion was agreed to.

CONSOLIDATION AND REENACTING CERTAIN MARINE SAFETY AND SEAMAN'S WELFARE LAWS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 46.

The PRESIDING OFFICER (Mr. HECHT) laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 46) entitled "An Act to revise, consolidate, and enact certain laws relating to vessels and seamen as subtitle II of title 46, United States Code "Shipping", do pass with the following amendment:

Strike all after the enacting clause and insert the following:

S. 46

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SUBTITLE II OF TITLE 46, UNITED STATES CODE

SECTION 1. Certain general and permanent laws of the United States, related to vessels and seamen, are revised, consolidated, and enacted as title 46, United States Code, "Shipping", as follows:

TITLE 46—SHIPPING

Subtitle	Sec.
I. [Reserved—general]	101
II. Vessels and seamen	2101
[BALANCE OF TITLE RESERVED]	
SUBTITLE II—VESSELS AND SEAMEN	
PART A—GENERAL PROVISIONS	
Chapter	Sec.
21. General	2101
23. Operation of vessels generally	2301
PART B—INSPECTION AND REGULATION OF VESSELS	
31. General	3101
33. Inspection generally	3301
35. Carriage of passengers	3501
37. Carriage of liquid bulk dangerous cargoes	3701
39. Carriage of animals	3901
41. Uninspected vessels	4101
43. Recreational vessels	4301
[PART C—RESERVED FOR LOAD LINES OF VESSELS]	
PART D—MARINE CASUALTIES

PART A—GENERAL PROVISIONS

CHAPTER 21—GENERAL

Sec.
2101. General definitions.
2102. Limited definitions.
2103. Superintendence of the merchant marine.
2104. Delegation.
2105. Report.
2106. Liability in rem.
2107. Civil penalty procedures.
2108. Refund of penalties.
2109. Public vessels.
2110. Fees prohibited.
2111. Pay for overtime services.
2112. Authority to change working hours.
2113. Authority to exempt certain vessels.

§ 2101. General definitions

In this subtitle—

(1) "associated equipment"—

(A) means—

(i) a system, accessory, component, or appurtenance of a recreational vessel; or

(ii) a marine safety article intended for use on board a recreational vessel; but

(B) does not include radio equipment.

(2) "barge" means a nonself-propelled vessel.

(3) "Boundary Line" means a line established under section 2(b) of the Act of February 19, 1895 (33 U.S.C. 151).

(4) "Coast Guard" means the organization established and continued under section 1 of title 14.

(5) "commercial service" includes any type of trade or business involving the transportation of goods or individuals, except service performed by a combatant vessel.

(6) "consular officer" means an officer or employee of the United States Government designated under regulations to grant visas.

(7) "crude oil" means a liquid hydrocarbon mixture occurring naturally in the earth, whether or not treated to render it suitable for transportation, and includes crude oil from which certain distillate fractions may have been removed, and crude oil to which certain distillate fractions may have been added.

(8) "crude oil tanker" means a tanker engaged in the trade of carrying crude oil.

(9) "discharge", when referring to a substance discharged from a vessel, includes spilling, leaking, pumping, pouring, emitting, emptying, or dumping, however caused.

(10) "documented vessel" means a vessel for which a certificate of documentation has been issued under chapter 121 of this title.

(11) "fisheries" includes planting, cultivating, catching, taking, or harvesting fish, shellfish, marine animals, pearls, shells, or marine vegetation at a place in the fishery conservation zone established by section 101 of the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1811).

(12) "foreign vessel" means a vessel of foreign registry or operated under the authority of a country except the United States.

(13) "freight vessel" means a motor vessel of more than 15 gross tons that carries freight for hire, except an oceanographic research vessel or an offshore supply vessel.

(14) "hazardous material" means a liquid material or substance that is—

(A) flammable or combustible;

(B) designated a hazardous substance under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321); or

(C) designated a hazardous material under section 104 of the Hazardous Material Transportation Act (49 U.S.C. 1803);

(15) "marine environment" means—

(A) the navigable waters of the United States and the land and resources in and under those waters;

(B) the waters and fishery resources of an area over which the United States asserts exclusive fishery management authority;

(C) the seabed and subsoil of the outer Continental Shelf of the United States, the resources of the Shelf, and the waters superjacent to the Shelf; and

(D) the recreational, economic, and scenic values of the waters and resources referred to in subclauses (A)-(C) of this clause.

(16) "motor vessel" means a vessel propelled by machinery other than steam.

(17) "nautical school vessel" means a vessel operated by or in connection with a nautical school.

(18) "oceanographic research vessel" means a vessel that the Secretary finds is being employed only in instruction in oceanography or limnology, or both, or only in oceanographic or limnological research, including those studies about the sea such as seismic, gravity meter, and magnetic exploration and other marine geophysical or geological surveys, atmospheric research, and biological research.

(19) "offshore supply vessel" means a motor vessel of more than 15 gross tons but less than 500 gross tons that regularly carries goods, supplies, or equipment in support of exploration, exploitation, or production of offshore mineral or energy resources and is not a small passenger vessel.

(20) "oil" includes oil of any type or in any form, including petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes except dredged spoil.

(21) "passenger"—

(A) on a passenger vessel, means an individual carried on the vessel except—

(i) the master; or

(ii) a crewmember.

(B) on a small passenger vessel, means an individual carried on the vessel except—

(i) the owner or representative of the owner;

(ii) the master or a crewmember engaged in the business of the vessel who has not contributed consideration for carriage and who is paid for services;

(iii) an employee of the owner of the vessel engaged in the business of the owner, except when the vessel is operating under a demise charter;

(iv) an employee of the demise charterer of the vessel engaged in the business of the demise charterer;

(v) a guest on board a vessel that is being operated only for pleasure, or a guest on board a sailing school vessel, who has not contributed consideration for carriage on board;

(vi) an individual on board a towing vessel of at least 50 gross tons who has not contributed consideration for carriage on board; or

(vii) a sailing school instructor or sailing school student.

(C) on an offshore supply vessel, means an individual carried on the vessel except—

(i) the owner;

(ii) a representative of the owner;

(iii) the master;

(iv) a crewmember engaged in the business of the vessel who has not contributed consideration for carriage on board and who is paid for services on board;

(v) an employee of the owner, or of a subcontractor to the owner, engaged in the business of the owner;

(vi) a charterer of the vessel;

(vii) a person with the same relationship to a charterer as a person in subclause (ii) or (v) of this subclause has to an owner;

(viii) a person employed in a phase of exploration, exploitation, or production of offshore mineral or energy resources served by the vessel; or

(ix) a guest who has not contributed consideration for carriage on board.

(D) on an uninspected passenger vessel, means an individual carried on the vessel except—

(i) the owner or representative of the owner;

(ii) the managing operator;

(iii) a crewmember engaged in the business of the vessel who has not contributed consideration for carriage on board and who is paid for services on board; or

(iv) a guest on board a vessel that is being operated only for pleasure who has not contributed consideration for carriage on board.

(22) "passenger vessel" means a vessel of at least 100 gross tons carrying at least one passenger for hire.

(23) "product carrier" means a tanker engaged in the trade of carrying oil except crude oil.

(24) "public vessel" means a vessel that—

(A) is owned, or demise chartered, and operated by the United States Government or a government of a foreign country; and

(B) is not engaged in commercial service.

(25) "recreational vessel" means a vessel—

(A) being manufactured or operated primarily for pleasure; or

(B) leased, rented, or chartered to another for the latter's pleasure.

(26) "recreational vessel manufacturer" means a person engaged in the manufacturing, construction, assembly, or importation of recreational vessels, components, or associated equipment.

(27) "sailing instruction" means teaching, research, and practical experience in operating vessels propelled primarily by sail and may include any subject related to that operation and to the sea, including seamanship, navigation, oceanography, other nautical and marine sciences, and maritime history and literature.

(28) "sailing school instructor" means an individual who is on board a sailing school vessel to provide sailing instruction, but does not include an operator or crewmember who is among those required to be on board the vessel to meet a requirement established under part F of this subtitle.

(29) "sailing school student" means an individual who is on board a sailing school vessel to receive sailing instruction.

(30) "sailing school vessel" means a vessel—

(A) that is less than 500 gross tons;

(B) carrying at least 6 individuals who are sailing school instructors or sailing school students;

(C) principally equipped for propulsion by sail, even if the vessel has an auxiliary means of propulsion; and

(D) owned or demise chartered, and operated by an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) and exempt from tax under section 501(a) of that Code, or by a State or political subdivision of a State, during times that the vessel is operated by the organization, State, or political subdivision only for sailing instruction.

(31) "scientific personnel" means individuals on board an oceanographic research vessel only to engage in scientific research, or to instruct or receive instruction in oceanography or limnology.

(32) "seagoing barge" means a non-self-propelled vessel of at least 100 gross tons making voyages beyond the Boundary Line.

(33) "seagoing motor vessel" means a motor vessel of at least 300 gross tons making voyages beyond the Boundary Line.

(34) "Secretary" means the head of the department in which the Coast Guard is operating.

(35) "small passenger vessel" means a vessel of less than 100 gross tons carrying more than 6 passengers (as defined in clause (21) (B) and (C) of this section).

(36) "State" means a State of the United States, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States.

(37) "steam vessel" means a vessel propelled in whole or in part by steam, except a recreational vessel of not more than 40 feet in length.

(38) "tanker" means a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces.

(39) "tank vessel" means a vessel that is constructed or adapted to carry, or that carries, oil or hazardous material in bulk as cargo or cargo residue, and that—

(A) is a vessel of the United States;

(B) operates on the navigable waters of the United States; or

(C) transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States.

(40) "towing vessel" means a commercial vessel engaged in or intending to engage in the service of pulling, pushing, or hauling along side, or any combination of pulling, pushing, or hauling along side.

(41) "undocumented" means not having and not required to have a document issued under chapter 121 of this title.

(42) "uninspected passenger vessel" means an uninspected vessel carrying not more than 6 passengers.

(43) "uninspected vessel" means a vessel not subject to inspection under section 3301 of this title that is not a recreational vessel.

(44) "United States", when used in a geographic sense, means the States of the United States, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States.

(45) "vessel" has the same meaning given that term in section 3 of title 1.

(46) "vessel of the United States" means a vessel documented or numbered under the laws of the United States.

§ 2102. Limited definitions

In chapters 43 and 123 of this title and part I of this subtitle—

(1) "eligible State" means a State that has a State recreational boating safety and facilities improvement program accepted by the Secretary.

(2) "State" and "United States", in addition to their meanings under section 2101 (36) and (44) of this title, include the Trust Territory of the Pacific Islands.

(3) "State recreational boating facilities improvement program"—

(A) means a program to develop or improve public facilities that establish or add to public access to the waters of the United States to improve their suitability for recreational boating, including ancillary facilities necessary to ensure the safe use of those facilities; and

(B) includes acquiring title or an interest in riparian or submerged land, and the capital improvement of riparian or submerged land, to increase public access to the waters of the United States.

(4) "State recreational boating safety and facilities improvement program" means a State recreational boating safety program, or a State recreational boating facilities improvement program, or both.

(5) "State recreational boating safety program" means education, assistance, and enforcement activities conducted for marine casualty prevention, reduction, and reporting for recreational boating.

§ 2103. Superintendence of the merchant marine

The Secretary has general superintendence over the merchant marine of the United States and of merchant marine personnel insofar as the enforcement of this subtitle is concerned and insofar as those vessels and personnel are not subject, under other law, to the supervision of another official of the United States Government. In the interests of marine safety and seamen's welfare, the Secretary shall enforce this subtitle and shall carry out correctly and uniformly administer this subtitle and regulations prescribed under this subtitle.

§ 2104. Delegation

(a) The Secretary may delegate the duties and powers conferred by this subtitle to any officer, employee, or member of the Coast Guard, and may provide for the subdelegation of those duties and powers.

(b) When this subtitle authorizes an officer or employee of the Customs Service to act in place of a Coast Guard official, the Secretary may designate that officer or employee subject to the approval of the Secretary of the Treasury.

§ 2105. Report

The Secretary shall provide for the investigation of the operation of this subtitle and of all laws related to marine safety, and shall require that a report be made to the Secretary annually about those matters that may require improvement or amendment.

§ 2106. Liability in rem

When a vessel is made liable in rem under this subtitle, the vessel may be libeled and proceeded against in a district court of the United States in which the vessel is found.

§ 2107. Civil penalty procedures

(a) After notice and an opportunity for a hearing, a person found by the Secretary to have violated this subtitle or a regulation prescribed under this subtitle for which a civil penalty is provided, is liable to the United States Government for the civil penalty provided. The amount of the civil penalty shall be assessed by the Secretary by written notice. In determining the amount of the penalty, the Secretary shall consider the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other matters that justice requires.

(b) The Secretary may compromise, modify, or remit, with or without consideration, a civil penalty under this subtitle until the assessment is referred to the Attorney General.

(c) If a person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General for collection in an appropriate district court of the United States.

§ 2108. Refund of penalties

The Secretary may refund or remit a civil penalty collected under this subtitle if—

(1) application has been made for refund or remission of the penalty within one year from the date of payment; and

(2) the Secretary finds that the penalty was unlawfully, improperly, or excessively imposed.

§ 2109. Public vessels

This subtitle does not apply to a public vessel of the United States. However, this subtitle does apply to a vessel (except a Coast Guard or a Saint Lawrence Seaway Development Corporation vessel) owned or operated by the Department of Transportation or by any corporation organized or controlled by the Department.

§ 2110. Fees prohibited

Fees may not be charged or collected by the Secretary for services provided for in this subtitle related to the engagement and discharge of seamen, the inspection and examination of vessels, the licensing of masters, mates, pilots, and engineers, and the measurement or documentation of vessels, except when specifically provided for in this subtitle.

§ 2111. Pay for overtime services

(a) The Secretary may prescribe a reasonable rate of extra pay for overtime services of civilian officers and employees of the Coast Guard required to remain on duty between 5 p.m. and 8 a.m., or on Sundays or holidays, to perform services related to—

(1) the inspection of vessels or their equipment;

(2) the engagement and discharge of crews of vessels;

(3) the measurement of vessels; and

(4) the documentation of vessels.

(b) Except for Sundays and holidays, the overtime rate provided under subsection (a) of this section is one-half day's additional pay for each 2 hours of overtime (or part of 2 hours of at least one hour). The total extra pay may be not more than 2 and one-half days' pay for any one period from 5 p.m. to 8 a.m.

(c) The overtime rate provided under subsection (a) of this section for Sundays and holidays is 2 additional days' pay.

(d) The owner, charterer, managing operator, agent, master, or individual in charge of the vessel shall pay the amount of the overtime pay provided under this section to the official designated by regulation. The official shall deposit the amount paid to the Treasury as miscellaneous receipts. Payment to the officer or employee entitled to the pay shall be made from the annual appropriations for salaries and expenses of the Coast Guard.

(e) The overtime pay provided under this section shall be paid if the authorized officers and employees have been ordered to report for duty and have reported, even if services requested were not performed.

§ 2112. Authority to change working hours

In a port at which the customary working hours begin before 8 a.m. or end after 5 p.m., the Secretary may regulate the working hours of the officers and employees referred to in section 2111 of this title so that those hours conform to the prevailing working hours of the port. However—

(1) the total period for which overtime pay may be required under section 2111 of this title may not be more than 15 hours between any 2 periods of ordinary working hours on other than Sundays and holidays;

(2) the length of the working day for the officers and employees involved may not be changed; and

(3) the rate of overtime pay may not be changed.

§ 2113. Authority to exempt certain vessels

If the Secretary decides that the application of a provision of part B or F of this subtitle is not necessary in performing the mission of a vessel engaged in excursions or an oceanographic research vessel, the Secretary by regulation may—

(1) for an excursion vessel, issue a special permit specifying the conditions of operation and equipment; and

(2) exempt the oceanographic research vessel from that provision under conditions the Secretary may specify.

CHAPTER 23—OPERATION OF VESSELS GENERALLY

Sec.
2301. Application.
2302. Penalties for negligent operations.
2303. Duties related to marine casualty assistance.
2304. Duty to provide assistance at sea.
2305. Injunctions.

§ 2301. Application

This chapter applies to a vessel operated on waters subject to the jurisdiction of the United States and, for a vessel owned in the United States, on the high seas.

§ 2302. Penalties for negligent operations

(a) A person operating a vessel in a negligent manner that endangers the life, limb, or property of a person is liable to the United States Government for a civil penalty of not more than $1,000.

(b) A person operating a vessel in a grossly negligent manner that endangers the life, limb, or property of a person shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(c) For a penalty imposed under this section, the vessel also is liable in rem unless the vessel is—

(1) owned by a State or a political subdivision of a State;

(2) operated principally for governmental purposes; and

(3) identified clearly as a vessel of that State or subdivision.

§ 2303. Duties related to marine casualty assistance and information

(a) The master or individual in charge of a vessel involved in a marine casualty shall—

(1) render necessary assistance to each individual affected to save that affected individual from danger caused by the marine casualty, so far as the master or individual in charge can do so without serious danger to the master's or individual's vessel or to individuals on board; and

(2) give the master's or individual's name and address and identification of the vessel to the master or individual in charge of any other vessel involved in the casualty, to any individual injured, and to the owner of any property damaged.

(b) An individual violating this section or a regulation prescribed under this section shall be fined not more than $1,000 or imprisoned for not more than 2 years. The vessel also is liable in rem to the United States Government for the fine.

(c) An individual complying with subsection (a) of this section or gratuitously and in good faith rendering assistance at the scene of a marine casualty without objection by an individual assisted, is not liable for damages as a result of rendering assistance or for an act or omission in providing or arranging salvage, towage, medical treatment, or other assistance when the individual acts as an ordinary, reasonable, and prudent individual would have acted under the circumstances.

§ 2304. Duty to provide assistance at sea

(a) A master or individual in charge of a vessel shall render assistance to any individual found at sea in danger of being lost, so far as the master or individual in charge can do so without serious danger to the master's or individual's vessel or individuals on board.

(b) A master or individual violating this section shall be fined not more than $1,000, imprisoned for not more than 2 years, or both.

§ 2305. Injunctions

(a) The district courts of the United States have jurisdiction to enjoin the negligent operation of vessels prohibited by this chapter on the petition of the Attorney General for the United States Government.

(b) When practicable, the Secretary shall—

(1) give notice to any person against whom an action for injunctive relief is considered under this section an opportunity to present that person's views; and

(2) except for a knowing and willful violation, give the person a reasonable opportunity to achieve compliance.

(c) The failure to give notice and opportunity to present views under subsection (b) of this section does not preclude the court from granting appropriate relief.

PART B—INSPECTION AND REGULATION OF VESSELS

CHAPTER 31—GENERAL

Sec.
3101. Authority to suspend inspection.

§ 3101. Authority to suspend inspection

When the President decides that the needs of foreign commerce require, the President may suspend a provision of this part for a foreign-built vessel registered as a vessel of the United States on conditions the President may specify.

CHAPTER 33—INSPECTION GENERALLY

Sec.
3301. Vessels subject to inspection.
3302. Exemptions.
3303. Reciprocity for foreign vessels.
3304. Carrying individuals in addition to crew.
3305. Scope and standards of inspection.
3306. Regulations.
3307. Frequency of inspection.
3308. Examinations.
3309. Certificate of inspection.
3310. Records of certification.
3311. Certificate of inspection required.
3312. Display of certificate of inspection.
3313. Compliance with certificate of inspection.
3314. Expiration of certificate of inspection.
3315. Disclosure of defects and protection of informants.
3316. United States classification societies.
3317. Fees.
3318. Penalties.

§ 3301. Vessels subject to inspection

The following categories of vessels are subject to inspection under this part:

(1) freight vessels.
(2) nautical school vessels.
(3) offshore supply vessels.
(4) passenger vessels.
(5) sailing school vessels.
(6) seagoing barges.
(7) seagoing motor vessels.
(8) small passenger vessels.
(9) steam vessels.
(10) tank vessels.

§ 3302. Exemptions

(a) A vessel is not excluded from one category only because the vessel is—

(1) included in another category of section 3301 of this title; or

(2) excluded by this section from another category of section 3301 of this title.

(b) A motor vessel engaged in fishing as a regular business, including oystering, clamming, crabbing, or the kelp or sponge industry, is exempt from section 3301 (1), (4), and (7) of this title.

(c)(1) Before January 1, 1988, a motor vessel is exempt from section 3301 (1), (4), and (7) of this title if the vessel is not more than 500 gross tons and—

(A) is a cannery tender or a fishing tender in the salmon or crab fisheries of Alaska, Oregon, and Washington; and

(B) only carries cargo to or from vessels in those fisheries or a facility used in processing or assembling fishery products, or transports cannery or fishing personnel to or from operating locations.

(2) Before January 1, 1988, a vessel is exempt from section 3301 (1), (4), (6), and (7) of this title if the vessel is not more than 5,000 gross tons and is used only in processing and assembling fishery products in the fisheries of Alaska, Oregon, and Washington.

(d)(1) A motor vessel of less than 150 gross tons, constructed before August 23, 1958, is not subject to inspection under section 3301(1) of this title if the vessel is owned or demise chartered to a cooperative or association that only transports cargo owned by at least one of its members on a nonprofit basis between places within the waters of—

(A) southeastern Alaska shoreward of the Boundary Line; or

(B) southeastern Alaska shoreward of the Boundary Line and—

(i) Prince Rupert, British Columbia; or

(ii) waters of Washington shoreward of the Boundary Line, via sheltered waters, as defined in article I of the treaty dated December 9, 1933, between the United States and Canada defining certain waters as sheltered waters.

(2) The transportation authorized under this subsection is limited to and from places not receiving annual weekly transportation service from any part of the United States by an established water common carrier. However, the limitation does not apply to transporting cargo of a character not accepted for transportation by that carrier.

(e) A vessel laid up, dismantled, or out of commission is exempt from inspection.

(f) Section 3301 (4) and (8) of this title does not apply to an oceanographic research vessel because it is carrying scientific personnel.

(g)(1) Except when compliance with major structural or major equipment requirements is necessary to remove an especially hazardous condition, an offshore supply vessel is not subject to regulations or standards for those requirements if the vessel—

(A) was operating as an offshore supply vessel before January 2, 1979; or

(B) was contracted for before January 2, 1979, and entered into service as an offshore supply vessel before October 6, 1980.

(2) After December 31, 1988, this subsection does not apply to an offshore supply vessel that is at least 20 years of age.

(h) An offshore supply vessel operating on January 1, 1979, under a certificate of inspection issued by the Secretary, is subject to an inspection standard or requirement only if the standard or requirement could have been prescribed for the vessel under authority existing under law on October 5, 1980.

(i)(1) The Secretary may issue a permit exempting a vessel from any part of the requirements of this part for vessels transporting cargo, including bulk fuel, from one place in Alaska to another place in Alaska only if the vessel—

(A) is not more than 300 gross tons;

(B) is in a condition that does not present an immediate threat to the safety of life or the environment; and

(C) was operating in the waters off Alaska as of June 1, 1976, or the vessel is a replacement for a vessel that was operating in the waters off Alaska as of June 1, 1976, if the vessel being replaced is no longer in service.

(2) Except in a situation declared to be an emergency by the Secretary, a vessel operating under a permit may not transport cargo to or from a place if the cargo could be transported by another commercial vessel that is reasonably available and that does not require exemptions to operate legally or if the cargo could be readily transported by overland routes.

(3) A permit may be issued for a specific voyage or for not more than one year. The permit may impose specific requirements about the amount or type of cargo to be carried, manning, the areas or specific routes over which the vessel may operate, or other similar matters. The duration of the permit and restrictions contained in the permit shall be at the sole discretion of the Secretary.

(4) A designated Coast Guard official who has reason to believe that a vessel issued a permit is in a condition or is operated in a manner that creates an immediate threat to the safety of life or the environment or is operated in a manner that is inconsistent with the terms of the permit, may direct the master or individual in charge to take immediate and reasonable steps to safeguard life and the environment, including directing the vessel to a port or other refuge.

(5) If a vessel issued a permit creates an immediate threat to the safety of life or the environment, or is operated in a manner inconsistent with the terms of the permit or the requirements of paragraph (2) of this subsection, the permit may be revoked. The owner, charter, managing operator, agent, master, or individual in charge of a vessel issued a permit, that willfully permits the vessel to be operated, or operates, the vessel in a manner inconsistent with the terms of the permit, is liable to the United States Government for a civil penalty of not more than $1,000.

(j) Notwithstanding another provision of this chapter, the Secretary is not required to inspect or prescribe regulations for a nautical school vessel of not more than 15 gross tons—

(1) when used in connection with a course of instruction dealing with any aspect of maritime education or study; and

(2) operated by—

(A) the United States Merchant Marine Academy; or

(B) a State maritime academy assisted under section 1304 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1295(c)).

§ 3303. Reciprocity for foreign vessels

(a) Except as provided in chapter 37 of this title, a foreign vessel of a country having inspection laws and standards similar to those of the United States and that has an unexpired certificate of inspection issued by proper authority of its respective country, is subject only to an inspection to ensure that the condition of the vessel's propulsion equipment and lifesaving equipment are as stated in its current certificate of inspection. A foreign country is considered to have inspection laws and standards similar to those of the United States when it is a party to an International Convention for Safety of Life at Sea to which the United States Government is currently a

party. A foreign certificate of inspection may be accepted as evidence of lawful inspection only when presented by a vessel of a country that has by its laws accorded to vessels of the United States visiting that country the same privileges accorded to vessels of that country visiting the United States.

(b) The Secretary shall collect and pay to the Treasury the same fees for the inspection of foreign vessels carrying passengers from the United States that a foreign country charges vessels of the United States trading to the ports of that country. The Secretary may waive at any time the collection of the fees on notice of the proper authorities of any country concerned that the collection of fees for the inspection of vessels of the United States has been discontinued.

§ 3304. Carrying individuals in addition to crew

(a) A documented vessel carrying cargo that carries not more than 12 individuals in addition to the crew on international voyages, or not more than 16 individuals in addition to the crew on other voyages, is not subject to inspection as a passenger vessel or a small passenger vessel.

(b) Before an individual in addition to the crew is carried on a vessel as permitted by this section, the owner, charterer, managing operator, agent, master, or individual in charge of the vessel first shall notify the individual of the presence on board of dangerous articles as defined by law, and of other conditions or circumstances that would constitute a risk of safety to the individual on board.

(c) The privilege authorized by this section applies to a vessel of a foreign country that affords a similar privilege to vessels of the United States in trades not restricted to vessels under its own flag.

§ 3305. Scope and standards of inspection

(a) The inspection process shall ensure that a vessel subject to inspection—

(1) is of a structure suitable for the service in which it is to be employed;

(2) is equipped with proper appliances for lifesaving, fire prevention, and firefighting;

(3) has suitable accommodations for the crew, sailing school instructors, and sailing school students, and for passengers on the vessel if authorized to carry passengers;

(4) is in a condition to be operated with safety to life and property; and

(5) complies with applicable marine safety laws and regulations.

(b) If an inspection, or examination under section 3308 of this title, reveals that a life preserver, life-saving device, or firehose is defective and incapable of being repaired, the owner or master shall destroy the life preserver or firehose in the presence of the official conducting the inspection or examination.

(c) A nautical school vessel operated by a civilian nautical school shall be inspected like a small passenger vessel or a passenger vessel, depending on its tonnage.

§ 3306. Regulations

(a) To carry out this part and to secure the safety of individuals and property on board vessels subject to inspection, the Secretary shall prescribe necessary regulations to ensure the proper execution of, and to carry out, this part in the most effective manner for—

(1) the design, construction, alteration, repair, and operation of those vessels, including superstructures, hulls, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, boilers, unfired pressure vessels, piping, electric installations, and accommodations for passengers and crew, sailing school instructors, and sailing school students;

(2) lifesaving equipment and its use;

(3) firefighting equipment, its use, and precautionary measures to guard against fire;

(4) inspections and tests related to clauses (1)–(3) of this subsection; and

(5) the use of vessel stores and other supplies of a dangerous nature.

(b) Equipment subject to regulation under this section may not be used on any vessel without prior approval as prescribed by regulation.

(c) In prescribing regulations for sailing school vessels, the Secretary shall consult with representatives of the private sector having experience in the operation of vessels likely to be certificated as sailing school vessels. The regulations shall—

(1) reflect the specialized nature of sailing school vessel operations, and the character, design, and construction of vessels operating as sailing school vessels; and

(2) include requirements for notice to sailing school instructors and sailing school students about the specialized nature of sailing school vessels and applicable safety regulations.

(d) In prescribing regulations for nautical school vessels operated by the United States Merchant Marine Academy or by a State maritime academy (as defined in section 1302(3) of the Merchant Marine Act, 1936 (46 App. U.S.C. 1295a(3))), the Secretary shall consider the function, purpose, and operation of the vessels, their routes, and the number of individuals who may be carried on the vessels.

(e) When the Secretary finds it in the public interest, the Secretary may suspend or grant exemptions from the requirements of a regulation prescribed under this section related to lifesaving and firefighting equipment, muster lists, ground tackle and hawsers, and bilge systems.

(f) In prescribing regulations for offshore supply vessels, the Secretary shall consider the characteristics, methods of operation, and the nature of the service of offshore supply vessels.

§ 3307. Frequency of inspection

Each vessel subject to inspection under this part shall undergo an initial inspection for certification before being put into service. After being put into service—

(1) each passenger vessel and nautical school vessel shall be inspected at least once a year;

(2) each small passenger vessel, freight vessel or offshore supply vessel of less than 100 gross tons, and sailing school vessel shall be inspected at least once every 3 years; and

(3) any other vessel shall be inspected at least once every 2 years.

§ 3308. Examinations

In addition to inspections required by section 3307 of this title, the Secretary shall examine—

(1) each vessel subject to inspection at proper times to ensure compliance with law and regulations; and

(2) crewmember accommodations on each vessel subject to inspection at least once a month or when the vessel enters United States ports to ensure that the accommodations are—

(A) of the size required by law and regulations;

(B) properly ventilated and in a clean and sanitary condition; and

(C) equipped with proper plumbing and mechanical appliances required by law and regulations, and the appliances are in good working condition.

§ 3309. Certificate of inspection

(a) When an inspection under section 3307 of this title has been made and a vessel has been found to be in compliance with the requirements of law and regulations, a certificate of inspection, in a form prescribed by the Secretary, shall be issued to the vessel.

(b) The Secretary may issue a temporary certificate of inspection in place of a regular certificate of inspection issued under subsection (a) of this section.

§ 3310. Records of certification

The Secretary shall keep records of certificates of inspection of vessels and of all acts in the examination and inspection of vessels, whether of approval or disapproval.

§ 3311. Certificate of inspection required

A vessel subject to inspection under this part may not be operated without having on board a valid certificate of inspection issued under section 3309 of this title.

§ 3312. Display of certificate of inspection

The certificate of inspection issued to a vessel under section 3309 of this title shall be displayed, suitably framed, in a conspicuous place on the vessel. When it is not practicable to so display the certificate, it shall be carried in the manner prescribed by regulation.

§ 3313. Compliance with certificate of inspection

(a) During the term of a vessel's certificate of inspection, the vessel must be in compliance with its conditions, unless relieved by a suspension or an exemption granted under section 3306(e) of this title.

(b) When a vessel is not in compliance with its certificate or fails to meet a standard prescribed by this part or a regulation prescribed under this part—

(1) the owner, charterer, managing operator, agent, master, or individual in charge shall be ordered in writing to correct the noted deficiencies promptly;

(2) the Secretary may permit any repairs to be made at a place most convenient to the owner, charterer, or managing operator when the Secretary decides the repairs can be made with safety to those on board and the vessel;

(3) the vessel may be required to cease operating at once; and

(4) if necessary, the certificate shall be suspended or revoked.

(c) The vessel's certificate of inspection shall be revoked if a condition unsafe to life that is ordered to be corrected under this section is not corrected at once.

(d) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel whose certificate has been suspended or revoked shall be given written notice immediately of the suspension or revocation. The owner or master may appeal to the Secretary the suspension or revocation within 30 days of receiving the notice, as provided by regulations prescribed by the Secretary.

§ 3314. Expiration of certificate of inspection

(a) If the certificate of inspection of a vessel expires when the vessel is on a foreign voyage, the vessel may complete the voyage to a port of the United States within 30 days of the expiration of the certificate

without incurring the penalties for operating without a certificate of inspection.

(b) If the certificate of inspection would expire within 15 days of sailing on a foreign voyage from a United States port, the vessel shall secure a new certificate of inspection before sailing, unless the voyage is scheduled to be completed prior to the expiration date of the certificate. If a voyage scheduled to be completed in that time is not so completed, the applicable penalties may be enforced unless the failure to meet the schedule was beyond the control of the owner, charterer, managing operator, agent, master, or individual in charge of the vessel.

(c) When the certificate of inspection of a foreign vessel carrying passengers, operated on a regularly established line, expires at sea after leaving the country to which it belongs or when the vessel is in the United States, the Secretary may permit the vessel to sail on its regular route without further inspection than would have been required had the certificate not expired. This permission applies only when the vessel will be regularly inspected and issued a certificate before the vessel's next return to the United States.

§ 3315. Disclosure of defects and protection of informants

(a) Each individual licensed under part E of this subtitle shall assist in the inspection or examination under this part of the vessel on which the individual is serving, and shall point out defects and imperfections known to the individual in matters subject to regulations and inspection. The individual also shall make known to officials designated to enforce this part, at the earliest opportunity, any marine casualty producing serious injury to the vessel, its equipment, or individuals on the vessel.

(b) An official may not disclose the name of an individual providing information under this section, or the source of the information, to a person except a person authorized by the Secretary. An official violating this subsection is liable to disciplinary action under applicable law.

§ 3316. United States classification societies

(a) In carrying out this part, the Secretary may rely on reports, documents, and certificates issued by the American Bureau of Shipping or a similar United States classification society, or an agent of the Bureau or society.

(b) Each department, agency, and instrumentality of the United States Government shall recognize the Bureau as its agent in classifying vessels owned by the Government and in matters related to classification, as long as the Bureau is maintained as an organization having no capital stock and paying no dividends. The Secretary and the Secretary of Transportation each shall appoint one representative (except when the Secretary is the Secretary of Transportation, in which case the Secretary shall appoint both representatives) who shall represent the Government on the executive committee of the Bureau. The Bureau shall agree that the representatives shall be accepted by it as active members of the committee. The representatives shall serve without compensation, except for necessary traveling expenses.

(c)(1) To the maximum extent practicable, the Secretary may delegate to the Bureau or a similar United States classification society, or an agent of the Bureau or society, the inspection or examination, in the United States or in a foreign country, of a vessel documented or to be documented as a vessel of the United States. The Bureau, society, or agent may issue the certificate of inspection required by this part and other certificates essential to documentation.

(2) When an inspection or examination has been delegated under this subsection, the Secretary's delegate—

(A) shall maintain in the United States complete files of all information derived from or necessarily connected with the inspection or examination for at least 2 years after the vessel ceases to be certified; and

(B) shall permit access to those files at all reasonable times to any officer, employee, or member of the Coast Guard designated—

(i) as a marine inspector and serving in a position as a marine inspector; or

(ii) in writing by the Secretary to have access to those files.

(d) The Secretary also may make an agreement with or use the Bureau or a similar United States classification society, or an agent of the Bureau or society, for reviewing and approving plans required for issuing a certificate of inspection.

§ 3317. Fees

(a) The Secretary may prescribe by regulation fees for inspecting or examining a small passenger vessel or a sailing school vessel.

(b) When an inspection or examination under this chapter of a documented vessel is conducted at a foreign port or place at the request of the owner or managing operator of the vessel, the owner or operator shall reimburse the Secretary for the travel and subsistence expenses incurred by the personnel assigned to perform the inspection or examination. Amounts received as reimbursement for these expenses shall be credited to the appropriation for operating expenses of the Coast Guard.

§ 3318. Penalties

(a) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this part or a regulation prescribed under this part, and a person violating a regulation that applies to a small passenger vessel, freight vessel of less than 100 gross tons, or sailing school vessel, are liable to the United States Government for a civil penalty of $1,000, except that when the violation involves operation of a barge, the penalty is $500. The vessel also is liable in rem for the penalty.

(b) A person that knowingly manufactures, sells, offers for sale, or possesses with intent to sell, any equipment subject to this part, and the equipment is so defective as to be insufficient to accomplish the purpose for which it is intended, shall be fined not more than $10,000, imprisoned for not more than 5 years, or both.

(c) A person that employs a means or device whereby a boiler may be subjected to a pressure greater than allowed by the terms of the vessel's certificate of inspection shall be fined not more than $2,000, imprisoned for not more than 5 years, or both.

(d) A person that deranges or hinders the operation of any machinery or device employed on a vessel to denote the state of steam or water in any boiler or to give warning of approaching danger, or permits the water level of any boiler when in operation of a vessel to fall below its prescribed low-water line, shall be fined not more than $2,000, imprisoned for not more than 5 years, or both.

(e) A person that alters, defaces, obliterates, removes, or destroys any plans or specifications required by and approved under a regulation prescribed under section 3306 of this title, with intent to deceive or impede any official of the United States in carrying out that official's duties, shall be fined not more than $2,000, imprisoned for not more than 2 years, or both.

(f) A person shall be fined not less than $1,000 but not more then $5,000, and imprisoned for not less than 2 years but not more then 5 years, if the person—

(1) forges or counterfeits with intent to make it appear genuine any mark or stamp prescribed for material to be tested and approved under section 3306 of this title or a regulation prescribed under section 3306;

(2) knowingly uses, affixes, or causes to be used or affixed, any such forged or counterfeited mark or stamp to or on material of any description;

(3) with fraudulent intent, possesses any such mark, stamp, or other device knowing it to be forged or counterfeited; or

(4) with fraudulent intent, marks or causes to be marked with the trademark or name of another, material required to be tested and approved under section 3306 of this title or a regulation prescribed under section 3306.

(g) A person shall be fined not more than $10,000, imprisoned for not more than one year, or both, if the person—

(1) interferes with the inspection of a nautical school vessel;

(2) violates a regulation prescribed for a nautical school vessel;

(3) is an owner of a nautical school vessel operated in violation of this part; or

(4) is an officer or member of the board of directors of a school, organization, association, partnership, or corporation owning a nautical school vessel operated in violation of a regulation prescribed for a nautical school vessel.

(h) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel that fails to give the notice required by section 3304(b) of this title is liable to the United States Government for a civil penalty of not more than $500. The vessel also is liable in rem for the penalty.

CHAPTER 35—CARRIAGE OF PASSENGERS

Sec.
3501. Number of passengers.
3502. List or count of passengers.
3503. Fire-retardant materials.
3504. Notification to passengers.
3505. Prevention of departure.
3506. Copies of laws.

§ 3501. Number of passengers

(a) Each certificate of inspection issued to a vessel carrying passengers (except a ferry), shall include a statement on the number of passengers that the vessel is permitted to carry.

(b) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel is liable to a person suing them for carrying more passengers than the number of passengers permitted by the certificate of inspection in an amount equal to—

(1) passage money; and

(2) $100 for each passenger in excess of the number of passengers permitted.

(c) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel that knowingly violates subsection (b) of this section also shall be fined not more than $100, imprisoned for not more than 30 days, or both.

(d) The vessel also is liable in rem for a penalty under this section.

(e) An offshore supply vessel may not carry passengers except in an emergency.

§ 3502. List or count of passengers

(a) The owner, charterer, managing operator, master, or individual in charge of the following categories of vessels carrying passengers shall keep a correct list of passengers received and delivered from day to day:

(1) vessels arriving from foreign ports (except at United States Great Lakes ports from Canadian Great Lakes ports).

(2) seagoing vessels in the coastwise trade.

(3) passenger vessels making voyages of more than 300 miles on the Great Lakes except from a Canadian to a United States port.

(b) The master of a vessel carrying passengers (except a vessel listed in subsection (a) of this section) shall keep a correct count of all passengers received and delivered.

(c) Lists and counts required under this section shall be open to the inspection of designated officials of the Coast Guard and the Customs Service at all times. The total number of passengers shall be provided to the Coast Guard when requested.

(d) This section applies to a foreign vessel arriving at a United States port.

(e) The owner, charterer, managing operator, master, or individual in charge of a passenger vessel failing to make a list or count of passengers as required by this section is liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

§ 3503. Fire-retardant materials

A passenger vessel of the United States having berth or stateroom accommodations for at least 50 passengers shall be granted a certificate of inspection only if the vessel is constructed of fire-retardant materials. Before November 1, 1988, this section does not apply to a vessel operating only on the inland rivers.

§ 3504. Notification to passengers

(a) A person selling passage on a foreign or domestic passenger vessel having berth or stateroom accommodations for at least 50 passengers and embarking passengers at United States ports for a coastwise or an international voyage shall notify each prospective passenger of the safety standards applicable to the vessel in a manner prescribed by regulation.

(b) All promotional literature or advertising through any medium of communication in the United States offering passage or soliciting passengers for ocean voyages anywhere in the world shall include information similar to the information described in subsection (a) of this section, and shall specify the registry of each vessel named, as a part of the advertisement or description of the voyage. Except for the inclusion of the country of registry of the vessel, this subsection does not apply to voyages by vessels meeting the safety standards described in section 3505 of this title.

(c) A person violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $10,000. If the violation involves the sale of tickets for passage, the owner, charterer, managing operator, agent, master, individual in charge, or any other person involved in each violation also is liable to the Government for a civil penalty of $500 for each ticket sold. The vessel on which passage is sold also is liable in rem for a violation of this section or a regulation prescribed under this section.

§ 3505. Prevention of departure

Notwithstanding section 3303(a) of this title, a foreign or domestic vessel of more than 100 gross tons having berth or stateroom accommodations for at least 50 passengers may not depart from a United States port with passengers who are embarked at that port, if the Secretary finds that the vessel does not comply with the standards stated in the International Convention for the Safety of Life at Sea to which the United States Government is currently a party.

§ 3506. Copies of laws

A master of a passenger vessel shall keep on board a copy of this subtitle, to be provided by the Secretary at reasonable cost. If the master fails to do so, the master is liable to the United States Government for a civil penalty of $200.

§ 3701. Definitions

In this chapter—

(1) "existing", when referring to a type of vessel to which this chapter applies, means a vessel that is not a new vessel.

(2) "major conversion" means a conversion of an existing vessel that substantially changes the dimensions or carrying capacity of the vessel or changes the type of vessel or substantially prolongs its life or that otherwise so changes the vessel that it is essentially a new vessel, as decided by the Secretary.

(3) "new", when referring to a type of vessel to which this chapter applies, means a vessel—

(A) for which the building contract is placed after June 1, 1979;

(B) in the absence of a building contract, the keel of which is laid, or which is at a similar stage of construction, after January 1, 1980;

(C) the delivery of which is after June 1, 1982; or

(D) that has undergone a major conversion under a contract made after June 1, 1979, or construction work that began after January 1, 1980, or was completed after June 1, 1982.

(4) "person" means an individual (even if not a citizen or national of the United States), a corporation, partnership, association, or other entity (even if not organized or existing under the laws of a State), the United States Government, a State or local government, a government of a foreign country, or an entity of one of those governments.

(5) "State", in addition to its meaning under section 2101(36) of this title, includes the Trust Territory of the Pacific Islands.

(6) "United States", in addition to its meaning under section 2101(44) of this title, includes the Trust Territory of the Pacific Islands.

§ 3702. Application

(a) Subject to subsections (b)-(e) of this section, this chapter applies to a tank vessel.

(b) This chapter does not apply to a documented vessel that would be subject to this chapter only because of the transfer of fuel from the fuel supply tanks of the vessel to offshore drilling or production facilities in the oil industry if the vessel is—

(1) not more than 500 gross tons;

(2) not a tanker; and

(3) in the service of oil exploitation.

(c) This chapter does not apply to a cannery tender, fishing tender, or fishing vessel of not more than 500 gross tons, used in the salmon or crab fisheries of Alaska, Oregon, or Washington, when engaged only in the fishing industry.

(d) This chapter does not apply to a vessel of not more than 5,000 gross tons used in processing and assembling fishery products of the fisheries of Alaska, Oregon, and Washington. However, the vessel is subject to regulation by the Secretary when carrying flammable or combustible liquid cargo in bulk.

(e) This chapter does not apply to a foreign vessel on innocent passage on the navigable waters of the United States.

§ 3703. Regulations

(a) The Secretary shall prescribe regulations for the design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels to which this chapter applies, that may be necessary for increased protection against hazards to life and property, for navigation and vessel safety, and for enhanced protection of the marine environment. The Secretary may prescribe different regulations applicable to vessels engaged in the domestic trade, and also may prescribe regulations that exceed standards set internationally. Regulations prescribed by the Secretary under this subsection are in addition to regulations prescribed under other laws that may apply to any of those vessels. Regulations prescribed under this subsection shall include requirements about—

(1) superstructures, hulls, cargo holds or tanks, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, and boilers;

(2) the handling or stowage of cargo, the manner of handling or stowage of cargo, and the machinery and appliances used in the handling or stowage;

(3) equipment and appliances for lifesaving, fire protection, and prevention and mitigation of damage to the marine environment;

(4) the manning of vessels and the duties, qualifications, and training of the officers and crew;

(5) improvements in vessel maneuvering and stopping ability and other features that reduce the possibility of marine casualties;

(6) the reduction of cargo loss if a marine casualty occurs; and

(7) the reduction or elimination of discharges during ballasting, deballasting, tank cleaning, cargo handling, or other such activity.

(b) In prescribing regulations under subsection (a) of this section, the Secretary shall consider the types and grades of cargo permitted to be on board a tank vessel.

(c) In prescribing regulations under subsection (a) of this section, the Secretary shall establish procedures for consulting with, and receiving and considering the views of—

(1) interested departments, agencies, and instrumentalities of the United States Government;

(2) officials of State and local governments;

(3) representatives of port and harbor authorities and associations;

(4) representatives of environmental groups; and

(5) other interested parties knowledgeable or experienced in dealing with problems involving vessel safety, port and waterways safety, and protection of the marine environment.

§ 3704. Coastwise trade vessels

A segregated ballast tank, a crude oil washing system, or an inert gas system, required by this chapter or a regulation prescribed under this chapter, on a vessel entitled to engage in the coastwise trade under section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), shall be installed in the United States (except the trust territories). A vessel failing to comply with this section may not engage in the coastwise trade.

§ 3705. Crude oil tanker minimum standards

(a) A new crude oil tanker of at least 20,000 deadweight tons shall be equipped with—

(1) protectively located segregated ballast tanks;

(2) a crude oil washing system; and

(3) a cargo tank protection system consisting of a fixed deck froth system and a fixed inert gas system.

(b)(1) An existing crude oil tanker of at least 40,000 deadweight tons shall be equipped with—

(A) segregated ballast tanks; or

(B) a crude oil washing system.

(2) Compliance with paragraph (1) of this subsection may be delayed until June 1, 1985, for any tanker of less than 70,000 deadweight tons that has dedicated clean ballast tanks.

(c) An existing crude oil tanker of at least 20,000 deadweight tons but less than 40,000 deadweight tons, and at least 15 years of age, shall be equipped with segregated ballast tanks or a crude oil washing system before January 2, 1986, or the date on which the tanker reaches 15 years of age, whichever is later.

(d) An existing crude oil tanker of at least 20,000 deadweight tons shall be equipped with an inert gas system. However, for a crude oil tanker of less than 40,000 deadweight tons not fitted with high capacity tank washing machines, the Secretary may grant an exemption if the vessel's owner can show clearly that compliance would be unreasonable and impracticable due to the vessel's design characteristics.

(e) A crude oil tanker engaged in transferring oil from an offshore oil exploitation or production facility on the Outer Continental Shelf of the United States shall be equipped with segregated ballast tanks, or may operate with dedicated clean ballast tanks or special ballast arrangements. However, the tanker shall comply with other applicable minimum standards of this section.

§ 3706. Product carrier minimum standards

(a) A new product carrier of at least 30,000 deadweight tons shall be equipped with protectively located segregated ballast tanks.

(b) A new product carrier of at least 20,000 deadweight tons shall be equipped with a cargo tank protection system consisting of a fixed deck froth system and a fixed inert gas system or, if the product carrier carries dedicated products incompatible with the cargo tank protection system, an alternate protection system authorized by the Secretary.

(c) An existing product carrier of at least 40,000 deadweight tons shall be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks.

(d) An existing product carrier of at least 20,000 deadweight tons but less than 40,000 deadweight tons, and at least 15 years of age, shall be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks before January 2, 1986, or the date on which it reaches 15 years of age, whichever is later.

(e) An existing product carrier of at least 40,000 deadweight tons, or an existing product carrier of at least 20,000 deadweight tons but less than 40,000 deadweight tons that is fitted with high-capacity tank washing machines, shall be equipped with an inert gas system.

§ 3707. Tanker minimum standards

(a) A new tanker of at least 10,000 gross tons shall be equipped with—

(1) 2 remote steering gear control systems operable separately from the navigating bridge;

(2) the main steering gear control in the steering gear compartment;

(3) means of communications and rudder angle indicators on the navigating bridge, a remote steering gear control station, and the steering gear compartment;

(4) at least 2 identical and adequate power units for the main steering gear;

(5) an alternative and adequate power supply, either from an emergency source of electrical power or from another independent source of power located in the steering gear compartment; and

(6) means of automatic starting and stopping of power units with attendant alarms at all steering stations.

(b) An existing tanker of at least 10,000 gross tons shall be equipped with—

(1) 2 remote steering gear control systems operable separately from the navigating bridge;

(2) the main steering gear control in the steering gear compartment; and

(3) means of communications and rudder angle indicators on the navigating bridge, a remote steering gear control station, and the steering gear compartment.

§ 3708. Self-propelled tank vessel minimum standards

A self-propelled tank vessel of at least 10,000 gross tons shall be equipped with—

(1) a dual radar system with short-range and long-range capabilities, each with true-north features;

(2) an electronic relative motion analyzer that is at least functionally equivalent to equipment complying with specifications established by the Secretary of Transportation;

(3) an electronic position-fixing device;

(4) adequate communications equipment;

(5) a sonic depth finder;

(6) a gyrocompass; and

(7) up-to-date charts.

§ 3709. Exemptions

The Secretary may exempt a vessel from the minimum requirements established by sections 3704-3706 of this title for segregated ballast, crude oil washing, and dedicated clean ballast if the Secretary decides that shore-based reception facilities are a preferred method of handling ballast and that adequate facilities are readily available.

§ 3710. Evidence of compliance by vessels of the United States

(a) A vessel of the United States to which this chapter applies that has on board oil or hazardous material in bulk as cargo or cargo residue must have a certificate of inspection issued under this part, endorsed to indicate that the vessel complies with regulations prescribed under this chapter.

(b) Each certificate endorsed under this section is valid for not more than 24 months and may be renewed as specified by the Secretary. In appropriate circumstances, the Secretary may issue a temporary certificate valid for not more than 30 days. A certificate shall be suspended or revoked if the Secretary finds that the vessel does not comply with the conditions under which the certificate was issued.

§ 3711. Evidence of compliance by foreign vessels

(a) A foreign vessel to which this chapter applies may operate on the navigable waters of the United States, or transfer oil or hazardous material in a port or place under the jurisdiction of the United States, only if the vessel has been issued a certificate of compliance by the Secretary. The Secretary may issue the certificate only after the vessel has been examined and found to be in compliance with this chapter and regulations prescribed under this chapter. The Secretary may accept any part of a certificate, endorsement, or document, issued by the government of a foreign country under a treaty, convention, or other international agreement to which the United States is a party, as a basis for issuing a certificate of compliance.

(b) A certificate issued under this section is valid for not more than 24 months and may be renewed as specified by the Secretary. In appropriate circumstances, the Secretary may issue a temporary certificate valid for not more than 30 days.

(c) A certificate shall be suspended or revoked if the Secretary finds that the vessel does not comply with the conditions under which the certificate was issued.

§ 3712. Notification of noncompliance

The Secretary shall notify the owner, charterer, managing operator, agent, master, or individual in charge of a vessel found not to be in compliance with a regulation prescribed under this part and state how compliance may be achieved.

§ 3713. Prohibited acts

(a) A person may not—

(1) violate this chapter or a regulation prescribed under this chapter;

(2) refuse to permit any official, authorized by the Secretary to enforce this chapter, to board a vessel or to enter a shore area, place, or premises, under a person's control to make an inspection under this chapter; or

(3) refuse to obey a lawful directive issued under this chapter.

(b) A vessel to which this chapter applies may not—

(1) operate on the navigable waters of the United States or use a port or place subject to the jurisdiction of the United States when not in compliance with this chapter or a regulation prescribed under this chapter;

(2) fail to comply with a lawful directive issued under this chapter; or

(3) carry a type or grade of oil or hazardous material in bulk as cargo or cargo residue unless its certificate is endorsed to allow that carriage.

§ 3714. Inspection and examination

(a)(1) The Secretary shall have each vessel to which this chapter applies inspected or examined at least once each year.

(2) Each of those vessels that is more than 10 years of age shall undergo a special and detailed inspection of structural strength and hull integrity as specified by the Secretary.

(3) The Secretary may make contracts for conducting inspections or examinations in the United States and in foreign countries. An inspector conducting an inspection or examination under contract may not issue a certificate of inspection or a certificate of compliance, but the inspector may issue a temporary certificate.

(4) The Secretary shall prescribe by regulation reasonable fees for an inspection or examination conducted under this section outside the United States, or which, when involving a foreign vessel, is conducted under a contract authorized by paragraph (3) of this subsection. The owner, charter, or managing operator of a vessel inspected or examined by the Secretary is liable for the fees. Amounts received as fees shall be deposited in the Treasury.

(5) The Secretary may allow provisional entry of a vessel to conduct an inspection or examination under this chapter.

(b) Each vessel to which this chapter applies shall have on board those documents the Secretary considers necessary for inspection and enforcement, including documents listing—

(1) the type, grade, and approximate quantities of cargo on board;

(2) the shipper and consignee of the cargo;

(3) the places of origin and destination of the vessel; and

(4) the name of an agent in the United States authorized to accept service of legal process.

(c) Each vessel to which this chapter applies that operates in the United States shall have a person designated as authorized to accept service of legal process for the vessel.

§ 3715. Lightering

(a) A vessel may transfer oil or hazardous material in a port or place subject to the jurisdiction of the United States, when the cargo has been transferred from another vessel on the navigable waters of the United States or in the marine environment, only if—

(1) the transfer was conducted consistent with regulations prescribed by the Secretary; and

(2) both the delivering and receiving vessels had on board, at the time of transfer, a certificate of inspection or a certificate of compliance, as would have been required under section 3710 or 3711 of this title, had the transfer taken place in a port or place subject to the jurisdiction of the United States.

(b) The Secretary shall prescribe regulations to carry out subsection (a) of this section. The regulations shall include provisions on—

(1) minimum safe operating conditions, including sea state, wave height, weather, proximity to channels or shipping lanes, and other similar factors;

(2) the prevention of spills;

(3) equipment for responding to a spill;

(4) the prevention of any unreasonable interference with navigation or other reasonable uses of the high seas, as those uses are defined by treaty, convention, or customary international law;

(5) the establishment of lightering zones; and

(6) requirements for communication and prearrival messages.

§ 3716. Tank washings

(a) A vessel may not transfer cargo in a port or place subject to the jurisdiction of the United States if, before arriving, the vessel has discharged tank washings containing oil or hazardous material in preparation for loading at that port or place in violation of the laws of the United States or in a manner or quantities inconsistent with a treaty to which the United States is a party.

(b) The Secretary shall establish effective control and supervisory measures to carry out this section.

§ 3717. Marine safety information system

(a) The Secretary shall establish a marine safety information system that shall contain information about each vessel to which this chapter applies that operates on the navigable waters of the United States, or that transfers oil or hazardous material in a port or place under the jurisdiction of the United States. In acquiring this information, the Secretary shall make full use of publicly available information. The Secretary may by regulation require the vessel to provide information that the Secretary considers necessary to carry out this subsection, including—

(1) the name of each person with an ownership interest in the vessel;

(2) details of compliance with the financial responsibility requirements of applicable laws or regulations;

(3) registration information, including all changes in the name of the vessel;

(4) the history of marine casualties and serious repair problems of the vessel; and

(5) a record of all inspections and examinations of a vessel conducted under section 3714 of this title.

(b) On written request from the Secretary, the head of each department, agency, or instrumentality of the United States Government shall provide available information that the Secretary considers necessary to confirm the information received under subsection (a) of this section.

§ 3718. Penalties

(a)(1) A person violating this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation.

(2) Each vessel to which this chapter applies that is operated in violation of this chapter or a regulation prescribed under this chapter is liable in rem for a civil penalty under this subsection.

(b) A person willfully and knowingly violating this chapter or a regulation prescribed under this chapter shall be fined not more than $50,000, imprisoned for not more than 5 years, or both.

(c) Instead of the penalties provided by subsection (b) of this section, a person willfully and knowingly violating this chapter or a regulation prescribed under this chapter, and using a dangerous weapon, or engaging in conduct that causes bodily injury or fear of imminent bodily injury to an official authorized to enforce this chapter or a regulation prescribed under this chapter, shall be fined not more than $100,000, imprisoned for not more than 10 years, or both.

(d) The district courts of the United States have jurisdiction to restrain a violation of this chapter or a regulation prescribed under this chapter.

(e) At the request of the Secretary, the Secretary of the Treasury shall withhold or revoke the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) of a vessel the owner or operator of which is subject to a penalty under this section. Clearance may be granted on filing a bond or other surety satisfactory to the Secretary.

CHAPTER 39—CARRIAGE OF ANIMALS

Sec.
3901. Regulations for accommodations for export animals.
3902. Penalties.

§ 3901. Regulations for accommodations for export animals

The Secretary of Agriculture may prescribe regulations governing the accommodations on board vessels for cattle, horses, mules, asses, sheep, goats, and swine to be carried from the United States to a foreign country. The regulations shall prescribe standards for space, ventilation, fittings, food and water supply, and other requirements the Secretary of Agriculture considers necessary for the safe and proper transportation and humane treatment of those animals. The Secretary of Agriculture may examine any vessel the Secretary of Agriculture considers necessary to carry out this chapter.

§ 3902. Penalties

When the owner, charterer, managing operator, agent, master, or individual in charge of a vessel carrying animals referred to in section 3901 of this title willfully violates, or causes or permits to be violated, a regulation prescribed under this chapter, the vessel may be prohibited from carrying any such animals from the United States for a period, of not more than one year, that the Secretary of Agriculture directs. The vessel may not be cleared from a port of the United States during that period.

CHAPTER 41—UNINSPECTED VESSELS

Sec.
4101. Application.
4102. Safety equipment.
4103. Exemptions.
4104. Regulations.
4105. Uninspected passenger vessels.
4106. Penalties.

§ 4101. Application

This chapter applies to an uninspected vessel—

(1) on the navigable waters of the United States; or

(2) owned in the United States and operating on the high seas.

§ 4102. Safety equipment

(a) Each uninspected vessel propelled by machinery shall be provided with the number, type, and size of fire extinguishers, capable of promptly and effectively extinguishing burning liquid fuel, that may be prescribed by regulation. The fire extinguishers shall be kept in condition for immediate and effective use and so placed as to be readily accessible.

(b) Each uninspected vessel propelled by machinery shall carry at least one readily accessible life preserver or other lifesaving device, of the type prescribed by regulation, for each individual on board.

(c) Each uninspected vessel shall have the carburetors of each engine of the vessel (except an outboard motor) using gasoline

as fuel, equipped with an efficient flame arrestor, backfire trap, or other similar device prescribed by regulation.

(d) Each uninspected vessel using a volatile liquid as fuel shall be provided with the means prescribed by regulation for properly and efficiently ventilating the bilges of the engine and fuel tank compartments, so as to remove any explosive or flammable gases.

§ 4103. Exemptions

Section 4102(a) of this title does not apply to a vessel propelled by outboard motors when competing in a race previously arranged and announced or, if the vessel is designed and intended only for racing, when operated incidental to tuning up the vessel and its engines for the race.

§ 4104. Regulations

The Secretary shall prescribe regulations to carry out this chapter.

§ 4105. Uninspected passenger vessels

Chapter 43 of this title applies to an uninspected passenger vessel.

§ 4106. Penalties

If a vessel to which this chapter applies is operated in violation of this chapter or a regulation prescribed under this chapter, the owner, charterer, managing operator, agent, master, and individual in charge are each liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

CHAPTER 43—RECREATIONAL VESSELS

Sec.
4301. Application.
4302. Regulations.
4303. Inspection and testing.
4304. Importation of nonconforming vessels and equipment.
4305. Exemptions.
4306. Federal preemption.
4307. Prohibited acts.
4308. Termination of unsafe operation.
4309. Investigation and reporting.
4310. Repair and replacement of defects.
4311. Penalties and injunctions.

§ 4301. Application

(a) This chapter applies to a recreational vessel and associated equipment carried in the vessel on waters subject to the jurisdiction of the United States and, for a vessel owned in the United States, on the high seas.

(b) Except when expressly otherwise provided, this chapter does not apply to a foreign vessel temporarily operating on waters subject to the jurisdiction of the United States.

(c) Until there is a final judicial decision that they are navigable waters of the United States, the following waters lying entirely in New Hampshire are declared not to be waters subject to the jurisdiction of the United States within the meaning of this section: Lake Winnisquam, Lake Winnipesaukee, parts of the Merrimack River, and their tributary and connecting waters.

§ 4302. Regulations

(a) The Secretary may prescribe regulations—

(1) establishing minimum safety standards for recreational vessels and associated equipment, and establishing procedures and tests required to measure conformance with those standards, with each standard—

(A) meeting the need for recreational vessel safety; and

(B) being stated, insofar as practicable, in terms of performance;

(2) requiring the installation, carrying, or use of associated equipment (including fuel systems, ventilation systems, electrical systems, sound-producing devices, firefighting equipment, lifesaving devices, signaling devices, ground tackle, life- and grab-rails, and navigational equipment) on recreational vessels and classes of recreational vessels subject to this chapter, and prohibiting the installation, carrying, or use of associated equipment that does not conform with safety standards established under this section; and

(3) requiring or permitting the display of seals, labels, plates, insignia, or other devices for certifying or evidencing compliance with safety regulations and standards of the United States Government for recreational vessels and associated equipment.

(b) Each regulation prescribed under this section shall specify an effective date that is not earlier than 180 days from the date the regulation was published, unless the Secretary finds that there exists a recreational vessel safety hazard so critical as to require an earlier effective date. However, this period may not be more than 24 months for cases involving, in the discretion of the Secretary, major product design, retooling, or major changes in the manufacturing process.

(c) In prescribing regulations under this section, the Secretary shall, among other things—

(1) consider the need for and the extent to which the regulations will contribute to recreational vessel safety;

(2) consider relevant available recreational vessel safety standards, statistics, and data, including public and private research, development, testing, and evaluation;

(3) not compel substantial alteration of a recreational vessel or item of associated equipment that is in existence, or the construction or manufacture of which is begun before the effective date of the regulation, but subject to that limitation may require compliance or performance, to avoid a substantial risk of personal injury to the public, that the Secretary considers appropriate in relation to the degree of hazard that the compliance will correct; and

(4) consult with the National Boating Safety Advisory Council established under section 13110 of this title about the considerations referred to in clauses (1)-(3) of this subsection.

(d) Section 8903 of this title does not apply to a vessel being operated for bona fide dealer demonstrations provided without fee to business invitees. However, if on the basis of substantial evidence, the Secretary decides under this section that requiring vessels so operated to be under the control of licensed individuals is necessary for boating safety, then the Secretary may prescribe regulations requiring the licensing of individuals controlling these vessels in the same manner as provided in chapter 89 of this title for individuals in control of vessels carrying passengers for hire.

§ 4303. Inspection and testing

(a) Subject to regulations, supervision, and reviews that the Secretary may prescribe, the Secretary may delegate to a person, private or public agency, or organization, or to an officer or employee under the supervision of that person or agency, any work, business, or function related to the testing, inspection, and examination necessary for compliance enforcement and for the development of data to enable the Secretary to prescribe regulations under section 4302 of this title.

(b) The Secretary may—

(1) conduct research, testing, and development necessary to carry out this chapter, including the procurement by negotiation or otherwise of experimental and other recreational vessels or associated equipment for research and testing purposes; and

(2) subsequently sell those vessels.

§ 4304. Importation of nonconforming vessels and equipment

The Secretary and the Secretary of the Treasury may authorize by joint regulations the importation of any nonconforming recreational vessel or associated equipment on conditions, including providing a bond, that will ensure that the recreational vessel or associated equipment will be brought into conformity with applicable safety regulations and standards of the Government before the vessel or equipment is operated on waters subject to the jurisdiction of the United States.

§ 4305. Exemptions

If the Secretary considers that recreational vessel safety will not be adversely affected, the Secretary may issue an exemption from this chapter or a regulation prescribed under this chapter.

§ 4306. Federal preemption

Unless permitted by the Secretary under section 4305 of this title, a State or political subdivision of a State may not establish, continue in effect, or enforce a law or regulation establishing a recreational vessel or associated equipment performance or other safety standard or imposing a requirement for associated equipment (except insofar as the State or political subdivision may, in the absence of the Secretary's disapproval, regulate the carrying or use of marine safety articles to meet uniquely hazardous conditions or circumstances within the State) that is not identical to a regulation prescribed under section 4302 of this title.

§ 4307. Prohibited acts

(a) A person may not—

(1) manufacture, construct, assemble, sell or offer for sale, introduce or deliver for introduction into interstate commerce, or import into the United States, a recreational vessel, associated equipment, or component of the vessel or equipment unless—

(A) it conforms with this chapter or a regulation prescribed under this chapter; or

(B) it is intended only for export and is so labeled, tagged, or marked on the recreational vessel or equipment, including any markings on the outside of the container in which it is to be exported;

(2) affix, attach, or display a seal, document, label, plate, insignia, or other device indicating or suggesting compliance with standards of the United States Government on, in, or in connection with, a recreational vessel or item of associated equipment that is false or misleading; or

(3) fail to provide a notification as required by this chapter or fail to exercise reasonable diligence in carrying out the notification and reporting requirements of this chapter.

(b) A person may not operate a vessel in violation of this chapter or a regulation prescribed under this chapter.

§ 4308. Termination of unsafe operation

If an official charged with the enforcement of this chapter observes a recreational vessel being operated without sufficient lifesaving or firefighting devices or in an overloaded or other unsafe condition (as defined in regulations prescribed under this chapter) and, in the judgment of the official, the operation creates an especially hazardous condition, the official may direct the opera-

tor of the recreational vessel to take immediate and reasonable steps necessary for the safety of individuals on board the vessel, including directing the operator to return to a mooring and to remain there until the situation creating the hazard is corrected or ended.

§ 4309. Investigation and reporting

(a) A recreational vessel manufacturer to whom this chapter applies shall establish and maintain records and reports and provide information the Secretary may require to enable the Secretary to decide whether the manufacturer has acted or is acting in compliance with this chapter and regulations prescribed under this chapter. On request of an officer, employee, or agent authorized by the Secretary, a recreational vessel manufacturer shall permit the officer, employee, or agent to inspect, at reasonable times, factories or other facilities, and records related to deciding whether the manufacturer has acted or is acting in compliance with this chapter and regulations prescribed under this chapter.

(b) Information reported to or otherwise obtained by the Secretary or the representative of the Secretary under this section containing or related to a trade secret or other matter referred to in section 1905 of title 18, or authorized to be exempt from public disclosure by section 552(b) of title 5, is confidential under section 1905. However, on approval of the Secretary, the information may be disclosed to other officers, employees, or agents concerned with carrying out this chapter or when it is relevant in a proceeding under this chapter.

§ 4310. Repair and replacement of defects

(a) In this section, "associated equipment" includes only items or classes of associated equipment that the Secretary shall prescribe by regulation after deciding that the application of the requirements of this section to those items or classes of associated equipment is reasonable and in furtherance of this chapter.

(b) If a recreational vessel or associated equipment has left the place of manufacture and the recreational vessel manufacturer discovers or acquires information that the manufacturer decides, in the exercise of reasonable and prudent judgment, indicates that a recreational vessel or associated equipment subject to an applicable regulation prescribed under section 4302 of this title either fails to comply with the regulation, or contains a defect that creates a substantial risk of personal injury to the public, the manufacturer shall provide notification of the defect or failure of compliance as provided by subsections (c) and (d) of this section within a reasonable time after the manufacturer has discovered the defect.

(c)(1) The notification required by subsection (b) of this section shall be given to the following persons in the following manner:

(A) by certified mail to the first purchaser for other than resale, except that the requirement for notification of the first purchaser shall be satisfied if the recreational vessel manufacturer exercises reasonable diligence in establishing and maintaining a list of those purchasers and their current addresses, and sends the required notice to each person on that list at the address appearing on the list.

(B) by certified mail to subsequent purchasers if known to the manufacturer.

(C) by certified mail or other more expeditious means to the dealers and distributors of the recreational vessels or associated equipment.

(2) The notification required by subsection (b) of this section is required to be given only for a defect or failure of compliance discovered by the recreational vessel manufacturer within a reasonable time after the manufacturer has discovered the defect or failure, except that the manufacturer's duty of notification under paragraph (1) (A) and (B) of this subsection applies only to a defect or failure of compliance discovered by the manufacturer within one of the following appropriate periods:

(A) if a recreational vessel or associated equipment required by regulation to have a date of certification affixed, 5 years from the date of certification.

(B) if a recreational vessel or associated equipment not required by regulation to have a date of certification affixed, 5 years from the date of manufacture.

(d) The notification required by subsection (b) of this section shall contain a clear description of the defect or failure to comply, an evaluation of the hazard reasonably related to the defect or failure, a statement of the measures to correct the defect or failure, and an undertaking by the recreational vessel manufacturer to take those measures only at the manufacturer's cost and expense.

(e) Each recreational vessel manufacturer shall provide the Secretary with a copy of all notices, bulletins, and other communications to dealers and distributors of that manufacturer, and to purchasers of recreational vessels or associated equipment of that manufacturer, about a defect related to safety in the recreational vessels or associated equipment, and any failure to comply with the regulation or order applicable to the recreational vessels or associated equipment. The Secretary may publish or otherwise disclose to the public information in the notices or other information the Secretary has that the Secretary considers will assist in carrying out this chapter. However, the Secretary may disclose any information that contains or relates to a trade secret only if the Secretary decides that the information is necessary to carry out this chapter.

(f) If, through testing, inspection, investigation, or examination of reports, the Secretary decides that a recreational vessel or associated equipment to which this chapter applies contains a defect related to safety or fails to comply with an applicable regulation prescribed under this chapter and notification under this chapter is appropriate, the Secretary shall notify the recreational vessel manufacturer of the defect or failure. The notice shall contain the findings of the Secretary and shall include a synopsis of the information on which they are based. The manufacturer may then provide the notification required by this chapter to the persons designated in this chapter or dispute the Secretary's decision. If disputed, the Secretary shall provide the manufacturer with an opportunity to present views and establish that there is no such defect or failure. When the Secretary considers it to be in the public interest, the Secretary may publish notice of the proceeding in the Federal Register and provide interested persons, including the National Boating Safety Advisory Council, with an opportunity to comment. If, after presentation by the manufacturer, the Secretary decides that the recreational vessel or associated equipment contains a defect related to safety or fails to comply with an applicable regulation, the Secretary may direct the manufacturer to provide the notifications specified in this chapter.

(g) The Secretary may prescribe regulations to carry out this section, including the establishment of procedures that require dealers and distributors to assist manufacturers in obtaining information required by this section. A regulation prescribed under this subsection does not relieve a manufacturer of any obligation imposed by this section.

§ 4311. Penalties and injunctions

(a) A person willfully operating a recreational vessel in violation of this chapter or a regulation prescribed under this chapter shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(b) A person violating section 4307(a)(1) of this title is liable to the United States Government for a civil penalty of not more than $2,000, except that the maximum civil penalty may be not more than $100,000 for a related series of violations. When a corporation violates section 4307(a)(1), any director, officer, or executive employee of the corporation who knowingly and willfully ordered, or knowingly and willfully authorized, a violation is individually liable to the Government for the penalty, in addition to the corporation. However, the director, officer, or executive employee is not liable individually under this subsection if the director, officer, or executive employee can demonstrate by a preponderance of the evidence that—

(1) the order or authorization was issued on the basis of a decision, in exercising reasonable and prudent judgment, that the nonconformity with standards and regulations constituting the violation would not cause or constitute a substantial risk of personal injury to the public; and

(2) at the time of the order or authorization, the director, officer, or executive employee advised the Secretary in writing of acting under this clause and clause (1) of this subsection.

(c) A person violatng any other provision of this chapter or other regulation prescribed under this chapter is liable to the Government for a civil penalty of not more than $1,000. If the violation involves the operation of a vessel, the vessel also is liable in rem for the penalty.

(d) When a civil penalty of not more than $200 has been assessed under this chapter, the Secretary may refer the matter of collection of the penalty directly to the United States magistrate of the jurisdiction in which the person liable may be found for collection procedures under supervision of the district court and under an order issued by the court delegating this authority under section 636(b) of title 28.

(e) The district courts of the United States have jurisdiction to restrain a violation of this chapter, or to restrain the sale, offer for sale, introduction or delivery for introduction into interstate commerce, or importation into the United States, of a recreational vessel or associated equipment that the court decides does not conform to safety standards of the Government. A civil action under this subsection shall be brought by filing a petition by the Attorney General for the Government. When practicable, the Secretary shall give notice to a person against whom an action for injunctive relief is contemplated and provide the person with an opportunity to present views and, except for a knowing and willful violation, shall provide the person with a reasonable opportunity to achieve compliance. The failure to give notice and provide the opportunity does not preclude the granting of appropriate relief by the district court.

(f) A person is not subject to a penalty under this chapter if the person—

(1) establishes that the person did not have reason to know, in exercising reasonable care, that a recreational vessel or associated equipment does not conform with the applicable safety standards of the Government; or

(2) holds a certificate issued by the manufacturer of that recreational vessel or associated equipment to the effect that the recreational vessel or associated equipment conforms to all applicable recreational vessel safety standards of the Government, unless the person knows or reasonably should have known that the recreational vessel or associated equipment does not so conform.

(g) Compliance with this chapter or standards, regulations, or orders prescribed under this chapter does not relieve a person from liability at common law or under State law.

[PART C—RESERVED FOR LOAD LINES OF VESSELS]

PART D—MARINE CASUALTIES

CHAPTER 61—REPORTING MARINE CASUALTIES

Sec.
6101. Marine casualties and reporting.
6102. State marine casualty reporting system.
6103. Penalty.

§ 6101. Marine casualties and reporting

(a) The Secretary shall prescribe regulations on the marine casualties and incidents to be reported and the manner of reporting. The regulations shall require reporting the following marine casualties:

(1) death of an individual.

(2) serious injury to an individual.

(3) material loss of property.

(4) material damage affecting the seaworthiness or efficiency of the vessel.

(b) A marine casualty shall be reported within 5 days as provided in this part and regulations prescribed under this part.

(c) When the owner, charterer, managing operator, or agent of a vessel of the United States has reason to believe (because of lack of communication with or nonappearance of a vessel or any other incident) that the vessel may have been lost or imperiled, the owner, charterer, managing operator, or agent immediately shall attempt to determine the status of the vessel. If the owner, charterer, managing operator, or agent cannot determine the status of the vessel, the owner, charterer, managing operator, or agent immediately shall notify the Coast Guard and provide the name and identification number of the vessel, the names of individuals on board, and any other information that may be requested by the Coast Guard.

(d) This part applies to a foreign vessel when involved in a marine casualty on the navigable waters of the United States.

(e) A marine casualty not resulting in the death of an individual shall be classified according to the gravity of the casualty, as prescribed by regulation, giving consideration to the extent of injuries to individuals, the extent of property damage, the dangers that the casualty creates, and the size, occupation, and means of propulsion of each vessel involved.

§ 6102. State marine casualty reporting system

(a) The Secretary shall prescribe regulations for a uniform State marine casualty reporting system for vessels. Regulations shall prescribe the casualties to be reported and the manner of reporting. A State shall compile and submit to the Secretary reports, information, and statistics on casualties reported to the State.

(b) The Secretary shall collect, analyze, and publish reports, information, and statistics on marine casualties together with findings and recommendations the Secretary considers appropriate. If a State marine casualty reporting system provides that information derived from casualty reports (except statistical information) may not be publicly disclosed, or otherwise prohibits use by the State or any person in any action or proceeding against a person, the Secretary may use the information provided by the State only in the same way that the State may use the information.

§ 6103. Penalty

An owner, charterer, managing operator, agent, master, or individual in charge of a vessel failing to report a casualty or incident as required under section 6101 of this title or a regulation prescribed under section 6101 is liable to the United States Government for a civil penalty of $1,000.

CHAPTER 63—INVESTIGATING MARINE CASUALTIES

Sec.
6301. Investigation of marine casualties.
6302. Public investigations.
6303. Rights of parties in interest.
6304. Subpena authority.
6305. Reports of investigations.
6306. Penalty.
6307. Notifications to Congress.

§ 6301. Investigation of marine casualties

The Secretary shall prescribe regulations for the immediate investigation of marine casualties under this part to decide, as closely as possible—

(1) the cause of the casualty, including the cause of any death;

(2) whether an act of misconduct, incompetence, negligence, unskillfulness, or willful violation of law committed by any individual licensed, certificated, or documented under part E of this subtitle has contributed to the cause of the casualty, or to a death involved in the casualty, so that appropriate remedial action under chapter 77 of this title may be taken;

(3) whether an act of misconduct, incompetence, negligence unskillfulness, or willful violation of law committed by any person, including an officer, employee, or member of the Coast Guard, contributed to the cause of the casualty, or to a death involved in the casualty;

(4) whether there is evidence that an act subjecting the offender to a civil penalty under the laws of the United States has been committed, so that appropriate action may be undertaken to collect the penalty;

(5) whether there is evidence that a criminal act under the laws of the United States has been committed, so that the matter may be referred to appropriate authorities for prosecution; and

(6) whether there is need for new laws or regulations, or amendment or repeal of existing laws or regulations, to prevent the recurrence of the casualty.

§ 6302. Public investigations

Each investigation conducted under this chapter and regulations prescribed under this chapter shall be open to the public, except when evidence affecting the national security is to be received.

§ 6303. Rights of parties in interest

In an investigation conducted under this chapter, the following shall be allowed to be represented by counsel, to cross-examine witnesses, and to call witnesses:

(1) an owner,

(2) any holder of a license or certificate of registry,

(3) any holder of a merchant mariner's document,

(4) any other person whose conduct is under investigation, and

(5) any other party in interest.

§ 6304. Subpena authority

(a) In an investigation under this chapter, the attendance and testimony of witnesses, including parties in interest, and the production of any evidence may be compelled by subpena. The subpena authority granted by this section is coextensive with that of a district court of the United States, in civil matters, for the district in which the investigation is conducted.

(b) When a person fails to obey a subpena issued under this section, the district court of the United States for the district in which the investigation is conducted or in which the person failing to obey is found, shall on proper application issue an order directing that person to comply with the subpena. The court may punish as contempt any disobedience of its order.

(c) A witness complying with a subpena issued under this section may be paid for actual travel and attendance at the rate provided for witnesses in the district courts of the United States.

(d) An official designated to conduct an investigation under this part may issue subpenas as provided in this section and administer oaths to witnesses.

§ 6305. Reports of investigations

(a) The Secretary shall prescribe regulations about the form and manner of reports of investigations conducted under this part.

(b) Reports of investigations conducted under this part shall be made available to the public, except to the extent that they contain information related to the national security.

§ 6306. Penalty

A person attempting to coerce a witness, or to induce a witness, to testify falsely in connection with a marine casualty, or to induce a witness to leave the jurisdiction of the United States, shall be fined $5,000, imprisoned for one year, or both.

§ 6307. Notifications to Congress

(a) The Secretary shall notify the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Merchant Marine and Fisheries of the House of Representatives of any hearing, before the hearing occurs, investigating a major marine casualty involving a death under section 6301 of this title.

(b) The Secretary shall submit to a committee referred to in subsection (a) of this section information on a major marine casualty that is requested by that committee or the chairman of the committee if the submission of that information is not prohibited by a law of the United States.

(c) The Secretary shall submit annually to Congress a summary of the marine casualties reported during the prior fiscal year, together with a brief statement of action taken concerning those casualties.

PART E—LICENSES, CERTIFICATES, AND MERCHANT MARINERS' DOCUMENTS

CHAPTER 71—LICENSES AND CERTIFICATES OF REGISTRY

Sec.
7101. Issuing and classifying licenses and certificates of registry.

7102. Citizenship.
7103. Licenses for radio officers.
7104. Certificates for medical doctors and nurses.
7105. Oaths.
7106. Duration of licenses.
7107. Duration of certificates of registry.
7108. Termination of licenses and certificates of registry.
7109. Renewal of licenses.
7110. Exhibiting licenses.
7111. Licenses for fishing vessels not subject to inspection.
7112. Licenses of masters or mates as pilots.
7113. Exemption from draft.
7114. Fees.

§ 7101. Issuing and classifying licenses and certificates of registry

(a) Licenses and certificates of registry are established for individuals who are required to hold licenses or certificates under this subtitle.

(b) Under regulations prescribed by the Secretary, the Secretary—

(1) issues the licenses and certificates of registry; and

(2) may classify the licenses and certificates of registry as provided in subsections (c) and (f) of this section, based on—

(A) the tonnage, means of propulsion, and horsepower of machine-propelled vessels;

(B) the waters on which vessels are to be operated; or

(C) other reasonable standards.

(c) The Secretary may issue licenses in the following classes to applicants found qualified as to age, character, habits of life, experience, professional qualifications, and physical fitness:

(1) masters, mates, and engineers.

(2) pilots.

(3) operators.

(4) radio officers.

(d) In classifying individuals under subsection (c)(1) of this section, the Secretary shall establish, when possible, suitable career patterns and service and other qualifying requirements appropriate to the particular service or industry in which the individuals are engaged.

(e) An individual may be issued a license under subsection (c)(2) of this section only if the applicant—

(1) is at least 21 years of age;

(2) is of sound health and has no physical limitations that would hinder or prevent the performance of a pilot's duties;

(3) agrees to have a thorough physical examination each year while holding the license;

(4) demonstrates, to the satisfaction of the Secretary, that the applicant has the requisite general knowledge and skill to hold the license;

(5) demonstrates proficiency in the use of electronic aids to navigation;

(6) maintains adequate knowledge of the waters to be navigated and knowledge of regulations for the prevention of collisions in those waters;

(7) has sufficient experience, as decided by the Secretary, to evidence ability to handle any vessel of the type and size which the applicant may be authorized to pilot; and

(8) meets any other requirement the Secretary considers reasonable and necessary.

(f) The Secretary may issue certificates of registry in the following classes to applicants found qualified as to character, knowledge, skill, and experience:

(1) pursers.

(2) medical doctors.

(3) professional nurses.

§ 7102. Citizenship

Licenses and certificates of registry for individuals on documented vessels may be issued only to citizens of the United States.

§ 7103. Licenses for radio officers

(a) A license as radio officer may be issued only to an applicant who has a first-class or second-class radiotelegraph operator license issued by the Federal Communications Commission.

(b) Except as provided in section 7318 of this title, this part does not affect the status of radiotelegraph operators serving on board vessels operating only on the Great Lakes.

§ 7104. Certificates for medical doctors and nurses

A certificate of registry as a medical doctor or professional nurse may be issued only to an applicant who has a license as a medical doctor or registered nurse, respectively, issued by a State.

§ 7105. Oaths

An applicant for a license or certificate of registry shall take, before the issuance of the license or certificate, an oath before a designated official, without concealment or reservation, that the applicant will perform faithfully and honestly, according to the best skill and judgment of the applicant, all the duties required by law.

§ 7106. Duration of licenses

A license issued under this part is valid for 5 years. However, the validity of a license issued to a radio officer is conditioned on the continuous possession by the holder of a first-class or second-class radiotelegraph operator license issued by the Federal Communications Commission.

§ 7107. Duration of certificates of registry

A certificate of registry issued under this part is not limited in duration. However, the validity of a certificate issued to a medical doctor or professional nurse is conditioned on the continuous possession by the holder of a license as a medical doctor or registered nurse, respectively, issued by a State.

§ 7108. Termination of licenses and certificates of registry

When the holder of a license or certificate of registry, the duration of which is conditioned under section 7106 or 7107 of this title, fails to hold the license required as a condition, the license or certificate of registry issued under this part is terminated.

§ 7109. Renewal of licenses

A license issued under this part may be renewed for additional 5-year periods.

§ 7110. Exhibiting licenses

Each holder of a license issued under this part shall display, within 48 hours after employment on a vessel for which that license is required, the license in a conspicuous place on the vessel.

§ 7111. Licenses for fishing vessels not subject to inspection

Examinations for licensing individuals on fishing vessels not required to be inspected under part B of this subtitle shall be oral.

§ 7112. Licenses of masters or mates as pilots

A master or mate licensed under this part who also qualifies as a pilot is not required to hold 2 licenses. Instead, the qualification of the master or mate as pilot shall be endorsed on the master's or mate's license.

§ 7113. Exemption from draft

A licensed master, mate, pilot, or engineer of a vessel inspected under part B of this subtitle, propelled by machinery or carrying hazardous liquid cargoes in bulk, is not liable to draft in time of war, except for performing duties authorized by the license. When performing those duties in the service of the United States Government, the master, mate, pilot, or engineer is entitled to the highest rate of wages paid in the merchant marine of the United States for similar services. If killed or wounded when performing those duties, the master, mate, pilot, or engineer, or the heirs or legal representatives of the master, mate, pilot, or engineer, are entitled to all the privileges under the pension laws of the United States provided to members of the Armed Forces.

§ 7114. Fees

The Secretary may prescribe by regulation reasonable fees for the inspection of and the issuance of a certificate, license, or permit related to small passenger vessels and sailing school vessels.

CHAPTER 73—MERCHANT MARINERS' DOCUMENTS

Sec.
7301. General.
7302. Issuing merchant mariners' documents and continuous discharge books.
7303. Possession and description of merchant mariners' documents.
7304. Citizenship notation on for merchant mariners' documents.
7305. Oaths for holders of merchant mariners' documents.
7306. General requirements and classifications for able seamen.
7307. Able seamen—unlimited.
7308. Able seamen—limited.
7309. Able seamen—special.
7310. Able seamen—offshore supply vessels.
7311. Able seamen—sail.
7312. Scale of employment.
7313. General requirements for members of engine departments.
7314. Service requirements for qualified members of engine departments.
7315. Training.
7316. Lifeboatmen.
7317. Tankermen.
7318. Radiotelegraph operators on Great Lakes.
7319. Records of merchant mariners' documents.

§ 7301. General

(a) In this chapter—

(1) "service on deck" means service in the deck department in work related to the work usually performed on board vessels by able seamen and may include service on decked fishing vessels and on public vessels of the United States;

(2) 360 days is equal to one year's service; and

(3) a day is equal to 8 hours of labor or duty.

(b) The Secretary may prescribe regulations to carry out this chapter.

§ 7302. Issuing merchant mariners' documents and continuous discharge books

(a) The Secretary shall issue a merchant mariner's document to an individual required to have that document under part F of this subtitle if the individual satisfies the requirements of this part. The document serves as a certificate of identification and as a certificate of service, specifying each rating in which the holder is qualified to serve on board vessels on which that document is required under part F.

(b) The Secretary also may issue a continuous discharge book to an individual issued a merchant mariner's document if the individual requests.

§ 7303. Possession and description of merchant mariners' documents

A merchant mariner's document shall be retained by the seaman to whom issued. The document shall contain the signature, notations of nationality, age, and physical description, the photograph, the thumbprint, and the home address of the seaman. In addition, the document shall specify the rate or ratings in which the seaman is qualified to serve.

§ 7304. Citizenship of notation on merchant mariners' documents

An individual applying for a merchant mariner's document shall provide satisfactory proof that the individual is a citizen of the United States before that notation is made on the document.

§ 7305. Oaths for holders of merchant mariners' documents

An applicant for a merchant mariner's document shall take, before issuance of the document, an oath that the applicant will perform faithfully and honestly all the duties required by law, and will carry out the lawful orders of superior officers.

§ 7306. General requirements and classifications for able seamen

(a) To qualify for an endorsement as able seaman authorized by this section, an applicant must provide satisfactory proof that the applicant—

(1) is at least 18 years of age;

(2) has the service required by the applicable section of this part;

(3) is qualified professionally as demonstrated by an applicable examination or educational requirements; and

(4) is qualified as to sight, hearing, and physical condition to perform the seaman's duties.

(b) The classifications authorized for endorsement as able seaman are the following:

(1) able seaman—unlimited.

(2) able seaman—limited.

(3) able seaman—special.

(4) able seaman—offshore supply vessels.

(5) able seaman—sail.

§ 7307. Able seamen—unlimited

The required service for the endorsement of able seaman—unlimited, qualified for unlimited service on a vessel on any waters, is at least 3 years' service on deck on board vessels operating at sea or on the Great Lakes.

§ 7308. Able seamen—limited

The required service for the endorsement of able seaman—limited, qualified for limited service on a vessel on any waters, is at least 18 months' service on deck on board vessels of at least 100 gross tons operating on the oceans or navigable waters of the United States (including the Great Lakes).

§ 7309. Able seamen—special

The required service for the endorsement of able seaman—special, qualified for special service on a vessel on any waters, is at least 12 months' service on deck on board vessels operating on the oceans or the navigable waters of the United States (including the Great Lakes).

§ 7310. Able seamen—offshore supply vessels

For service on a vessel of less than 500 gross tons engaged in support of exploration, exploitation, or production of offshore mineral or energy resources, an individual may be rated as able seaman—offshore supply vessels if the individual has at least 6 months' service on deck on board vessels operating on the oceans or the navigable waters of the United States (including the Great Lakes).

§ 7311. Able seamen—sail

For service on a sailing school vessel on any waters, an individual may be rated as able seaman—sail if the individual has at least 6 months' service on deck on sailing school vessels, oceanographic research vessels powered primarily by sail, or equivalent sailing vessels operating on the oceans or navigable waters of the United States (including the Great Lakes).

§ 7312. Scale of employment

(a) Individuals qualified as able seamen—unlimited under section 7307 of this title may constitute all of the able seamen required on a vessel.

(b) Individuals qualified as able seamen—limited under section 7308 of this title may constitute all of the able seamen required on a vessel of less than 1,600 gross tons or on a vessel operating on the Great Lakes and the Saint Lawrence River as far east as Sept Iles. Individuals qualified as able seamen—limited may constitute not more than 50 percent of the number of able seamen required on board other vessels.

(c) Individuals qualified as able seamen—special under section 7309 of this title may constitute—

(1) all of the able seamen required on a vessel of not more than 500 gross tons or on a seagoing barge or towing vessel; and

(2) not more than 50 percent of the number of able seamen required on board other vessels.

(d) Individuals qualified as able seamen—offshore supply vessels under section 7310 of this title may constitute all of the able seamen required on board a vessel of less than 500 gross tons engaged in support of exploration, exploitation, or production of offshore mineral or energy resources.

(e) When the service of able seaman—limited or able seamen—special is authorized for only a part of the required number of able seamen on board a vessel, the combined percentage of those individuals so qualified may not be greater than 50 percent of the required number.

§ 7313. General requirements for members of engine departments

(a) Classes of endorsement as qualified members of the engine department on vessels of at least 100 gross tons (except vessels operating on rivers or lakes (except the Great Lakes)) may be prescribed by regulation.

(b) The ratings of wiper and coal passer are entry ratings and are not ratings as qualified members of the engine department.

(c) An applicant for an endorsement as qualified member of the engine department must provide satisfactory proof that the applicant—

(1) has the service required by section 7314 of this title;

(2) is qualified professionally as demonstrated by an applicable examination; and

(3) is qualified as to sight, hearing, and physical condition to perform the member's duties.

§ 7314. Service requirements for qualified members of engine departments

To qualify for an endorsement as qualified member of the engine department, an applicant must provide proof that the applicant has 6 months' service in the related entry rating as described in section 7313(b) of this title.

§ 7315. Training

(a) Graduation from a nautical school vessel approved under law and regulation may be substituted for the service requirements under section 7307 or 7314 of this title.

(b) The satisfactory completion of other courses of instruction approved by the Secretary may be substituted for not more than one-third of the required service on deck at sea under sections 7307-7311 of this title.

(c) The satisfactory completion of other courses of instruction approved by the Secretary may be substituted for not more than one-half of the required service at sea under section 7314 of this title.

§ 7316. Lifeboatmen

To qualify for an endorsement as lifeboatman, an applicant must provide satisfactory proof that the applicant—

(1) has the service or training required by regulation;

(2) is qualified professionally as demonstrated by examination; and

(3) is qualified professionally by actual demonstration.

§ 7317. Tankermen

(a) The Secretary shall prescribe procedures, standards, and qualifications for the issuance of certificates or endorsements as tankerman, stating the types of oil or hazardous material that can be handled with safety to the vessel and the marine environment.

(b) An endorsement as tankerman shall indicate the grades or types of cargo the holder is qualified and authorized to handle with safety on board vessels.

§ 7318. Radiotelegraph operators on Great Lakes

(a) A radiotelegraph operator on the Great Lakes only shall have a first-class or second-class radiotelegraph operator's license issued by the Federal Communications Commission.

(b) An endorsement as radiotelegraph operator on the Great Lakes only ends if the holder ceases to hold the license issued by the Commission.

§ 7319. Records of merchant mariners' documents

The Secretary shall maintain records on each merchant mariner's document issued, including the name and address of the seaman to whom issued and the next of kin of the seaman. The records are not open to general or public inspection.

CHAPTER 75—GENERAL PROCEDURES FOR LICENSING, CERTIFICATION, AND DOCUMENTATION

Sec.

7501. Duplicates.

7502. Records.

7503. Dangerous drugs as grounds for denial.

§ 7501. Duplicates

(a) If a license, certificate, or document issued under this part is lost as a result of a marine casualty, the holder shall be supplied with a duplicate without cost.

(b) For any other loss, the seaman may obtain a duplicate on payment of reasonable costs prescribed by regulation by the Secretary.

§ 7502. Records

The Secretary shall maintain records on the issuances, denials, suspensions, and revocations of licenses, certificates of registry, merchant mariners' documents, and endorsements on those licenses, certificates, and documents.

§ 7503. Dangerous drugs as grounds for denial

(a) In this section, "dangerous drug" means a narcotic drug, controlled substance, and marihuana (as defined in section 102 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802)).

(b) A license, certificate, or document authorized to be issued under this part may be denied to an individual who—

(1) within 10 years before applying for the license, certificate, or document, has been convicted of violating a dangerous drug law of the United States or of a State; or

(2) when applying, has ever been a user of, or addicted to, a dangerous drug unless the individual provides satisfactory proof that the individual is cured.

CHAPTER 77—SUSPENSION AND REVOCATION

Sec.
7701. General.
7702. Administrative procedure.
7703. Bases for suspension or revocation.
7704. Dangerous drugs as grounds for revocation.
7705. Subpenas and oaths.

§ 7701. General

(a) The purpose of suspension and revocation proceedings is to promote safety at sea.

(b) Licenses, certificates of registry, and merchant mariners' documents may be suspended or revoked for acts described in section 7703 of this title.

(c) When a license, certificate of registry, or merchant mariner's document has been revoked under this chapter, the former holder may be issued a new license, certificate, or document only after it has been decided, under regulations prescribed by the Secretary, that the issuance is compatible with the requirements of good discipline and safety at sea.

(d) The Secretary may prescribe regulations to carry out this chapter.

§ 7702. Administrative procedure

(a) Sections 551-559 of title 5 apply to each hearing under this chapter about suspending or revoking a license, certificate of registry, or merchant mariners' document.

(b) The individual whose license, certificate of registry, or merchant mariner's document has been suspended or revoked under this chapter may appeal, within 30 days, the suspension or revocation to the Secretary.

§ 7703. Bases for suspension or revocation

A license, certificate, or merchant mariner's document issued by the Secretary may be suspended or revoked if, when acting under the authority of that license, certificate, or document, the holder—

(1) has violated or failed to comply with this subtitle, a regulation prescribed under this subtitle, or any other law or regulation intended to promote marine safety or to protect navigable waters.

(2) has committed an act of incompetence, misconduct, or negligence.

§ 7704. Dangerous drugs as grounds for revocation

(a) In this section, "dangerous drug" means a narcotic drug, controlled substance, and marihuana (as defined in section 102 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802)).

(b) If it is shown at a hearing under this chapter that a holder of a license, certificate of registry, or document issued under this part, within 10 years before the beginning of the proceedings, has been convicted of violating a dangerous drug law of the United States or of a State, the license, certificate, or document shall be revoked.

(c) If it is shown that a holder has been a user of, or addicted to, a dangerous drug, the license, certificate, or document shall be revoked unless the holder provides satisfactory proof that the holder is cured.

§ 7705. Subpenas and oaths

(a) An official designated to investigate or preside at a hearing on matters that are grounds for suspension or revocation of licenses, certificates, and documents may administer oaths and issue subpenas to compel the attendance and testimony of witnesses and the production of records or other evidence during investigations and at hearings.

(b) The jurisdictional limits of a subpena issued under this section are the same as, and are enforceable in the same manner as, subpenas issued under chapter 63 of this title.

PART F—MANNING OF VESSELS

CHAPTER 81—GENERAL

Sec.
8101. Complement of inspected vessels.
8102. Watchmen.
8103. Citizenship and Naval Reserve requirements.
8104. Watches.
8105. Regulations.

§ 8101. Complement of inspected vessels

(a) The certificate of inspection issued to a vessel under part B of this subtitle shall state the complement of licensed individuals and crew (including lifeboatmen) considered by the Secretary to be necessary for safe operation. A manning requirement imposed on a sailing school vessel shall consider the participation of sailing school instructors and sailing school students in the operation of that vessel.

(b) The Secretary may modify the complement, by endorsement on the certificate, for reasons of changed conditions or employment.

(c) A requirement made under this section by an authorized official may be appealed to the Secretary under prescribed regulations.

(d) A vessel to which this section applies may not be operated without having in its service the complement required in the certificate of inspection.

(e) When a vessel is deprived of the service of a member of its complement without the consent, fault, or collusion of the owner, charterer, managing operator, agent, master, or individual in charge of the vessel, the master shall engage, if obtainable, a number of members equal to the number of those of whose services the master has been deprived. The replacements must be of the same or a higher grade or rating than those whose places they fill. If the master finds the vessel is sufficiently manned for the voyage, and replacements are not available to fill all the vacancies, the vessel may proceed on its voyage. Within 12 hours after the vessel arrives at its destination, the master shall report in writing to the Secretary the cause of each deficiency in the complement. A master failing to make the report is liable to the United States Government for a civil penalty of $50 for each deficiency.

(f) The owner, charterer, or managing operator of a vessel not manned as required by this section is liable to the Government for a civil penalty of $100, or, for a deficiency of a licensed individual, a penalty of $500.

(g) A person may not employ an individual as, and an individual may not serve as, a master, mate, engineer, radio officer, or pilot of a vessel to which this part or part B of this subtitle applies if the individual is not licensed by the Secretary. A person (including an individual) violating this subsection is liable to the Government for a civil penalty of not more than $500. Each day of a continuing violation is a separate offense.

(h) The owner, charterer, or managing operator of a freight vessel of less than 100 gross tons, a small passenger vessel, or a sailing school vessel not manned as required by this section is liable to the Government for a civil penalty of $1,000. The vessel also is liable in rem for the penalty.

§ 8102. Watchmen

The owner, charterer, or managing operator of a vessel carrying passengers during the nighttime shall keep a suitable number of watchmen in the vicinity of the cabins or staterooms and on each deck to guard against and give alarm in case of a fire or other danger. An owner, charterer, or managing operator failing to provide watchmen required by this section is liable to the United States Government for a civil penalty of $1,000.

§ 8103. Citizenship and Naval Reserve requirements

(a) Only a citizen of the United States may serve as master, chief engineer, or officer in charge of a deck watch or engineering watch on a documented vessel.

(b) On each departure of a documented vessel (except a fishing or whaling vessel or yacht) from a port of the United States, 75 percent of the seamen (excluding licensed individuals) must be citizens of the United States. If the Secretary decides, on investigation, that qualified citizen seamen are not available, the Secretary may reduce the percentage.

(c) On each departure from the United States of a vessel (except a passenger vessel) for which a construction or operating differential subsidy has been granted, all of the seamen of the vessel must be citizens of the United States.

(d)(1) On each departure from the United States of a passenger vessel for which a construction or operating differential subsidy has been granted, at least 90 percent of the entire complement (including licensed individuals) must be citizens of the United States.

(2) An individual not required by this subsection to be a citizen of the United States may be engaged only if the individual has a declaration of intention to become a citizen of the United States or other evidence of admission to the United States for permanent residence. An alien may be employed only in the steward's department of the passenger vessel.

(e) If a documented vessel is deprived for any reason of the services of an individual (except the master) when on a foreign voyage and a vacancy consequently occurs, until the vessel's first return to a United States port at which a replacement who is a citizen of the United States can be obtained, an individual not a citizen of the United States may serve in—

(1) the vacancy; or

(2) a vacancy resulting from the promotion of another individual to fill the original vacancy.

(f) A person employing an individual in violation of this section or a regulation pre-

scribed under this section is liable to the United States Government for a civil penalty of $500 for each individual so employed.

(g) A deck or engineer officer employed on a vessel on which an operating differential subsidy is paid, or employed on a vessel (except a vessel of the Coast Guard or Saint Lawrence Seaway Development Corporation) owned or operated by the Department of Transportation or by a corporation organized or controlled by the Department, if eligible, shall be a member of the Naval Reserve.

(h) The President may—

(1) suspend any part of this section during a proclaimed national emergency; and

(2) when the needs of commerce require, suspend as far and for a period the President considers desirable, subsection (a) of this section for crews of vessels of the United States documented for foreign trade.

§ 8104. Watches

(a) An owner, charterer, managing operator, master, individual in charge, or other person having authority may permit an officer to take charge of the deck watch on a vessel when leaving or immediately after leaving port only if the officer has been off duty for at least 6 hours within the 12 hours immediately before the time of leaving.

(b) On an oceangoing or coastwise vessel of not more than 100 gross tons, a licensed individual may not be required to work more than 9 of 24 hours when in port, including the date of arrival, or more than 12 of 24 hours at sea, except in an emergency when life or property are endangered.

(c) On a towing vessel (except a towing vessel operated only for fishing or engaged in salvage operations) operating on the Great Lakes, harbors of the Great Lakes, and connecting or tributary waters between Gary, Indiana, Duluth, Minnesota, Niagara Falls, New York, and Ogdensburg, New York, a licensed individual or seaman in the deck or engine department may not be required or permitted to work more than 8 hours in one day, except in an emergency when life or property are endangered.

(d) On a merchant vessel of more than 100 gross tons (except a vessel only operating on rivers, harbors, lakes (except the Great Lakes), bays, sounds, bayous, and canals, a fishing or whaling vessel, yacht, or vessel engaged in salvage operations), the licensed individuals, sailors, coal passers, firemen, oilers, and water tenders shall be divided, when at sea, into at least 3 watches, and shall be kept on duty successively to perform ordinary work incident to the operation and management of the vessel. The requirement of this subsection applies to radio officers only when at least 3 radio officers are employed. A licensed individual or seaman in the deck or engine department may not be required to work more than 8 hours in one day.

(e) On a vessel designated by subsections (c) and (d) of this section—

(1) a seaman may not be—

(A) engaged to work alternately in the deck and engine departments; or

(B) required to work in the engine department if engaged for deck department duty or required to work in the deck department if engaged for engine department duty;

(2) a seaman may not be required to do unnecessary work on Sundays, New Year's Day, July 4th, Labor Day, Thanksgiving Day, or Christmas Day, when the vessel is in a safe harbor, but this clause does not prevent dispatch of a vessel on a voyage; and

(3) when the vessel is in a safe harbor, 8 hours (including anchor watch) is a day's work.

(f) Subsections (d) and (e) of this section do not limit the authority of the master or other officer or the obedience of the seamen when, in the judgment of the master or other officer, any part of the crew is needed for—

(1) maneuvering, shifting the berth of, mooring, or unmooring, the vessel;

(2) performing work necessary for the safety of the vessel, or the vessel's passengers, crew, or cargo;

(3) saving life on board another vessel in jeopardy; or

(4) performing fire, lifeboat, or other drills in port or at sea.

(g) On a towing vessel (except a vessel to which subsection (c) of this section applies), an offshore supply vessel, or a barge to which this section applies, that is engaged on a voyage of less than 600 miles, the licensed individuals and crewmembers (except the coal passers, firemen, oilers, and water tenders) may be divided, when at sea, into at least 2 watches.

(h) On a vessel to which section 8904 of this title applies, an individual licensed to operate a towing vessel may not work for more than 12 hours in a consecutive 24-hour period except in an emergency.

(i) A person violating subsection (a) or (b) of this section is liable to the United States Government for a civil penalty of $100.

(j) The owner, charterer, or managing operator of a vessel on which a violation of subsection (c), (d), (e), of (h) of this section occurs is liable to the Government for a civil penalty of $500. The seaman is entitled to discharge from the vessel and receipt of wages earned.

§ 8105. Regulations

The Secretary may prescribe regulations to carry out this part.

CHAPTER 83—MASTERS AND OFFICERS

Sec.
8301. Minimum number of licensed individuals.
8302. Staff department.
8303. Service under licenses issued without examination.
8304. Implementing the Officers' Competency Certificates Convention, 1936.

§ 8301. Minimum number of licensed individuals

(a) Except as provided in chapter 89 of this title and except for a vessel operating only on rivers, harbors, lakes, bays, sounds, bayous, and canals, a vessel to which part B of this subtitle applies shall engage a minimum of licensed individuals as follows:

(1) Each of those vessels shall have a licensed master.

(2) A vessel of at least 1,000 gross tons and propelled by machinery shall have 3 licensed mates. However, if the vessel is on a voyage of less than 400 miles from port of departure to port of final destination, it shall have 2 licensed mates.

(3) A vessel of at least 200 gross tons but less than 1,000 gross tons and propelled by machinery shall have 2 licensed mates.

(4) A vessel of at least 100 gross tons but less than 200 gross tons and propelled by machinery shall have one licensed mate. However, if the vessel is on a voyage of more than 24 hours, it shall have 2 licensed mates.

(5) A freight vessel or a passenger vessel of at least 300 gross tons and propelled by machinery shall have a licensed engineer.

(b) An offshore supply vessel on a voyage of less than 600 miles shall have a licensed mate. However, if the vessel is on a voyage of at least 600 miles, the vessel shall have 2 licensed mates. An offshore supply vessel of more than 200 gross tons may not be operated without a licensed engineer.

(c) Subsection (a) of this section does not apply to a fishing or whaling vessel or a yacht.

(d) The Secretary may—

(1) suspend any part of this chapter during a national emergency proclaimed by the President; *and*

(2) increase the number of licensed individuals on a vessel to which this chapter applies if, in the Secretary's judgment, the vessel is not sufficiently manned for safe operation.

§ 8302. Staff department

(a) This section applies to a vessel of the United States except—

(1) a fishing or whaling vessel or a yacht;

(2) a vessel operated only on bays, sounds, inland waters, and lakes (except the Great Lakes); and

(3) a vessel ferrying passengers and cars on the Great Lakes.

(b) The staff department on a vessel is a separate and independent department. It consists of individuals registered under section 7101 of this title, clerks and individuals assigned to the senior registered medical doctor.

(c) The staff department is composed of a medical division and a purser's division. The officer in charge of each division is responsible only to the master. The senior registered medical doctor is in charge of the medical division. The senior registered purser is in charge of the purser's division.

(d) The officer in charge of the purser's division of the staff department on an oceangoing passenger vessel licensed to carry more than 100 passengers shall be a registered chief purser. When more than 3 persons are employed in the purser's division of that vessel, there also shall be at least one registered senior assistant purser and one registered junior assistant purser.

(e) A person may not employ an individual to serve in, and an individual may not serve in, a grade of staff officer on a vessel, when that staff officer is required by this section to be registered, if the individual does not have a certificate of registry as staff officer in that grade. A person (including an individual) violating this subsection is liable to the United States Government for a civil penalty of $100. However, if a registered staff officer is not available at the time of sailing, the vessel may sail with an unregistered staff officer or without a staff officer.

(f) A staff officer may not be included in a vessel's certificate of inspection.

(g) A registered staff officer serving under this section who is a member of the Naval Reserve may wear on the officer's uniform special distinguishing insignia prescribed by the Secretary of the Navy.

(h) The uniform stripes, decoration, or other insignia worn by a staff officer shall be of gold braid or woven gold or silver material. A crewmember (except a staff officer) may not wear any uniform with a staff officer's identifying insignia.

§ 8303. Service under licenses issued without examination

An individual issued a license without examination before October 29, 1941, to serve

as master, mate, or engineer on a vessel not subject to inspection under part B of this subtitle, may not serve under authority of that license on a vessel that is subject to inspection under part B.

§ 8304. Implementing the Officers' Competency Certificates Convention, 1936

(a) In this section, "high seas" means waters seaward of the Boundary Line.

(b) The Officers' Competency Certificates Convention, 1936 (International Labor Organization Draft Convention Numbered 53, on the minimum requirement of professional capacity for masters and officers on board merchant vessels), as ratified by the President on September 1, 1938, with understandings appended, and this section apply to a documented vessel operating on the high seas except—

(1) a public vessel;

(2) a wooden vessel of primitive build, such as a dhow or junk;

(3) a barge; and

(4) a vessel of less than 200 gross tons.

(c) A person may not engage or employ an individual to serve as, and an individual may not serve as, a master, mate, or engineer on a vessel to which this section applies, if the individual does not have a license issued under section 7101 of this title authorizing service in the capacity in which the individual is to be engaged or employed.

(d) A person (including an individual) violating this section is liable to the United States Government for a civil penalty of $100.

(e) A license issued to an individual to whom this section applies is a certificate of competency.

(f) A designated official may detain a vessel to which this section applies (by written order served on the owner, charterer, managing operator, agent, master, or individual in charge of the vessel) when there is reason to believe that the vessel is about to proceed from a port of the United States to the high seas in violation of this section or a provision of the convention described in subsection (b) of this section. The vessel may be detained until the vessel complies with this section. Clearance may not be granted to a vessel ordered detained under this section.

(g) A foreign vessel to which the convention described in subsection (b) of this section applies, on the navigable waters of the United States, is subject to detention under subsection (f) of this section, and to an examination that may be necessary to decide if there is compliance with the convention.

(h) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel detained under subsection (f) or (g) of this section may appeal the order within 5 days as provided by regulation.

(i) An officer or employee of the Customs Service may be designated to enforce this section.

CHAPTER 85—PILOTS

Sec.

8501. State regulation of pilots.

8502. Federal pilots required.

§ 8501. State regulation of pilots

(a) Except as otherwise provided in this part, pilots in the bays, rivers, harbors, and ports of the United States shall be regulated only in conformity with the laws of the States.

(b) The master of a vessel entering or leaving a port on waters that are a boundary between 2 States, and that is required to have a pilot under this section, may employ a pilot licensed or authorized by the laws of either of the 2 States.

(c) A State may not adopt a regulation or provision that discriminates in the rate of pilotage or half-pilotage between vessels sailing between the ports of one State and vessels sailing between the ports of different States, or against vessels because of their means of propulsion, or against public vessels of the United States.

(d) A State may not adopt a regulation or provision that requires a coastwise vessel to take a pilot licensed or authorized by the laws of a State if the vessel—

(1) is propelled by machinery and subject to inspection under part B of this subtitle; or

(2) is subject to inspection under chapter 37 of this title.

(e) Any regulation or provision violating this section is void.

§ 8502. Federal pilots required

(a) A coastwise seagoing vessel, when not sailing on register and when underway (except on the high seas), shall be under the direction and control of a pilot licensed under section 7101 of this title if the vessel is—

(1) propelled by machinery and subject to inspection under part B of this subtitle; or

(2) subject to inspection under chapter 37 of this title.

(b) The fees charged for pilotage by pilots required under this section may not be more than the customary or legally established rates in the States in which the pilotage is performed.

(c) A State or political subdivision of a State may not impose on a pilot licensed under this subtitle an obligation to procure a State or other license, or adopt any other regulation that will impede the pilot in the performance of the pilot's duties under the laws of the United States.

(d) A State or political subdivision of a State may not levy pilot charges on a vessel lawfully piloted by a pilot required under this section.

(e) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of $500. The vessel also is liable in rem for the penalty.

(f) An individual serving as a pilot without having a license required by this section or a regulation prescribed under this section is liable to the Government for a civil penalty of $500.

CHAPTER 87—UNLICENSED PERSONNEL

Sec.

8701. Merchant mariners' documents required.

8702. Certain crew requirements.

8703. Tankermen on tank vessels.

§ 8701. Merchant mariners' documents required

(a) This section applies to a merchant vessel of at least 100 gross tons except—

(1) a vessel operating only on rivers and lakes (except the Great Lakes);

(2) a barge (except a seagoing barge or a barge to which chapter 37 of this title applies);

(3) a fishing or whaling vessel or a yacht;

(4) a sailing school vessel with respect to sailing school instructors and sailing school students; and

(5) an oceanographic research vessel with respect to scientific personnel.

(b) A person may not engage or employ an individual, and an individual may not serve, on board a vessel to which this section applies if the individual does not have a merchant mariner's document issued to the individual under section 7302 of this title. Except for an individual required to be licensed or registered under this part, the document must authorize service in the capacity for which the holder of the document is engaged or employed.

(c) On a vessel to which section 10306 or 10503 of this title does not apply, an individual required by this section to hold a merchant mariner's document must exhibit it to the master of the vessel before the individual may be employed.

(d) A person (including an individual) violating this section is liable to the United States Government for a civil penalty of $500.

§ 8702. Certain crew requirements

(a) This section applies to a vessel of at least 100 gross tons except—

(1) a vessel operating only on rivers and lakes (except the Great Lakes);

(2) a barge (except a seagoing barge or a barge to which chapter 37 of this title applies);

(3) a fishing or whaling vessel or a yacht;

(4) a sailing school vessel with respect to sailing school instructors and sailing school students; and

(5) an oceanographic research vessel with respect to scientific personnel.

(b) A vessel may depart from a port of the United States only if at least—

(1) 75 percent of the crew in each department on board is able to understand any order spoken by the officers, and

(2) 65 percent of the deck crew (excluding licensed individuals) have merchant mariners' documents endorsed for a rating of at least able seaman, except that this percentage may be reduced to 50 percent on a vessel permitted under section 8104 of this title to maintain a 2-watch system.

(c) An able seaman is not required on a towing vessel operating on bays and sounds connected directly with the seas.

(d) An individual having a rating of less than able seaman may not be permitted at the wheel in ports, harbors, and other waters subject to congested vessel traffic, or under conditions of reduced visibility, adverse weather, or other hazardous circumstances.

(e) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of $500.

§ 8703. Tankermen on tank vessels

(a) A vessel of the United States to which chapter 37 of this title applies, that has on board oil or hazardous material in bulk as cargo or cargo residue, shall have a specified number of the crew certified as tankermen as required by the Secretary. This requirement shall be noted on the certificate of inspection issued to the vessel.

(b) The Secretary shall prescribe procedures, standards, and qualifications for the issuance of certificates as tankermen, stating the types of oil or hazardous material that can be handled with safety to the vessel and the marine environment.

(c) A vessel to which section 3702(b) of this title applies shall have on board as a crewmember in charge of the transfer operation an individual certified as a tankerman (qualified for the grade of fuel transferred),

unless a master, mate, pilot, engineer, or operator licensed under section 7101 of this title is present in charge of the transfer. If the vessel does not have that individual on board, chapter 37 of this title applies to the vessel.

CHAPTER 89—SMALL VESSEL MANNING

Sec.
8901. Freight vessels.
8902. Small passenger vessels.
8903. Uninspected passenger vessels.
8904. Towing vessels.
8905. Exemptions.
8906. Penalty.

§ 8901. Freight vessels

A freight vessel of less than 100 gross tons shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.

§ 8902. Small passenger vessels

A small passenger vessel shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.

§ 8903. Uninspected passenger vessels

An uninspected passenger vessel shall be operated by an individual licensed by the Secretary to operate that type of vessel, under prescribed regulations.

§ 8904. Towing vessels

A towing vessel that is at least 26 feet in length measured from end to end over the deck (exluding sheer), shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.

§ 8905. Exemptions

(a) Section 8903 of this title applies to a recreational vessel operated in dealer demonstrations only if the Secretary decides that the application of section 8903 is necessary for recreational vessel safety under section 4302(d) of this title.

(b) Section 8904 of this title does not apply to a vessel of less than 200 gross tons engaged in the offshore mineral and oil industry if the vessel has offshore mineral and oil industry sites or equipment as its ultimate destination or place of departure.

§ 8906. Penalty

An owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $1,000. The vessel also is liable in rem for the penalty.

CHAPTER 91—TANK VESSEL MANNING STANDARDS

Sec.
9101. Standards for foreign tank vessels.
9102. Standards for tank vessels of the United States.

§ 9101. Standards for foreign tank vessels

(a) The Secretary shall—

(1) periodically evaluate the manning, training, qualification, and watchkeeping standards prescribed by the certificating country of a foreign vessel to which chapter 37 of this title applies, that operates on the navigable waters of the United States and transfers oil or hazardous material in a port or place under the jurisdiction of the United States; and

(2) after each evaluation made under clause (1) of this subsection, decide whether the foreign country, whose system for licensing and certification of seamen was evaluated, has standards that are equivalent to or more stringent than United States standards or international standards accepted by the United States.

(b) A foreign vessel to which chapter 37 of this title applies that has on board oil or hazardous material in bulk as cargo or cargo residue shall have a specified number of personnel certified as tankerman or equivalent, as required by the Secretary, when the vessel transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States. The requirement of this subsection shall be noted in applicable terminal operating procedures. A transfer operation may take place only if the crewmember in charge is capable of clearly understanding instructions in English.

§ 9102. Standards for tank vessels of the United States

(a) The Secretary shall prescribe standards for the manning of each vessel of the United States to which chapter 37 of this title applies, related to the duties, qualifications, and training of the officers and crew of the vessel, including standards related to—

(1) instruction in vessel and cargo handling and vessel navigation under normal operating conditions in coastal and confined waters and on the high seas;

(2) instruction in vessel and cargo handling and vessel navigation in emergency situations and under marine casualty or potential casualty conditions;

(3) qualifications for licenses by specific type and size of vessels;

(4) qualifications for licenses by use of simulators for the practice or demonstration of marine-oriented skills;

(5) minimum health and physical fitness criteria for various grades of licenses and certificates;

(6) periodic retraining and special training for upgrading positions, changing vessel type or size, or assuming new responsibilities; and

(7) decisions about licenses and certificates, conditions of licensing or certification, and periods of licensing or certification by reference to experience, amount of training completed, and regular performance testing.

(b) The Secretary shall waive the application of criteria required by subsection (a)(5) of this section for an individual having a license or certificate (including a renewal of the license or certificate) in effect on October 17, 1978. When the waiver is granted, the Secretary may prescribe conditions for the license or certificate and its renewal, as the Secretary decides are reasonable and necessary for the safety of a vessel on which the individual may be employed.

CHAPTER 93—GREAT LAKES PILOTAGE

Sec.
9301. Definitions.
9302. Great Lakes pilots required.
9303. United States registered pilot service.
9304. Pilotage pools.
9305. Agreements with Canada.
9306. State regulation prohibited.
9307. Great Lakes Pilotage Advisory Committee.
9308. Penalties.

§ 9301. Definitions

In this chapter—

(1) "Canadian registered pilot" means an individual (except a regular crewmember of a vessel) who is registered by Canada on the same basis as an individual registered under section 9303 of this title.

(2) "Great Lakes" means Lakes Superior, Michigan, Huron, Erie, and Ontario, their connecting and tributary waters, the Saint Lawrence River as far east as Saint Regis, and adjacent port areas.

(3) "United States registered pilot" means an individual (except a regular crewmember of a vessel) who is registered under section 9303 of this title.

§ 9302. Great Lakes pilots required

(a)(1) Except as provided in subsections (d) and (e) of this section, each vessel of the United States operating on register and each foreign vessel shall engage a United States or Canadian registered pilot for the route being navigated who shall—

(A) in waters of the Great Lakes designated by the President, direct the navigation of the vessel subject to the customary authority of the master; and

(B) in waters of the Great Lakes not designated by the President, be on board and available to direct the navigation of the vessel at the discretion of and subject to the customary authority of the master.

(2) The President shall make water designations under this subsection with regard to the public interest, the effective use of navigable waters, marine safety, and the foreign relations of the United States.

(b) An individual of a vessel licensed for navigation on the Great Lakes under section 7101 of this title, or equivalent provisions of Canadian law, and qualified for the route being navigated, may serve as the pilot required on waters not designated by the President.

(c) The authority extended under subsections (a) and (b) of this section to a Canadian registered pilot or other Canadian licensed officer to serve on certain vessels in United States waters of the Great Lakes shall continue as long as Canada extends reciprocity to United States registered pilots and other individuals licensed by the United States for pilotage service in Canadian waters of the Great Lakes.

(d) A vessel may be operated on the United States waters of the Great Lakes without a United States or Canadian registered pilot when—

(1) the Secretary notifies the master that a registered pilot is not available; or

(2) the vessel or its cargo is in distress or jeopardy.

(e) A Canadian vessel regularly operating on the Great Lakes or between ports on the Great Lakes and the Saint Lawrence River, with only an occasional voyage to ports in the maritime provinces of Canada in the Canadian coastal trade, is exempt from subsections (a) and (b) of this section as long as Canada permits enrolled vessels of the United States to be operated on Canadian waters of the Great Lakes under the direction of individuals licensed under section 7101 of this title.

§ 9303. United States registered pilot service

(a) The Secretary shall prescribe by regulation standards of competency to be met by each applicant for registration under this chapter. An applicant must—

(1) have a license as master, mate, or pilot issued under section 7101 of this title;

(2) have acquired at least 24 months licensed service or equivalent experience on vessels or integrated towing vessels and tows of at least 4,000 gross tons, operating on the Great Lakes or oceans, with a minimum of 6 months of that service or experience having been on the Great Lakes; and

(3) agree that, if appointed as a United States registered pilot, the applicant will be available for service when required.

(b) The Secretary shall issue to each registered pilot under this chapter a certificate of registration describing the areas within which the pilot may serve. The pilot shall carry the certificate when in the service of a vessel.

(c) The Secretary shall prescribe by regulation the duration of validity of registration.

(d) The Secretary may prescribe by regulation the conditions for service by United States registered pilots, including availability for service.

(e) Subject to sections 551-559 of title 5, the Secretary may suspend or revoke a certificate of registration issued under this section if the holder fails to comply with a regulation prescribed under this chapter. Suspension or revocation of the holder's license under chapter 77 of this title includes the holder's certificate of registration.

(f) The Secretary shall prescribe by regulation rates and charges for pilotage services, giving consideration to the public interest and the costs of providing the services.

§ 9304. Pilotage pools

(a) The Secretary may authorize the formation of a pool by a voluntary association of United States registered pilots to provide for efficient dispatching of vessels and rendering of pilotage services.

(b) For pilotage pools, the Secretary may—

(1) limit the number of the pools;

(2) prescribe regulations for their operation and administration;

(3) prescribe a uniform system of accounts;

(4) perform audits and inspections; and

(5) require coordination on a reciprocal basis with similar pool arrangements authorized by the appropriate agency of Canada.

§ 9305. Agreements with Canada

To provide for a coordinated system of pilotage service on the Great Lakes, the Secretary, subject to the concurrence of the Secretary of State, may make agreements with the appropriate agency of Canada to—

(1) fix the number of pilots to be registered in each country;

(2) provide for participation on an equitable basis;

(3) prescribe joint or identical rates and charges;

(4) coordinate pool operations; and

(5) establish conditions for services by registered pilots.

§ 9306. State regulation prohibited

A State or political subdivision of a State may not regulate or impose any requirement on pilotage on the Great Lakes.

§ 9307. Great Lakes Pilotage Advisory Committee

(a) The Secretary may establish a Great Lakes Pilotage Advisory Committee. The Committee—

(1) may review proposed Great Lakes pilotage regulations and policies and make recommendations to the Secretary that the Committee considers appropriate;

(2) may make available to Congress recommendations that the Committee makes to the Secretary; and

(3) shall meet at the call of the Secretary.

(b) The Committee shall consist of 3 members appointed by the Secretary each of whom has at least 5 years practical experience in maritime operations. The term of each member is for a period of not more than 5 years, specified by the Secretary. Before filling a position on the Committee, the Secretary shall publish a notice in the Federal Register soliciting nominations for membership on the Committee.

(c) When attending meetings or otherwise serving at the request of the Secretary, a member of the Committee (except a member regularly employed by the United States Government) may be paid at a rate of not more than $75 a day. When serving away from home or regular place of business, the member may be allowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5 for individuals employed intermittently in the Government service.

§ 9308. Penalties

(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel knowingly allowing the vessel to be operated in violation of section 9302 of this title is liable to the United States Government for a civil penalty of $500 for each day during which the vessel is in violation. The vessel also is liable in rem for the penalty.

(b) An individual who directs the navigation of a vessel in violation of section 9302 of this title is liable to the Government for a civil penalty of $500 for each day during which the violation occurs.

(c) A person violating a regulation prescribed under section 9303 of this title is liable to the Government for a civil penalty of $500.

PART G—MERCHANT SEAMEN PROTECTION AND RELIEF

CHAPTER 101—GENERAL

Sec.
10101. Definitions.
10102. Designations and duties of shipping commissioners.
10103. Reports.
10104. Regulations.

§ 10101. Definitions

In this part—

(1) "master" means the individual having command of a vessel owned by a citizen of the United States.

(2) "owner" means the person to whom the vessel belongs.

(3) "seaman" means an individual (except scientific personnel, a sailing school instructor, or a sailing school student) engaged or employed in any capacity on board a vessel owned by a citizen of the United States.

§ 10102. Designations and duties of shipping commissioners

(a) The Secretary shall designate officers, employees, and members of the Coast Guard to act as shipping commissioners under this part. The Secretary may designate officers and employees of the Customs Service as shipping commissioners.

(b) The general duties of shipping commissioners are to supervise the engagement and discharge of seamen.

(c) The owner, charterer, managing operator, agent, or master of the vessel shall perform the duties of shipping commissioner when a shipping commissioner is not available.

§ 10103. Reports

(a) A master of a vessel to which section 8701(a) of this title applies, who engages or discharges a seaman without a shipping commissioner being present, shall submit reports in the form, content, and manner of filing as prescribed by regulation, to ensure compliance with laws related to manning and the engagement and discharge of seamen.

(b) This section does not apply to a ferry or towing vessel operated in connection with a ferry operation, employed only in trades other than with foreign ports, lakes, bays, sounds, bayous, canals, or harbors.

§ 10104. Regulations

The Secretary may prescribe regulations to carry out this part.

CHAPTER 103—FOREIGN AND INTERCOASTAL VOYAGES

Sec.
10301. Application.
10302. Shipping articles agreements.
10303. Provisions.
10304. Form of agreement.
10305. Manner of signing agreement.
10306. Exhibiting merchant mariners' documents.
10307. Posting agreements.
10308. Foreign engagements.
10309. Engaging seamen to replace those lost by desertion or casualty.
10310. Discharge.
10311. Certificates of discharge.
10312. Settlements on discharge.
10313. Wages.
10314. Advances.
10315. Allotments.
10316. Trusts.
10317. Loss of lien and right to wages.
10318. Wages on discharge in foreign ports.
10319. Costs of a criminal conviction.
10320. Records of seamen.
10321. General penalty.

§ 10301. Application

(a) Except as otherwise specifically provided, this chapter applies to a vessel of the United States—

(1) on a voyage between a port in the United States and a port in a foreign country (except a port in Canada, Mexico, or the West Indies); or

(2) of at least 75 gross tons on a voyage between a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean.

(b) This chapter does not apply to a vessel on which the seamen are entitled by custom or agreement to share in the profit or result of a voyage.

(c) Unless otherwise provided, this chapter does not apply to a foreign vessel.

§ 10302. Shipping articles agreements

(a) Before proceeding on a voyage, the master of a vessel to which this chapter applies shall make a shipping articles agreement in writing with each seaman in the crew.

(b) The agreement shall contain the following:

(1) the nature, and, as far as practicable, the duration of the intended voyage, and the port or country in which the voyage is to end.

(2) the number and description of the crew and the capacity in which each seaman is to be engaged.

(3) the time at which each seaman is to be on board to begin work.

(4) the amount of wages each seaman is to receive.

(5) regulations about conduct on board, and information on fines, short allowance of provisions, and other punishment for misconduct provided by law.

(6) a scale of the provisions that are to be provided each seaman.

(7) any stipulation in reference to advances and allotments of wages.

(8) other matters not contrary to law.

§ 10303. Provisions

(a) A seaman shall be served at least 3 meals a day that total at least 3,100 calories, including adequate water and adequate protein, vitamins, and minerals in accordance with the United States Recommended Daily Allowances.

(b) The text of subsection (a) of this section shall be included in the agreement required by section 10302 of this title. A copy of the text also shall be posted in a conspicuous place in the galley and forecastle of each vessel.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10304. Form of agreement

The form of the agreement required by section 10302 of this title shall be in substance as follows:

UNITED STATES OF AMERICA

(Date and place of first signature of agreement):

It is agreed between the master and seamen of the , of which is at present master, or whoever shall go for master, now bound from the port of to , (here the voyage is to be described, and the places named at which the vessel is to touch, or if that cannot be done, the general nature and probable length of the voyage is to be stated).

The seamen agree to conduct themselves in an orderly, faithful, honest, and sober manner, and to be at all times diligent in their respective duties, and to be obedient to the lawful commands of the master, or of an individual who lawfully succeeds the master, and of their superior officers in everything related to the vessel, and the stores and cargo of the vessel, whether on board, in boats, or on shore. In consideration of this service by the seamen to be performed, the master agrees to pay the crew, as wages, the amounts beside their names respectively expressed, and to supply them with provisions according to the annexed scale.

It is agreed that any embezzlement, or willful or negligent destruction of any part of the vessel's cargo or stores, shall be made good to the owner out of the wages of the person guilty of the embezzlement or destruction.

If an individual holds himself or herself out as qualified for a duty which the individual proves incompetent to perform, the individual's wages shall be reduced in proportion to the incompetency.

It also is agreed that if a seaman considers himself or herself to be aggrieved by any breach of this agreement or otherwise, the seaman shall present the complaint to the master or officer in charge of the vessel, in a quiet and orderly manner, who shall take steps that the case requires.

It also is agreed that (here any other stipulations may be inserted to which the parties agree, and that are not contrary to law).

In witness whereof, the parties have subscribed their names to this agreement, on the dates beside their respective signatures.

Signed by , master, on the day of , nineteen hundred and .

Signature of seaman	Time of service:
Birthplace	Months
Age	Days
Height:	Hospital money
Feet	Whole wages
Inches	Wages due
Description:	Place and time of entry
Complexion	Time at which seaman is to be on board
Hair	In what capacity
Wages each month	Shipping commissioner's signature or initials
Wages each voyage	Allotment payable to
Advance wages	Conduct qualifications
Amount of monthly allotment	

NOTE.—In the place for signature and descriptions of individuals engaged after the first departure of the vessel, the entries are to be made as above, except that the signature of the consul or vice consul, customs officer, or witness before whom the individual is engaged, is to be entered.

§ 10305. Manner of signing agreement

(a) The agreement required by section 10302 of this title shall be signed—

(1) first by the master and dated at that time, after which each seaman shall sign; and

(2) in the presence of a shipping commissioner.

(b) When the crew is first engaged, the agreement shall be signed in duplicate. One of the copies shall be retained by the shipping commissioner. The other copy shall contain space for the description and signatures of seamen engaged subsequent to the first making of the agreement, and shall be delivered to the master.

(c) An agreement signed before a shipping commissioner shall be acknowledged and signed by the commissioner on the agreement in the manner and form prescribed by regulation. The acknowledgment and certification shall include a statement by the commissioner that the seaman—

(1) has read the agreement;

(2) is acquainted with and understands its conditions; and

(3) has signed it freely and voluntarily when sober.

§ 10306. Exhibiting merchant mariners' documents

Before signing the agreement required by section 10302 of this title, each individual required by section 8701 of this title to have a merchant mariner's document shall exhibit to the shipping commissioner a document issued to the individual, appropriately endorsed for the capacity in which the individual is to serve.

§ 10307. Posting agreements

At the beginning of a voyage, the master shall have a legible copy of the agreement required by section 10302 of this title, omitting signatures, exhibited in a part of the vessel accessible to the crew. A master violating this section is liable to the United States Government for a civil penalty of $100.

§ 10308. Foreign engagements

(a) When a seaman is engaged outside the United States, the agreement required by section 10302 of this title shall be signed in the presence of a consular officer. If a consular officer is not available at the port of engagement, the seaman may be engaged, and the agreement shall be signed in the next port at which a consular officer is available.

(b) A master engaging a seaman in violation of this section is liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

§ 10309. Engaging seamen to replace those lost by desertion or casualty

(a) If a desertion or casualty results in the loss of at least one seaman, the master shall engage, if obtainable, a number equal to the number of seamen of whose services the master has been deprived. The new seaman must have at least the same grade or rating as the seaman whose place the new seaman fills. The master shall report the loss and replacement to a consular officer at the first port at which the master arrives.

(b) The master is liable to the United States Government for a civil penalty of $200 for each report not made. The vessel also is liable in rem for the penalty.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10310. Discharge

A master shall deliver to a seaman or a shipping commissioner a full and true account of the seaman's wages and all deductions at least 48 hours before paying off or discharging the seaman. A master failing to deliver the account is liable to the United States Government for a civil penalty of $50.

§ 10311. Certificates of discharge

(a) On discharging a seaman and paying the seaman's wages, the shipping commissioner shall provide the seaman with a certificate of discharge. The form of the certificate shall be prescribed by regulation. It shall contain—

(1) the name of the seaman;

(2) the citizenship or nationality of the seaman;

(3) the number of the seaman's merchant mariner's document;

(4) the name and official number of the vessel;

(5) the nature of the voyage (foreign, intercoastal, or coastwise);

(6) the propulsion class of the vessel;

(7) the date and place of engagement;

(8) the date and place of discharge; and

(9) the seaman's capacity on the voyage.

(b) The certificate of discharge may not contain a reference about the character or ability of the seaman. The certificate shall be signed by the master, the seaman, and the shipping commissioner as witness.

(c) A certificate of discharge may not be issued if the seaman holds a continuous discharge book. The entries shall be made in the discharge book in the same manner as the entries required by subsection (a) of this section.

(d)(1) A record of each discharge shall be maintained by the Secretary in the manner and location prescribed by regulation. The records may not be open for general or public use or inspection.

(2) A duplicate of a record of discharge shall be issued to a seaman at a cost prescribed by regulation.

(e) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10312. Settlements on discharge

(a) When discharge and settlement are completed, the master or owner and each seaman shall sign the agreement required by section 10302 of this title in the presence of a shipping commissioner. The commissioner shall sign the agreement and retain a copy. When signed, it shall serve as a mutual release of all claims for wages for the voyage.

(b) In a dispute about wages or deductions, if the parties agree in writing to

submit the dispute to a shipping commissioner, the award made by the commissioner is conclusive in any subsequent legal proceeding. A document signed and sealed by a shipping commissioner purporting to be the award is prima facie evidence of the award.

(c) In a proceeding before a shipping commissioner related to the wages, claims, or discharge of a seaman, the shipping commissioner may call on the owner, charterer, managing operator, agent, master, or a seaman to produce logbooks or other documents about a matter in question, and may summon before the commissioner and examine any person on the matter. An owner, charterer, managing operator, agent, master, or seaman failing on summons to produce a document in the possession or control of the owner, charterer, managing operator, agent, master, or seaman, or to give evidence, without reasonable cause, is liable to the United States Government for a civil penalty of $100. On application of the shipping commissioner, the owner, charterer, managing operator, agent, master, or seaman may be punished by a district court of the United States as in other cases of contempt of court.

(d) On request, a certified copy of an agreement may be provided to a party to the agreement and is admissible in evidence with the effect of the original in any subsequent proceeding.

(e) When a seaman has been discharged before a shipping commissioner, only the agreement is evidence of the release or satisfaction of any claim.

(f) If a discharge is made under this section, the shipping commissioner, at the request of the master, shall provide the master with a signed statement of the total amount of wages paid. Between the master and the employer, the statement shall be received as evidence that the master has made the payments as stated.

§ 10313. Wages

(a) A seaman's entitlement to wages and provisions begins when the seaman begins work or when specified in the agreement required by section 10302 of this title for the seaman to begin work or be present on board, whichever is earlier.

(b) Wages are not dependent on the earning of freight by the vessel. When the loss or wreck of the vessel ends the service of a seaman before the end of the period contemplated in the agreement, the seaman is entitled to wages for the period of time actually served. The seaman shall be deemed a destitute seaman under section 11104 of this title. This subsection applies to a fishing or whaling vessel but not a yacht.

(c) When a seaman who has signed an agreement is discharged improperly before the beginning of the voyage or before one month's wages are earned, without the seaman's consent and without the seaman's fault justifying discharge, the seaman is entitled to receive from the master or owner, in addition to wages earned, one month's wages as compensation.

(d) A seaman is not entitled to wages for a period during which the seaman—

(1) unlawfully failed to work when required, after the time fixed by the agreement for the seaman to begin work; or

(2) lawfully was imprisoned for an offense, unless a court hearing the case otherwise directs.

(e) After the beginning of the voyage, a seaman is entitled to receive from the master, on demand, one-half of the balance of wages earned and unpaid at each port at which the vessel loads or delivers cargo during the voyage. A demand may not be made before the expiration of 5 days from the beginning of the voyage, not more than once in 5 days, and not more than once in the same port on the same entry. If a master does not comply with this subsection, the seaman is released from the agreement and is entitled to payment of all wages earned. Notwithstanding a release signed by a seaman under section 10312 of this title, a court having jurisdiction may set aside, for good cause shown, the release and take action that justice requires. This subsection does not apply to a fishing or whaling vessel or a yacht. However, this subsection applies to a vessel taking oysters.

(f) At the end of a voyage, the master shall pay each seaman the balance of wages due the seaman within 24 hours after the cargo has been discharged or within 4 days after the seaman is discharged, whichever is earlier. When a seaman is discharged and final payment of wages is delayed for the period permitted by this subsection, the seaman is entitled at the time of discharge to one-third of the wages due the seaman.

(g) When payment is not made as provided under subsection (f) of this section without sufficient cause, the master or owner shall pay to the seaman 2 days' wages for each day payment is delayed.

(h) Subsections (f) and (g) of this section do not apply to a fishing or whaling vessel or a yacht. However, subsections (f) and (g) apply to a vessel taking oysters.

(i) This section applies to a seaman on a foreign vessel when in a harbor of the United States. The courts are available to the seaman for the enforcement of this section.

§ 10314. Advances

(a)(1) A person may not—

(A) pay a seaman wages in advance of the time when the seaman has earned the wages;

(B) pay advance wages of the seaman to another person; or

(C) make to another person an order, note, or other evidence of indebtedness of the wages, or pay another person, for the engagement of seamen when payment is deducted or to be deducted from the seaman's wage.

(2) A person violating this subsection is liable to the United States Government for a civil penalty of not more than $500. A payment made in violation of this subsection does not relieve the vessel or the master from the duty to pay all wages after they have been earned.

(b) A person demanding or receiving from a seaman or an individual seeking employment as a seaman, remuneration for providing the seaman or individual with employment, is liable to the Government for a civil penalty of not more than $500.

(c) This section applies to a foreign vessel when in waters of the United States. An owner, charterer, managing operator, agent, or master of a foreign vessel violating this section is liable to the Government for the same penalty as an owner, charterer, managing operator, agent, or master of a vessel of the United States for the same violation.

(d) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement required by section 10302 of this title at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(e) This section does not apply to a fishing or whaling vessel or a yacht. However, this section applies to a vessel taking oysters.

§ 10315. Allotments

(a) Under prescribed regulations, a seaman may stipulate as follows in the agreement required by section 10302 of this title for an allotment of any part of the wages the seaman may earn:

(1) to the seaman's grandparents, parents, spouse, sister, brother, or children;

(2) to an agency designated by the Secretary of the Treasury to handle applications for United States savings bonds, to purchase bonds for the seaman; and

(3) for deposits to be made in an account for savings or investment opened by the seaman and maintained in the seaman's name at a savings bank or a savings institution in which the accounts are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

(b) An allotment is valid only if made in writing and signed by and approved by a shipping commissioner. The shipping commissioner shall examine allotments and the parties to them to enforce compliance with the law. Stipulations for allotments made at the beginning of a voyage shall be included in the agreement and shall state the amounts and times of payment and the person to whom payments are to be made.

(c) Only an allotment complying with this section is lawful. A person falsely claiming qualification as an allottee under this section is liable to the United States Government for a civil penalty of not more than $500.

(d) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(e) This section applies to a foreign vessel when in waters of the United States. An owner, charterer, managing operator, agent, or master of a foreign vessel violating this section is liable to the Government for the same penalty as an owner, charterer, managing operator, agent, or master of a vessel of the United States for the same violation.

§ 10316. Trusts

Sections 10314 and 10315 of this title do not prevent an employer from making deductions from the wages of a seaman, with the written consent of the seaman, if—

(1) the deductions are paid into a trust fund established only for the benefit of seamen employed by that employer, and the families and dependents of those seamen (or of those seamen, families, and dependents jointly with other seamen employed by other employers, and the families and dependents of the other seamen); and

(2) the payments are held in trust to provide, from principal or interest, or both, any of the following benefits for those seamen and their families and dependents:

(A) medical or hospital care, or both.

(B) pensions on retirement or death of the seaman.

(C) life insurance.

(D) unemployment benefits.

(E) compensation for illness or injuries resulting from occupational activity.

(F) sickness, accident, and disability compensation.

(G) purchasing insurance to provide any of the benefits specified in this section.

§ 10317. Loss of lien and right to wages

A master or seaman by any agreement other than one provided for in this chapter

may not forfeit the master's or seaman's lien on the vessel or be deprived of a remedy to which the master or seaman otherwise would be entitled for the recovery of wages. A stipulation in an agreement inconsistent with this chapter, or a stipulation by which a seaman consents to abandon a right to wages if the vessel is lost, or to abandon a right the seaman may have or obtain in the nature of salvage, is void.

§ 10318. Wages on discharge in foreign ports

(a) When a master or seaman applies to a consular officer for the discharge of the seaman, the consular officer shall require the master to pay the seaman's wages if it appears that the seaman has carried out the agreement required by section 10302 of this title or otherwise is entitled to be discharged. Then the consular officer shall discharge the seaman. A consular officer shall require the payment of extra wages only as provided in this section or in chapter 109 of this title.

(b) When discharging a seaman, a consular officer who fails to require the payment of the wages due a seaman at the time, and of the extra wages due under subsection (a) of this section, is accountable to the United States Government for the total amount.

(c) A seaman discharged under this section with the consent of the seaman is entitled to wages up to the time of discharge, but not for any additional period.

(d) If the seaman is discharged involuntarily, and it appears that the discharge was not because of neglect of duty, incompetency, or injury incurred on the vessel, the master shall provide the seaman with employment on a vessel agreed to by the seaman or shall provide the seaman with one month's extra wages.

(e) Expenses for the maintenance and return of an ill or injured seaman to the United States shall be paid by the Secretary of State. If a seaman is incapacitated by illness or injury and prompt discharge is necessary, but a personal appearance of the master before a consular officer is impracticable, the master may provide transportation to the seaman to the nearest consular officer for discharge.

(f) A deduction from wages of the seaman is permitted only if the deduction appears in the account of the seaman required to be delivered under section 10310 of this title, except for matters arising after delivery of the account, in which case a supplementary account is required. During a voyage, the master shall record in the official logbook the matters about which deductions are to be made with the amounts of the deductions. The entries shall be made as the matters occur. The master shall produce the official logbook at the time of payment of wages, and also before a competent authority on the hearing of any complaint or question about the payment of wages.

§ 10319. Costs of a criminal conviction

In a proceeding about a seaman's wages, if it is shown that the seaman was convicted during the voyage of an offense by a competent tribunal and sentenced by the tribunal, the court hearing the case may direct that a part of the wages due the seaman, but not more than $15, be applied to reimburse the master for costs properly incurred in procuring the conviction and sentence.

§ 10320. Records of seamen

The Secretary may prescribe regulations for reporting by a master of matters about the engagement, discharge, or service of seamen that may be needed in keeping central records of seamen.

§ 10321. General penalty

The owner, charterer, managing operator, agent, or master of a vessel on which a seaman is carried in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $200 for each seaman carried in violation. The vessel also is liable in rem for the penalty.

CHAPTER 105—COASTWISE VOYAGES

Sec.
10501. Application.
10502. Shipping articles agreements.
10503. Exhibiting merchant mariners' documents.
10504. Wages.
10505. Advances.
10506. Trusts.
10507. Duties of shipping commissioners.
10508. General penalties.
10509. Penalty for failing to begin voyage.

§ 10501. Application

(a) Except for a vessel to which chapter 103 of this title applies, this chapter applies to a vessel of at least 50 gross tons on a voyage between a port in one State and a port in another State (except an adjoining State).

(b) This chapter does not apply to a vessel on which the seamen are entitled by custom or agreement to share in the profit or result of a voyage.

(c) Unless otherwise provided, this chapter does not apply to a foreign vessel.

§ 10502. Shipping articles agreements

(a) Before proceeding on a voyage, the master of a vessel to which this chapter applies shall make a shipping articles agreement in writing with each seaman on board, declaring the nature of the voyage or the period of time for which the seaman is engaged.

(b) The agreement shall include the date and hour on which the seaman must be on board to begin the voyage.

(c) The agreement may not contain a provision on the allotment of wages or a scale of provisions.

§ 10503. Exhibiting merchant mariners' documents

Before signing the agreement required by section 10502 of this title, a seaman required by section 8701 of this title to have a merchant mariner's document shall exhibit to the master a document issued to the seaman and appropriately endorsed for the capacity in which the seaman is to serve.

§ 10504. Wages

(a) After the beginning of a voyage, a seaman is entitled to receive from the master, on demand, one-half of the balance of wages earned and unpaid at each port at which the vessel loads or delivers cargo during the voyage. A demand may not be made before the expiration of 5 days from the beginning of the voyage, not more than once in 5 days, and not more than once in the same port on the same entry. If a master does not comply with this subsection, the seaman is released from the agreement required by section 10502 of this title and is entitled to payment of all wages earned. Notwithstanding a release signed by a seaman under section 10312 of this title, a court having jurisdiction may set aside, for good cause shown, the release and take action that justice requires. This subsection does not apply to a fishing or whaling vessel or a yacht. However, this subsection applies to a vessel taking oysters.

(b) The master shall pay a seaman the balance of wages due the seaman within 2 days after the termination of the agreement required by section 10502 of this title or when the seaman is discharged, whichever is earlier.

(c) When payment is not made as provided under subsection (b) of this section without sufficient cause, the master or owner shall pay to the seaman 2 days' wages for each day payment is delayed.

(d) Subsections (b) and (c) of this section do not apply to a fishing or whaling vessel or a yacht. However, subsections (b) and (c) apply to a vessel taking oysters.

(e) This section applies to a seaman on a foreign vessel when a in harbor of the United States. The courts are available to the seaman for the enforcement of this section.

§ 10505. Advances

(a)(1) A person may not—

(A) pay a seaman wages in advance of the time when the seaman has earned the wages;

(B) pay advance wages of the seaman to another person; or

(C) make to another person an order, note, or other evidence of indebtedness of the wages, or pay another person, for the engagement of seamen when payment is deducted or to be deducted from the seaman's wage.

(2) A person violating this subsection is liable to the United States Government for a civil penalty of not more than $100. A payment made in violation of this subsection does not relieve the vessel or the master from the duty to pay all wages after they have been earned.

(b) A person demanding or receiving from a seaman or an individual seeking employment as a seaman, remuneration for providing the seaman or individual with employment, is liable to the Government for a civil penalty of not more than $500.

(c) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement required by section 10502 of this title at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(d) This section does not apply to a fishing or whaling vessel or a yacht. However, this section applies to a vessel taking oysters.

§ 10506. Trusts

Section 10505 of this title does not prevent an employer from making deductions from the wages of a seaman, with the written consent of the seaman, if—

(1) the deductions are paid into a trust fund established only for the benefit of seamen employed by that employer, and the families and dependents of those seamen (or of those seamen, families, and dependents jointly with other seamen employed by other employers, and the families and dependents of the other seamen); and

(2) the payments are held in trust to provide, from principal or interest, or both, any of the following benefits for those seamen and their families and dependents:

(A) medical or hospital care, or both.

(B) pensions on retirement or death of the seaman.

(C) life insurance.

(D) unemployment benefits.

(E) compensation for illness or injuries resulting from occupational activity.

(F) sickness, accident, and disability compensation.

(G) purchasing insurance to provide any of the benefits specified in this section.

§ 10507. Duties of shipping commissioners

(a) At the option of the owner or master of a vessel to which this chapter applies, a shipping commissioner may engage and discharge the crew.

(b) When a crew is engaged under this section, sections 10302, 10303, 10305, 10307, 10311, 10312, 10313(b)-(f), and 10321, and chapter 107 of this title apply.

§ 10508. General penalties

(a) A master who carries a seaman on a voyage without first making the agreement required by section 10502 of this title shall pay to the seaman the highest wage that was paid for a similar voyage within the 3 months before the time of engagement at the port or place at which the seaman was engaged. A seaman who has not signed an agreement is not bound by the applicable regulations, penalties, or forfeitures.

(b) A master engaging a seaman in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $20. The vessel also is liable in rem for the penalty.

§ 10509. Penalty for failing to begin voyage

(a) A seaman who fails to be on board at the time contained in the agreement required by section 10502 of this title, without having given 24 hours' notice of inability to do so, shall forfeit, for each hour's lateness, one-half of one day's pay to be deducted from the seaman's wages if the lateness is recorded in the official logbook on the date of the violation.

(b) A seaman who does not report at all or subsequently deserts forfeits all wages.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

CHAPTER 107—EFFECTS OF DECEASED SEAMEN

Sec.
10701. Application.
10702. Duties of masters.
10703. Procedures of masters.
10704. Duties of consular officers.
10705. Disposition of money, property, and wages by consular officers.
10706. Seamen dying in the United States.
10707. Delivery to district court.
10708. Sale of property.
10709. Distribution.
10710. Unclaimed money, property, and wages.
10711. Penalties.

§ 10701. Application

(a) Except as otherwise specifically provided, this chapter applies to a vessel on a voyage between—

(1) a port of the United States and a port in a foreign country (except a port in Canada, Mexico, and the West Indies); and

(2) a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean.

(b) This chapter does not apply to a vessel on which a seaman by custom or agreement is entitled to share in the profit or result of a voyage.

(c) This chapter does not apply to a foreign vessel.

§ 10702. Duties of masters

(a) When a seaman dies during a voyage, the master shall take charge of the seaman's money and property. An entry shall be made in the official logbook, signed by the master, the chief mate, and an unlicensed crewmember containing an inventory of the money and property and a statement of the wages due the seaman, with the total of the deductions to be made.

(b) On compliance with this chapter, the master shall obtain a written certificate of compliance from a shipping commissioner. Clearance may be granted to a foreign-bound vessel only when the certificate is received at the office of customs.

§ 10703. Procedures of masters

(a) If the vessel is proceeding to the United States when a seaman dies, the master shall deliver the seaman's money, property, and wages when the agreement required by this part is ended, as provided by regulations prescribed by the Secretary.

(b) If the vessel touches at a foreign port after the death of the seaman, the master shall report to the first available consular officer. The consular officer may require the master to deliver to the officer the money, property, and wages of the seaman. The consular officer shall give the master a receipt for the matters delivered and certify on the agreement the particulars of the delivery. When the agreement ends, the master shall deliver the receipt as prescribed by regulations.

(c) If the consular officer does not require the master to deliver the seaman's money, property, and wages, the officer shall so certify on the agreement, and the master shall dispose of the money, property, and wages as provided under subsection (a) of this section.

(d) A deduction from the account of a deceased seaman is valid only if certified by a proper entry in the official logbook.

§ 10704. Duties of consular officers

When a seaman dies outside the United States leaving money or property not on board a vessel, the consular officer nearest the place at which the money and property is located shall claim and take charge of it.

§ 10705. Disposition of money, property, and wages by consular officers

When money, property, or wages of a deceased seaman comes into possession of a consular officer, the officer may—

(1) sell the property and remit the proceeds and other money or wages of the seaman the officer has received, to the district court of the United States for the district in which the voyage begins or ends; or

(2) deliver the money, property, and wages to the district court.

§ 10706. Seamen dying in the United States

When a seaman dies in the United States and is entitled at death to claim money, property, or wages from the master or owner of a vessel on which the seaman served, the master or owner shall deliver the money, property, and wages as provided by regulations prescribed by the Secretary.

§ 10707. Delivery to district court

The Secretary shall provide for the delivery to a district court of the United States of the money, property, and wages of a deceased seaman within one week from the date of receipt.

§ 10708. Sale of property

A district court of the United States may direct the sale of any part of the property of a deceased seaman. Proceeds of the sale shall be held as wages of the seaman are held.

§ 10709. Distribution

(a)(1) If the money, property, and wages of a seaman, including proceeds from the sale of property, are not more then $1,500 in value, and subject to deductions it allows for expenses and at least 60 days after receiving the money, property, and wages, the court may deliver the money, property, and wages to a claimant proving to be—

(A) the seaman's surviving spouse or child;

(B) entitled to the money, property, and wages under the seaman's will or under a law or at common law; or

(C) entitled to secure probate, or take out letters of administration, although no probate or letters of administration have been issued.

(2) The court is released from further liability for the money, property, and wages distributed under paragraph (1) of this subsection.

(3) Instead of acting under paragraphs (1) and (2) of this subsection, the court may require probate or letters of administration to be taken out, and then deliver the money, property, and wages to the legal representative of the seaman.

(b) If the money, property, and wages are more than $1,500 in value, the court, subject to deductions for expenses, shall deliver the money, property, and wages to the legal representative of the seaman.

§ 10710. Unclaimed money, property, and wages

(a) When a claim for the money, property, or wages of a deceased seaman held by a district court of the United States has not been substantiated within 6 years after their receipt by the court, the court, if a subsequent claim is made, may allow or refuse the claim.

(b) If, after money, property, and wages have been held by the court for 6 years, it appears to the court that no claim will have to be satisfied, the property shall be sold. The money and wages and the proceeds from the sale shall be deposited in the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown".

§ 10711. Penalties

An owner or master violating this chapter are each liable to the United States Government for a civil penalty of 3 times the value of the seaman's money, property, and wages involved or, if the value is not determined, of $200.

CHAPTER 109—PROCEEDINGS ON UNSEAWORTHINESS

Sec.
10901. Application.
10902. Complaints of unfitness.
10903. Proceedings on examination of vessel.
10904. Refusal to proceed.
10905. Complaints in foreign ports.
10906. Discharge of crew for unsuitability.
10907. Permission to make complaint.
10908. Penalty for sending unseaworthy vessel to sea.

§ 10901. Application

This chapter applies to a vessel of the United States except a fishing or whaling vessel or a yacht.

§ 10902. Complaints of unfitness

(a)(1) If the chief and second mates or a majority of the crew of a vessel ready to begin a voyage discover, before the vessel leaves harbor, that the vessel is unfit as to crew, hull, equipment, tackle, machinery, apparel, furniture, provisions of food or water, or stores to proceed on the intended voyage and require the unfitness to be inquired into, the master immediately shall apply to the district court of the United States at the place at which the vessel is located, or, if no court is being held at the place at which the vessel is located, to a judge or justice of the peace, for the appointment of surveyors. At least 2 complain-

ing seamen shall accompany the master to the judge or justice of the peace.

(2) A master failing to comply with this subsection is liable to the United States Government for a civil penalty of $500.

(b)(1) Any 3 seamen of a vessel may complain that the provisions of food or water for the crew are, at any time, of bad quality, unfit for use, or deficient in quantity. The complaint may be made to the commanding officer of a United States naval vessel, consular officer, Coast Guard shipping commissioner, or chief official of the Customs Service.

(2) The officer, commissioner, or official shall examine, or have examined, the provisions of food or water. If the provisions are found to be of bad quality, unfit for use, or deficient in quantity, the person making the findings shall certify to the master of the vessel which provisions are of bad quality, unfit for use, or deficient.

(3) The officer, commissioner, or official to whom the complaint was made shall—

(A) make an entry in the official logbook of the vessel on the results of the examination; and

(B) submit a report on the examination to the district court of the United States at which the vessel is to arrive, with the report being admissible into evidence in any legal proceeding.

(4) The master is liable to the Government for a civil penalty of not more than $100 each time the master, on receiving the certification referred to in paragraph (2) of this subsection—

(A) does not provide other proper provisions of food or water, when available, in place of the provisions certified as of bad quality or unfit for use;

(B) does not obtain sufficient provisions when the certification includes a finding of a deficiency in quantity; or

(C) uses provisions certified to be of bad quality or unfit for use.

§ 10903. Proceedings on examination of vessel

(a) On application made under section 10902(a) of this title, the judge or justice of the peace shall appoint 3 experienced and skilled marine surveyors to examine the vessel for the defects or insufficiencies complained of. The surveyors have the authority to receive and consider evidence necessary to evaluate the complaint. When the complaint involves provisions of food or water, one of the surveyors shall be a medical officer of the Public Health Service, if available. The surveyors shall make a report in writing, signed by at least 2 of them, stating whether the vessel is fit to proceed to sea or, if not, in what respect it is unfit, making appropriate recommendations about additional seamen, provisions, or stores, or about physical repairs, alterations, or additions necessary to make the vessel fit.

(b) On receiving the report, the judge or justice of the peace shall endorse on the report the judgment of the judge or justice on whether the vessel is fit to proceed on the voyage, and, if not, whether the vessel may proceed to another port at which the deficiencies can be corrected. The master and the crew shall comply with the judgment.

(c) The master shall pay all costs of the survey, report, and judgment. However, if the complaint of the crew appears in the report and judgment to have been without foundation, or if the complaint involved provisions of food or water, without reasonable grounds, the master or owner may deduct the amount of the costs and reasonable damages for the detention of the vessel, as determined by the judge or justice of the peace, from the wages of the complaining seamen.

(d) A master of a vessel violating this section who refuses to pay the costs and wages is liable to the United States Government for a civil penalty of $100 and is liable in damages to each person injured by the refusal.

§ 10904. Refusal to proceed

After a judgment under section 10903 of this title that a vessel is fit to proceed on the intended voyage, or after the order of a judgment to make up deficiencies is complied with, if a seaman does not proceed on the voyage, the unpaid wages of the seaman are forfeited.

§ 10905. Complaints in foreign ports

(a) When a complaint under section 10902(a) of this title is made in a foreign port, the procedures of this chapter shall be followed, with a consular officer performing the duties of the judge or justice of the peace.

(b) On review of the marine surveyors' report, the consular officer may approve and must certify any part of the report with which the officer agrees. If the consular officer dissents from any part of the report, the officer shall certify reasons for dissenting from that part.

§ 10906. Discharge of crew for unsuitability

When a survey is made at a foreign port, the surveyors shall state in the report whether, in their opinion, the vessel had been sent to sea unsuitably provided in any important particular, by neglect or design or through mistake or accident. If by neglect or design, and the consular officer approves the finding, the officer shall discharge a seaman requesting discharge and shall require the master to pay one month's wages to that seaman in addition to wages then due, or sufficient money for the return of the seaman to the nearest and most convenient port of the United States, whichever is the greater amount.

§ 10907. Permission to make complaint

(a) A master may not refuse to permit, deny the opportunity to, or hinder a seaman who wishes to make a complaint authorized by this chapter.

(b) A master violating this section is liable to the United States Government for civil penalty of $500.

§ 10908. Penalty for sending unseaworthy vessel to sea

A person that knowingly sends or attempts to send, or that is a party to sending or attempting to send, a vessel of the United States to sea, in an unseaworthy state that is likely to endanger the life of an individual, shall be fined not more than $1,000, imprisoned for not more than 5 years, or both.

CHAPTER 111—PROTECTION AND RELIEF

Sec.
11101. Accommodations for seamen.
11102. Medicine chests.
11103. Slop chests.
11104. Destitute seamen.
11105. Wages on discharge when vessel sold.
11106. Wages on justifiable complaint of seamen.
11107. Unlawful engagements void.
11108. Taxes.
11109. Attachment of wages.
11110. Seamen's clothing.
11111. Limit on amount recoverable on voyage.

§ 11101. Accommodations for seamen

(a) On a merchant vessel of the United States the construction of which began after March 4, 1915 (except a yacht, pilot vessel, or vessel of less than 100 gross tons)—

(1) each place appropriated to the crew of the vessel shall have a space of at least 120 cubic feet and at least 16 square feet, measured on the floor or deck of that place, for each seaman or apprentice lodged in the vessel;

(2) each seaman shall have a separate berth and not more than one berth shall be placed one above another;

(3) the place or berth shall be securely constructed, properly lighted, drained, heated, and ventilated, properly protected from weather and sea, and, as far as practicable, properly shut off and protected from the effluvium of cargo or bilge water; and

(4) crew space shall be kept free from goods or stores that are not the personal property of the crew occupying the place in use during the voyage.

(b) In addition to the requirements of subsection (a) of this section, a merchant vessel of the United States that in the ordinary course of trade makes a voyage of more than 3 days' duration between ports and carries a crew of at least 12 seamen shall have a hospital compartment, suitably separated from other spaces. The compartment shall have at least one bunk for each 12 seamen constituting the crew (but not more than 6 bunks may be required).

(c) A steam vessel of the United States operating on the Mississippi River or its tributaries shall provide, under the direction and approval of the Secretary, an appropriate place for the crew that shall conform to the requirements of this section, as far as they apply to the steam vessel, by providing a properly heated sleeping room in the engineroom of the steam vessel properly protected from the cold, wind, and rain by means of suitable awnings or screens on either side of the guards or sides and forward, reaching from the boiler deck to the lower or main deck.

(d) A merchant vessel of the United States, the construction of which began after March 4, 1915, having more than 10 seamen on deck, shall have at least one light, clean, and properly heated and ventilated washing place. There shall be provided at least one washing outfit for each 2 seamen of the watch. A separate washing place shall be provided for the fireroom and engineroom seamen, if their number is more than 10, that shall be large enough to accommodate at least one-sixth of them at the same time, and have a hot and cold water supply and a sufficient number of washbasins, sinks, and shower baths.

(e) Forecastles shall be fumigated at intervals provided by regulations prescribed by the Secretary of Health and Human Services, with the approval of the Secretary, and shall have at least 2 exits, one of which may be used in emergencies.

(f) The owner, charterer, managing operator, agent, master, or licensed individual of a vessel not complying with this section is liable to the United States Government for a civil penalty of at least $50 but not more than $500.

§ 11102. Medicine chests

(a) A vessel of the United States on a voyage from a port in the United States to a foreign port (except to a Canadian port), and a vessel of the United States of at least 75 gross tons on a voyage between a port of

the United States on the Atlantic Ocean and Pacific Ocean, shall be provided with a medicine chest.

(b) The owner and master of a vessel not equipped as required by subsection (a) of this section or a regulation prescribed under subsection (a) are liable to the United States Government for a civil penalty of $500. If the offense was due to the fault of the owner, a master penalized under this section has the right to recover the penalty and costs from the owner.

§ 11103. Slop chests

(a) A vessel to which section 11102 of this title applies shall be provided with a slop chest containing sufficient clothing for the intended voyage for each seaman, including—

(1) boots or shoes;
(2) hats or caps;
(3) underclothing;
(4) outer clothing;
(5) foul weather clothing;
(6) everything necessary for the wear of a seaman; and
(7) a complete supply of tobacco and blankets.

(b) Merchandise in the slop chest shall be sold to a seaman desiring it, for the use of the seaman, at a profit of not more than 10 percent of the reasonable wholesale value of the merchandise at the port at which the voyage began.

(c) This section does not apply to a vessel on a voyage to Canada, Bermuda, the West Indies, Mexico, or Central America, or a fishing or whaling vessel.

§ 11104. Destitute seamen

(a) A consular officer shall provide, for a destitute seaman of the United States, subsistence and passage to a port of the United States in the most reasonable manner, at the expense of the United States Government and subject to regulations prescribed by the Secretary of State. A seaman, if able, shall be required to perform duties on the vessel giving the seaman passage, in accordance with the seaman's rating.

(b) A master of a vessel of the United States bound to a port of the United States shall take a destitute seaman on board at the request of a consular officer and transport the seaman to the United States. A master refusing to transport a destitute seaman when requested is liable to the United States Government for a civil penalty of $100. The certificate signed and sealed by a consular officer is prima facie evidence of refusal. A master is not required to carry a destitute seaman if the seaman's presence would cause the number of individuals on board to exceed the number permitted in the certificate of inspection or if the seaman has a contagious disease.

(c) Compensation for the transportation of destitute seamen to the United States who are unable to work shall be agreed on by the master and the consular officer, under regulations prescribed by the Secretary of State. However, the compensation may be not more the lowest passenger rate of the vessel, or 2 cents a mile, whichever is less.

(d) When a master of a vessel of the United States takes on board a destitute seaman unable to work, from a port or place not having a consular officer, for transportation to the United States or to a port at which there is a consular officer, the master or owner of the vessel shall be compensated reasonably under regulations prescribed by the Secretary of State.

§ 11105. Wages on discharge when vessel sold

(a) When a vessel of the United States is sold in a foreign country, the master shall deliver to the consular officer a certified crew list and the agreement required by this part. The master shall pay each seaman the wages due the seaman and provide the seaman with employment on board another vessel of the United States bound for the port of original engagement of the seaman or to another port agreed on. If employment cannot be provided, the master shall—

(1) provide the seaman with the means to return to the port of original engagement;
(2) provide the seaman passage to the port of original engagement; or
(3) deposit with the consular officer an amount of money considered sufficient by the officer to provide the seaman with maintenance and passage home.

(b) The consular officer shall endorse on the agreement the particulars of the payment, provision, or deposit made under this section.

(c) An owner of a vessel is liable to the United States Government for a civil penalty of $500 if the master does not comply with this section.

§ 11106. Wages on justifiable complaint of seamen

(a) Before a seaman on a vessel of the United States is discharged in a foreign country by a consular officer on the seaman's complaint that the agreement required by this part has been breached because the vessel is badly provisioned or unseaworthy, or against the officers for cruel treatment, the officer shall inquire about the complaint. If satisfied of the justice of the complaint, the consular officer shall require the master to pay the wages due the seaman plus one month's additional wages and shall discharge the seaman. The master shall provide the seaman with employment on another vessel or provide the seaman with passage on another vessel to the port of original engagement, to the most convenient port of the United States, or to some port agreeable to the seaman.

(b) When a vessel does not have sufficient provisions for the intended voyage, and the seaman has been forced to accept a reduced ration or provisions that are bad in quality or unfit for use, the seaman is entitled to recover from the master or owner an allowance, as additional wages, that the court hearing the case considers reasonable.

(c) Subsection (b) of this section does not apply when the reduction in rations was for a period during which the seaman willfully and without sufficient cause failed to perform duties or was lawfully under confinement on board or on shore for misconduct, unless that reduction can be shown to have been unreasonable.

(d) Subsection (b) of this section does not apply to a fishing or whaling vessel or a yacht.

§ 11107. Unlawful engagements void

An engagement of a seaman contrary to a law of the United States is void. A seaman so engaged may leave the service of the vessel at any time and is entitled to recover the highest rate of wages at the port from which the seaman was engaged or the amount agreed to be given the seaman at the time of engagement, whichever is higher.

§ 11108. Taxes

Wages due or accruing to a master or seaman on a vessel in the foreign, coastwise, intercoastal, interstate, or noncontiguous trade or a fisherman employed on a fishing vessel may not be withheld under the tax laws of a State or a political subdivision of a State. However, this section does not prohibit withholding wages of a seaman on a vessel in the coastwise trade between ports in the same State if the withholding is under a voluntary agreement between the seaman and the employer of the seaman.

§ 11109. Attachment of wages

(a) Wages due or accruing to a master or seaman are not subject to attachment or arrestment from any court, except for an order of a court about the payment by a master or seaman of any part of the master's or seaman's wages for the support and maintenance of the spouse or minor children of the master or seaman, or both. A payment of wages to a master or seaman is valid, notwithstanding any prior sale or assignment of wages or any attachment, encumbrance, or arrestment of the wages.

(b) An assignment or sale of wages or salvage made before the payment of wages does not bind the party making it, except allotments authorized by section 10315 of this title.

(c) This section applies to a fisherman on a fishing vessel.

§ 11110. Seamen's clothing

The clothing of a seaman is exempt from attachments and liens. A person detaining a seaman's clothing shall be fined not more than $500, imprisoned for not more than 6 months, or both.

§ 11111. Limit on amount recoverable on voyage

When a seaman is on a voyage on which a written agreement is required under this part, not more than $1 is recoverable from the seaman by a person for a debt incurred by the seaman during the voyage for which the seaman is signed on until the voyage is ended.

CHAPTER 113—OFFICIAL LOGBOOKS

Sec.
11301. Logbook and entry requirements.
11302. Manner of making entries.
11303. Penalties.

§ 11301. Logbook and entry requirements

(a) A vessel of the United States on a voyage between a port in the United States and a port in a foreign country, and a vessel of the United States of at least 75 gross tons on a voyage between a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean, shall have an official logbook.

(b) The master of the vessel shall make or have made in the official logbook the following entries:

(1) each legal conviction of a seaman of the vessel and the punishment inflicted.
(2) each offense committed by a seaman of the vessel for which it is intended to prosecute or to enforce under a forfeiture, together with statements about reading the entry and the reply made to the charge as required by section 11502 of this title.
(3) each offense for which punishment is inflicted on board and the punishment inflicted.
(4) a statement of the conduct, character, and qualifications of each seaman of the vessel or a statement that the master declines to give an opinion about that conduct, character, and qualifications.
(5) each illness of or injury to a seaman of the vessel, the nature of the illness or injury, and the medical treatment.

(6) each death on board, with the cause of death, and if a seaman, the information required by section 10702 of this title.

(7) each birth on board, with the sex of the infant and name of the parents.

(8) each marriage on board, with the names and ages of the parties.

(9) the name of each seaman who ceases to be a crewmember (except by death), with the place, time, manner, and the cause why the seaman ceased to be a crewmember.

(10) the wages due to a seaman who dies during the voyage and the gross amount of all deductions to be made from the wages.

(11) the sale of the property of a seaman who dies during the voyage, including a statement of each article sold and the amount received for the property.

(12) when a marine casualty occurs, a statement about the casualty and the circumstances under which it occurred, made immediately after the casualty when practicable to do so.

§ 11302. Manner of making entries

Each entry made in the official logbook—

(1) shall be made as soon as possible after the occurrence;

(2) if not made on the day of the occurrence, shall be dated and state the date of the occurrence;

(3) if the entry is about an occurrence happening before the vessel's arrival at the final port of discharge, shall be made not later than 24 hours after the arrival;

(4) shall be signed by the master; and

(5) shall be signed by the chief mate or another seaman.

§ 11303. Penalties

(a) A master failing to maintain an official logbook as required by this part is liable to the United States Government for a civil penalty of $200.

(b) A master failing to make an entry in the vessel's official logbook as required by this part is liable to the Government for a civil penalty of $200.

(c) A person is liable to the Government for a civil penalty of $150 when the person makes, procures to be made, or assists in making, an entry in the vessel's official logbook—

(1) later than 24 hours after the vessel's arrival at the final port of discharge; and

(2) that is about an occurrence that happened before that arrival.

CHAPTER 115—OFFENSES AND PENALTIES

Sec.
11501. Penalties for specified offenses.
11502. Entry of offenses in logbook.
11503. Duties of consular officers related to insubordination.
11504. Enforcement of forfeitures.
11505. Disposal of forfeitures.
11506. Carrying sheath knives.
11507. Surrender of offending officers.

§ 11501. Penalties for specified offenses

When a seaman lawfully engaged commits any of the following offenses, the seaman shall be punished as specified:

(1) For desertion, the seaman forfeits any part of the money or property the seaman leaves on board and any part of earned wages.

(2) For neglecting or refusing without reasonable cause to join the seaman's vessel or to proceed to sea in the vessel, for absence without leave within 24 hours of the vessel's sailing from a port (at the beginning or during the voyage), or for absence without leave from duties and without sufficient reason, the seaman forfeits from the seaman's wages not more than 2 days' pay or a sufficient amount to defray expenses incurred in hiring a substitute.

(3) For quitting the vessel without leave after the vessel's arrival at the port of delivery and before the vessel is placed in security, the seaman forfeits from the seaman's wages not more than one month's pay.

(4) For willful disobedience to a lawful command at sea, the seaman, at the discretion of the master, may be confined until the disobedience ends, and on arrival in port forfeits from the seaman's wages not more than 4 days' pay or, at the discretion of the court, may be imprisoned for not more than one month.

(5) For continued willful disobedience to lawful command or continued willful neglect of duty at sea, the seaman, at the discretion of the master, may be confined, on water and 1,000 calories, with full rations every 5th day, until the disobedience ends, and on arrival in port forfeits, for each 24 hours' continuance of the disobedience or neglect, not more than 12 days' pay or, at the discretion of the court, may be imprisoned for not more than 3 months.

(6) For assaulting a master, mate, pilot, engineer, or staff officer, the seaman shall be imprisoned for not more than 2 years.

(7) For willfully damaging the vessel, or embezzling or willfully damaging any of the stores or cargo, the seaman forfeits from the seaman's wages the amount of the loss sustained and, at the discretion of the court, may be imprisoned for not more than 12 months.

(8) For smuggling for which a seaman is convicted causing loss or damage to the owner or master, the seaman is liable to the owner or master for the loss or damage, and any part of the seaman's wages may be retained to satisfy the liability. The seaman also may be imprisoned for not more than 12 months.

§ 11502. Entry of offenses in logbook

(a) When an offense listed in section 11501 of this title is committed, an entry shall be made in the vessel's official logbook—

(1) on the day of the offense;

(2) stating the details;

(3) signed by the master; and

(4) signed by the chief mate or another seaman.

(b) Before arrival in port if the offense was committed at sea, or before departure if the offense was committed in port and the offender is still on the vessel—

(1) the entry shall be read to the offender;

(2) the offender shall be given a copy; and

(3) the offender shall be given the opportunity to reply.

(c) After subsection (b) of this section has been complied with, an entry shall be made in the official logbook—

(1) stating that the entry about the offense was read and a copy provided to the offender;

(2) stating the offender's reply;

(3) signed by the master; and

(4) signed by the chief mate or another seaman.

(d) In a subsequent legal proceeding, if the entries required by this section are not produced or proved, the court may refuse to receive evidence of the offense.

§ 11503. Duties of consular officers related to insubordination

(a) A consular officer shall use every means to discountenance insubordination on vessels of the United States, including employing the aid of local authorities.

(b) When a seaman is accused of insubordination, a consular officer shall inquire into the facts and proceed as provided in section 11106 of this title. If the consular officer discharges the seaman, the officer shall endorse the agreement required by this part and enter in the vessel's official logbook the cause and particulars of the discharge.

§ 11504. Enforcement of forfeitures

When an offense by a seaman also is a criminal violation, it is not necessary that a criminal proceeding be brought to enforce a forfeiture.

§ 11505. Disposal of forfeitures

(a) Money, property, and wages forfeited under this chapter for desertion may be applied to compensate the owner of master of the vessel for expenses caused by the desertion. The balance shall be transferred to the Secretary when the voyage is completed, as prescribed by the Secretary.

(b) Within one month of receiving the balance under subsection (a) of this section, the Secretary shall transfer the balance to the appropriate district court of the United States. If it appears to the district court that the forfeiture was imposed properly, the property transferred may be sold in the same manner prescribed for the disposition of the property of deceased seamen. The court shall deposit in the Treasury as miscellaneous receipts the proceeds of the sale and any money and wages transferred to the court.

(c) When an owner or master fails to transfer the balance as required under subsection (a) of this section, the owner or master is liable to the United States Government for a civil penalty of 2 times the amount of the balance, recoverable by the Secretary in the same manner that seaman's wages are recovered.

(d) In all other cases of forfeiture of wages, the forfeiture shall be for the benefit of the owner of the vessel.

§ 11506. Carrying sheath knives

A seaman in the merchant marine may not wear a sheath knife on board a vessel without the consent of the master. The master of a vessel of the United States shall inform each seaman of this prohibition before engagement. A master failing to advise a seaman is liable to the United States Government for a civil penalty of $50.

§ 11507. Surrender of offending officers

When an officer of a vessel of the United States (except the master) has violated section 2191 of title 18, and the master has actual knowledge of the offense or if complaint is made within 3 days after reaching port, the master shall surrender the offending officer to the proper authorities. If the master fails *to use diligence* to comply with this section and the offender escapes, the owner, the master, and the vessel are liable for damages to the individual unlawfully punished.

PART H—IDENTIFICATION OF VESSELS

CHAPTER 121—DOCUMENTATION OF VESSELS

Sec.
12101. Related terms in other laws.
12102. Vessels eligible for documentation.
12103. Certificates of documentation.
12104. Effect of documentation.
12105. Registry.
12106. Coastwise licenses and registry.
12107. Great Lakes licenses and registry.
12108. Fishery licenses and registry.

12109. Pleasure vessel licenses.
12110. Limitations on operations authorized by certificates.
12111. Invalidation of certificates of documentation.
12112. Vessels procured outside the United States.
12113. Ports of documentation.
12114. Home ports.
12115. Names of vessels.
12116. Numbers, signal letters, and identification markings.
12117. Recording of United States built vessels.
12118. Registration of funnel marks and house flags.
12119. List of documented vessels.
12120. Reports.
12121. Regulations.
12122. Penalties.

§ 12101. Related terms in other laws

When used in a law, regulation, document ruling, or other offical act referring to the documentation of a vessel—

(1) "certificate of registry", "register", and "registry" mean a registry as provided in section 12105 of this title.

(2) "license", "enrollment and license", "license for the coastwise (or coasting) trade", and "enrollment and license for the coastwise (or coasting) trade" mean a coastwise license as provided in section 12106 of this title.

(3) "enrollment and license to engage in the foreign and coastwise (or coasting) trade on the northern, northeastern, and northwestern frontiers, otherwise than by sea" means a Great Lakes license as provided in section 12107 of this title.

(4) "license for the fisheries" and "enrollment and license for the fisheries" mean a fishery license as provided in section 12108 of this title.

(5) "yacht" means a pleasure vessel even if not documented.

§ 12102. Vessels eligible for documentation

A vessel of at least 5 net tons not registered under the laws of a foreign country is eligible for documentation if the vessel is owned by—

(1) an individual who is a citizen of the United States;

(2) an association, trust, joint venture, or other entity—

(A) all of whose members are citizens of the United States; and

(B) that is capable of holding title to a vessel under the laws of the United States or of a State;

(3) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States;

(4) a corporation established under the laws of the United States or of a State, whose president or other chief executive officer and chairman of its board of directors are citizens of the United States and no more of its directors are noncitizens than a minority of the number necessary to constitute a quorum;

(5) the United States Government; or

(6) the government of a State.

§ 12103. Certificates of documentation

(a) On application by the owner of a vessel eligible for documentation, the Secretary shall issue a certificate of documentation of one of the types specified in sections 12105–12109 of this title.

(b) The Secretary may prescribe the form of, the manner of filing, and the information to be contained in, applications for certificates of documentation.

(c) Each certificate of documentation shall—

(1) contain the name, the home port, and a description of the vessel;

(2) identify the owner of the vessel; and

(3) contain additional information prescribed by the Secretary.

(d) The Secretary shall prescribe procedures to ensure the integrity of, and the accuracy of information contained in, certificates of documentation.

(e) The owner and master of a documented vessel shall make the vessel's certificate of documentation available for examination as the law or Secretary may require.

§ 12104. Effect of documentation

A certificate of documentation is—

(1) conclusive evidence of nationality for international purposes, but not in a proceeding conducted under the laws of the United States;

(2) except for a pleasure vessel license, conclusive evidence of qualification to be employed in a specified trade; and

(3) not conclusive evidence of ownership in a proceeding in which ownership is in issue.

§ 12105. Registry

(a) A registry may be issued for a vessel eligible for documentation.

(b) A vessel for which a registry is issued may be employed in foreign trade or trade with Guam, American Samoa, Wake, Midway, or Kingman Reef.

(c) On application of the owner of a vessel that qualifies for a coastwise license under section 12106 of this title, a Great Lakes license under section 12107 of this title, or a fishery license under section 12108 of this title, the Secretary may issue a registry appropriately endorsed authorizing the vessel to be employed in the coastwise trade, the Great Lakes trade, or the fisheries, as the case may be.

(d) Except as provided in sections 12106–12108 of this title, a foreign built vessel registered under this section may not engage in the coastwise trade, the Great Lakes trade, or the fisheries.

§ 12106. Coastwise licenses and registry

(a) A coastwise license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation;

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under laws of the United States to be employed in the coastwise trade.

(b) Subject to the laws of the United States regulating the coastwise trade and the fisheries, only a vessel for which a coastwise license or an appropriately endorsed registry is issued may be employed in—

(1) the coastwise trade; and

(2) the fisheries.

§ 12107. Great Lakes licenses and registry

(a) A Great Lakes license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation;

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under the laws of the United States to be employed in the coastwise trade.

(b) Subject to the laws of the United States regulating the coastwise trade, trade with Canada, and the fisheries, only a vessel for which a Great Lakes license or an appropriately endorsed registry is issued may be employed on the Great Lakes and their tributary and connecting waters in—

(1) the coastwise trade;

(2) trade with Canada; and

(3) the fisheries.

§ 12108. Fishery licenses and registry

(a) A fishery license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation; and

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under the laws of the United States to be employed in the fisheries.

(b) Subject to the laws of the United States regulating the fisheries, only a vessel for which a fishery license or an appropriately endorsed registry is issued may be employed in the fisheries.

§ 12109. Pleasure vessel licenses

(a) A pleasure vessel license may be issued for a vessel that is—

(1) eligible for documentation; and

(2) to be operated only for pleasure.

(b) A licensed pleasure vessel may proceed between a port of the United States and a port of a foreign country without entering or clearing with the Customs Service.

(c) The Secretary may prescribe by regulation reasonable fees for issuing, renewing, or replacing a pleasure vessel license, or for providing any other service related to a pleasure vessel license. The fees shall be based on the costs of the service provided.

§ 12110. Limitations on operations authorized by certificates

(a) A vessel may not be employed in a trade except a trade covered by the certificate of documentation issued for that vessel. A documented pleasure vessel may be operated only for pleasure. However, a certificate of documentation may be exchanged, under regulations prescribed by the Secretary, for another type of certificate of documentation or endorsed appropriately for a trade for which the vessel qualifies.

(b) A barge qualified to be employed in the coastwise trade may be employed, without being documented, in that trade on rivers, harbors, lakes (except the Great Lakes), canals, and inland waters.

(c) When a vessel is employed in a trade not covered by the certificate of documentation issued for that vessel, or a documented pleasure vessel is operated except for pleasure, the vessel and its equipment are liable to seizure by and forfeiture to the United States Government.

(d) A documented vessel may be placed under the command only of a citizen of the United States.

§ 12111. Invalidation of certificates of documentation

(a) A certificate of documentation is invalid if the vessel for which it is issued—

(1) no longer meets the requirements of this chapter and regulations prescribed under this chapter applicable to that certificate of documentation; or

(2) is placed under the command of a person not a citizen of the United States.

(b) Except as provided by section 30(O) of the Merchant Marine Act, 1920 (46 App. U.S.C. 961(a)), an invalid certificate of documentation shall be surrendered as provided by regulations prescribed by the Secretary.

§ 12112. Vessels procured outside the United States

(a) The Secretary and the Secretary of State, acting jointly, may provide for the issuance of an appropriate document for a vessel procured outside the United States meeting the ownership requirements of section 12102 of this title.

(b) Subject to limitations the Secretary may prescribe, a vessel for which an appropriate document is issued under this section may proceed to the United States and engage en route in the foreign trade or trade with Guam, American Samoa, Wake, Midway, or Kingman Reef. On the vessel's arrival in the United States, the document shall be surrendered as provided by regulations prescribed by the Secretary.

(c) A vessel for which a document is issued under this section is subject to the jurisdiction and laws of the United States. However, the Secretary may suspend for a period of not more than 6 months, the application of a vessel inspection law carried out by the Secretary or regulations prescribed under that law if the Secretary considers the suspension to be in the public interest.

§ 12113. Ports of documentation

The Secretary shall designate ports of documentation in the United States at which vessels may be documented and instruments affecting title to, or interest in, documented vessels may be recorded. The Secretary—

(1) shall specify the geographic area to be served by each designated port; and

(2) may discontinue, relocate, or designate additional ports of documentation.

§ 12114. Home ports

(a) The port of documentation selected by an owner of a vessel and approved by the Secretary for the documentation of the vessel is the vessel's home port.

(b) Once a vessel's home port is established, it may not be changed without the approval of the Secretary.

§ 12115. Names of vessels

(a) The name of the vessel selected by the owner and approved by the Secretary for the documentation of the vessel is the vessel's name of record.

(b) Once a vessel's name of record is established, it may not be changed without the approval of the Secretary.

(c) The Secretary may prescribe by regulation a reasonable fee for changing a documented vessel's name of record.

§ 12116. Numbers, signal letters, and identification markings

(a) The Secretary shall maintain a numbering system for the identification of a documented vessel and shall assign a number to each documented vessel.

(b) The Secretary may maintain a system of signal letters for a documented vessel.

(c) The owner of a documented vessel shall affix to the vessel and maintain in the manner prescribed by the Secretary the number assigned and any other identification markings the Secretary may require.

§ 12117. Recording of United States built vessels

The Secretary may provide for the recording and certifying of information about vessels built in the United States that the Secretary considers to be in the public interest.

§ 12118. Registration of funnel marks and house flags

The Secretary shall provide for the registration of funnel marks and house flags by owners of vessels.

§ 12119. List of documented vessels

The Secretary shall publish periodically a list of all documented vessels and information about those vessels that the Secretary considers pertinent or useful. The list shall contain a notation clearly indicating all vessels classed by the American Bureau of Shipping.

§ 12120. Reports

To ensure compliance with this chapter and laws governing the qualifications of vessels to engage in the coastwise trade and the fisheries, the Secretary may require owners and masters of documented vessels to submit reports in any reasonable form and manner the Secretary may prescribe.

§ 12121. Regulations

The Secretary may prescribe regulations to carry out this chapter.

§ 12122. Penalties

(a) A person that violates this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $500.

(b) When the owner of a vessel knowingly falsifies or conceals a material fact, or makes a false statement or representation about the documentation of the vessel, that vessel and its equipment are liable to seizure by and forfeiture to the United States Government.

(c) When a certificate of documentation is knowingly and fraudulently used for a vessel, that vessel and its equipment are liable to seizure by and forfeiture to the Government.

CHAPTER 123—NUMBERING UNDOCUMENTED VESSELS

Sec.
12301. Numbering vessels.
12302. Standard numbering system.
12303. Exemption from numbering requirements.
12304. Certificates of numbers.
12305. Displaying numbers.
12306. Safety certificates.
12307. Regulations on numbering and fees.
12308. Providing vessel numbering and registration information.
12309. Penalties.

§ 12301. Numbering vessels

An undocumented vessel equipped with propulsion machinery of any kind shall have a number issued by the proper issuing authority in the State in which the vessel principally is operated.

§ 12302. Standard numbering system

(a) The Secretary shall prescribe by regulation a standard numbering system for vessels to which this chapter applies. On application by a State, the Secretary shall approve a State numbering system that is consistent with the standard numbering system. In carrying out its numbering system, a State shall adopt any definitions of relevant terms prescribed by regulations of the Secretary.

(b) A State with an approved numbering system is the issuing authority within the meaning of this chapter. The Secretary is the issuing authority in a State in which a State numbering system has not been approved.

(c) When a vessel is numbered in a State, it is deemed in compliance with the numbering system of a State in which it temporarily is operated.

(d) When a vessel is removed to a new State of principal operation, the issuing authority of that State shall recognize the validity of the number issued by the original State for 60 days.

(e) If a State has a numbering system approved after the Secretary issues a number, the State shall recognize the validity of the number issued by the Secretary for one year.

(f) When the Secretary decides that a State numbering system is not being carried out consistent with the standard numbering system or the State has changed the system without the Secretary's approval, the Secretary may withdraw approval after giving notice to the State, in writing, stating the reasons for the withdrawal.

§ 12303. Exemption from numbering requirements

(a) When the Secretary is the authority issuing a number under this chapter, the Secretary may exempt a vessel or class of vessels from the numbering requirements of this chapter under conditions the Secretary may prescribe.

(b) When a State is the issuing authority, it may exempt from the numbering requirements of this chapter a vessel or class of vessels exempted under subsection (a) of this section or otherwise as permitted by the Secretary.

§ 12304. Certificates of numbers

(a) A certificate of number is granted for a number issued under this chapter. The certificate shall be pocket-sized, shall be at all times available for inspection on the vessel for which issued when the vessel is in operation, and may be valid for not more than 3 years. The certificate of number for a vessel less than 26 feet in length and leased or rented to another for the latter's noncommercial operation of less than 7 days may be retained on shore by the vessel's owner or representative at the place from which the vessel departs or returns to the possession of the owner or the owner's representative. A vessel that does not have the certificate of number on board shall be identified when in operation, and comply with requirements, as the issuing authority prescribes.

(b) The owner of a vessel numbered under this chapter shall provide—

(1) the issuing authority notice of the transfer of any part of the owner's interest in the vessel or of the destruction or abandonment of the vessel, within a reasonable time after the transfer, destruction, or abandonment; and

(2) notice of a change of address within a reasonable time of the change, as prescribed by regulation.

§ 12305. Displaying numbers

A number required by this chapter shall be painted on, or attached to, each side of the forward half of the vessel for which it was issued, and shall be the size, color, and type as may be prescribed by the Secretary. No other number may be carried on the forward half of the vessel.

§ 12306. Safety certificates

When a State is the authority issuing a number under this chapter, it may require that the individual in charge of a numbered vessel have a valid safety certificate issued under conditions set by the issuing authority, except when the vessel is subject to manning requirements under part F of this subtitle.

§ 12307. Regulations on numbering and fees

The authority issuing a number under this chapter may prescribe regulations and establish fees to carry out the intent of this chapter. The fees shall apply equally to residents and nonresidents of the State. A State issuing authority may impose only conditions for vessel numbering that are—

(1) prescribed by this chapter or regulations of the Secretary about the standard numbering system; or

(2) related to proof of payment of State or local taxes.

§ 12308. Providing vessel numbering and registration information

A person may request from an authority issuing a number under this chapter the numbering and registration information of a vessel that is retrievable from vessel numbering system records of the issuing authority. When the issuing authority is satisfied that the request is reasonable and related to a boating safety purpose, the information shall be provided on paying the cost of retrieving and providing the information requested.

§ 12309. Penalties

(a) A person willfully violating this chapter or a regulation prescribed under this chapter shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(b) A person violating this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $1,000. If the violation involves the operation of a vessel, the vessel also is liable in rem for the penalty.

(c) When a civil penalty of not more than $200 has been assessed under this chapter, the Secretary may refer the matter of collection of the penalty directly to the United States magistrate of the jurisdiction in which the person liable may be found for collection procedures under supervision of the district court and under an order issued by the court delegating this authority under section 636(b) of title 28.

PART I—STATE BOATING SAFETY PROGRAMS

CHAPTER 131—RECREATIONAL BOATING SAFETY

Sec.

13101. State recreational boating safety programs.
13102. Program acceptance.
13103. Allocations.
13104. Availability of allocations.
13105. Computation decisions about State amounts expended.
13106. Authorization of contract spending.
13107. National Recreational Boating Safety and Facilities Improvement Fund.
13108. Computing amounts allocated to States and State records requirements.
13109. Consultation, cooperation, and regulation.
13110. National Boating Safety Advisory Council.

§ 13101. State recreational boating safety programs

(a) To encourage greater State participation and uniformity in boating safety and facility improvement efforts, and particularly to permit the States to assume the greater share of boating safety education, assistance, and enforcement activities, the Secretary shall carry out a national recreational boating safety and facilities improvement program. Under this program, the Secretary may make contracts with, and allocate and distribute amounts to, eligible States to assist them in developing, carrying out, and financing State recreational boating safety and facilities improvement programs.

(b) The Secretary shall establish guidelines and standards for the program. In doing so, the Secretary—

(1) shall consider, among other things, factors affecting recreational boating safety by contributing to overcrowding and congestion of waterways, such as the increasing number of recreational vessels operating on those waterways and their geographic distribution, the availability and geographic distribution of recreational boating facilities in and among applying States, and State marine casualty and fatality statistics for recreational vessels;

(2) shall consult with the Secretary of the Interior to minimize duplication with the purposes and expenditures of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4—4601-11) and with the guidelines developed under that Act; and

(3) shall maintain environmental standards consistent with the Coastal Zone Management Act of 1972 (16 U.S.C. 1451-1464) and other laws and policies of the United States intended to safeguard the ecological and esthetic quality of the waters and wetlands of the United States.

(c) A State whose recreational boating safety and facilities improvement program has been approved by the Secretary is eligible for allocation and distribution of amounts under this chapter to assist that State in developing, carrying out, and financing its program. Matching amounts shall be allocated and distributed among eligible States by the Secretary as provided by section 13103 of this title.

§ 13102. Program acceptance

(a) The Secretary may make a contract with, and allocate and distribute amounts from the Fund established under section 13107 of this title to, a State that has an approved State recreational boating safety and facilities improvement program, if the State demonstrates to the Secretary's satisfaction that—

(1) the program submitted by that State is consistent with this chapter and chapters 61 and 123 of this title;

(2) amounts distributed will be used to develop and carry out a State recreational boating safety and facilities improvement program containing the minimum requirements of subsection (c), (d), or (f) of this section;

(3) sufficient State matching amounts are available from general revenue, undocumented vessel numbering and license fees, State marine fuels taxes, or from a fund constituted from the proceeds of those taxes and established to finance a State recreational boating safety and facilities improvement program; and

(4) the program submitted by that State designates a State lead authority or agency that will carry out or coordinate carrying the State recreational boating safety and facilities improvement program supported by financial assistance of the United States Government in that State, including the requirement that the designated State authority or agency submit required reports that are necessary and reasonable to carry out properly and efficiently the program and that are in the form prescribed by the Secretary.

(b) Amounts of the Government from sources (except sources referred to in subsection (a)(3) of this section) may not be used to provide a State's share of the costs of the program described under this section. State matching amounts committed to a program under this chapter may not be used to constitute the State's share of matching amounts required by another program of the Government.

(c) The Secretary shall approve a State recreational boating safety program, and the program is eligible to receive amounts authorized to be expended under section 13106 of this title, if the program includes—

(1) a vessel numbering system approved or carried out by the Secretary under chapter 123 of this title;

(2) a cooperative boating safety assistance program with the Coast Guard in that State;

(3) sufficient patrol and other activity to ensure adequate enforcement of applicable State boating safety laws and regulations;

(4) an adequate State boating safety education program; and

(5) a system, approved by the Secretary, for reporting marine casualties required under section 6102 of this title.

(d) The Secretary shall approve a State recreational boating facilities improvement program, and the program is eligible to receive amounts authorized to be expended under section 13106 of this title, if the program includes—

(1) a complete description of recreational boating facility improvement projects to be undertaken by the State; and

(2) consultation with State officials responsible for the statewide comprehensive outdoor recreation plan required by the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4—4601-11) and for any program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451-1464).

(e) The Secretary's approval under this section is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the program.

(f)(1) A State may submit a combined program to the Secretary for the improvement of recreational boating safety and the improvement of recreational boating facilities in that State. The Secretary shall approve the program if it contains the minimum requirements set forth in subsections (c) and (d) of this section.

(2) Those parts of the combined program of a State that are designed to improve recreational boating safety are eligible to receive amounts authorized to be expended for State recreational boating safety programs under section 13106 of this title. The Secretary's approval of those parts is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the State's recreational boating safety program under this chapter.

(3) Those parts of the combined program of a State that are designed to improve recreational boating facilities are eligible to receive amounts authorized to be expended for State recreational boating facilities im-

provement programs under section 13106 of this title. The Secretary's approval of those parts is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the State's recreational boating facilities program under this chapter.

§ 13103. Allocations

(a) The Secretary shall allocate amounts available for allocation and distribution under this chapter for State recreational boating safety programs as follows:

(1) One-third shall be allocated equally each fiscal year among eligible States.

(2) One-third shall be allocated among eligible States that maintain a State vessel numbering system approved under chapter 123 of this title and a marine casualty reporting system approved under this chapter so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the number of vessels numbered in that State bears to the number of vessels numbered in all eligible States.

(3) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the amount of State amounts expended or obligated by the State for the State recreational boating safety program during the prior fiscal year bears to the total State amounts expended or obligated during that fiscal year by all eligible States for State recreational boating safety programs.

(b) The Secretary shall allocate the amounts available for allocation and distribution under this chapter for State recreational boating facilities improvement programs as follows:

(1) One-third shall be allocated equally each fiscal year among eligible States.

(2) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the number of vessels numbered in that State bears to the number of vessels numbered in all eligible States.

(3) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State shall be in the same ratio as the State amounts expended or obligated by the State for a recreational boating facilities improvement program approved under this chapter during the prior fiscal year bears to the total State amounts expended or obligated during that fiscal year by all eligible States for recreational boating facilities improvement programs.

(c) The amount received by a State under this section in a fiscal year may be not more than one-half of the total cost incurred by that State in developing, carrying out, and financing that State's recreational boating safety and facilities improvement program in that fiscal year.

(d) An allocation or distribution of amounts under this section may not be made to a State to maintain boating facilities under that State's approved recreational boating safety and facilities improvement program.

(e) The Secretary may allocate not more than 5 percent of the amounts available for allocation and distribution in a fiscal year for national boating safety activities of national nonprofit public service organizations.

(f) The Secretary may expend from the amounts available for allocation and distribution in a fiscal year those amounts necessary to carry out this chapter. However, the amounts expended in a fiscal year to carry out this chapter may be not more than $250,000 or 2 percent of the amounts available for allocation and distribution in that fiscal year, whichever is greater.

§ 13104. Availability of allocations

(a) Amounts allocated to a State shall be available for obligation by that State for a period of 3 years after the date of allocation. Amounts unobligated by the State at the end of the 3 years shall be withdrawn by the Secretary and shall be available with other amounts to be allocated by the Secretary during that fiscal year.

(b) Amounts available to the Secretary that have not been allocated at the end of a fiscal year shall be carried forward as part of the total allocation of amounts for the next fiscal year that may be expended under this chapter.

§ 13105. Computation decisions about State amounts expended

(a) Consistent with regulations prescribed by the Secretary, the computation by a State of amounts expended or obligated for the State recreational boating safety and facilities improvement program shall include—

(1) the acquisition, maintenance, and operating costs of land, facilities, equipment, and supplies;

(2) personnel salaries and reimbursable expenses;

(3) the costs of training personnel;

(4) public boat safety education;

(5) the costs of carrying out the program; and

(6) other expenses that the Secretary considers appropriate.

(b) The Secretary shall decide an issue arising out of the computation made under subsection (a) of this section.

§ 13106. Authorization of contract spending

(a) To provide financial assistance for State recreational boating safety and facilities improvement programs, the Secretary may expend, subject to amounts provided in appropriations laws for liquidating contract authority, an amount equal to the revenues accruing each fiscal year from the taxes under section 4041(b) of the Internal Revenue Code of 1954 (26 U.S.C. 4041(b)) from special motor fuels used as fuel in motor boats and under section 4081 of that Code (26 U.S.C. 4081) from gasoline used as fuel in motor boats.

(b) Of the amounts available for allocation and distribution for recreational boating safety and facilities improvement programs, one-third shall be allocated for recreational boating safety programs and two-thirds shall be allocated for recreational boating facilities improvement programs.

(c) Amounts authorized to be expended for State recreational boating safety and facilities improvement programs remain available until expended and are deemed to have been expended only if an amount equal to the total amounts authorized to be expended under this section for the fiscal year in question and all prior fiscal years have been obligated. Amounts previously obligated but released by payment of a final voucher or modification of a program acceptance shall be credited to the balance of unobligated funds and shall be immediately available for expenditure.

§ 13107. National Recreational Boating Safety and Facilities Improvement Fund

There is established in the Treasury a separate fund known as the National Recreational Boating Safety and Facilities Improvement Fund consisting of amounts paid into it as provided in section 209(f)(5) of the Highway Revenue Act of 1956. Amounts in the Fund are available for making expenditures as provided in section 13106 of this title.

§ 13108. Computing amounts allocated to States and State records requirements

(a) Amounts allocated and distributed under section 13103 of this title shall be computed and paid to the States as follows:

(1) During the last quarter of a fiscal year and on the basis of computations made under section 13105 of this title and submitted by the States, the Secretary shall determine the percentage of the amounts available for the next fiscal year to which each eligible State is entitled.

(2) Notice of the percentage and of the dollar amount, if it can be determined, for each State shall be provided to the States at the earliest practicable time.

(3) If the Secretary determines that an amount made available to a State for a prior fiscal year is greater or less than the amount that should have been made available to the State for the prior fiscal year, because of later or more accurate State expenditure information, the amount for the current fiscal year may be increased or decreased by the appropriate amount.

(b) The Secretary shall schedule the payment of amounts, consistent with the program purposes and applicable regulations prescribed by the Secretary of the Treasury, to minimize the time elapsing between the transfer of amounts from the Treasury and the subsequent disbursement of the amounts by a State.

(c) The Secretary shall notify a State authority or agency that further payments will be made to the State only when the program complies with the prescribed standards or a failure to comply substantially with standards is corrected if the Secretary, after reasonable notice to the designated State authority or agency, finds that—

(1) the State recreational boating safety and facilities improvement program submitted by the State and accepted by the Secretary has been so changed that it no longer complies with this chapter or standards prescribed by regulations; or

(2) in carrying out the State recreational boating safety and facilities improvement program, there has been a failure to comply substantially with the standards prescribed by regulations.

(d) The Secretary shall provide for the accounting, budgeting, and other fiscal procedures that are necessary and reasonable to carry out this section properly and efficiently. Records related to amounts allocated under this chapter shall be made available to the Secretary and the Comptroller General to conduct audits.

§ 13109. Consultation, cooperation, and regulation

(a) In carrying out responsibilities under this chapter, the Secretary may consult with State and local governments, public and private agencies, organizations and committees, private industry, and other persons having an interest in boating safety and facilities improvement.

(b) The Secretary may advise, assist, and cooperate with the States and other interested public and private agencies in planning, developing, and carrying out boating safety and facilities improvement programs. Acting under section 141 of title 14, the Secretary shall ensure the fullest cooperation between the State and United States Government authorities in promoting boating safety by making agreements and other arrangements with States when possible. Sub-

ject to chapter 23 of title 14, the Secretary may make available, on request of a State, the services of members of the Coast Guard Auxiliary to assist the State in promoting boating safety on State waters.

(c) The Secretary may prescribe regulations to carry out this chapter.

§ 13110. National Boating Safety Advisory Council

(a) The Secretary shall establish a National Boating Safety Advisory Council. The Council shall consist of not more than 21 members appointed by the Secretary, whom the Secretary considers to have a particular expertise, knowledge, and experience in boating safety.

(b)(1) Insofar as practical and to ensure balanced representation, the Secretary shall appoint members equally from—

(A) State officials responsible for State boating safety programs;

(B) recreational vessel manufacturers; and

(C) boating organizations and members of the general public.

(2) Additional individuals from the sources referred to in paragraph (1) of this subsection may be appointed to panels of the Council to assist the Council in performing its duties.

(3) At least once a year, the Secretary shall publish a notice in the Federal Register soliciting nominations for membership on the Council.

(c) In addition to the consultation required by section 4302 of this title, the Secretary shall consult with the Council on other major boating safety matters related to this chapter. The Council may make available to Congress information, advice, and recommendations that the Council is authorized to give to the Secretary.

(d) When attending meetings of the Council, a member of the Council or a panel may be paid at a rate not more than the rate for GS-18. When serving away from home or regular place of business, the member may be allowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5 for individuals employed intermittently in the Government service. A payment under this section does not make a member of the Council an officer or employee of the United States Government for any purpose.

[PART J—RESERVED FOR MEASUREMENT OF VESSELS]

MISCELLANEOUS PROVISIONS

SEC. 2. (a) Laws effective after December 31, 1982, that are inconsistent with this Act supersede this Act to the extent of the inconsistency.

(b) A reference to a law replaced by this Act, including a reference in a regulation, order, or other law, is deemed to refer to the corresponding provision of this Act.

(c) An order, rule, or regulation in effect under a law replaced by this Act continues in effect under the corresponding provision of this Act until repealed, amended, or superseded.

(d) An action taken or an offense committed under a law replaced by this Act is deemed to have been taken or committed under the corresponding provision of this Act.

(e) An inference of legislative construction is not to be drawn by reason of the caption or catch line of a provision enacted by this Act.

(f) If a provision enacted by this Act is held invalid, all valid provisions that are severable from the invalid provision remain in effect. If a provision of this Act is held invalid in one or more of its applications, the provision remains in effect in all valid applications that are severable from the invalid application or applications.

(g)(1) Part B of subtitle II and sections 7306 (related to able seaman sail) and 7311 of title 46 (as enacted by section 1 of this Act) take effect April 15, 1984, or when regulations for sailing school vessels under part B are effective, whichever is earlier.

(2) Section 3715(a) of title 46 (as enacted by section 1 of this Act) is effective on the day after the effective date of the regulations prescribed by the Secretary under section 3715(b) of title 46.

(h) Chapter 63 of title 46 (as enacted by section 1 of this Act) does not supersede section 304(a)(1)(E) of the Independent Safety Board Act of 1974 (49 App. U.S.C. 1903(a)(1)(E)).

(i) Each offshore supply vessel described in section 3302(g) of title 46 (as enacted by section 1 of this Act), that was registered with the Secretary of Transportation under section 4426a(7) of the Revised Statutes but that has not been inspected by the Secretary shall be held to be in compliance with all applicable vessel inspection laws pending verification by actual inspection or until one year after the date of enactment of this Act, whichever is earlier.

(j) Within 2 years after the date of enactment of this Act, the Federal Maritime Commission and the Secretary of Transportation each shall submit to Congress a proposed codification of the laws within their respective jurisdictions related to shipping and maritime matters.

CONFORMING CROSS-REFERENCES

SEC. 3. (a) Section 5549(4) of title 5, United States Code is amended to read as follows:

"(4) sections 2111 and 2112 of title 46; and".

(b) Section 10542(c) of title 49, United States Code, is amended—

(1) in the matter before clause (1), by striking "tank vessels" and substituting "a tank vessel"; and

(2) by striking clause (2) and substituting:

"(2) having a certificate of inspection issued under part B of subtitle II of title 46 endorsed to show that the vessel complies with chapter 37 of title 46.".

REPEALS

SEC. 4. (a) The repeal of a law by this Act may not be construed as a legislative implication that the provision was or was not in effect before its repeal.

(b) The laws specified in the following schedule are repealed, except for rights and duties that matured, penalties that were incurred, and proceedings that were begun, before the date of enactment of this Act and except as provided by section 2 of this Act:

● Mr. PACKWOOD. Mr. President, I am proud of the bill now being brought before the Senate and urge its passage.

This bill revises, consolidates, and reenacts those laws related to marine safety and seamen's welfare. In many

ways this is a truly historic piece of legislation.

Since Teddy Roosevelt first tried in 1908, numerous administrations and Congresses have attempted to reorganize and consolidate those laws in title 46 of the United States Code pertaining to vessels and seamen.

Past attempts have been bogged down by controversial or substantive changes or by deleterious amendments. Therefore, it has been the intention of the sponsors of S. 46 to avoid certain highly controversial substantive revisions which, due to opposition, would endanger the bill's chances of passage.

In the 193 years since the enactment of the first Federal maritime statutes, there has been no complete revision of the shipping laws. The various statutes passed by Congress from time to time since 1790 have been included in title 46 of the United States Code, together with the sections of the Revised Statutes, without any attempt to delete, coordinate, consolidate, or rewrite conflicting provisions. This is the first step in producing an understandable and useful compendium of maritime laws.

I. LEGISLATIVE HISTORY

The present initiative reflects a 20-year effort by the Commerce Committee, in cooperation with the Coast Guard, to organize and modernize existing laws enforced by the Coast Guard governing commercial shipping and recreational boating.

An excellent history of the tortured past of the maritime statutory codification efforts can be found in "Conquering the Maze: A Proposal for Reorganization of the U.S. Shipping Laws," by C. J. Maguire and R. E. McDaniel, "Proceedings of the Marine Safety Council," volume 38, No. 4, June 1981.

In 1929, and again during the late 1940's, the Coast Guard attempted to codify Federal shipping laws. In 1967 and 1971, the Senate committee considered, and then abandoned, the initiative.

Consideration of S. 46 by the Senate today is a result of long and careful scrutiny by all members of the maritime community, and a concentrated bipartisan effort in both the Senate and the House over the past 2 years.

During the 97th Congress, S. 2660 was introduced on July 22, 1982, by myself, and Senators STEVENS and GORTON. At my request, CRS completed a comparative analysis of S. 2660 and title 46, United States Code.

On November 22, a Commerce Committee Print was published. (Marine Safety and Seamen's Welfare Laws—With Corresponding Sections of the United States Code—And Brief Explanation.) This Committee Print provided a side-by-side comparison of the Staff Working Draft of S. 2660 and the corresponding United States Code section. Most importantly, it provided an explanation for each section of S. 2660 which differed from, or was organized differently than, current law. Finally a complete table of current United States Code sections and their disposition of the Staff Working Draft of S. 2660 was included in the committee print.

Following industry and labor comments on the committee print, and a great deal of work by the Coast Guard, S. 46 was introduced on January 26, 1983. Again, public comment was requested, and the bill was revised prior to being reported out of the Commerce Committee on April 12, 1983 (Senate Report 98-56). On May 5, 1983, S. 46 was passed by the Senate with technical amendments. Upon arriving at the House of Representatives, it was referred to the House Merchant Marine and Fisheries Committee.

Meanwhile, a companion bill identical to S. 2660 had been introduced in the House of Representatives. Hearings were held in the fall of 1982. Based on these hearings, Congressmen STUDDS, JONES, BIAGGI, DON YOUNG, and FORSYTHE, introduced H.R. 2247 on March 24, 1983. Additional hearings were held on April 28, 1983, and H.R. 2247 was reported out by the House Merchant Marine and Coast Guard Subcommittees on June 21, 1983. It was finally favorably reported by the full House Merchant Marine and Fisheries Committee on June 28, 1983.

The version reported by the full committee reflected the continuing cooperative effort by House and Senate staff. It reflected the many changes adopted following original introduction of S. 46 on the Senate side, and H.R. 2247 on the House side. At the June 28 markup, the House Merchant Marine and Fisheries Committee amended S. 46 by substituting a revised version agreed to by House and Senate staff. Thus, it was S. 46 that was ultimately reported out of the House Merchant Marine and Fisheries Committee and brought to the House floor. On August 1, 1983, S. 46 was passed by the House of Representatives.

Upon our passage of S. 46 today, the bill will proceed to the President, whom I am told is eager to sign this legislation into law.

II. CAPT. CLINT MAGUIRE

House and Senate staff have worked together long and diligently on this matter, and the Coast Guard and the Department of Transportation have been more than cooperative. However, it is clear that one individual has made an exceptional contribution, far beyond anything required or expected of him. Capt. Clint Maguire, U.S. Coast Guard—retired, has worked on this project much longer than the current legislative initiative would suggest.

For many years in the Coast Guard he addressed the need to review, revise, and consolidate the maritime laws. Much later, in retirement, he was the primary resource for the Congressional Research Service for its analysis of title 46 of the United States Code. It was based on that CRS report to the Senate Commerce Committee that S. 2660 was first introduced.

Subsequently, Clint Maguire continued to be an invaluable resource to the Senate. It is fair to say that S. 46 would not now be ready for final passage if it were not for the tireless efforts of Captain Maguire. His only compensation is the satisfaction of seeing a long-awaited, much-needed initiative finally and properly completed. The Senate owes Captain Maguire its gratitude.

III. PURPOSE

The purpose of S. 46 is threefold. Primarily, to reorganize certain shipping laws as they appear in title 46 of the United States Code to make them more easily understood by the affected public. S. 46 remedies the internal inconsistencies of title 46 by providing clear definitions for all terms used throughout the title, by combining widely dispersed laws into groupings by subject, and by gathering the numerous exceptions to any general rules in one place.

A second purpose of the bill is to apply these laws to the maritime community in an easier, quicker, and less expensive fashion. With the goal of regulatory reform, this bill will lead to cost savings for the Federal Government and efficiencies for the maritime industry. A streamlined title 46, whose laws are organized so that they can be easily found and understood, reduces the need to resort to litigation to define the law, and provides the potential for later delegation of responsibility to the private sector, such as has been accomplished with private inspection and documentation societies.

The third purpose of this bill is to update or repeal outmoded law. Antiquated sections of title 46 have been identified in this bill. Where they no longer serve any purpose, and do not give rise to opposition which might serve to undermine the basic effort, these sections have been repealed. Other significant, although ancient, sections have been retained and updated.

IV. SCOPE AND SUBJECT MATTER OF S. 46

The bill before you has made new law only to the extent that it will add a new subtitle to title 46 of the United States Code. No substantive changes of a controversial nature were intended in its drafting. Rather, the attempt has been to modernize and reorganize the scope and format of the existing

law. Three sections of the bill have no basis in preexisting legislation in sections 6302, 7702, 103201, but have been added to aid in the smooth application and implementation of this legislation. One section of the bill, section 7305, reinstates in statutory form an oath for merchant mariners which did exist in earlier laws, disappeared through congressional omission, but has continued to be applied by the Coast Guard without objection. Other examples of reforms in the existing law are the modernization of the nutritional standards for seamen, the removal of gender-based terminology, the removal of antiquated titles, such as collector of customs and board of local inspectors, and the abolishment of leg irons and bread and water as a means of punishment. We have simplified seamen's rights of appeal by bringing them in line with their current application under the Administrative Procedure Act and Reorganization Plan 3-46 which abolished the Bureau of Marine Inspection and Navigation and the officers and the boards thereof, and transferred all functions of the Bureau, of its officers and its boards, and the Secretary of Commerce pertaining thereto, to the Commandant of the U.S. Coast Guard.

The following table shows those areas of the law generally covered by this bill:

Part A—General Provisions.
Part B—Inspection and Regulation of Vessels.
Part C—Reserved.
Part D—Marine Casualties and Accidents.
Part E—Licenses, Certificates, and Merchant Mariners' Documents.
Part F—Manning of Vessels.
Part G—Merchant Seamen Protection and Relief.
Part H—Identification of Vessels.
Part I—State Boating Safety Programs.

V. CONCLUSION

S. 46 has been the subject of many years of careful scrutiny and comment from the maritime community. This bill is the embodiment of a consensus that has existed for decades within the maritime community in that those laws affecting vessels and seamen were in dire need of consolidation and reform. It is a bipartisan product of the House and the Senate and is long overdue. I urge its passage by unanimous consent.●

● Mr. LONG. Would the Senator yield for questions?

Mr. PACKWOOD. Yes, I yield to my distinguished colleague from Louisiana, a member of the Merchant Marine Subcommittee.

Mr. LONG. I note that in certain instances, the House changed the language of S. 46, as we passed it on April 28. these language changes include the use of the term "tank vessel" and "tanker" in the House bill, whereas in our bill we used only the term "tank vessel." I ask the Senator, what is the origin of the term "tank vessel" and the relationship of that term to the term "tanker"?

Mr. PACKWOOD. The Senator is correct that our original bill and the House bill are different in this regard. The House version is an accurate expression of current law. "Tank vessel" is a term incorporating the provisions of current law (46 U.S.C. 391a(3)), which set forth the kind of vessel to which section 5 of the Port and Tanker Safety Act of 1978 applies. Instead of repeating the lengthy provisions of current law to describe such a vessel, the House decided to incorporate the provisions in the term "tank vessel" in order to make chapter 37 more concise. This concise term is currently used in the Coast Guard's regulations implementing the 1978 act, beginning at 46 CFR 30.01. Thus, the use of the term "tank vessel" does not amend, expand, or alter current law, or current Coast Guard inspection procedures or standards.

For example, it is the committee's intent that the use of the term "tank vessel" will not result in more vessels being inspected as if they were "tankers." The two terms "tank vessel" and "tanker" are not interchangeable for purposes of chapter 37 because a "tank vessel" may be a vessel which is not a "tanker."

Mr. LONG. I thank the Senator for his answer. Another example of the House version being different from the language in our bill is where the House bill uses the term "able seamen offshore supply vessel" whereas our bill used the term "able seamen—special (offshore supply vessels)." Does this difference represent any change in current law?

Mr. PACKWOOD. No.

Mr. LONG. Finally, I inquire of a provision that was not in our bill, but is in the House bill. The provision is subparagraph 3316(c)(2)(A). This provision states that when the Secretary of Transportation delegates vessel inspection responsibilities to a classification society, such as the American Bureau of Shipping, the "delegate shall maintain in the United States complete files of all information derived from or necessarily connected with the inspection or examination for at least 2 years after the vessel ceases to be certified." Is this provision a change in current law?

Mr. PACKWOOD. No, the language you cite tracks current law 46 U.S.C. 9(d).

Let me make a general response to the Senator's questions, which are helpful to our deliberations. Even though we are adopting the House version of S. 46, I assure the Senator and the Senate that the intent as reflected in our bill is the same as the intent of the House bill.

Mr. LONG. I appreciate the Senator's statement.●

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

SENATE JOINT RESOLUTION 136 PLACED ON CALENDAR

Mr. BAKER. Mr. President, I propose to discharge the Judiciary Committee from further consideration of Senate Joint Resolution 136 and then to place that item on the calendar if the minority leader has no objection.

Mr. BYRD. Mr. President, I have no objection.

I ask unanimous consent that I be added as a cosponsor to that legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I thank the Chair.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 136, a joint resolution to recognize Volunteer Firefighters Recognition Day, as a tribute to the bravery and self-sacrifice of our volunteer firefighters, and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF TITLE XVIII OF THE SOCIAL SECURITY ACT

Mr. BAKER. Mr. President, I propose now to take up H.R. 3677 if the minority leader is agreeable.

Mr. BYRD. Mr. President, there is no objection to consideration of this measure.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 3677, an act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3677) to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

The Senate proceeded to consider the bill.

Mr. DOLE. Mr. President, I would like to ask for immediate consideration of H.R. 3677, a bill to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

The purpose of the bill is to correct a technical error in section 122 of Public Law 97-248, the Tax Equity and Fiscal Responsibility Act of 1982. The

bill, which is identical to a provision previously agreed to by the Senate Finance Committee, as part of S. 951, and introduced as a separate bill, S. 1592, would establish a hospice cap at $6,500, indexed in future years by the medical care component of the Consumer Price Index.

As many in this body know, section 122 of Public Law 97-248 provided for reimbursement under the medicare program for hospice care. A cap on the maximum amount of reimbursement to each hospice program was established based upon the number of medicare enrollees in each program. The intent of the cap was to insure that payments for hospice care would not exceed what would have been expended by medicare if the patient had been treated in a conventional setting.

When the legislation was agreed to last year it was understood, based on information provided to the Ways and Means Committee and to the Finance Committee, that the payment cap would equal about $7,600.

However, we have since discovered that the information provided to us at that time was incorrect. As a result the formula, as we designed it, provided for a cap amount for 1984 that was far too low to allow hospices to provide adequate care.

The bill before us corrects the consequences of that original error in cost estimates. It establishes a specific cap amount which is a reasonable reflection of the costs of care; and a cap amount which will increase or decrease in future years to reflect medical care price changes.

Medicare payment for hospice services is scheduled to begin in November 1983. I expect, as do many others, that changes in the legislation are likely to be necessary based on the results of the soon-to-be-completed demonstration. Hearings will be held on the implementing regulations as soon as they are published for comment; however, I believe it appropriate to correct what we know to be an error in calculating the payment amount, before the publication of those draft regulations.

I am committed to fulfilling the promise we made to the terminally ill last year. In order to do so we need to correct any possible errors in the legislation as quickly as possible.

● Mr. HEINZ. Mr. President, I am pleased to support H.R. 3677, which would reestablish the intent of Congress by correcting the medicare reimbursement rate for the hospice benefit we enacted last year as part of TEFRA.

While the implementing regulations have yet to be released for public comment, I strongly urge my colleagues to support this legislation that would simply raise the reimbursement cap to $6,500. The bill has strong support in both the Senate and House of Representatives. It is purely a technical correction, and has no budgetary impact. More importantly, without timely passage of this technical amendment, medicare reimbursement for hospice care would be inadequate.

At issue, since passage of the Tax Equity and Fiscal Responsibility Act of 1982, it has come to our attention that the per capita cost prepared by the Congressional Budget Office was incorrect. The result was that using our original formula, the reimbursement cap would have been $4,200 instead of $7,200—an amount that clearly, would have been insufficient to cover hospice services.

This technical correction establishes a $6,500 cap, which takes into account the most current available data. And, to insure an ongoing, adequate level of reimbursement, this cap will be indexed annually according to the medical care component of the Consumer Price Index.

As chairman of the Special Committee on Aging and one of the principal architects of the hospice benefit for terminally ill medicare beneficiaries, I commend Senator DOLE and my colleagues in the other Chamber for their prompt action on this important matter. But, I am extremely disturbed over the administration's attempts to stall publication of the regulations necessary to implement this program on November 1.

Mr. President, it is my understanding that Secretary Heckler has been working with the Office of Management and Budget to release the regulations for public comment. Those of us in Congress who worked long and hard to see this benefit enacted, now demand the opportunity to work with the Department of Health and Human Services to be sure that implementation of the new hospice benefit is not thwarted by unreasonable regulatory delays.

If the regulatory delays cannot be resolved expeditiously, the hospice law takes effect November 1, with or without any guidance to medicare beneficiaries and providers of hospice services. While this administration quibbles over reimbursement rates, terminally ill medicare beneficiaries will be denied the humane alternative that hospice care provides. Let us not allow administrative delays to undermine the good work of Congress.●

Mr. BAKER. Mr. President, I ask unanimous consent that the bill be considered as having been read the first and second times and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 3677) was read the third time and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

H.R. 2230 PLACED ON CALENDAR

Mr. BAKER. Mr. President, earlier, I had a conversation with the distinguished minority leader about the next matter. I believe, based on those conversations, that perhaps the minority leader will not object to this request:

I ask unanimous consent that when the Senate receives H.R. 2230, the Civil Rights Commission authorization bill, it be placed on the calendar.

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object, I had indicated to the distinguished majority leader that I was going to initiate rule XIV procedures and put this on the calendar. He has beaten me to the punch. I am in accord with his action.

Mr. BAKER. I thank the minority leader for his statement. I am delighted to perform that act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 6 P.M.

Mr. BAKER. Mr. President, since the Senate is about to go out unless there is other business to be transacted today, I ask unanimous consent that, if the Senate does go out before the hour of 6 p.m., the RECORD remain open until that time for the introduction of bills and resolutions and for the filing of statements and reports by committees.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, there are one or two things on the Executive Calendar today. More than that, I see.

Mr. President, I inquire of the minority leader if he is in a position to consider the nomination of John P. Vukasin, of California, under the Judiciary, to be U.S. district judge, the nomination of William Perry Pendley, of Wyoming, to be an Assistant Secretary of the Interior under the Department of the Interior; Judith W. Rogers to be an associate judge of the District of Columbia Court of Appeals; A. Franklin Burgess, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia; James Brian Hyland, of Virginia, to be Inspector General of the Department of Labor, and certain nominations placed on the Secretary's desk in the Coast Guard.

Mr. BYRD. Mr. President, two nominees on the calendar have not been

cleared, and I refer to the Judiciary and the Department of the Interior. All other nominations, including the one that the distinguished majority leader did not mention under African Development Bank are cleared. All are cleared including that one.

Mr. BAKER. I thank the minority leader.

Mr. BYRD. Except the two which I enumerated.

Mr. BAKER. Mr. President, as I understand it then, we would be cleared by the minority to consider by unanimous consent Calendar Orders No. 250, 251, 252, and the nominations placed on the Secretary's desk in the Coast Guard?

Mr. BYRD. The majority leader is correct.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations just identified by me.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations confirmed en bloc are as follows:

THE JUDICIARY

Judith W. Rogers, of the District of Columbia, to be an associate judge of the District of Columbia Court of Appeals for the term of 15 years.

A. Franklin Burgess, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years.

[NEW REPORTS]

DEPARTMENT OF LABOR

James Brian Hyland, of Virginia, to be Inspector General, Department of Labor.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD

Coast Guard nominations beginning Mark A. Johnson, and ending David H. Boyd, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of August 1, 1983.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER, Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I am going to extend the time for the transaction of routine morning business if the minority leader has no objection.

I ask unanimous consent that the time for the transaction of routine morning business may be extended until not later than 6 p.m. this evening under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, I think we will be able to take the Senate out in a few minutes. I might describe the situation as I see it at this moment.

The Senate will convene tomorrow at 9:30 a.m. under the order previously entered.

After the recognition of the two leaders under the standing order, four Senators will be recognized on special orders of not to exceed 15 minutes.

After the execution of the special orders, it is anticipated that a time for the transaction of routine morning business will be provided for.

After the close of the time for the transaction of routine morning business, the business before the Senate will be the motion to proceed to the consideration of the Radio Marti bill, pursuant to the provisions of rule XXII, after the invocation of cloture.

I say for the benefit of Senators, however, that I anticipate and fully expect that that matter may be put over by unanimous consent, so that the Senate can resume consideration of the Interior appropriations bill. No such order has been entered yet, but I expect that it may be, based on the fact that the clearance process on this side of the aisle—and I understand on the other side, perhaps—has indicated that that is the desire of the parties principally involved. I hope we can finish the Interior appropriations bill tomorrow. Tomorrow is Thursday, and Senators should be on notice of the possibility of a late evening.

Mr. President, the Department of Defense authorization conference report may reach us tomorrow; and if it does, it is the intention of the leadership to try to reach that measure as well.

That is about as good as I can do with the situation at this moment.

I yield to the minority leader.

Mr. BYRD. Mr. President, is the distinguished and very able majority leader in a position to indicate what his plans are for Friday?

Mr. BAKER. Mr. President, as Members know, the adjournment resolution sent us by the House of Representatives provides for adjournment over until September 12, beginning today, tomorrow, or Friday. It is obvious that we are not going to be able to do that today, but it is possible that we can do it by tomorrow, especially if we are willing to stay late in order to accomplish that purpose. In order to do so, we would need to take care of the Interior appropriations bill, to do the DOD conference report, if we have it—if it is here—and perhaps other things that it would appear desirable to do.

It is still distinctly possible that we will be in on Friday, but I am prepared to say that it is my hope that we can finish Thursday evening; and it would be my intention to stay a little later than usual in order to accomplish that purpose, if possible.

Mr. BYRD. So it would not to be appropriate for me to start a rumor that we are definitely going out tomorrow evening?

Mr. BAKER. No. The rumor would be helpful if it were along these lines: We are going to go out Thursday evening if everybody will settle down and do everything we ask them to do.

Mr. BYRD. Which includes the Interior appropriations bill.

Mr. BAKER. Yes, it does.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. I thank the minority leader.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

IDEAS HAVE CONSEQUENCES

Mr. SYMMS. Mr. President, I have always subscribed to the view, expressed in the title of Richard Weaver's book, that "Ideas Have Consequences." Some of the ideas which have had the greatest consequences for the good of our society in recent years—and have had profound influence on my own thinking—are the ideas on political and economic freedom expressed by Leonard Read, whom I loved and considered more than a teacher, but a friend.

Leonard Read, who died recently, was the father of the Foundation for Economic Education, in Irvington on the Hudson in New York, which, for nearly 40 years has been the source for some of the most cogent and origi-

nal thinking and writing on the subject of liberty. Over the years he planted countless seeds and inspired others to nurture the harvest. The result is a new generation of independent thinkers who have changed the political and economic climate of this country, notwithstanding and not to mention the fact that our own President Reagan is a product of a friendship that goes back very far with the late Leonard Read, and I think it is fair to say that Leonard Read had an influence on the President's thinking in his formative years in the positions that he has come to.

Today, the virtues of the free market and the failures of socialism are more widely recognized, thanks in large measure to the labors of Leonard Read and his disciples at the Foundation for Economic Education and the good news is that they shall carry on under the very able leadership of Bob Anderson and Ed Opitz.

Mr. President, several days ago, in the Wall Street Journal, the very distinguished journalist, Vermont Royster, paid tribute to Leonard Read and the legacy he has left us in words that are more eloquent than I can muster. I ask unanimous consent that Royster's column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THINKING THINGS OVER—THE HALF-FORGOTTEN MEN

(By Vermont Royster)

I'm not sure that "conservative", the word so often applied, is the right one for the mood of the country these past few years. I am sure we are seeing a revolt against the politics that brought us repeated inflation, rising taxes, neglect of our defenses and a growing intrusion of government into everyone's life. It's a mood no politician, Democratic or Republican, can afford to ignore.

But Ronald Reagan and his followers, whatever they may think, didn't create it. They have only taken advantage of it more perceptively than their opponents.

For that mood, by whatever name you give it, has been a long time growing. The seeds of it were sown over many years by a few independent minds long derided by politicians and weighty political writers. Even now their names are only half-remembered.

One of those sowers was Leonard Read, who died just recently. No profound intellectual, he, but a man of perceptive mind who believed that if people would only look they would see that socialism, in all its guises, wore tattered clothes. So in the middle 1940s he launched the Foundation for Economic Education, run initially on a shoestring. Out of it poured a richness of books and pamphlets to teach the virtues of liberty, economic as well as political.

Some of those books he wrote himself. His little essay on the making of a pencil-showing how the marketplace brought together goods and technology from all over the world to make this simple tool ubiquitous and cheap—remains a classic.

Read's Foundation was fertile in offspring. One was spawned by an associate, F. A. Harper, who created the Institute for Humane Studies in California. Although he too has passed on, his institute remains and flourishes.

Len Read inspired the great Austrian economist—and later Nobel prize winner—Friedrich von Hayek to invite an international group of libertarian economists and philosophers to gather in Switzerland to exchange ideas. Out of this grew the Mont Pelerin Society, which still meets. Numbered amoung its first members, then young but now famous and covered with honors (including also a Nobel prize), was Milton Friedman.

Not all those who planted seeds of new (old) ideas about the virtues of economic freedom founded institutions or gathered formal disciples around them. Other labored privately, lifting their voices whenever they could find a platform or people who would listen.

One of these is Henry Hazlitt, currently approaching his ninetieth year with no diminution of mind and spirit. He first gained recognition as a literary critic (I still cherish his "Anatomy of Criticism," read in my college days). He served on The Wall Street Journal before its present editors were born and was for a time an editorial writer on both the old New York Herald-Tribune and the New York Times.

Then some 40 years ago he wrote a small volume, "Economics In One Lesson," which is almost what its title states. Anyway, there is no better introduction to the fallacies of socialist economics or the merits of the marketplace as a regulator of man's economic labors.

Perhaps the oddest of those sowers of seeds was Eric Hoffer, another who died this year. What made him seem odd was that he was a "man of the people" who worked all his life as a day laborer and who had no formal education. Not at all the sort of background from which you would expect an intellectual to spring, especially one to take up cudgels against the collectivist political philosophy that once so dominated the self-styled intellectual community.

Yet Hoffer did. His first book to find print, "The True Believer," was a penetrating critique of the collective fanaticism that inspires mass movements and mass thinking. In others he defended capitalism as the best guarantor of individual freedom, praised America when it was unfashionable to do so. Naturally he was viewed as a curiosity, tagged as the "longshoreman's philosopher," as if the two words were necessarily contradictory. Though Ronald Reagan awarded him the Medal of Freedom in his old age, he was hardly the darling of the true believers in the ideal that the country needed direction from an elite gathered in Washington.

Obviously this doesn't exhaust the list of the once lonesome voices raised to question the philosophy of statism that dominated political thinking for more than a generation. You would have to include Lawrence Fertig and John Chamberlain among others; and, once upon a time, William Buckley before he became a television character and a spinner of spy yarns. Mr. Buckley's National Review gave a platform to many such voices.

You would also have to include some more obscure in the popular attention, like Ludwig von Mises, who along with Hayek put socialism in all its forms under a disciplined microscope. They provided the intellectual underpinning for the rebirth of what, in shorthand, can be called free market economics.

How much influence any of these, individually, have had on the altered public mood, political or otherwise, is impossible to measure. But that altogether they contributed to the changing political climate I have no doubt.

For a long time they were prophets without honor. They were mostly ignored, even sneered at. Even today their faith in a free economy isn't shared everywhere. But no one in the academic, economic or political communities now scoffs at their ideas. Slowly the seeds they sowed have found roots, often among people who never heard of them.

Yet they persevered and together wrought a revolution in our ways of thinking about the way we manage the nation's affairs. It would be a pity if they were forgotten.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, it looks like there will be some reason for us to remain in session for just a little longer.

I ask unanimous consent that the time for the transaction of routine morning business be extended until 6:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I wish to report that a number of Senators are engaged in serious conversations now about the possibility of reviving the agriculture target price bill. I have just come from that meeting. I encouraged them to continue negotiations, but I pointed out to them that I have already announced there would be no more record votes tonight and that it is unlikely that anything can be worked out this evening that could be adopted by the Senate in a reasonable time.

In a moment I intend to ask the Senate to recess over until tomorrow. But before I do so, may I point out that if the negotiations by the interested Senators on the agriculture bill produce a result, it would be my hope that we could propound a unanimous-consent request in respect to that bill

shortly after we convene tomorrow. So Senators who may be listening in their offices or whose staff may be listening in the offices should be on the alert to the possibility of a unanimous-consent request in the morning to arrange a time and a method for the consideration of the agriculture target price bill. I am not certain that will occur but it could occur.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. BAKER. Mr. President, if no other Senator is now seeking recognition, I move in accordance with the previous order that the Senate now stand in recess until 9:30 a.m.

The motion was agreed to, and at 6:51 p.m., the Senate recessed until tomorrow, August 4, 1983, at 9:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate August 3, 1983:

DEPARTMENT OF LABOR

James Brian Hyland, of Virginia, to be Inspector General, Department of Labor.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Judith W. Rogers, of the District of Columbia, to be an associate judge of the District of Columbia Court of Appeals for the term of 15 years.

A. Franklin Burgess, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years.

IN THE COAST GUARD

Coast Guard nominations beginning Mark A. Johnson, and ending David H. Boyd, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on August 1, 1983.

HOUSE OF REPRESENTATIVES—*Wednesday, August 3, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We implore Your blessing O God upon all Your people and especially upon those with any special need. We pray that Your spirit will give healing to those who are ill, that Your strength will nurture any who are weak, that Your presence will give us peace. Enable us to put our trust in You and Your providence that we will gain the confidence and hope that Your spirit can give. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. BARTLETT. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BARTLETT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 356, nays 24, answered "present" 4, not voting 49, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes; and

H.R. 3564. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3394. An act to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance.

EDUCATING ALIEN CHILDREN

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, the quality and availability of education in America have surfaced this year for long-overdue national attention.

One question needs answering as we attempt to come to grips with the education issue: How will our hard-pressed local school districts afford quality schools?

In a celebrated case last year, the Supreme Court ruled that local school districts must provide educational services to alien children. The Court held that all persons living in the United States enjoy equal protection of the laws and have a right to receive free public education. Surely it is far better to have these young people in school than lurking furtively in alleyways trying to avoid detection. But we all know eduction is not free.

The money must come from somewhere. Bilingual education is particularly expensive. With few exceptions, undocumented aliens own no property and pay no taxes to local school districts.

Alien children are attending schools all across America—in New York, in Pennsylvania, in Florida, in Ohio, in California, and in my own State of Texas.

In Texas the cost of educating one alien student for 1 year is estimated to be $2,500. That is a major drain on the local tax base which supports our local school districts. Some of the poorest districts have the highest numbers of alien children.

There are 1,500 such children enrolled at this time in the Fort Worth Independent School District. Their enrollment in the past 2 years requires the equivalent of three additional elementary schools, or 50 classrooms. The bulk of these children, according to spokesmen for the district, are concentrated in schools which already are the most overcrowded.

In the first week after the August recess, our colleague, Mr. DE LA GARZA, and I will offer an amendment to the vocational rehabilitation legislation to redress this national problem. Our amendment will provide $500 to local school districts each year for each alien child enrolled, and thereby help to offset the often burdensome cost of educating these children.

The Supreme Court has ordered that school districts must assume this burden. The Federal Government therefore has a clear responsibility to help financially strapped local school districts meet the extra cost it has put upon them.

TASK FORCE ON HUNGER

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I think many Members of this House were surprised late yesterday when we learned, through the news media, that President Reagan is going to create a task force on hunger. But I want to say this morning that we welcome the President's interest.

For more than 2 years, Mr. Speaker, Congress has been trying to make a couple of simple facts about this problem clear to officials of the administration.

Yes, we want to cut out fraud, waste and abuse in food programs. Yes, we want to eliminate spending that does not help poor people. And yes, we have acted repeatedly in those fields. But no, we do not want to reduce the already thin benefits for those who are truly in need.

During much of this time, the basic answer from the administration has been—cut the budget. They have said—cut, cut, cut, and now we find the President saying he is "perplexed" by news stories about hunger. And we find a special assistant to the President quoted as saying the Government has no statistics on hunger, but it wants to find out what is going on.

Mr. Speaker, I can suggest a simple solution.

Let the President or his assistants call me on the telephone. I can arrange for them to get some evidence about what is going on. For much of this year, one of the subcommittees of our House Committee on Agriculture has been looking into the hunger problem. Mr. PANETTA of California, the chairman of the subcommittee, or Mr. EMERSON of Missouri, the ranking Republican Member, can give us a lot of information on what the subcommittee found. They found that there are hungry people in this great country today * * * and I am sure the subcommittee hearing records can be made available to anyone who wants to read them.

We are today watching a recovery in the general economy. How far it will go and how strong it will be, we do not know. We all hope it will improve the lives of many needy people and reduce the need for food assistance. But the need is still there, and it is still very substantial.

Congress has recognized this need. Early this year, we included action on surplus food donation in the jobs bill. In June, this House voted 389 to 18 for a bill to continue donation programs. Just yesterday, this House voted by 407 to 16 to express the sense of Congress that there should be no further cuts in food benefits to eligible and qualified needy people.

Just yesterday, also, the Census Bureau produced a new report on poverty. The number of people living below the official poverty line rose for the fourth straight year to the highest level since 1965. Most of last year's decline has been blamed on the recession, but the figures also may reflect some of the budget cuts of the past few years.

I would think that these and other facts have carried us far past the point at which the President needs a commission of experts to study the problem of hunger.

But if that study will provide any facts we do not already have, I welcome it.

If that study can make believers out of those in the administration who have been trying to cut food programs, then I welcome it with enthusiasm.

Mr. Speaker, I do not know who the members of the new study commission will be. I assume they will be qualified experts. But I think we have a situation here that reminds me of the story they used to tell about the doctors who examined us for service in the Armed Forces.

They used to say that the doctors would look for just two things—could you see lightning and hear thunder. If you could, you were fit to serve in the army. Well, I think the same philosophy can be used in picking the new commission. If the commission can, in a manner of speaking, see lightning and hear thunder, it will be able to see that there is good reason to be concerned about hunger.

SOUTHEAST INTERSTATE RADIOACTIVE WASTE MANAGEMENT COMPACT

(Mr. DERRICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERRICK. Mr. Speaker, in 1980, the Congress passed legislation which handed the responsibility for management and disposal of low-level radioactive waste to the individual States.

The bill I am introducing represents the culmination of a long and complex process toward agreement by eight Southeastern States to form a compact for shared management and disposal of low-level wastes.

The first site for the Southeast region will be the Chem-Nuclear Services burial site in Barnwell County which is in my congressional district in South Carolina.

This will be available to Southeastern States until 1992, after which another compact State will assume the responsibility.

Since Chem-Nuclear is one of only two commercial low-level sites operating in the Nation, South Carolina has

borne the brunt of waste management responsibility. I pushed for the Low-Level Waste Policy Act of 1980 because I knew it would bring about an equitable and efficient system of regional management.

I solicit your support as cosponsors of this bill approving the compact and urge quick action by the committees of jurisdiction.

HEALTH INSURANCE FOR THE UNEMPLOYED

(Mr. EVANS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Illinois. Mr. Speaker, one of the greatest tragedies of our current high unemployment is that millions of Americans have lost their employment-based health insurance along with their jobs. According to the Congressional Budget Office, a startling 14 million unemployed workers and family members, including 4 million children, had no health protection at the beginning of this year.

In my district in west central Illinois, where unemployment is greater and of longer duration than in most other areas of the country, the situation has reached crisis proportions. Unemployed people with diabetes who cannot afford insulin have come to my office for help, but there is no place to refer them. Unemployed people in my district are postponing needed surgery because they have no way to pay for it.

These people must be helped. We can help them by passing the Health Care for the Unemployed Act of 1983. Americans often demonstrate their compassion for victims of tragedies in other lands. Here is a golden opportunity for us to show the same concern for our fellow citizens.

CRISIS EXISTS NOW ON HUNGER

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Mr. Speaker, during the past year, the cuts in Federal nutrition programs have had a profound impact in Connecticut. Our repeated pleas to the administration that the USDA release additional Government-owned commodities for distribution to the hungry have fallen on deaf ears. Only 2 weeks ago, the Connecticut delegation received a letter from the Administrator of the Food and Nutrition Service that the administration believed it was "taking every reasonable step necessary" for the hungry people of our country. We have known all along that was not the case.

It now appears the administration has changed its position with its announcement of a new task force on hunger. But for the thousands of people who must resort to over-extended soup kitchens and food pantries in Connecticut, the crisis exists now. I do not believe this task force will tell us anything we do not already know. There have been numerous studies of the growing problems of malnutrition resulting from unemployment and the recession. Action is now needed.

The House of Representatives has already approved excellent legislation that would improve and increase the distribution of surplus Government-owned commodities. I would urge the President to strongly support its enactment.

WAR ON POVERTY LOST

(Mr. HARRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARRISON. Mr. Speaker, in 1964, this Nation declared a war on poverty. Yesterday, we announced that we lost. Fifteen percent of our people are now living in poverty. That is more than at any time since 1965.

And so, yesterday, the President announced that he is going to appoint a commission to tell him what to do about hunger in America.

Well, Mr. President, you do not need a commission to tell you why so many people are poor. The Census Bureau told you yesterday. It is because of the recession, and unemployment, and your cutbacks in programs such as aid to dependent children.

And you do not need a Government commission to tell you why people are hungry. It is because they do not have enough to eat.

And you do not need a commission to tell you what to do about it. Thirty four million poor Americans can tell you that. Stop what you are doing. Stop cutting aid to pregnant women and young chidren and those who cannot find jobs and the sick and the disabled. Because if you do not stop, Mr. President, the loss of the war on poverty will be followed by a massacre of the poor.

HUNGER IN THE UNITED STATES AND THE REAGAN POLICIES

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, Ronald Reagan setting up a commission on hunger is like James Watt setting up a commission to study wildlife preservation; Billy Martin setting up a commission on sports etiquette; or Jaws setting up a commission on beach safety.

If Mr. Reagan wants to learn about hunger in this country, he need look no further than the actions of his own administration.

According to his own census figures, 2 million more children have been driven into poverty since President Reagan took office.

If this rate continues, 4½ million children will be locked into poverty during Mr. Reagan's term in office.

On the average, Reagan policies are adding as many children to the poverty rolls every year as were escaping poverty under the Johnson administration.

And make no mistake: Children living in poverty mean children living in hunger, and that translates into poor health, poor school performance, and medical costs.

Attacking hunger in this country is going to take more than a commission or the Secretary of Agriculture pushing a shopping cart around a suburban supermarket for a week.

It is going to take a commitment to fair policies that support and encourage the poor instead of punishing and victimizing them. The President would do well to call a halt to setting up commissions, and read the reports that are already on the shelf.

He can start with the dismal figures his own administration released yesterday.

THE FEDERAL RESERVE BOARD CHAIRMAN'S ROLE IN SOLVING FISCAL PROBLEMS

(Mr. LUNDINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNDINE. Mr. Speaker, within the last 24 hours, both Alan Greenspan and Senator ROBERT DOLE have called for a summit between Members of Congress and the White House to deal with the problem of deficit reduction. Alan Greenspan has called for Speaker of the House O'NEILL and President Reagan to attempt to reach a consensus on this problem. Senator DOLE called for a bipartisan effort from the House, Senate, and President to address this problem.

I do not believe that the President and Speaker O'NEILL, or a bipartisan effort between the House, Senate, and the President can alone arrive at a solution to this problem. What is really needed here is to have Paul Volcker, Chairman of the Federal Reserve, involved in this effort. It is Chairman Volcker who so many times has warned Congress that the only alternative to large deficits is the implementation by the Federal Reserve of monetary policies that perpetuate high real interest rates. As such, it is

Chairman Volcker who has the capacity to make the central tradeoff to the sacrifices which must occur for deficit reduction—lower real interest rates.

Yesterday, I wrote to Paul Volcker and urged him to take the leadership in developing a national accord with the Congress and White House to reduce budget deficits and lower interest rates. Mr. Volcker is in an ideal position to attempt to establish some consensus by the time of the fiscal year 1985 budget submission to the Congress next January. Only he can do so in such a way to remove it from the politically charged climate that would exist if such an effort is made only by the Congress and the President and only addresses the size of the deficit without dealing with interest rates.

I urge my colleagues to join me in this effort to urge Mr. Volcker to exercise leadership on this critical issue.

A LESSON TO BE LEARNED FROM THE VOYAGE OF CHRISTOPHER COLUMBUS

(Mr. WILLIAMS of Montana asked and was given permission to address to House for 1 minute, and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, 491 years ago this day, an hour before dawn, with a crew of 90 people, Christopher Columbus set sail on his historic voyage. The importance of that journey was not only in its epic nature, though epic it was, not only in the discovery of the New World, though a new world was opened. The importance of that journey was also in the insistence of one man that we put behind us the misinformation and superstitions of the past and chart a course to the truth.

PROGRESS TOWARD BUDGETARY RETRAINT DIMMED BY PERSISTENT DEFICITS

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, as the August recess draws near, the House can be proud that it has consistently enforced the limits of the budget resolution. Last night's reduction of general revenue sharing to conform to the budget limits was the most recent example.

However, even with this record, a very dark cloud looms over our economic horizon. This is the cloud of unprecedented Federal deficits. The irony is that the more robust the economic recovery, the more imminent and dangerous these deficits become for reigniting inflation, high interest rates, and another recession.

Many talk about deficits but too little is done. What we need is for the President, the Speaker and congressional leaders of both parties to hold a Camp David type summit, put partisan concerns aside for the next few months and come out with a serious plan to get these deficits under control. Until huge deficits become a bipartisan concern with a bipartisan solution, I am afraid they will be just a subject of political rhetoric and not economic action.

DOD BILL STILL CONTAINS 90 PERCENT OF ADMINISTRATION REQUESTS

(Mr. GEJDENSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEJDENSON. Mr. Speaker, yesterday the conference committee on the DOD bill decided to include the $114 million for chemical weapons. This is particularly distressing after that money was rejected by the House by almost a 100-vote margin. In the Senate, for the first time since 1977, it was required that the Vice President break a tie in order to include the chemical weapons money.

In the DOD bill, we leave 90 percent of the administration's money intact—$700 million for measures that would help defend our troops. We also provide additional moneys, $33 million for research and development.

Our present supply of chemical weapons in Europe is adequate to fight a 30-day war. We still have the State Department and the Defense Department unable to talk to our European allies about the location of these weapons on their territory. Additionally, this provides a problem as the Pershing debate rises in Europe. This is an additional area where we will only embarrass ourselves with our Western allies.

Mr. Speaker, I would hope that the committee rethink its position.

THE PRESIDENT'S ZIGZAG POLICY

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, one of the classic battle maneuvers at sea is known as the zigzag. From the days of Horatio Nelson and our own John Paul Jones to the present, the zigzag—a back-and-forth, uneven pattern of movement—has enabled warships to confuse the enemy as to their intent and their destination.

Now that President Reagan has actually committed American warships, along with a growing number of American "advisers" and combat personnel, to provocative action in Central America, the principle of the zigzag once again is deployed.

Unfortunately, the President's Central American policy is based on a zigzag pattern. First, he zigs this way, with overtures toward peaceful negotiation and bipartisan consultation, as in his April message to the joint session of Congress. Next, he zags that way, with covert escalations and the threat of more to come, without prior consultation with the Congress.

The President's zigzag policy has our potential adversaries confused; but, unfortunately, so has he confused the Congress and the American people.

Mr. Speaker, it is time for this country to establish a rational policy and a clear mission in Central America before Mr. Reagan's zigzag policies are tested under all too real conditions.

BUSINESS AS USUAL

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I am scared. We talk a lot about fiscal policy around here. We worry about it, and economists and Federal Reserve Board members scold us about it. Businessmen tell us they cannot live with the deficits we create. Member after Member takes the well of the House and deplores what we call the casualness of the Reagan administration about deficits of the $200 billion dimension. We think we are doing something heroic when through the budget process we order ourselves to raise taxes by $12 billion—a pittance compared to the fiscal gap—knowing full well we will never deliver on it, and if we did that it would be the excuse to spend more.

Taxes aside, when it comes to spending, Mr. Speaker, it is business as usual. Take yesterday and today, for instance. We honored a great man by a national holiday we do not need at a cost to Government alone of about a quarter of a billion dollars. Then we added over $460 million a year for the next 3 years, to revenue sharing, a program I support but which we cannot afford to expand. Today, unless I read the signs wrong, we are going to begin a new entitlement program we do not need, health insurance for those unemployed too well off to qualify for medicaid, at a cost of $2 billion a year. I know we must honor Martin Luther King, we cannot stand up to our demanding local officials, we have got to help even the more affluent unemployed, and so forth.

Mr. Speaker, we have met our fiscal enemy and it is us. We are hypocrites to pretend anything else.

THE SOLOMON AMENDMENT AND DRAFT REGISTRATION

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, but I do not desire to revise and extend my remarks.

The SPEAKER pro tempore (Mr. MINISH). The gentleman from New York (Mr. SOLOMON) is recognized for 1 minute.

Mr. SOLOMON. Mr. Speaker, last night the Senate and House conferees on the Defense authorization bill threw out the so-called Moynihan amendment which would have delayed by 90 days the Solomon amendment which prohibits young men who are in violation of the Draft Registration Act from receiving any college loans and grants.

Mr. Speaker, this was the last-ditch effort of attempts to repeal or delay the Solomon amendment. I urge all of you to let your constituents know these students can do themselves a favor—go out and register like the other 96 percent of the 10 million young Americans who have been loyal, patriotic, and have obeyed the laws of the land, because the Solomon amendment is law.

And I urge all of you to also tell your college administrators who have been complaining about the minimal paperwork to now start to worry about the defense of their country and the preparedness of their country and to get with the Solomon amendment.

TAX REPEAL LEGISLATION THAT WOULD SAVE MONEY FOR THE GOVERNMENT

(Mr. PETRI asked and was given permission to address the House for 1 minute.)

Mr. PETRI. Mr. Speaker, today I am introducing legislation which would save the Government money, reduce regulation, and lessen the paperwork of some small businesses. The legislation will repeal a tax on the manufacture of small-scale gasohol equipment, primarily used by farmers to produce gasohol for their tractors and other farm machinery.

With every year that this tax is collected the Government loses money. The tax generates only about $6,000 a year in revenue, and Treasury officials have reported that the cost of administering this tax is actually much higher than $6,000.

We need to redouble our efforts to find ways to reduce Government spending, and eliminate needless Government regulation on small businesses. While this legislation is small in scope, I believe it is a step in the right direction.

PRESIDENT APOLOGIZES TO INTERNATIONAL FEDERATION OF BUSINESS AND PROFESSIONAL WOMEN

(Mr. SCHUMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, yesterday a delegation from the International Federation of Business and Professional Women was not permitted to tour the White House.

Today it is reported that the President will go before the group to apologize. It is also reported today that the administration will ask the Supreme Court to loosen restriction on Federal aid to institutions that discriminate against women.

The doorkeeper at the White House who kept the women out was a more accurate indicator of the President's policies than his apology is today.

Mr. Speaker, the gender gap will continue as long as the President talks one way and acts another.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2992, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1983

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 98-341) on the resolution (H. Res. 296) providing for the consideration of the bill (H.R. 2992) to authorize appropriations for the fiscal years 1984 and 1985 for international security and development assistance and for the Peace Corps, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3231, EXPORT ADMINISTRATION AMENDMENTS ACT OF 1983

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 98-342) on the resolution (H. Res. 297) providing for consideration of the bill (H.R. 3231) to amend the authorities contained in the Export Administration Act of 1979, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2379, NATIONAL PARK SYSTEM PROTECTION AND RESOURCES MANAGEMENT ACT OF 1983

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 98-343) on the resolution (H. Res. 298) providing for consideration of the bill (H.R. 2379) to provide for the protection and management of the national park system, and for other purposes, which was referred to the House Calendar and ordered to be printed.

□ 1045

HEALTH CARE FOR THE UNEMPLOYED ACT

Mr. BONIOR of Michigan, Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 276 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 276

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3021) to amend the Social Security Act to provide for a program of grants to States to provide health care benefits for the unemployed, and for other purposes, the first reading of the bill shall be dispensed with, and all points of order against the consideration of the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and to the amendments made in order by this resolution and shall continue not to exceed two hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments recommended by the Committees on Energy and Commerce and Ways and Means now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 3521, said substitute shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of section 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344), clause 7 of rule XVI, and clause 5(b) of rule XXI are hereby waived. No amendment to the bill or to said substitute shall be in order except (1) an amendment printed in the Congressional Record of July 12, 1983, by, and if offered by, Representative Bliley of Virginia, said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Bliley and a Member opposed thereto, and said amendment shall not be subject to amendment except an amendment printed in the Congressional Record of July 20, 1983, by, and if offered by, Representative Waxman of California, and said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Waxman, and a Member opposed thereto; and (2) an amendment printed in the Congressional Record of July 20, 1983, by Representative Frenzel of Minnesota, and said amendment shall not be subject to

amendment but shall be debatable for not to exceed thirty minutes to be equally divided and controlled by Representative Frenzel and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendment thereto to final passage without intervening motion except one motion to recommit with or without instructions. All points of order, except under clause 7 of rule XVI, are waived against instructions contained in a motion to recommit and against any amendment required by said instructions to be reported back to the House.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 276 provides for the consideration of H.R. 3021 to amend the Social Security Act to provide health care benefits for the unemployed. In order to allow the consideration of H.R. 3021 in an expeditious and orderly manner, House Resolution 276 provides for a modified closed rule allowing 2 hours of general debate; 1 hour of debate shall be equally divided and controlled by the chairman and ranking minority member of the committee on energy and commerce and 1 hour shall be equally divided and controlled by the chairman and ranking minority member of the Committee of Ways and Means.

In order to provide for the prompt consideration of H.R. 3021 on the floor of the House of Representatives, it was necessary for the Committee on Rules to waive points of order against the bill pursuant to section 402(a) of the Congressional Budget Act of 1974. This section of the Congressional Budget Act states that it is not in order to consider any bill authorizing enactment of new budget authority for a fiscal year unless that bill was reported by May 15 preceding the beginning of such fiscal year. Because H.R. 3021 would authorize enactment of new budget authority in fiscal year 1983, and because the bill was not reported by May 15, prior to the beginning of this fiscal year, a waiver of section 402(a) of the Congressional Budget Act was requested of and granted by the Committee on Rules.

Chairman JONES of the Budget Committee has informed the Committee on Rules that due to the emergency nature of H.R. 3021, and because the legislation is assumed in the revised concurrent resolution on the budget for fiscal year 1983, and in the first concurrent resolution on the budget for fiscal year 1984 (House Concurrent Resolution 91), a majority of the Budget Committee members would support the necessary budget act waivers. After general debate, H.R. 3021 shall be considered for amendment under the 5-minute rule. House Resolution 276 makes in order the consideration of the text of H.R. 3521 as an amendment in the nature of a substitute in lieu of the recommended amendments from the Committee on Energy and Commerce and the Committee on Ways and Means printed in the bill.

H.R. 3521 shall be considered as read. In order to allow consideration of this amendment in the nature of a substitute, the Committee on Rules waived points of order against the substitute regarding section 401(b)(1) of the Congressional Budget Act of 1974. This section prohibits the consideration of any legislation providing new entitlement authority becoming effective prior to the first day of a fiscal year within the calendar year in which the legislation was reported. House Resolution 276 also waives points of order against the substitute for failure to comply with clause 7 of House rule XVI, the germaneness requirements as well as clause 5(b) House rule XXI which prohibits the consideration of an amendment carrying a tax or tariff measure during the consideration of a bill reported by a committee having no tax or tariff jurisdiction.

The amendment in the nature of a substitute is not open for amendment except for the amendment printed in the CONGRESSIONAL RECORD of July 12, 1983, by Representative BLILEY of Virginia and the amendment printed in the CONGRESSIONAL RECORD of July 20, 1983, by Representative FRENZEL of Minnesota.

The amendment, if offered by Representative BLILEY, is debatable for up to 30 minutes to be equally divided and controlled by Representative BLILEY and a Member opposed to the amendment. Representative BLILEY's amendment is not amendable except for one amendment printed in the CONGRESSIONAL RECORD on July 20, 1983, by Representative WAXMAN of California. The amendment shall be debatable for up to 30 minutes to be equally divided and controlled by Representative WAXMAN and a Member opposed thereto.

Representative FRENZEL's amendment shall not be amendable but is debatable for up to 30 minutes to be equally divided and controlled by Representative FRENZEL and a Member opposed to the amendment. House Resolution 276 provides for one motion to recommit with or without instructions. If a motion to recommit with instructions is offered, the rule waives all points of order against the instructions except clause 7 of House rule XVI the germaneness rule.

Mr. Speaker, according to the Congressional Budget Office, during fiscal year 1984, 9.6 million people will, as a result of being unemployed, find themselves without health insurance. If you consider their affected immediate dependents, that number rises to 19.1 million people who, through no fault of their own, will be without health insurance coverage. This legislation seeks to remedy this grave and intolerable situation by authorizing $350 million in fiscal year 1983, $1,869 billion in fiscal year 1984, and $1,538 billion in fiscal year 1985 for block grants to States interested in providing health related services for unemployed workers and their families. Grants to States would be based on statewide unemployment figures and individual eligibility would be linked to eligibility for unemployment compensation benefits. Participating States would be required to provide certain amounts of matching funds based on unemployment rates, receipt and exhaustion of unemployment benefits. The bill provides for copayments on the part of recipients as well as a requirement that nonpublic employers of 25 or more employees who provide health care insurance, extend health care coverage after the layoff of covered workers. The bill also authorizes a discretionary Federal grant program of $96 million in fiscal year 1984, $77 million in fiscal year 1985, and $60 million in fiscal year 1986 for assistance to hospitals providing services to the unemployed and the uninsured. The bill also increases the block grant for maternity and child health services from $373 million to $483 million in fiscal year 1984 and thereafter.

Mr. Speaker, as you know, H.R. 3021 was initially reported from the Committee on Energy and Commerce on June 7, 1983, and sequentially referred to the Committee on Ways and Means which reported the bill on June 30, 1983. The two committees have conferred, they have considered and they have compromised. The legislation we have before us today is the product of many hours of careful debate and deliberation. I believe House Resolution 276 provides a fair rule for the consideration of this legislation allowing 2 hours for debate and waiving necessary points of order as to allow consideration of an amendment offered in the nature of a substitute and three additional printed amendments. Mr. Speaker, House Resolution 276 allows for extensive debate and full consideration of this very important legislation and I urge its adoption.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman for yielding me the customary 30 minutes.

Mr. Speaker, I would like to say right up front that we should defeat this rule. As our former distinguished colleague, the gentleman from Califor-

nia, Mr. Clausen, a member of the Rules Committee, used to say, the House makes a mistake in just considering rules as a parliamentary procedure, and that we should uniformly just accept rules that come out of the Rules Committee. When it is an arbitrary, capricious and unfair rule in a bad bill, it is an opportunity to kill a snake where you find it. We should have done it in the Rules Committee. We should have at least been fair in the way we handled the rule in the Rules Committee; but now that it is here, we should defeat this rule and give the opportunity for the third time for the Rules Committee to consider the rule.

This rule has a very interesting history that I think my colleagues might be interested in hearing. It first came before the Rules Committee and we heard the customary testimony from the chairmen of the two committees involved, the distinguished gentleman from Illinois (Mr. ROSTENKOWSKI), chairman of the Ways and Means Committee and members from the Committee on Energy and Commerce.

The gentleman from Illinois said very candidly that on instructions of his committee, he had no objection to an open rule as to title I of this bill.

The gentleman from California (Mr. WAXMAN) came in and, of course, wanted it totally closed.

We heard testimony from the gentleman from Minnesota (Mr. FRENZEL) in support of an amendment; the gentleman from Iowa (Mr. TAUKE) in support of an amendment or a substitute; the gentleman from Ohio (Mr. GRADISON) in support of an amendment; the gentleman from Virginia (Mr. BLILEY) in support of an amendment dealing with abortion. It was a lengthy hearing.

I had the impression that the Rules Committee was basically going to make this an open rule as to title I. There was no need to close it. Ways and Means had said as to their part of the rule, they saw no problem with it being open, which would have made in order these various amendments that are referred to. But mysteriously, something happened and the Rules Committee decided that no, in effect, we are going to have a closed rule. But on a recorded vote, the amendment of the gentleman from Virginia (Mr. BLILEY) dealing with the issue of abortion was made in order on a bipartisan vote, I might add, and the rule was reported with no other amendments in order.

Well, after a few days, apparently a determination was made that that is not going to sell on the floor of the House. Republicans are going to vote against it because in substance it has not been properly drafted and a lot of other Members would vote against it for a variety of reasons, including the amendment dealing with abortion.

So the Rules Committee decided that they would have another hearing on this great issue and reconsider the rule. It came back to the Rules Committee. We heard from the same Members supporting amendments. We heard at length from the gentleman from California (Mr. WAXMAN). I do not believe we heard from the chairman of the Ways and Means Committee on that particular occasion.

The Rules Committee reconsidered the rule and this time decided, yes, the Bliley amendment would be in order, not subject to any amendment except one offered by the gentleman from California (Mr. WAXMAN), which would say that there would be the exception for rape and incest; so then we had two amendments on abortion. They decided they would pick and choose between the other pending amendments to pick the one, you know, that did not bother them too much, and so they selected the amendment of the gentleman from Minnesota (Mr. FRENZEL) and made it in order.

□ 1100

But it summarily dismissed the Gradison amendment, dismissed the Tauke substitute or any others. They just picked and chose between not even their own party's amendment and so the others are not in order. The rule was reported out on a straight party line vote.

And here we are.

Now, as to the content of this rule. The gentleman from Michigan has described it quite well, but there are a couple of little nuances that I would like to emphasize a little bit.

It is a modified closed rule with 2 hours of general debate.

The first amendment made in order is an amendment in the nature of a substitute which consists of the text of H.R. 3521, a so-called compromise worked out between the Committees on Energy and Commerce and Ways and Means. It waives section 401(b)(1) of the Budget Act, which prohibits new entitlement authority becoming effective before the next fiscal year.

It waives clause 5(b) of rule XXI which prohibits a tax or tariff amendment by a committee with no jurisdiction on such matters, and clause 7 of rule XVI, which is the germaneness rule.

The substitute is made in order as original text.

I mentioned that the amendment by the gentleman from Virginia (Mr. BLILEY) is in order with one amendment by the gentleman from California (Mr. WAXMAN) in order to that.

The Frenzel amendment, which is a means test amendment allowing assets of $100,000, including a house or its equity, would be in order.

Now, as to the motion to recommit with or without instructions. The argument was made in committee, "Well, you all can offer that in your motion to recommit with or without instructions. Why do you complain about these amendments not being in order?"

But they do miss one little point there. The germaneness is waived on the amendments to the main body but germaneness is not waived on the motion to recommit with instructions. So that is a little nuance there that makes an awful lot of difference.

There are a lot of Members who are going to talk about the substance a little bit under the rule, and I hope that it is all that we are going to hear about the substance and we will never get to the bill itself.

I will not prolong it. But I would ask these questions about the substance:

How are we going to pay for this program?

It is a new program with no way determined as to how it is going to be paid for. We say, "Oh, well, we will worry about that later," which really tells us the truth behind this bill. It is another one in a series of totally political bills we have had flushed through this institution in recent weeks and months.

Second, it is alleged that this is a short-term emergency. Think back, my colleagues. How many short-term emergency bills have we had go through here that are short term? They pass through here and they go into law usually in perpetuity.

Third, we have no means test at all. A lot of people are going to benefit from this thing, this new entitlement program, that should not be benefitting from it.

If it, heaven forbid, in this form should get to the President he would veto it in this form.

I urge my colleagues to defeat this rule. Let us give the Rules Committee one more chance maybe to report a fair rule and maybe then we can come up with a bill that all Members can support with the funding provided, with a means test, and truly a short-term bill.

Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I oppose the rule on H.R. 3021.

When this matter initially came before the Rules Committee, I joined the chairman of the Ways and Means Committee in supporting that portion of the rule which our committee directed him to request. That rule would have permitted amendments to title I or the substitute legislation that has been scheduled for consideration by the House.

Mr. Speaker, we are about to debate the merits of a major and costly new title (21) of the Social Security Act. Under the final rule granted for debate, several worthy amendments

that would, in my view, make improvements in the proposal are being excluded from consideration by this body. These amendments include a substitute block grant proposal, which would provide greater flexibility to the States to tailor health care aid to coincide with existing public and private efforts to assist the unemployed. This particular proposal was developed by Mr. TAUKE in cooperation with the National Governor's Association, and it enjoyed their support when this matter was before the Energy and Commerce Committee. My colleagues, Mr. FRENZEL and Mr. JENKINS of the Ways and Means Committee, offered a similar block grant proposal in the form of H.R. 3521. Both of these proposals would require a source of financing.

Another of my colleagues, Mr. GRADISON, attempted to have made in order a reasonable approach to targeting benefits, by allowing States the flexibility of requiring those with the financial wherewithal to bear a little more of the burden so that our limited dollars could be directed to those most in need.

The gentleman from Illinois (Mr. PORTER) wanted to offer an amendment that would make the dollars available to the States under H.R. 3021 subject to the appropriations process. This would seem sensible because, with continued improvement in the economy, less money may be needed in fiscal year 1985. Under H.R. 3021, the funds will flow without review by the Appropriations Committee.

Under the rule granted, these amendments are being denied consideration by the House. I believe that Members should have the opportunity to discuss and vote on the critical issues raised through these amendments.

Why is the majority afraid to let the House work its will on these matters? Are they afraid that some of the ideas embodied in the amendments might upset the bill which was cooked up for force feeding to Members?

The majority party is in firm control of this body and I assume any minority amendments could be defeated, irrespective of their merits. Why are we being denied the opportunity for their consideration?

Mr. Speaker, this rule should be defeated.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the distinguished chairman of the Ways and Means Committee, the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I rise in support of the rule for consideration of H.R. 3021.

I believe it is a fair rule, providing for the efficient consideration of the issue of health insurance for the unemployed, while providing at the same time for consideration of amendments addressing the major issues arising in connection with this proposal.

The proposed rule—House Resolution 276—provides for the consideration of substitute language—introduced as H.R. 3521—which reflects agreement between members of the two committees—Ways and Means and Energy and Commerce—which took action on this important legislation. Members of the House of Representatives are not being asked to decide between two differing versions of legislation reported by separate committees. What you will have before you is an agreed-upon version.

The rule does make in order certain amendments to this substitute language. Among these is an amendment, to be offered by the gentleman from Minnesota (Mr. FRENZEL), permitting the States to apply an assets test as a condition for receipt of health benefits under the public program in the State.

Means testing or assets testing would not generally have been permitted in the legislation agreed to by the Committee on Ways and Means or in the language of the substitute that will be treated as original text under the rule. What the substitute language does require, however, is that 5 percent of the Federal funds must be set aside and used exclusively to provide benefits for the needy unemployed—who meet whatever means test or assets test the State decides to use. It was the judgment of the Committee on Ways and Means at the time it considered this legislation that—aside from this special 5-percent provision—it would be best not to have any additional means or asset test done by the States under this program.

However, this view was by no means unanimous in committee. Some Members would have preferred to permit further means or asset testing in order to assure that public funds would not be used to provide health insurance for relatively well-to-do people who could afford to pay for their own health insurance.

Since that time, the Committee on Rules has recognized the importance that Members of this body attach to the assets testing issue and has recommended that the Frenzel amendment be made in order under the rule. Although I did not support the Frenzel amendment when it was offered in committee, I do support the decision of the Rules Committee to make that amendment in order so the Members can express their judgment on this issue.

In summary, I believe that the rule is fair and equitable. It makes it possible for Members to address directly the major issues arising under this legislation. I urge the Members vote for the previous question and for the rule.

Mr. LOTT. Mr. Speaker, I yield 3½ minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I rise in opposition to the rule. It simply is ridiculous that we should be starting a brandnew program in a whole new area without having any effective chance whatsoever to offer amendments.

The normal argument on behalf of a closed rule is that the committee involved is somehow more knowledgeable than this body as a whole and that any effort to allow amendments would lead to a much weaker final product.

Well, let me tell you that in this case the committees did a lousy job.

They create another entitlement program, No. 1.

Two, they add to the financial burden on the States.

Three, they preclude the States from establishing effective standards.

And, four, they increase again the already burdensome Federal deficit.

I fully recognize the need to do something to protect the unemployed during periods of high unemployment from the loss of health insurance and I come from a district with better than 18 percent unemployed right now.

But we simply cannot afford a whole new entitlement program in this area.

Now, I know the argument is made that this is only a temporary program with a financial cap. Well, when have you ever known of a temporary entitlement program that did not become permanent. Name one for me.

And as far as dollar caps are concerned, there were caps on the food stamp program, the energy assistance program, and the title 20 program. We all know what happened in these cases. Every time a crunch arrived the cap immediately went upward.

This bill would prevent the States from imposing a means test on the program. Why do we do that? When dollars are short, a means test is the most effective way of insuring that those most in need are assisted.

We are precluded under this rule from offering an amendment to allow the States to institute a means test if they feel that is the best way or the most effective manner in which to stretch out their dollars. We need a rule that allows that opportunity.

We also need a rule that allows us to reduce the $4 billion cost of the program; $4 billion during a time of triple digit deficits will only add to the problem and threaten a return to the economic conditions that produced the hardship we are seeking to address in the first place.

The fact is we can meet the problem with less cost and if we can we ought to.

We need a rule that allows an overall substitute to be offered which would provide this body with an alternative to the bill before us. Many

States are unhappy with various aspects of the committee proposal.

We have a substitute that would correct many of these shortcomings as well as the problem areas I have just cited, but we are precluded from offering it as an amendment under this rule.

When a new program is being undertaken it must be fully debated and open for amendment on the floor. That is my view. It has always been.

We can go back to what the Court said on the legislative veto and all of the rest. It is as a result of our not doing what we should be doing in the first place, more clearly defining what we intend.

We have enacted too many programs over the years that were badly structured because they were not fully considered, and I do not think we ought to be making the same mistake today.

I urge Members to defeat this rule, open it up, and give us an opportunity to clean up this legislation in order to make it much more effective.

Mr. BETHUNE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I will be happy to yield to the gentleman from Arkansas.

Mr. BETHUNE. Mr. Speaker, I support the gentleman on this. I agree with his comment. It should be fully debated and open for amendment on the floor because I also agree with the gentleman that the committee did not do a good job.

There are always those occasions here.

The point I want to make is that just the other day we closed down the debate on the IMF. I hope that as we try to reopen that opportunity so that Members can improve this bill substantively, which is a $8.4 billion quota increase, the gentlemen would join with those of us in the minority who are trying to work our will there as well.

Mr. MICHEL. I understand what the gentleman is saying and I appreciate his contribution.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, I rise in strong opposition to this resolution. I do so because I seriously believe that it will undermine the legislative process.

The gentleman from Illinois (Mr. MICHEL), the minority leader, made an excellent statement outlining his reasons for opposing this rule, and I certainly join him in those sentiments.

I cannot recall where a spending bill of this magnitude has come to the floor with a closed rule of this kind. Perhaps we would not object to a closed rule if all Members who were involved here did not want to offer amendments, but that is not the case.

On two occasions when I went to the Rules Committee we asked for permission to offer amendments to this bill but these requests were rejected and we will not be able to do so.

I cannot understand why we have a closed rule.

This is a spending bill. It is not a tax bill. Tax bills often come to the floor with closed rules. But this is an appropriation bill. It appropriates money for a new spending program.

I want to repeat that. It is an appropriation bill in that it does bypass the appropriation process and makes money directly available for this program.

Amendments were offered in both committees. Many amendments were offered in both committees by committee members, and yet this rule now is going to deny not only the opportunity for those Members to offer amendments similar to those, but will deny the opportunity for other Members to get up and offer amendments to this bill.

□ 1115

This is wrong. It is my judgment amendments would significantly improve the legislation. I am particularly concerned that my fellow colleague on the Commerce Committee, Mr. TAUKE, the gentleman from Iowa, will be denied the opportunity to offer a substitute to the bill under consideration. His amendment closely follows a similar amendment that was offered in the Energy and Commerce Committee and it got widespread bipartisan support there.

I think he should have an opportunity to offer this kind of amendment here on the floor. It is just wrong to consider major legislation like this under the kind of rule that is being proposed. No matter how Members stand on the merits of the legislation, it is imperative that all Members be given an opportunity to offer constructive amendments and it is imperative that Members who oppose the bill as it is presently written be given the right to offer a substitute and to vote for alternatives more in line with their views.

We are not being given that opportunity. So, I urge my colleagues to vote no on the rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Speaker, I rise in support of the rule.

House Resolution 276 provides a modified closed rule, allowing for amendment on assets testing and abortion, and one motion to recommit with or without instructions.

The rule allows the Members to address the issues that are of most concern to them without unduly delaying consideration of the bill.

H.R. 3021 has been the subject of three hearings and three markups by two full committees and one subcommittee. The Energy and Commerce Committee and the Ways and Means Committee both ordered the bill reported out. The Appropriations Committee, to which the bill was also referred, took no action.

In this process, H.R. 3021 has been thoroughly considered and extensively revised to reflect various concerns of the Members and affected groups such as the National Governors Association. An open rule at this stage of the debate would serve only to delay its passage unnecessarily.

A number of the Members have expressed concern to me about the absence of a means test from the bill. While I do not share this concern, I want to point out to the Members that the rule does allow Mr. FRENZEL to offer his amendment requiring an assets test. In addition, an assets test could be included as part of the instructions on a motion to recommit and would also be in order under the rule.

Similarly, a number of Members have expressed concern about the absence of a specific statutory abortion prohibition in the legislation although the Hyde amendment to the appropriations bill would certainly cover this question. Under the rule, amendments on this subject will be in order.

Finally, a number of Members, including Representative TAUKE, have expressed an interest in offering a substitute for the block grant currently in the bill. A similar amendment was soundly defeated by a vote of 27 to 15 in the Energy and Commerce Committee and was not even offered in the Ways and Means Committee. Under the rule, it could be incorporated into the instructions on a motion to recommit. This is appropriate context for an amendment that was not adopted by either of the authorizing committees that considered the legislation.

I would urge my colleagues to support the rule.

The SPEAKER pro tempore. The Chair will state that the gentleman from Michigan (Mr. BONIOR) has 17 minutes remaining, the gentleman from Mississippi (Mr. LOTT) has 13½ minutes remaining.

Mr. LOTT. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I rise in opposition to the rule as proposed by the Rules Committee. The rule before us is a slight improvement from the rule which was originally recommended by the Rules Committee. The original rule was a closed rule, allowing for one amendment relating to abortions to be offered by Mr. BLILEY. The rule now provides for two amendments, one to be offered by Mr. BLILEY and one to be offered by myself.

The rule, however, is still a closed rule. It does not allow any other meri-

torious amendments to be offered, nor does it allow for the complete consideration of any amendment in the nature of a substitute, other than one offered jointly by the Ways and Means Committee and the Energy and Commerce Committee.

In my judgment, this is a far too important, far too expensive proposal, to be considered under such a restrictive rule. No major legislation should be considered under a gag rule. I urge the defeat of the previous question, and, if that fails, the defeat of the rule.

I suppose I look like an ingrate because the Rules Committee made an amendment of mine in order. However, I asked the committee for two other, better, amendments, and the committee refused. The rule remains a gag rule.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. I thank the gentleman for yielding and appreciate it especially at this moment in order to speak in response to the gentleman from California.

I think perhaps some quick historical perspective on development of this legislation is desirable.

The gentleman from California started with a vehicle called H.R. 2552, which I would not support in the Health Subcommittee.

We then began to see if we could work out a compromise, which we finally did, which took the form of H.R. 3021, a substantially different bill from that originally introduced by the gentleman from California. I am the cosponsor of that bill, I am a supporter of the bill and I am going to continue to be a supporter of the bill. I am not a supporter of this rule.

I am not a supporter of this rule because Members of this House, duly elected in the same manner as all other Members of the House, are being denied the opportunity to offer amendments to express their views upon those amendments and to give other people the opportunity to vote those amendments up or down, an opportunity that was enjoyed in the Commerce Committee and in the Ways and Means Committee and should not be feared on the floor of the House.

My colleague from Iowa, Mr. TAUKE, has an amendment which I believe he should have the opportunity to offer. I am not afraid of that amendment being considered here on the floor of the House. It was considered in the Commerce Committee and it was rejected on a bipartisan vote. I voted against it. I would vote against it again here on the floor of the House, but I believe he has every right as the duly elected Representative to offer that amendment, to discuss it and to see whether or not people want to vote for it or against it, and I think it is unfortunate that he, as an elected Representative, is going to be denied that opportunity.

I ask for him to have that opportunity.

The gentleman from California said he was not going to give him that opportunity because he was not getting anything in return for doing that.

Well, where is it written in the rules of the House that someone must get something in return for allowing free and open debate? I think it is very unfortunate that we have a situation like that and, as a supporter of this bill, I believe this rule should be rejected so that everybody has the opportunity to be a legislator in this, the peoples' House.

I thank the gentleman for yielding.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Speaker, passing legislation to provide health insurnace for the unemployed is a good idea, and I support the idea. But the version before us is so badly flawed that in its present form it should not become law. There are two fundamental problems with this bill. First, no means of financing is provided, and the House will not even have a chance under this rule to consider how to pay for this new program. We are told "it is in the budget." But the budget is a ceiling, not a floor, and the only way we can balance off inevitable cost overruns in some programs is to hold other items below the budget ceilings.

Equally important the bill is totally unfair to those it is meant to assist—unemployed who have lost their health benefits, but have sufficient income or assets to render them ineligible for medicaid. As now written this bill would give priority to those unemployed the longest, not to those in the greatest need. Frankly, it makes no sense to me to pay benefits to an unemployed person with substantial untapped assets—or nonjob sources of income—who happens to have been out of work for over a year, but to deny them to a needier neighbor who has had a shorter spell of unemployment.

The rule before us makes it impossible even to consider this issue, and to provide fairer priorities for the expenditure of the limited funds this measure would provide. The other body will be considering a bill from its Finance Committee that does deal with this issue. Our conferees deserve to have direction from the House but that will be impossible under the gag rule before us.

The Ways and Means Committee wisely recommended an open rule on the nontax aspects of this bill. But the Rules Committee—overriding the bipartisan request of the Ways and Means Committee—has given us a flawed rule. What are they afraid of? Is there something wrong with the idea that those unemployed who can pay for part of their health insurance benefits should do so? Is there something wrong with idea that taxpayers' money should go first to those who need help the most?

Mr. Speaker, we should turn down this rule and insist on the opportunity not only to debate but also to amend this bill. Whether it ever becomes law may well turn on the decision we make on the rule itself. In its present form the bill deserves to be defeated.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. Mr. Speaker, we have a problem that we want to deal with today, not to study but to deal with.

We have an emergency situation, we have suffering which is chronic and it is not just in the inner city. The people I hear from about this are from the suburbs.

What we are being urged on the other side is to neglect the problem, to delay further. And then perhaps in another year we can have a President who will appoint a commission to study what we will do about health care for the unemployed.

We have a chance to act. It has come through two committees. The Rules Committee has considered it extensively. As a matter of fact, the description of what the Rules Committee did shows the difficulty of framing the issues. I think we have flexibility in this rule, we have the opportunity to consider just what we want to do on the abortion issue and on the means test. All those things are set forth in the rule. I think the time to act is right now; it is not time to delay.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this bill. I wish to associate myself with the remarks of the gentleman from Ohio (Mr. LUKEN). We are facing an emergency situation with parents who are delaying health care for themselves and for their children because they have been laid off from work and can only then turn to acute care or emergency room operations. We have spent a great deal of time, both the President and the House, considering what we could do about liver transplants and how we are willing to dash for their life. Yet, at the same time we are blocking legislation that will enable children of unemployed parents to be able to seek the primary care we need. This is an emergency piece of legislation. I originally opposed the rule when it was first formulated because it limited the debate to

only one amendment. That was the Bliley amendment on abortion. I opposed the rule for two reasons; one, it prohibited us the opportunity to add and debate the traditional language, "rape and incest." Second, I felt we should also debate whether we should have an assets test. I repeat, we felt we should be able to debate an amendment to the amendment to add rape and incest as a condition for abortion, No. 2, that there should be a debate on whether there should be an assets test on targeting this to those who are the most needy.

Therefore, even though this is not my most favorite rule that has come before the House, I think the Rules Committee has acted wisely and justly to enable us to answer questions on both social and economic policy.

I yield back the balance of my time and urge the adoption of the rule.

The SPEAKER pro tempore. The gentleman from Michigan has 14 minutes remaining and the gentleman from Mississippi has 7½ minutes remaining.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Speaker, and ladies and gentlemen of the House, I strongly favor the intent of the underlying legislation providing health insurance for the unemployed, but not under the terms that it is presented to us today; not as an entitlement and not without a revenue source. Yet, under the terms of the modified closed rule now under consideration there are only four amendments in order. And none of these amendments will allow us the opportunity to improve upon the legislation to the extent that many of us will feel comfortable in voting for it that is, within the context of fiscal responsibility.

Moreover, we have every indication that this legislation in its present form is going to be vetoed by the President.

I went before the Rules Committee to request that they make in order my amendment to make this program subject to annual appropriations. Unfortunately, the committee refused.

My colleague from Iowa, (Mr. TAUKE) asked the committee to make in order his amendment which would provide for a funding source for this $4 billion new spending program in the face of a $200 billion deficit. Again, the committee refused.

To establish a new program beyond the purview of the annual appropriations process, particularly in the health care area, would represent one more addition to the growing portion of our Federal budget that is termed "relatively uncontrollable" and that, I might remind the Members, is now 77 percent of the budget today and growing, growing, growing.

□ 1130

It seems to me that in the health care area, where inflation far in advance of our average underlying inflation is the norm, we ought to not create a program that is not subject to the appropriations process. We ought to create it rather, in such a way that there is the review process provided by appropriations and the prioritizing it requires.

It further seems to me that many worry that given the State and Federal bureaucracies that the plethora of regulations that this bill is going to require, that it cannot be fairly characterized as a temporary program. In the face of this probability, it would be a mistake to take the program away from the annual appropriations process and not make it subject to that review. That can meet changing needs over time in a reponsible and reponsive manner.

The appropriations process provides us with flexibility not to mention the rigorous oversight that is so necessary to insuring that the program will be well administered.

We should think long and hard before we enact another Federal program that is beyond this annual appropriations process—yet another entitlement program, without a source of funding in the face of huge deficits—surely a course of action that will bring further opprobrium upon this body for its evident and continuing lack of fiscal responsibility.

No issue, it seems to me, is more important. The press gallery ought to be packed to see if there is one shred of fiscal responsibility left in this body. The vote on this rule will show whether there is or not.

I urge my colleagues to defeat this rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Speaker, those Members who know of my involvement in this issue for the past year know that I do not like the fact that this bill is not subject to annual appropriation. But I am asking the House today to support the rule, nonetheless, for two reasons.

First, because any delay—and we will have delay if this rule unravels today—will mean that there is not a chance in the world of the two Chambes getting together to pass any real legislation in the remainder of this fiscal year. And I simply do not think we can afford that kind of delay.

Second, in response to the comments made by the gentleman from Illinois who just spoke, I would say that the Appropriations Committee had its opportunity to make this proposal subject to annual appropriations. When the gentleman from Pennsylvania (Mr. MCDADE) and I offered a substitute proposal to the supplemental in the Appropriations Committee a number of months ago, we said at that time that that was the action necessary to assure that you would have annual appropriation review. Unfortunately, we lost. We lost by one vote and the gentleman from Illinois voted against us. That was the time to make this idea subject to annual appropriations. Now it is simply too late.

It is fine to debate the hows and wherefores of health case for the unemployed when you are sitting in this Chamber and have the kind of health insurance coverage that we all have. But when you are sitting out in the country and you are out of work and you are out of coverage and your wife is sick or your kids are sick, you do not care how the politicians get you that help, you just want to make sure that they do get you that help. And the only way you are going to do that is if you do it now, here, today, on this bill, with this rule.

If the Members turn down this rule, any chance of getting action in the remainder of this fiscal year is out the window and everybody knows it.

Mr. NIELSON of Utah. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Utah.

Mr. NIELSON of Utah. I thank the gentleman if the gentleman's object is to get a bill passed that would be signed by the President——

Mr. OBEY. If we wait for the President to decide what he will sign, we will wait until hell freezes over. He has not indicated his willingness to sign any legislation.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, in the interest of fairness, I urge a "no" vote on the rule for consideration of the Health Care for the Unemployed Act of 1983. Not only does the closed rule prevent important and worthwhile amendments from being offered on the House floor, but it establishes a dangerous precedent by bypassing the consideration of discussion at the committee level.

First, the Rules Committee action on a closed rule for the Health Insurance for the Unemployed bill prevents all but a few amendments from being offered. It took this action despite the fact that Chairman ROSTENKOWSKI of the Ways and Means Committee urged an open rule for the health insurance provisions of the bill both in a June 30 letter to the Rules Committee and in testimony at the July 12 Rules' hearing. Representative ROSTENKOWSKI said, and I quote,

> I am authorized and directed by the Commiee on Ways and Means to request that the Committee on Rules grant a rule • • • which would provide for • • • permitting gemane amendments to Title I (the health insurance provisions of the bill).

Chairman ROSTENKOWSKI recognized that a number of Members have important, intelligent, and germane amendments to the bill. These amendments cannot be offered under the current closed rule. To quote the words of the American Medical Association, an enthusiastic supporter of the health insurance legislation, "The rule for H.R. 3021 is excessively restrictive and does not allow for appropriate amendments to the bill." In turn, the AMA urges Members to vote against the rule.

This gentleman from California went before the Rules Committee on July 20 and asked that the committee make three very straightforward and appropriate amendments in order. These amendments are printed in the August 1 issue of the CONGRESSIONAL RECORD. None of the amendments which I wanted to offer were made in order despite the fact that I am a member of the Energy and Commerce Committee, the committee which had original jurisdiction over this legislation.

Second, the current rule allows for consideration of a substitute bill, H.R. 3521, which was never considered in its entirety by any committee of the House. At the same time, the Rules Committee refused to make in order a substitute bill which was discussed and received strong bipartisan support in the Energy and Commerce Committee. By allowing legislation to be considered which was drafted outside the committee process while disallowing the consideration of legislation which was discussed at length in a House committee, the Rules Committee is setting a dangerous precedent against the open and democratic proceedings of the Congress. Moreover, the substitute bill which was made in order before the Rules Committee is virtually unamendable under the current rule. I do not understand nor see any good reason why the Rules Committee should preclude discussion and changes to one of the most novel pieces of legislation this Nation has ever seen.

Third, both the Health Insurance for the Unemployed bill and its substitute are poorly drafted and need substantial revision. Among the oversights, both bills contain numerous instances of entitlement language in what are acclaimed to be block grant proposals. At the Rules Committee hearing on July 20, this gentleman from California requested that an amendment be made in order to correct some of these deficiencies. The amendment is printed in the August 1 RECORD. I was denied even this request to amend the bill.

Fourth, the current bill and the substitute would spend over $4 billion above current spending levels without examining which of the current unemployment or medical programs should be modified or phased out in order to provide for this new one. Adding new programs and new expenditures with the size of the Federal budget deficit the way it is simply exacerbates the unemployment and inflation problems of the economy. This gentleman from California asked the Rules Committee to make in order an amendment which would have created a commission to examine current spending by the Federal Government and to recommend spending reductions in Federal funds to pay for the program. The spending reductions could not be recommended from either the trust fund moneys, unemployment compensation, or national defense moneys. The request to make this amendment in order was again denied.

Fifth, the way the bills are currently written, nearly every State would be required to spend millions of dollars in order to receive Federal Funds. This requirement would excessively burden the States without consideration of State budgetary problems. For example, the State of California, whose move to eliminate its budget deficit recently received nationwide attention, would be required to spend $12.4 million in order to receive Federal Funds. And, in terms of percent of State match funds required to be spent, California has one of the lowest State requirements to receive Federal runds.

For all these reasons, I urge Members to join the bipartisan effort to vote against the rule.

Mr. LOTT. Mr. Speaker, I yield the balance of my time to the gentleman from Iowa (Mr. TAUKE), who has done an excellent job in working up a substitute on this issue.

Mr. TAUKE. Mr. Speaker, no matter how you cut it, this rule is a bad deal. It is a bad deal for the Members of the House because it does not give them an opportunity to consider the major issues that this proposal presents. It is a bad deal for the American people because it requires that their Representatives vote an entitlement program with a cap or nothing at all to meet the health needs of the unemployed.

I think that it is fair to say that a consensus has developed in this body that we should do something in order to ensure that the unemployed have access to health care. But at the same time that a consensus has developed in that area, there has been no consensus developed on how we should approach the issue.

There are fundamentally two ways that you can approach this issue. Either by adopting an entitlement program or by providing for some kind of grant program to the States.

The way the Rules Committee has structured this debate we are not being given an opportunity to make that choice. We are being told that we will adopt an entitlement program with a funding cap or we will adopt nothing at all.

My colleague from California indicated earlier that this is not an entitlement program. He said it is a block grant. Of course, when he talks to his more liberal friends, he calls it an entitlement program with a cap.

The fact is that it is an entitlement program with a cap because the States do not have an opportunity to limit eligibility. Nobody has an opportunity to limit eligibility.

Those who are eligible under this program are going to have to be served under this program, regardless of the resources.

Even if you do not think that it is unwise to adopt an entitlement program of this kind, certainly you have to recognize that adopting this program, with the limited funds that are contained in this measure, is going to mean that we must try to provide services for a large number of people with limited dollars. As a result, we are not going to do anybody very much good.

□ 1140

It just does not make sense. But, more importantly, it seems to me that we should have an opportunity as Members of this body to look at the possibility of giving the States a block grant—a block grant which will allow them to meet the unique needs of their States; a program that will allow them to dovetail this program with other State programs that are already on the books; an opportunity to give them the chance to adopt a means test so that they could make the best use of the funds.

I urge a "no" vote on the rule.

● Mr. CONTE. Mr. Speaker, I rise in opposition to the rule. I do so not out of opposition to the basic notion of health insurance for the unemployed, but out of concern over the entitlement nature of the proposal in H.R. 3021, and with the belief that the Members ought to be able to choose among the alternatives available for consideration.

Here we go again, creating an entitlement, at a time when entitlements are the primary uncontrolled, nonmilitary cause of the unceasing rise in Federal expenditures. Here we go again locking ourselves into spending billions of dollars in fiscal year 1984 and fiscal year 1985 without knowing what the conditions will be in those outyears, and without any chance to adjust that expenditure if conditions should change.

When are we going to learn there is no quicker way to get ourselves into the red than with the entitlement approach. The proposal may be a time-limited entitlement; it may be a capped entitlement; but it is an entitlement nonetheless.

Two of the amendments that would be precluded by the rule would change the entitlement nature of the bill to an authorization. That is exactly what we should be doing here. We, the Congress, need to exercise annual oversight over our Federal expenditures. We, the Congress, need the flexibility to adjust our expenditures according to the needs of our people and according to the shape of our economy. For that reason I will oppose the the rule, even though I favor health insurance for the unemployed.●

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker and colleagues, this is a fair rule. We debated this, as my colleague from Mississippi said, on two occasions in the Rules Committee. The rule we have before us now does take care of the economic needs that my friend, the gentlewoman from Maryland (Ms. MIKULSKI), mentioned, the ability to test this House with respect to a means test. It takes care of those people who are concerned about the abortion issue on both sides by allowing the Bliley amendment and, of course, the amendment of Mr. WAXMAN thereto.

It also will provide in a motion to recommit a number of things if the minority feels that these things should be put in their motion. A more stringent means test could be put in there. It could strike requirements on the States in the bill to provide more flexibility to the States. It can cut the amount of money in the bill itself. It can strike requirements that States' plans conform to the medicaid plans. It can increase the deductible and cost sharing. They can do a number of things in the motion to recommit.

I think the rule is fair, and I think it will allow the House to express itself on this very important issue.

But I would like to talk about the bill itself, if I could. The administration has asked that this Congress treat one-tenth of 1 percent decline in employment as a sure sign of a sustained recovery. It asks that the Congress treat a 10-percent unemployment rate as a victory. The deepest and the longest recession since the Great Depression cannot be that easily dismissed, nor can we take heart in the slow growth of a sputtering economy whose end, according to Alan Greenspan, a Republican economist, is already in sight.

Despite the vaulted recovery, in 1984, 9.6 million workers will not only be unemployed, but unemployed without health insurance. That figure is staggering, yet its true meaning I think needs illustration.

A hospital in my district, St. Joseph's Hospital, a hospital which serves an important commitment to the whole population of my area, people in that hospital have reported to me that the number of people waiting to get emergency care has tripled. And the patients who are put in those hospitals overnight, 75 percent are coming from the emergency rooms. One unemployed woman, a diabetic, now lives with her parents who receive social security. Even together they cannot afford the insulin that she needs. Another neighbor of mine, age 40, unemployed and without health insurance after an adult lifetime of working, only came to the hospital in June when the lump on his neck could no longer be overlooked.

Yet the direct needs of the unemployed workers themselves are only part of the problem. Their needs, as we have mentioned in this debate over and over again within the last hour, are matched by the needs of their 9.6 million dependents. In fact, let us be clear. The real beneficiaries of today's bill will be the families of the unemployed.

Hospitals offering care to the unemployed report that the largest single demand is for prenatal care. They also report disturbing trends. Women are postponing prenatal care. Some are postponing all care until delivery. The result, as you can imagine, is inevitable.

In Michigan, the death rate for infants born without prenatal care is some 12 times higher—12 times higher—than the rate for those who receive care. Today as we debate this bill the price of delayed prenatal care is mounting.

As the children's defense fund documented earlier this year, in parts of Detroit the infant death rate has hit 3.3 percent, as high as that of Honduras, as high as it is in Honduras. In Warren, a town outside of my district, which is a rather large suburban town, the infant mortality rate has risen 53 percent in 1982. In Pontiac, Mich., it has risen 17 percent. And in Flint it has risen 12 percent.

Will anyone argue the need? If not, then opposition to this bill can only be pitched on its choice of means. Yet today's bill is not an expansive measure, as it has been portrayed. Its funding is clearly capped. Its term is fixed. Far from seeking to meet all the health care coverage needs that plague this Nation, it fills just one discrete and well-defined segment, the unemployed.

There are more who could be served. Surveys done by the National Center for Health Service Research and the National Center for Health Statistics in 1977 found that a staggering 16 percent of farmworkers are uninsured, and 12 percent of service workers are uninsured.

And medicaid, as we all know, does not fill the gap. Its rigorous eligibility standards, closely related to eligibility for categorical welfare programs, exclude many without private insurance, perhaps most. CBO tentatively concluded in 1979 that 13 percent—30 million people in this country—have no health care protection of any sort.

Nor will this bill meet all of the health care needs of the carefully defined population that it serves. While States will have substantial flexibility in implementing the program, it clearly will not provide the catastrophic health insurance coverage unavailable to many Americans and clearly unreachable by those who are out of work.

In truth, this bill, H.R. 3021, is no grand historic measure, but it is a small step in the direction of basic commonsense and basic decency. It is not a national health insurance program, and those who imply that it is mistake the issue and seek to meet new problems with old cliches.

Nor is H.R. 3021 an unprecedented measure. It merely provides in a very small part the protection already available under the health systems initiated in Canada decades ago, in France in 1945, in Japan in 1922, in Sweden in 1955, and in Great Britain in 1948.

Perhaps other Members have seen this morning's news and have learned that poverty in America is now at its highest level since 1965—since 1965. In a scant 2½ years, this administration has managed to cancel the dreams that have driven this society for a decade and a half.

Poverty on the rise, we are told the President has finally learned, with great surprise, of the nutrition problems that have reached deep into our country as a result of the massive cuts in our basic food programs. What is this administration's response to these revelations? They have ordered a new study.

H.R. 3021 may not be a massive and unprecedented measure, but it does respond to the fundamental questions before this Congress. Can this body—will this body—unequivocally and without complex qualification pledge the full resources of the Federal Government to the services of its people?

Mr. BONIOR of Michigan. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. (Mr. MINISH). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LOTT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 227, nays 196, not voting 10, as follows:

Messrs. DELLUMS, YOUNG of Missouri, KEMP, AuCOIN, and MRAZEK changed their votes from "yea" to "nay."

Mr. FOGLIETTA and Mr. LEHMAN of Florida changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

House Resolution No. 262 was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 276 and rule XXIII, the Chair declares the House in the Committee of the Whole on the State of the Union for the consideration of the bill, H.R. 3021.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3021) to amend the Social Security Act to provide for a program of grants to States to provide health care benefits for the unemployed, and for other purposes, with Mr. DURBIN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. WAXMAN) will be recognized for 30 minutes; the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 30 minutes; the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes; and the gentleman from New York (Mr. CONABLE) will be recognized for 30 mintues.

The Chair recognizes the gentleman from California (Mr. WAXMAN).

□ 1210

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 3021, the Health Care for the Unemployed Act of 1983.

I am pleased to be joined in supporting this legislation by Representative MADIGAN, the distinguished ranking minority member of the Subcommittee on Health and the Environment, which initially reported out this bill.

This legislation addresses a critical national problem: The loss of health insurance protection by millions of American workers who have been laid off from their jobs. According to the Congressional Budget Office, over 19 million unemployed workers and their families will be without health insurance coverage during fiscal year 1984. These individuals will not qualify for medicaid due to the restrictive eligibility standards of that program. They will lack any protection against the high costs of needed health care.

In today's health care system, no health insurance generally means no care, except in extreme emergencies. A recent national survey by the Robert Wood Johnson Foundation found that in 1982, 300,000 uninsured families reported that a family member was refused medical care for financial reasons. An additional 1 million uninsured families said that someone in their family needed care but did not receive it for financial reasons. Nearly half of these did not even try to get care.

The message is clear: No job, no insurance, no care.

H.R. 3021 speaks to this dilemma.

The bill establishes a 2-year block grant to the States to enable them to provide health benefits to the unemployed and their families. States would have broad discretion in establishing eligibility and benefits. States would

have flexibility in administering the program through their own agencies, or through private insurers. States could also offer alternative delivery arrangements, including HMO's and preferred provider organizations, as an option to individuals eligible for the program.

The bill also improves the availability of private health insurance coverage for unemployed workers and their families. It will allow an unemployed worker to enroll in the health benefits plan of his or her employed spouse. It requires large employers that already offer group health benefits to provide 3-month continuation coverage to laid-off workers. And it will give unemployed workers the option of converting to individual coverage once their group coverage expires.

These requirements, which will enable unemployed workers and their families to avoid the need to obtain publicly financed care, would be phased in over the next year and a half, in order to give employers time to make the necessary adjustments.

Finally, the bill authorizes a program of discretionary grants to public and private hospitals of last resort serving large numbers of unemployed persons with no health coverage. Even after the new block grant program and the private insurance coverage provisions are in effect, many unemployed people will remain uninsured and ineligible for medicaid. This grant program will assist those hospitals that are willing to serve these patients.

The bill also increases the fiscal year 1984 authorization level for the maternal and child health services block grant to $483 million. This will allow the Appropriations Committees to continue funding this vital program at the fiscal year 1983 level provided by the emergency jobs bill, if that committee finds that the funding is still needed.

I would like to emphasize a few important points about this legislation.

First, the bill would not establish a new, permanent open-ended entitlement program like medicare or medicaid. Instead, it creates a 2-year block grant program to the States that sunsets on October 1, 1985. The amount of Federal funding for the block grant is fixed.

Second, funding for the bill is consistent with the budget resolution adopted by the House and the Senate. The budget resolution allows $350 million in fiscal year 1983, $2 billion in fiscal year 1984, and $1.650 billion in fiscal year 1985 for health benefits for the unemployed. H.R. 3021 is funded at these levels. I believe these amounts are the minimum necessary to enable the States to provide adequate benefits for the unemployed.

Third, despite recent improvements in the economy, the loss of health insurance coverage remains a serious problem for millions of unemployed and their families. It is true that the economy in recent months has begun to show welcome signs of recovery. However, we are not completely out of the woods yet. In June, over 11 million people—not including dependents—were still out of work. And even OMB's optimistic economic forecasts assume that the unemployment rate will decline slowly, from 9.9 percent this year to 8.9 percent next year to 8.2 percent in 1985. Millions of workers and their families will be without health insurance coverage due to unemployment.

Fourth, under the block grant established by the bill, health benefits would be targeted on the neediest of the unemployed. While the bill does not require States to administer a cumbersome and expensive means test, it does place first priority on coverage of those who have been out of work the longest. People who have been out of work for a year or more are not likely to have much left in the way of liquid assets. In addition, the bill requires States to use a portion of their funds to provide health benefits to persons in financial or medical need.

Finally, the bill has had strong bipartisan support. It was reported out of the Energy and Commerce Committee by a vote of 34 to 8.

Before concluding, I would briefly like to review the legislative history of H.R. 3021. The bill was introduced on May 16, 1983 and referred to the Committee on Energy and Commerce. The committee ordered the bill reported, with amendments, on May 24 (H. Rep. 98-236, pt. 1). The bill at that point was in compliance with the first concurrent budget resolution for fiscal year 1984 as adopted by the House.

H.R. 3021 was then sequentially referred to the Committee on Ways and Means and to the Committee on Appropriations. On June 23, the House and the Senate agreed to the conference report on the budget resolution, reducing the funds available for health benefits for the unemployed from $5.4 billion to $4.0 billion.

This funding reduction meant that not all of the unemployed could be accommodated, and that the States would need additional flexibility to target benefits. Accordingly, I and other members of the Energy and Commerce Committee worked closely with Chairman ROSTENKOWSKI and members of the Ways and Means Committee and with the National Governors Association to develop an effective and workable program that complies with the new levels in the Budget Resolution.

On June 29, the Ways and Means Committee approved this program and ordered it reported as an amendment in the nature of a substitute. This amendment is explained in the Ways and Means Committee report (H. Rept. 98-236, pt. 2).

The Appropriations Committee took no action on the measure.

A compromise bill was then assembled, consisting of the amendment in the nature of a substitute recommended by the Ways and Means Committee plus a provision from the bill as reported by the Energy and Commerce Committee relating to the enforcement of the private insurance coverage requirements through civil action. This compromise bill, H.R. 3521, was introduced by Chairman ROSTENKOWSKI and myself on July 12, 1983.

Under the rule, the text of H.R. 3521 is the amendment in the nature of a substitute now before the House. The committee report on this bill consists of the Ways and Means Committee report (H. Rept. 98-236, pt. 2) and those portions of the Energy and Commerce Committee report (H. Rept. 98-236, pt. 1) relating to the enforcement of the open enrollment, 90-day continuation, and individual conversion option requirements.

In closing, I would ask my colleagues to consider what the consequences of not passing this legislation would be. Very simply, many unemployed workers and their families would forego needed health care for lack of funds. And the States and localities will end up paying for the emergency and urgent care provided to the uninsured unemployed in public hospitals and clinics. Furthermore, when the next recession came upon us, we would find ourselves facing the same crisis, with perhaps even greater demands for Federal intervention.

While the Federal Government might appear to save money in the short run by doing nothing, it would only be asking for trouble in the long run. The costs of treating the complications of pregnancy or high blood pressure are far greater than the costs of providing adequate preventive care for such conditions before complications develop.

I urge my colleagues to support this bill.

Mr. BROYHILL. Mr. Chairman, I yield 7 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Chairman, I thank the gentleman for yielding and rise to join my colleagues, the gentleman from California (Mr. WAXMAN), in support of H.R. 3021.

Although I think the situation with regard to the rule under which we are operating is regrettable, as I indicated, Mr. Chairman, during the debate on the rule, I am a cosponsor of H.R. 3021 and did support it in the Commerce Committee, where it received strong bipartisan support and I do continue to support the bill.

Several things have been said, Mr. Chairman, about what this bill does or

does not include at this point. Several things have been said with regard to whether or not any accommodations have already been made at this point.

I would like to remind my colleagues in the House that this is a substantially different bill than the bill originally introduced by my colleague, the gentleman from California, the distinguished chairman of the Health and Environment Subcommittee.

This bill, H.R. 3021, includes provisions not included in the original bill, and I want to read very briefly a list of those major provisions that represent changes that have been made from the original bill and have been made in order to accommodate the gentleman from Illinois and other minority Members of the House.

□ 1220

For example, there is included in this bill a sunset clause that terminates the public part of this bill as of October 1, 1986, without regard to what the unemployment situation in the country may be at that point.

There is also a provision to give States the option for prepaid capitated plans, that is voucher and other prepaid arrangements not included in the original bill.

There is a linking of the continuation of the public program with State compliance to private sector reforms.

There is a State match rate reduced from the original levels of the bill.

There are linked expenditures under this bill to levels of the budget resolution now adopted, so the amount of money contemplated to be spent by this bill is within the limits existing in the budget resolution.

There is an expanded public hospital grant program that I requested to apply to all hospitals treating disproportionate numbers of unemployed uninsured people in their particular communities.

We also allow States to offset premiums against portions of the State match requirements, a provision not included in the original bill, and we exclude temporary workers from eligibility who were included in the original bill.

Those are just some of the changes made by the gentleman from California to accommodate the objections of the minority members of the Energy and Commerce Committee to the original bill introduced by the gentleman from California. So I do think that we have a bipartisan bill.

We do have a bill, as has been mentioned, that was reported from our committee by a vote of 34 to 8.

I think it is a bill worthy of the support of the House at this point.

Let me address one other thing that is being said by people who are working against this bill. People are saying that we have a medicaid system to take care of these people who otherwise would be taken care of by this program. That is not true.

We are talking about people who are receiving unemployment compensation. Unemployment compensation in most cases, in fact perhaps in all cases, would disqualify someone from being eligible for medicaid in the several States of the country.

So we are not talking about people who could be taken care of by medicaid because by the very fact that they are on unemployment compensation they are probably not eligible for medicaid.

The last point I want to make is something that I think is not well understood, and that is that hospitals in this country who have ever in the course of their history as a health care entity received funds from Hill-Burton are required to accept charity cases. They must, in a community where they compete with a proprietary hospital, accept the charity cases.

The consequences are that an extreme financial hardship is being worked upon community hospitals in communities with high unemployment rates because there is no program like this available. The consequence of that, if we continue, is going to be to put the community hospitals out of business in some communities, leaving only the proprietary or profitmaking hospitals to exist to serve that community.

I do not think that that is in the best interests of the public. I do not think that that is something that the Congress really wants to happen. I think we avoid that happening by supporting H.R. 3021.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Does the gentleman know how long unemployment compensation benefits last? Does the gentleman know the groups who get priority under this bill?

I think the gentleman will find that the priority under the bill is directed toward people whose unemployment compensation has already been lost and that, therefore, they are not, as the gentleman suggested, ineligible for medicaid because of receipt of unemployment compensation.

Mr. MADIGAN. Is the gentleman proposing a question to me?

Mr. FRENZEL. I did.

Mr. MADIGAN. I apologize for being distracted.

Mr. FRENZEL. I suggested to the gentleman that the principal thrust of the bill was for aid to the relatively long-term unemployed, which is defined within the bill, and that our current unemployment compensation programs would have expired for that class of claimant and that therefore they would not be barred from receiving medicaid unless, of course, they had lots of personal assets and could not meet that test.

The gentleman suggested they were all collecting unemployment compensation and therefore could not receive medicaid.

I think the gentleman is in error on most of these claimants.

Mr. MADIGAN. I appreciate the gentleman's remark. If the gentleman is correct I would stand corrected.

But I understand that unemployment compensation benefits are only for 26 weeks. But I also understand that we usually extend that to 39 weeks, that we often extend it to 52 weeks.

I think the gentleman would be correct if the Congress and State legislatures were not providing those extensions but I think the practical matter is that the extensions are provided.

Mr. FRENZEL. If the gentleman will yield, we have provided an extended program of 13 extra weeks to 39 weeks and a Federal supplemental compensation of additional weeks which make nearly a year. But this bill is targeted on those who have been unemployed for over a year.

That is the way at least that it was presented in our committee.

Mr. MADIGAN. I think they are given priority, but they are not the only people eligible under the bill reported by the Committee on Energy and Commerce.

It is possible that the gentleman's committee, the Committee on Ways and Means, has changed that provision and if they have I stand corrected.

Mr. WAXMAN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise to speak in support of this legislation, health insurance for the unemployed. The need for this bill is evident with unemployment in this country still over 10 percent.

When workers lose their jobs they also lose health insurance for themselves and their families. That means that they feel doubly victimized. They no longer have the means to support themselves and they no longer can afford the important support services for their families.

These are the people who have worked all of their lives, paid their taxes, and played by the rules. They are the Vietnam vets and they are the women who are heads of households. Now they face the fear of illness, accident, or surgery in addition to the stress of unemployment.

One of the things we know about the stresses of unemployment is that they either generate or exacerbate health problems. If you are a father who cannot support his children your blood pressure is likely to rise to dangerous levels. If you are a woman, the

head of a household and you are choosing between feeding your family or buying eyeglasses for your daughter you are absolutely headed for a ulcer. And then you will be delaying your health care because you want to take care of your children.

Mr. Chairman, when we think of parents, mothers and fathers, we know that they will do anything for their children and yet in many instances they cannot do the very things that they need to insure that their children have health care.

When considering this legislation, picture a father who is unemployed, who has a child, a little girl with diabetes. Think of his feelings now that he cannot provide the special diet to feed her or worries about taking her to the doctor and is worrying about providing her with insulin? We cannot turn our back on him or our heart to her.

So the very least we can do is to make sure that parents can fulfill their responsibilities.

The President promised a safety net when we began to do these drastic budget cuts and this indeed is a safety net.

The ultimate solution to the problems of the unemployed is a renewed economy with jobs and benefits protections. But in the meantime we must provide health insurance protection to these families.

We also know, as the gentleman from Illinois indicated, many of the families will delay seeking primary care only to end up in accident rooms, emergency rooms, or in need of hospitalization. What this means then is for the good guy hospitals who accept them, that, utilization of emergency rooms, increase often because of the delay in care. There is a need for more intensive or acute care. Those good guy hospitals who operate for philanthropic reasons—in my community they are the Mercy Hospitals, Lutheran, Sinai, Provident Hospitals—we find that they will be on the verge of bankruptcy simply because they honor their Hippocratic oath and their Hill-Burton commitment.

We have an obligation to the victims of our Nation's economic breakdown. We have an obligation to make sure the Good Samaritan Hospitals do not go bankrupt.

I urge the support of my colleagues for this legislation.

□ 1230

Mr. BROYHILL. Mr. Chairman, I yield myself 6 minutes.

Mr. Chairman, I rise in opposition to this bill for several reasons. No. 1, I am opposed to the bill because of the manner which this bill has come to the floor.

We just had a debate on that and had a vote in which over 190 Members expressed their concern over the gag rule; the closed rule.

What it has done is to undermine the legislative process, denying the right of Members to come here to offer constructive amendments.

These opportunities were given to Members of the committee, the two committees which had jurisdiction over this legislation. We had a number of amendments offered in the Energy and Commerce Committee and I understand the same procedure was adopted and followed in the Committee on Ways and Means.

Now those same Members and other Members who are not members of the committees who want to offer amendments do not have that right.

My experience in this House, we have found that the legislative process is not only undermined but you usually get worse legislation when a Member's rights to offer amendments and to be heard is gagged or hindered in any way.

Mr. Chairman, I am also concerned about the level of appropriations that are provided for in this legislation. The bill, in my judgment, provides for a fiscally irresponsible, $4 billion program. I want to point out to the Members who may be listening, not too many are on the floor at this present time, that this program completely bypasses the appropriations process. The bill provides for automatic appropriations of the amounts called for in the legislation of almost $4 billion, and there is no linkage, no tie-in to any revenue source to pay for the program.

Now, in the last several weeks, I was interested in hearing comments of Members from the other side of the aisle about large deficits and for some reason attempting to lay the blame for these large deficits at the door of the administration or the President, when all of us know that the President cannot spend a dime that the Congress does not first appropriate.

This bill will increase that deficit, in as much as there is no linkage to revenue sources to pay for the program.

I am also concerned about this bill because it imposes too many requirements, too many State plan requirements for what is called a temporary program.

These requirements are unnecessary, I think. If you will take the time to look at the bill, these State plans start on page 9 and end on page 29, some 20 pages of requirements that the States must follow in order to comply with this program.

There are descriptions here of those who will not be qualified for the program; a description here of people who will be qualified for the program. In my judgment this will unduly delay the program dollars from getting to the intended beneficiaries.

Another concern I have is the fact that we do not have a means test in this legislation. It opens up the door to considerable abuse. There will be an amendment offered, which I hope will be adopted, but as it presently stands there are no means tests that are provided for in this bill.

Mr. Chairman, it is well known that the administration has expressed itself on this bill. The administration has said that the bill is unacceptable unless there is a revenue source provided for.

I think, that being the case, the bill is unlikely to receive Presidential signature in its present form.

I think Members will know this fact. And since we do not have any attempt to accommodate those of us who on this side, and other Members, who would like to offer perfecting amendments in order to make it acceptable to the President, that when you look at it in that light this bill becomes a political statement and not really an attempt to try to deal with the real problem.

It seems to me we ought to be dealing with a real problem here, trying to do something about it, not putting together a package which is only intended as a political statement.

Mr. WAXMAN. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota (Mr. SIKORSKI).

Mr. SIKORSKI. Mr. Chairman, watching Bill Moyer's show on unemployment in Gadsden, Ala., a couple of weeks ago was a grim reminder that unemployment figures do not tell the whole story.

The rise in domestic violence, child abuse, infant mortality, alcoholism, drug abuse, depression, suicide, malnutrition, and chronic disease are conditions directly linked to unemployment.

Today we will be voting on health care for the unemployed. I remember the personally tragic testimony given in my first hearing as a Member of this body. In our Subcommittee on Health and the Environment, we heard from Mrs. Judy DuPerry, an unemployed GM worker from Bristol, Conn., who in the middle of the night brought her son to the emergency room for treatment of a very high fever caused by a leukemic blood disorder. She was in need, she was desperate and she was turned away, just as 30 million Americans are in need and desperate for health care and are turned away across America today. A letter we received recently from the U.S. Catholic Conference supporting this legislation discussed the human right of all human beings to adequate health care. I agree, but the States do not have the money, the private sector does not have the money—they are laying off people already—and medicaid offers no help.

Now, this body must not turn its back on the plight of the unemployed. This short-term, 2-year block grant to States, targeted to those who have been unemployed longest and most in need, and this hospital grant program to hospitals of last resort providing help to the unemployed, will help care for Judy DuPerry's son, for some of the unemployed in Gadsden, Ala., and a few of the 30 million Americans without health care—the 30 million the Catholic bishops talked about in their letter to us. Let us not turn our back, rather let us restore America's economy with compassion and concern for America's needy.

Mr. BROYHILL. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Chairman, I rise to explain to my colleagues that, when general debate is completed I will not offer the amendment which the rule makes in order in my name.

As this new program was proposed, drafted and went through its many different forms there was a significant doubt about whether the general restriction on abortion funding, the Hyde amendment, would apply. Just last night I received a letter from Thomas R. Donnelly, Assistant Secretary for Legislation of the Department of Health and Human Services assuring me that, if, as expected, the Hyde amendment continues as a part of the law, no funding of elective abortions under this program will be permitted.

In addition, I have discussed this problem with the Parliamentarian who concurs in the judgment of the Assistant Secretary of Health and Human Services: that the Hyde amendment will apply to this program. I also brought this problem to the attention of Appropriations Subcommittee Chairman NATCHER who has been most cooperative.

Mr. Chairman, while I would still prefer to have an explicit abortion restriction in this program, I am satisfied that that purpose will be achieved by the Hyde amendment. That being the case, I will accede to the wishes of my colleagues to not be placed unnecessarily in a difficult position as regards this issue. I trust that this decision, allowing us to complete debate on this new program an hour and a half sooner will have the approval of all of my colleagues.

□ 1240

Mr. WAXMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. ROWLAND).

Mr. ROWLAND. Mr. Chairman, I have long been a proponent of providing medical care through private means. And I am still a proponent of that.

There are times when it becomes necessary, however, for Government to become involved in helping people, whether it be local, State, or Federal Government.

Now I know that there are 28 States in this country now where physicians are trying to provide services for people who are unemployed. And they are doing an excellent job at this. They are doing this in my own State of Georgia.

But the percentage of physicians' fees as compared to the cost of hospital care is only 31 percent. So my colleagues you can see that these physicians who are providing this care are not addressing all of the needs. And there are many people who are falling through the cracks, middle-class people, because of this problem.

And I can tell my colleagues from my experience as a physician that many people will not come to the doctor for problems that they have if they are unable to pay for these services or they do not have hospital insurance.

For example, there was a period of time when I did not receive reimbursement for medicaid. And I found that during that period of time there were many people who did not come to see me, even though I told them that I would provide this care to them free of charge.

When I started accepting reimbursement from medicaid again, many of these people came back.

What will happen is people will put off coming to the doctor and the illness that they will have will become progressively worse. I will give the Members an example.

A person with diabetes may come in in acidosis. He can be treated in 2 or 3 days and go home. But if he comes in in a diabetic coma, he may stay in the hospital for 2 or 3 weeks.

Now someone has to pick up the cost of this. The public hospitals will simply have to shift this to the taxpayers in local communities. If it is a proprietary hospital then it will simply be shifted to the private patients in the hospitals.

Mr. Chairman, I think that this is a very important piece of legislation and I urge the support of my colleagues.

Mr. WAXMAN. Mr. Chairman, I yield 1 minute to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 3521, to amend the Social Security Act to provide health care benefits for the unemployed, to increase funds to Puerto Rico for the purpose of payments under the medicaid program, to require employers to provide additional health insurance benefits to their employees, to provide direct grants to hospitals who serve a significantly disproportionate number of low-income patients, to increase the authorization level for the maternal and child health block grants and for other purposes.

This bill is very important to the Nation and Puerto Rico and it represents an important step in accomplishing one of my top priorities here in Congress: to improve the quality of the health delivery system and health care services that poor and disadvantaged people in Puerto Rico receive.

H.R. 3521 accomplishes this goal in several ways. First, it increases the current cap for Puerto Rico under the medicaid program from $45 million to $77.1 million, an increase of $32.1 million for each fiscal year beginning October 1, 1983.

Currently, the medicaid program in Puerto Rico serves over 1.3 million "medically indigent" American citizens at a cost of approximately $219 million. Of this amount, the Federal Government contributes only $45 million. As a result, the government of Puerto Rico is expending $174 million of its own funds for the sole purpose of financing the medicaid program. If State-like treatment had been accorded even at the current limited level of funding and services, the Federal Government would have contributed 83 percent—$181.7 million—and the government of Puerto Rico 17 percent—$37.3 million.

This bill will provide an additional amount of $32.1 million in Federal funds to Puerto Rico and will enable us to offer low-income people in Puerto Rico who are eligible for medicaid the necessary and proper health care services. This amount, although still far from being enough, at least would furnish the Government of Puerto Rico the support needed to more adequately fund this program while continuing its own efforts to provide resources for this vital purpose.

Second, this bill increases the availability of private health insurance coverage for unemployed workers and their families in Puerto Rico and in the States by establishing three new requirements for employer provided health plans.

All employers, firms and organizations that provide health insurance benefits and employ an average of 25 or more persons would be required to provide a 30-day open enrollment period for married employees whose spouses have lost health insurance due to involuntary unemployment, to continue to provide health insurance for 90 days for employees who would otherwise lose their coverage due to layoff or involuntary separation and finally to offer workers who lose their insurance benefits due to unemployment the option of purchasing continued coverage on an individual basis without regard to existing health conditions.

These provisions will enable the working men and women in Puerto Rico and in the United States who lose their jobs to continue receiving health insurance benefits for 90 days after being laid off, to obtain health insurance coverage for themselves and their families through their working spouses' employer, and to continue their coverage on an individual basis without being rejected because of poor health or a pre-existing condition.

Third, H.R. 3521 increases the authorization for fiscal year 1984 and thereafter to the maternal and child health services block grant.

The maternal and child health services block grant is very important to Puerto Rico in order to provide our low-income women and children adequate and necessary health care services.

This program makes Federal funds available to the States for the provision or purchase of a broad range of maternal and child health related services. These funds are used in Puerto Rico to reduce, among others, the incidence of preventable diseases and handicapping conditions among low-income children; to reduce infant mortality; to increase the availability of prenatal delivery and post-partum care to low-income women; to increase the number of children immunized against diseases; and to provide medically necessary services to handicapped children.

The appropriation level for the maternal and child program for fiscal year 1983 is $478 million. This bill increases the authorization for this program from $373 million to $483 million in order to allow the program to continue at the same appropriation level for fiscal year 1983.

The maternal and child health program is a major source of care for many of the families of the unemployed, for the low-income mothers and for the handicapped children. If we fail to raise the authorization level, the program will lose $105 million, starting this October. This loss of funds would mean a loss of health care for mothers, infants, and children who are without other means of payments.

Finally, H.R. 3521, establishes a new program of direct grants to hospitals in Puerto Rico and in the Nation to assist them in providing services to low-income individuals without public or private insurance coverage.

This new program could very much assist our public hospitals in Puerto Rico to continue to provide the necessary and proper health care services to our "medically indigent" population. Actually, most of our public hospitals are located in areas experiencing very high unemployment, serving a significantly disproportionate number of low-income patients and providing services to all persons, regardless of their ability to pay.

I urge my colleagues to support this bill which I believe will be instrumental in upgrading the quality of health services for the poor in Puerto Rico.

Mr. WAXMAN. Mr. Chairman, I yield 3½ minutes to the gentleman from Texas (Mr. ORTIZ).

Mr. ORTIZ. Mr. Chairman, shortly, we will be voting on the bill entitled health insurance for the unemployed. I believe the intent of this legislation is just and humane. However, I am deeply concerned about a large group of my constituents who reside in the Rio Grande Valley, which is part of the 27th District in Texas. Those people include the agricultural and seasonal workers, who are not covered under unemployment compensation or any other program.

I would like to share with you the case of Felipe Cantu, Jr., which illustrates the tragedies that continue to occur under our present health delivery system. About the middle of June, Mr. Cantu, 44 years of age, had chest pains and went to the Chest Hospital to have them examined. The doctors diagnosed his problem as partial blockage of the coronary arteries. Since he was indigent and since the Chest Hospital had to close its indigent care facilities, the next best option was to get Mr. Cantu an appointment at Galveston's John Sealy Hospital, which receives funds for indigents.

Now, let me point out that Galveston is about 400 miles from the valley. In addition to a full day's drive for someone with a serious health problem, how do we expect that indigent person and his family to pay for their travel expenses?

In any case, the appointment was set for July 11. While waiting for his appointment, Mr. Cantu died. His death left his wife with two children to take care of, and she has no job experience.

I ask my colleagues, how many Felipe Cantus have to die waiting for an appointment before we act to prevent such disgraceful situations in the 1980's?

Samuel Sanchez, of the Hidalgo County Health Care Corp., has told me that his organization plans to service 60,000 patients this year. He argues that the health problems have increased as a result of the unemployment due to the recession. Compounding this problem is the peso devaluation. Obviously, the people in the colonias, 85 percent of whom are migrant workers, are in dire financial need. Further, due to Federal cuts, Mr. Sanchez' organization after June 1, 1982 could no longer provide badly needed transportation from the colonias to health facilities. Consequently, the ability to provide health care has suffered an additional setback.

In summary, I support this bill and I urge my colleagues to join with me in voting to provide relief for the millions of unemployed workers and their families who are victims of the recession.

Once this legislation is passed, I urge States to be flexible when determining benefits and include those agricultural and seasonal workers who so desperately need this assistance. Furthermore, since States are given broad discretion in determining eligibility and benefits, I challenge each State to devise the most equitable program possible.

If I may for the RECORD, I would like to ask my colleague, Chairman WAXMAN, the following questions:

First. How will the agricultural workers who are not covered under this program obtain critical health care services under this bill?

Second. If moneys are available to the States, how will State governments determine who qualifies for such services?

Third. How will matching funds put up by the States be used?

Mr. WAXMAN. If the gentleman will yield, there is in the bill a requirement that 5 percent of the Federal funds be used by the States for people who are not connected to the unemployment compensation system and have special medical or financial needs.

In addition, the State may use all of its matching funds for this population.

So the States have the latitude to use 100 percent of their own funds and 5 percent of the Federal funds to help the population you are concerned about.

Mr. ORTIZ. I thank the gentleman and I urge my colleagues to support this legislation.

The CHAIRMAN. The Chair would advise the committee that the time remaining for the gentleman from California (Mr. WAXMAN) is 10½ minutes, and the time remaining for the gentleman from North Carolina (Mr. BROYHILL) is 15 minutes.

Mr. BROYHILL. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I yield 2½ minutes to the gentleman from North Carolina (Mr. VALENTINE).

□ 1250

Mr. VALENTINE. Mr. Chairman, I have listened to a lot of words about jobs, the poor, the disabled, the deprived; about economic ills, health, education, national defense, foreign policy, international intrigue and rebellion and on and on. But nobody talks any more about the noose which continues to tighten around the neck of the American people, rich and poor, healthy and lame, old and young, and that is the national debt which is beyond huge, which is horrible and horrendous and which can and might literally change the face of America.

Unless we somehow get a grip on our insatiable desire to spend money that we do not have, we will eventually destroy the vitality of the Nation and its financial institutions. How dare we continue to give ourselves good things and send the bill to our children and to their children and their children.

Do not we have some obligation when we sit in this body and embark on a brand new program costing billions of dollars to raise the money in some way other than continuing to borrow? From what source do we derive the right to spend and spend money which we do not have? What great omnipotent being or influence has endowed this body of men and women with the authority to continue to try to shovel out of the Federal Treasure money which is not there. Yet, here today, we pile more on. We try to start a new program without the slightest whisper or hint as to where the money will come from except from our children and their children and their children.

Yesterday, we renewed revenue sharing—a worthy undertaking—but so many Members were not content to stop at that. Indeed, we increased the amount of money in revenue sharing by billions of dollars. I believe that my district is fairly typical and I tell you that I never had the first county official or local official ask me to do anything other than restore revenue sharing at the existing level. Yet, a majority of this body voted not only to restore this funding but to substantially increase it—without a hint or suggestion as to where the extra money will come from.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. VALENTINE) has expired.

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina (Mr. VALENTINE).

Mr. VALENTINE. Mr. Chairman, it is as if we say to the people of this country, "You asked us for a loaf, but won't you please take a loaf and a half?"

There was no pressure from my State—indeed, not even a request that the Congress extend revenue sharing to the States, yet a substantial portion of our membership sought to extend this bounty to the 50 States at a cost of additional billions which we do not have.

I realize full well that we have to tolerate today a budget deficit which just a few years ago was unthinkable, but indeed we owe it to the country to at least show some remorse and begin to try to effectively reduce the deficit. The people in this country are waiting and watching and hoping for a responsible approach to this problem and I must say that as of this date, there is little here to cause them much encouragement.

Motivated by the best instincts of the human race, most of us want to do good and great and happy and healthy things for our constituents. We want to make life easier and happier. I understand this. I believe in this and I applaud it. But, enough is enough. America, with all of its greatness, cannot do everything for everybody. America is waiting to see when we will return to our senses—the cupboard is bare.

Mr. WAXMAN. Mr. Chairman, I yield such time as he may consume to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. I thank the distinguished chairman of the subcommittee for yielding, and I commend him for bringing this legislation to the floor today. I think it faces the economic realities head on of those individuals who are unemployed across our Nation.

I rise today in strong support of H.R. 3021 providing health care benefits to those who are unemployed. The Health Care for the Unemployed Act would greatly benefit my State of West Virginia, in particular. Unemployment in West Virginia for the first 6 months of this year has fluctuated at or above 20 percent statewide, the highest rate of unemployment in the Nation, and higher in some of the coal mining areas of my district, McDowell County especially, where it is closer to 30 percent. Many of these unemployed workers have been unable to receive proper health care due to the rising costs of health care and the cutting of many public health programs from the budget.

However, we must look past cold, hard numbers and think in terms of human suffering, human sacrifice. It is hard to alleviate the suffering but we can do something to eliminate one sacrifice—health care. Unemployed workers should be protected under some form of health care program and I feel that the Health Care for the Unemployed Act is an important first step in providing health care coverage for these unfortunate people. The health of any citizen should not go unprotected just because he is out of work.

A few short weeks ago, the President indicated that the American economy was beginning to sparkle. The same night, on the floor of this Chamber, a special order was held on unemployment in the districts of a number of my colleagues. As we heard of the plight of those unemployed around our Nation, one of the most commonly expressed feelings was a feeling of abandonment, a feeling of being left out in the cold, a feeling that there was a lack of compassion in Washington for the plight of the unemployed. I call upon my colleagues right now to show some compassion for our unemployed workers and take a first step to insure that at least they can receive decent health care by passing the Health Care for the Unemployed Act.

Mr. BROYHILL. Mr. Chairman, I yield 3 minutes to the gentleman from Utah (Mr. NIELSON).

Mr. NIELSON of Utah. Mr. Chairman, I rise in opposition to the bill.

Mr. Chairman, I would like to point out that I was an original cosponsor of the bill because I believe we have to do something for the unemployed who, through no fault of their own, do not have adequate health insurance. They no longer have, except for a few months, any financial help from their erstwhile employers, and they also are no longer eligible for a group health plan. In many instances they must pay triple the amount for health insurance with only a fraction of their former income. It is a national problem.

However, the bill came out of the Energy and Commerce Committee in a way that I could not support and I withdrew my name as a sponsor. For one thing, it is more than double the amount considered by the Senate and over twice the amount that the President would accept. The rule we just adopted does not allow the possibility of a block grant approach in spite of the request of the National Governors Association, which supported that approach. The rule does not allow consideration of the Tauke amendment which would provide a block grant nor does it consider alternative means tests proposed by Representative GRADISON the funds are included in the budget resolution, the amounts are excessive, I also do not like the idea of an entitlement program which bears a striking resemblance to a national health insurance program.

I would like to say, however, that I think there are other ways to handle this, in addition to what is suggested here. I think the employer should build into his insurance contract some provision for carrying that insurance for at least a year beyond the time of unemployment; in other words, that should be part of the amount he and the employee both pay to keep that insurance going for a longer period. I think, also, there should be some attempt to require the carriers of insurance, such as Blue Cross and others, to allow people to remain part of the group for a longer period of time. If you had those two things, that would ease the burden quite a bit.

The problem is, however, acute. I hope we can come to a solution. As it stands, I feel compelled to vote against the bill because it is fiscally irresponsible, in view of our situation.

Mr. WAXMAN. Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico (Mr. RICHARDSON).

Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 3021, the Health Care for the Unemployed

Act. This bill is a modest attempt to insure that those who have been left behind by the harsh recession receive adequate and proper health care.

Roughly 11 million Americans remain out of work, and over one-fourth of these workers have been unemployed for over 27 weeks. In my home State of New Mexico, the unemployment rate continues to hover above the national average, while Hispanics are suffering from an unemployment rate in excess of 14 percent. I think we must heed this advice of President Reagan's own economic advisers who warn that if we continue the present course of recordbreaking Federal deficits and high interest rates, the recovery we are beginning to experience will slow dramatically in the next 6 months. Even the President's rosiest economic forecasts predict that unemployment will remain above 9 percent throughout the rest of this year and most of 1984.

Most Americans obtain their health insurance through their jobs. So many of the unemployed have not only lost their employment, but they have also lost health protection for themselves, their spouse, and their children. Most of the unemployed do not qualify for medicaid due to the stringent requirements for that program. According to the Congressional Budget Office 10.2 million jobless workers and their dependents lacked any form of health insurance in February 1983.

Mr. Chairman, in many respects, the quality of health care in this country has recently declined as a direct result of high unemployment coupled with rising health care costs. In some areas of the country, the infant mortality rate has actually gone up. The wealthiest, most compassionate nation on Earth cannot allow this to continue. We must act now to provide some health care assistance to those who have been especially hard hit by the recession. H.R. 3021 will provide this much needed assistance.

Eligibility for health care services under H.R. 3021 will be limited to those collecting unemployment compensation or those who have exhausted unemployment compensation within the past 2 years. Priority for services under this program will be given to those who have been unemployed the longest. The bill will also require a 3-month extension of employer paid health insurance for laid-off workers and would require employers to open enrollment in health plans for unemployed spouses and families of their current employees.

This bill is a compromise between the version reported by the House Energy and Commerce Committee and the Ways and Means Committee. The original energy and commerce bill would have mandated that all those unemployed who qualified for the program would have received health care assistance. The compromise version creates a program of block grants to the States. State participation in the program would be voluntary and State matching grants would vary from nothing to 20 percent of the program costs depending on the State unemployment rate. My only concern about the compromise version is that States may not be able to accommodate all of those who qualify for assistance.

Nevertheless, H.R. 3021 is better than nothing. It is certainly better than those proposals supported by the administration which would finance the program by cutting medicare. I find this funding method unconscionable. The aim of H.R. 3021 is to provide health protection to unemployed Americans, not to take from one disadvantaged group in order to give to another.

Mr. Chairman, our health is our most precious resource. Congress enacted medicare and medicaid to insure that our Nation's elderly and poor received proper health care. But many of the unemployed and their families have fallen through the gap these programs were meant to close. I urge my colleagues to vote for H.R. 3021 so the unemployed will be assured that although they have lost their jobs their health will be protected.

□ 1300

Mr. WAXMAN. Mr. Chairman, we reserve the balance of our time.

Mr. BROYHILL. Mr. Chairman, we reserve the balance of our time.

The CHAIRMAN. Under the rule, the Chair will now recognize the Chairman of the Committee on Ways and Means, the gentleman from Illinois (Mr. ROSTENKOWSKI) for 30 minutes.

Mr. ROSTENKOWSKI. Mr. Chairman, at the conclusion of my remarks I will yield to the gentleman from Indiana, and he will control the time.

I yield myself such time as I may consume.

Mr. Chairman, H.R. 3021 represents an effort, using the limited funds available, to offer some measure of assistance to the many Americans who, through no fault of their own, find themselves without health insurance due to loss of work.

The bill reflects the view that the Nation has a responsibility to attempt at least some modest effort to minimize the hardships that workers and their families are experiencing because of the troubles of the economy.

The economy is improving now, and that is a very welcome development. But high rates of unemployment are, unfortunately, expected to continue for some time. Even though overall employment rates are beginning to fall, many people will remain out of work, and many of these will be the long-term unemployed with special need for the assistance provided under this bill.

Loss of health insurance goes along with loss of a job. Sometimes this occurs after a delay, but it always eventually takes place if unemployment lasts long enough. The bill speaks to this problem in three ways.

First, the bill establishes a block grant program to the States to enable them to establish public programs of health benefits for the unemployed.

Funding is limited to the amounts contained in the fiscal year 1984 budget resolution, $350 million in fiscal year 1983; $2 billion in fiscal year 1984; and $1.65 billion in fiscal year 1985.

The block grant program is temporary, and is repealed effective with the end of fiscal year 1985.

Second, private employers of 25 or more employees would be required to meet certain requirements with respect to their health insurance policies. These include:

An open enrollment period so that an unemployed spouse and children could enroll in the health plan of the employed spouse;

A 90 day continuation coverage for those who are involuntarily laid off; and

A right of coversion to an individual policy, at the employee's expense, without requiring evidence regarding any existing health condition.

These requirements would be enforced throught Tax Code provisions that would sunset at the end of 1986. In addition, a person would have a private right of action against any employer health plan which failed to comply.

The public programs established under the block grant and the requirements on private employer health plans would work together to ease the problem of loss of health insurance due to loss of employment.

Third, the bill authorizes a discretionary grant program for assistance for public and other hospitals which are providers of last resort for uninsured and unemployed individuals.

The funds authorized are $96 million in fiscal year 1984; $77 million in fiscal year 1985 and $60 million in fiscal year 1986. These authorizations are within the amounts assumed in the budget resolution.

These funds would go to assist hospitals in areas hard hit by unemployment—hospitals that are attempting to serve large numbers of unemployed persons unable to meet their own hospital bills.

In addition to these three major features, the bill contains miscellaneous and technical amendment relating to maternal and child health, professional review organizations, and hospices.

Mr. Chairman, the bill is designed to make the best possible use of limited

funds. In the block grant part of the legislation, States would have wide discretion in designing their programs both in terms of eligibility and benefit design. But States would be required to give priority to those who have been out of work the longest, and who are thus most likely to have the greatest need of assistance. Special provisions would be made for pregnant women and children under age 5, for whom health care services are especially important and cost-effective.

The employer group health plans would assist in meeting the problem through modest changes in plans already being offered to employees and their families. Throughout the bill, the principle is adhered to that no public funds should be expended for health benefits for people who already have, or could elect to have, health benefits under a plan to which an employer contributes. In addition, in every case, benefits under a public plan would be secondary to any privately financed health benefits or to assistance to which the individual is entitled under medicaid.

In summary, Mr. Chairman, this is important and necessary legislation, even though it is modest in scope and expense. It is carefully designed to give flexibility to the States while giving priority to people most likely to be in need of assistance. It is based on the proposition that both the public and private sectors should share in meeting the need for health benefit protection during unemployment.

I urge approval of the legislation, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois (Mr. ROSTENKOWSKI) has consumed 5 minutes.

The Chair now recognizes the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I find interesting the comparative lack of interest in this legislation, the sense of routineness, as we create what is in effect a new entitlement program, subject to a cap, a whole new title of the Social Security Act, a provision which establishes a new class of public beneficiaries.

We have had before a number of medical programs of one sort or another, and this is a new medical program for those who do not need it but who have had health insurance previously. It is these people who are deemed to be necessary wards of the Government at whatever cost. It is not a modest program. Nobody can assume that it will not cost a good deal more in the future, nobody can assume that it will not be permanent, nobody can assume that a major bureaucracy will not be needed to administer it, and yet we find it approached as something of a ho-hum matter here today, in a body where most everyone has made up their minds whether they are going to vote for or against it, depending on their perception of the politics of the issue.

It sounds like an echo from the Great Society. I recall when I first came here some 19 years ago, we were here until midnight almost every night identifying national problems, throwing money at them irrespective of the consequences, hoping that we could then claim that we had solved the issue, had met a need; and, of course, that unleashed the avalanche which has been coming down our fiscal hillsides ever since.

We at that time made inevitable the $200 billion deficit that we have today, despite the fact that our Federal revenues have increased by sixfold since that time. This is a very similar operation that we are doing today. It is business as usual at a time when we are facing a $200 billion deficit, and when we should be imbued with some sense of crisis and responsibility for the economic distortions that deficit is inevitably going to create.

This program does not even provide a mode of financing. It just means additional borrowing. It will be beneficial to a certain class of worker, those who have worked at high incomes in the past, but because they belong to smokestack industries, industries which are in transition, they have been laid off for substantial periods of time. However, this group is a relatively affluent group because they have been making fairly good incomes prior to their having been laid off and, therefore, they cannot pass a means test.

We tried in the Committee on Ways and Means three times to establish some form of a means test, but that, of course, was voted down on pretty much a straight party-line vote.

If we had a means test, that is, if we were to limit this proposal only to those who needed it, then obviously medicaid would be ample for their needs because medicaid is for the needy; but of course then this particular class of worker would not be able to claim the public benefits that are sought by this program because this particular type of worker cannot meet the needs tests imposed on the medically indigent by medicaid.

□ 1310

Mr. Chairman, I am sympathetic with the plight of those unemployed workers who cannot afford private health insurance. I think we all might support a limited program to address this problem if it included a means test, a method of financing. This is not the case in the program that is before us.

As I said, H.R. 3021 would create an entire new title to the Social Security Act—title XXI. It is modeled on title XX, the social services title, in that it provides a cap on what otherwise is an entitlement. This addition would be in three parts: A block grant program entitling the States to spend up to $350 million this fiscal year, $1.87 billion in fiscal year 1984, and $1.54 billion in fiscal year 1985 on health services for unemployed persons, that is, people who meet the criteria of having been unemployed for a certain period of time even though they are not able to pass a means test. Requirements on employers with group health plans are also provided in this bill. They must provide open enrollment, extended coverage, and conversion rights.

That will increase the cost of health insurance contracts for those who currently provide health insurance. The probability is that the increased cost will cause some of them to cancel their health insurance as a fringe benefit. We do not require it any more than we required private pensions when we passed ERISA, and we all know the result of that was to some extent to reduce the number of employers that offered private pension plans. That may very well be the case with respect to health insurance, too, where we are increasing the cost of the health insurance to the employer and not requiring that he maintain it. If he gives health insurance to his employees, he must have these provisions of open enrollment, extended coverage, and conversion rights.

The third part of the bill provides a 3-year $233 million discretionary grant program to hospitals which serve the uninsured and the unemployed. In total, it is a $4 billion program, not a modest matter, as it has been described.

Who knows to what extent it will grow, and who really believes that it will be temporary?

Some of my colleagues will argue that this amount is consistent with the funding levels contained in the first budget resolution for fiscal year 1984. But that same budget resolution calls for cuts in spending and increases in revenues. There is no legislation before the House on these matters, and there is scant chance that there will be such legislation.

Who are we trying to kid? We all know that if health insurance for the unemployed is passed without a self-financing mechanism, the net result will be an increase in the deficit. This means that the Treasury would have to go out into the already crowded marketplace and borrow more money, with the inflationary risk which that practice always runs.

I do not believe that we are acting responsibly in considering a $4 billion program without including a way to finance it. If there is anything we should have learned over the years, it is that non-means-tested entitlement programs have been major factors in

our deteriorating fiscal condition. While H.R. 3021 technically is not an individual entitlement program, it does entitle States to amounts of money which generally must be spent for health care on a non-means-tested basis. As a matter of fact, we prohibit a means test for the States in order to be sure that this will not be confused in any way with medicaid, the program for poor people.

Furthermore, these funds automatically would be provided to the States without being subject to the appropriations process.

Does anyone really believe that this program will be allowed to sunset in 1985?

Does anyone really believe that this health insurance program for the unemployed will not create serious inequities in the use of public funds?

Does anyone really believe that, once this measure is enacted, there will be any way to avoid expanding its coverage in order to correct the inequities that are inherent in the way we are passing it today?

How are we going to explain, for instance, to workers in minimum wage jobs, with no employer-paid health insurance, that they should be denied help with their health care costs, while at the same time certain unemployed workers, without any test of income or resources, should be provided with free Government health care benefits?

Mr. Chairman, I hope my colleagues will understand that there are about 10 million employed workers out there with no employer-paid health care benefits. After we pass this measure, there may be quite a few more. Many of those workers may be worse off financially than those who would be helped under the proposal before us. Does that make sense?

Single parent families, the elderly, and disabled persons of all ages have to meet stringent income and assets tests to receive medicaid services. The aged and disabled under medicare have to pay significant amounts in deductibles and copayments. An uninsured elderly person has to pay $132 a month to purchase medicare hospital coverage. Disabled persons have to wait nearly 2½ years from the onset of disability before they get benefits under medicare. No similar tests or requirements would be imposed upon the beneficiaries of this program.

Except for very nominal payments from recipients, H.R. 3021 would allow the equivalent of first-dollar coverage of medicaid services to the unemployed, regardless of their income or assets.

Advocates of this proposition claim it will not continue indefinitely, and that its costs will not soar. I recall, all to vividly, that similar assurances were given about other programs under other titles of the Social Security Act. Medicare, or title XVIII, was projected to be containable, as far as the actuarial eye could see, back in the 1960's. That program is now projected to be bankrupt before the end of this decade, and its deficits are projected at $300 to $400 billion by 1995. The disability insurance program, to cite another example, was projected in its early stages to cost no more than $3 billion or $4 billion per year. It now runs about $20 billion per year.

How can we be sure that this new proposition will not follow the same pattern?

As it now stands, H.R. 3021 constitutes a major State entitlement program with no financing mechanism. I do not insist that any one particular method of paying for the program is any better than another, but I do insist that some method is necessary, and no method of financing connotes irresponsibility, totally inappropriate to our current irresponsible fiscal condition.

H.R. 3021 is a monetary shotgun, spraying cash pellets at those who might need help and those who might not. It is anything but targeted, and at a time when deficits loom so large, I think a program like this should at the very least be self-financing and sesigned to help those who have the greatest need.

Mr. Chairman, I despair of my colleagues thinking of this in real terms when so few are willing to even listen to the arguments, but I hope we will have time adequately to convey the sense of irresponsibility that goes with putting a program of this sort together, the way we are putting this together on a commitment to some elements of organized labor that we would bring it to the floor before we go on recess, and that thereafter we will judge it by so political a criterion as the basis on which this proposal seems to be judged.

The CHAIRMAN. The gentleman from New York (Mr. CONABLE) has consumed 13 minutes.

The Chair recognizes the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COYNE).

Mr. COYNE. Mr. Chairman, I rise in strong support of H.R. 3021, the Health Care for the Unemployed Act.

If we allow to continue a situation in which health benefits are available only to the employed, what we are saying, in effect, is that basic health care is a privilege one surrenders upon becoming unemployed.

Access to minimal health care should be a right, not a privilege. The Health Care for the Unemployed Act would extend that right to millions of Americans who have lost their health benefits due to joblessness.

We are talking of millions of people. Of the 7.4 million unemployed in December 1982 as a result of layoffs, 5.3 million had lost coverage under an employer-based benefits plan. If dependents are considered, the Congressional Budget Office estimates job loss caused an end to benefits for 10.7 million persons.

Those people who lose their health benefits because of unemployment, usually after a month or 2 without work, are forced to seek coverage on a more expensive, nongroup basis. For individuals who are in the high-risk category, such coverage may not be available at all.

Existing Federal programs simply do not address this situation. To obtain medicare, one must be elderly or seriously disabled. In most States, eligibility criteria for medicaid, designed to exclude all but the poorest of the poor from the program, tend to shutout many of these who are unemployed. Medicaid eligibility is often tied to eligibility for aid to families with dependent children, thereby precluding unemployed individuals and childless unemployed couples. Even in those States which allow AFDC and medicaid coverage to families in which the principal breadwinner is unemployed, restrictive resource and income requirements make the medicaid program an insufficient vehicle for health benefits for the unemployed.

The compromise measure now before us would establish a block grant for States to finance programs providing health care for the jobless. The amount each State receives will be determined by a judicious formula based on these criteria: The State's share of the total number of unemployed persons; the State's share of the total number of persons receiving unemployment benefits; and the total number of persons exhausting their unemployment benefits during the previous year.

The bill would also establish new requirements for employer-provided health plans, with the intention of making more insurance available to those without jobs.

One other very important provision of the legislation would allow grants to those hospitals which now serve as health care providers of last resort. In western Pennsylvania, many such institutions are severely overtaxed and are, in some instances, reaching the limit of their ability to pay for the health care of those who cannot afford it.

In fiscal year 1982, the Hospital Council of Western Pennsylvania's 98-member hospital and health care facilities provided $46 million in uncompensated care. The hospitals expect this amount to rise to $50 million in this fiscal year.

Hospital Council President Jack C. Robinette recalled recently the type of cases which have become commonplace. He said:

Typical of the calls we have received is the case of a young male laid off from this job with a coal mining company. His health care insurance expired on April 1. He is the father of three and his wife recently delivered a baby. Should one of them become ill, the family has no coverage at this time.

Or consider the case of the woman who was laid off from her job and collecting unemployment compensation when she fell and required hospitalization. Because of her assets, she is not eligible for medical assistance. She has no health benefits. Therefore, her medical bills of $1,998 will become a bad debt to the hosptial.

The health care block grant of funds to States will, I hope, work in tandem with programs already initiated by hospitals and private health insurers which seek to resolve the problem. One program which could serve as a model for the Nation was undertaken by Blue Cross/Blue Shield of western Pennsylvania, in cooperation with hospitals throughout the western part of the State.

This innovative plan, which went into effect May 1, has the effect of reducing the cost of coverage to unemployed workers by 50 percent. It grew from meetings which began last fall between representatives of the steel industry, both management and labor, and Blue Cross/Blue Shield. The group considered more than two dozen plans to lower the cost of insurance to the unemployed before it came up with one which appears fair to all concerned.

Here is how the plan works using Blue Cross. Depending on his or her means, an unemployed subscriber can select a plan for either 15 or 31 days of coverage. To lower the cost, the insurance company has filed for rates to cover only expected benefit payments, removing from the rate determination all administrative and similar costs usually applied to compute a breakeven rate. To lower costs still further, participating hospitals waive inpatient and outpatient deductibles, a waiver of $300 for inpatient care, and $25 for outpatient care.

At this point, I would like to insert in the RECORD the costs of health insurance, before and after May 1 agreement.

	Individual	Family
15-Day Coverage [1]		
Program underwriting (full costs)	$48.21	$109.75
Premium rates (subsidized)	28.15	62.20
31-Day Coverage [2]		
Program underwriting (full costs)	52.23	118.73
Premium rates (subsidized)	32.90	72.90

[1] Option 1 costs and rates (monthly).
[2] Option 2 costs and rates (monthly).

For hard-pressed families, even the subsidized 31-day rate of $72.90 may prove to be expensive. Enactment of H.R. 3021, which gives States the discretion to aid such individuals, will go a long way toward dealing with the problem we have begun to tackle in western Pennsylvania. A public/private approach to this serious problem may be the answer.

I urge a yes vote on H.R. 3021, the Health Care for the Unemployed Act.

Mr. JACOBS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the legislation before us is not perfect, but it is long overdue. We have had double digit unemployment in this country ever since this administration got a good start on the economy.

I hear it said that the attitude toward this legislation is just "ho and hum." This legislation is health for the unemployed.

What has been the attitude of this administration toward the unemployed? Has it been "ho and hum," or has it been "South succotash"?

It is high time that we do something. Now, what ought we to do about the unemployed and their health needs? Do we just put them on hold and ask them to hold their breath until that golden day when the Laffer curve comes around the mountain, when it comes? Or do we take some responsibility as a government that threw these people out of work, through absolutely no fault of their own in most cases?

Some would like to have an unfettered entitlement program. That was judged to be imprudent at this time for obvious reasons. Others would like to have an unfettered block grant program. Our committee has chosen the middle course, that is to say, a block grant without a blank check.

As for self-financing for the program, I ask my dear friends, when is the last time we saw a military appropriations bill come before this Congress and heard anybody suggest that it should be self-financed other than the implication, I suppose, that you would go out and hold somebody up with the weapons?

□ 1320

When is the last time a program for public works, pork barrel, came before this House and somebody said that none of these funds can be spent until the taxes are raised to pay them?

I happen to believe in a balanced budget. I never voted for the Kemp-Roth program. I voted to cut an awful lot of spending and I advocated a constitutional amendment, not just lately, but I have for years for a balanced budget; so if we are going to self-finance this, let us start self-financing everything and let us start self-financing things that are a little lower on the totem pole than whether somebody's wife or kid is going to lie there without adequate medical insurance just because the Laffer curve had not come in yet.

Mr. ALBOSTA. Mr. Chairman, will the gentleman yield?

Mr. JACOBS. I yield to the gentleman from Michigan.

Mr. ALBOSTA. Mr. Chairman, I rise today to speak in support of the legislation before us, H.R. 3021, "Health Care for the Unemployed Act.

By assuring that health care be provided to all Americans, H.R. 3021 represents a compromise solution to the problem faced by many persons who have lost their health insurance along with their jobs. For those families, being unemployed is doubling devastating.

I know from talking with my constituents in the north central region of Michigan that it is difficult, if not impossible, for those who are unemployed to obtain any kind of health care for their families. Once a worker is unemployed for more than a few months, health coverage virtually disappears. Nongroup health coverage at affordable rates is not available. More disturbing is the fact that for the majority of persons who lose employer-paid insurance, they are not eligible to receive assistance under any existing safety net program such as medicaid, without drastically depleting assets.

If H.R. 3021 is not approved and the unemployed person's health is allowed to deteriorate, surely you realize that we will all assume part of the expensive care that would be required. Clearly, this bill attempts to avoid this problem. I believe that in the final analysis, not only will this action be viewed as compassionate, but as cost-effective as well.

While I have the opportunity, I want to commend the chairman and the committee members on the House Ways and Means and Energy and Commerce Committees, for reporting out this legislation and avoiding the proposal to tax a portion of the employer-paid health insurance benefits.

Earlier this year, I introduced a House Resolution 186, expressing the sense of the House of Representatives that employee health benefit plans should remain tax exempt. If this tax proposal was allowed to be attached to this legislation, it would have been the millions of American workers who would have been the real losers. Not only would our constituents pay more in taxes on health benefits, but in all practicality, would be losing essential health care services.

My bill, which has been cosponsored by 53 of my colleagues in the House, is supported by a joint coalition of over 200 major business, labor, and health organizations. I oppose the taxation of health insurance benefits for the following reasons:

Taxing will not slow rising health care costs;

It may reduce needed preventive care services by causing employers to eliminate dental and vision care services;

It penalizes older workers and workers in high risk jobs by placing a higher tax on these workers who are already paying high health insurance premiums;

It will not raise the promised revenues because employers will likely reshuffle benefit packages so that health insurance contributions will fall below the tax.

Again, I thank the members of the committee who rejected this tax proposal during consideration of the bill. It is my hope that when this bill is considered by the Senate and/or conferees, that this tax will not be included.

With over 11 million people unemployed in this country, and 15.2 percent unemployment in my district alone, I urge my colleagues to address the problem of health care for the unemployed and vote in favor of H.R. 3021.

Mr. Chairman, during consideration in the House Committee on Ways and Means of this legislation, H.R. 3021, an amendment was offered to tax a portion of health insurance benefits as proposed by the administration. I understand that this amendment was rejected by voice vote.

Earlier this year, I introduced House Resolution 186, which expresses the sense of the House that these benefits should remain tax exempt. Fifty-three of my colleagues and a joint coalition of over 20 major business, labor, and health organizations support this resolution.

Mr. Chairman, is it the intent of the committee to continue to prohibit the taxation of employer-paid health insurance benefits?

Mr. JACOBS. It is the intent of the committee to take up the gentleman's resolution at the appropriate time.

Mr. ALBOSTA. Mr. Chairman, I thank the gentleman.

Mr. JACOBS. Mr. Chairman, the Ways and Means Committee would like to provide the following additional information.

The bill establishes a block grant to States to provide health insurance for the unemployed. Funding is limited to the amounts contained in the fiscal year 1984 budget resolution—$350 million in fiscal year 1983; $2.0 billion in fiscal year 1984; and $1.65 billion in fiscal year 1985.

States would determine eligibility within a broad category of those who are currently receiving unemployment compensation and those who have received unemployment compensation within the last 2 years—with priority given to those who have been unemployed the longest.

Five percent of the Federal funds would be set aside for the State to provide health care to persons who may not have been eligible for unemployment compensation but who have a special financial or medical need.

States would have broad authority to design benefit packages that meet the needs of the State's unemployed but there would have to be at least some inpatient hospital and some physician coverage. Special provisions would be made for pregnant women and children under 5.

States could impose, at their discretion, a modest premium based upon a percentage of an individual's unemployment check. States would be required to impose the copayments on benefits similar to those under medicaid.

Federal funds would be allocated to States based on a three-part formula: One-third on the total number of unemployed persons; one-third on the number of persons receiving unemployment compensation; and one-third on the number of persons who have exhausted unemployment compensation.

States wishing to participate would be required to provide a State match between 20 percent and zero. States with unemployment rates of 6 percent or less would provide 20 percent—with the State match decreasing to 5 percent where a State had an unemployment rate of 10 percent or more. For those States in which the unemployment rate is 10 percent or more and the rate is also 133 percent above the national average, there would be no State matching requirement.

Second portion of the program, intended to supplement the public program, would require private employers with 25 or more employees to meet certain requirements with respect to their health insurance policies. These would include an open enrollment period so that an unemployed spouse could enroll in the plan of the employed spouse; 90-day continuation coverage for those who are involuntarily laid off; and a right of conversion to an individual policy, at the employee's expense, without requiring evidence regarding any existing health condition.

The provisions would be enforced through a 10-percent excise tax on the employer's expenses of a plan which does not comply. Such enforcement would sunset at the end of 1986. In addition, a person would have a private right of action against any plan which failed to comply.

Finally, the bill authorizes a discretionary grant program for assistance for public hospitals which are providers of last resort for uninsured and unemployed individuals. The funds authorized are—$96 million in fiscal year 1984; $77 million in fiscal year 1985 and $60 million in fiscal year 1986—and are within the amounts assumed in the budget resolution.

In addition, the bill contains miscellaneous and technical amendments relating to maternal and child health, professional review organizations, and hospices.

Mr. JACOBS. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY of New York. Mr. Chairman, I thank the gentleman for yielding.

Fifty years ago, the New Deal began and it began in part because there was a crying need in this country. One out of every four Americans at the time was unemployed and poor. The national government decided that it was time for them to do something. The argument against it, was that it was too expensive and a march toward socialism, that this would only discourage people from working. Fortunately, the people who were opposed to the New Deal did not have their way.

In 1946, after the Army had experienced drafting 12 million servicemen, they found to their horror that one out of every three of the inductees had to be rejected because they were or had been chronically malnourished; so our Government responded with a school lunch program to deal with that problem.

At the same time, you heard people saying, "This is no good. This will never work. It's too expensive. It can't solve the problem." They were wrong, the program worked.

In 1969, a field commission report said in South Carolina there was chronic malnutrition in this country and we started a program called food stamps and we have slowly began to eliminate chronic malnutrition in this country.

We have had over the last 50 years programs designed to help people and they have worked. We have eliminated, for the most part, hunger in this country.

In the western democracies, Great Britain, France, West Germany, the Scandinavian countries health care is a major concern of the Government. They do not argue about covering people, they provide it. Last year we continued to debate the merits of providing health care to all our citizens. In Detroit, the infant mortality rate was 33 per thousand, the same as it is in Honduras. Testimony was taken and it was found conclusively that this was the result of people losing the opportunity through insurance to get medical coverage.

Now what we are trying to address today is this problem. It is not as grand in scope as the problems that we have addressed successfully in the past, but it still is a problem.

Let us look at the people this bill will help. More than 21 million unemployed workers and their dependents will lose their health insurance this

year alone. Sixty percent of them will lose health care protection either immediately or within a month after layoff. Some 13 million children will suffer the horrifying effects of unemployment—the dramatic surge in infant mortality rates is not without cause.

And unemployment is no longer a short, temporary setback for workers. In the 1974-75 recession, the average duration of joblessness was 14 weeks—today, it is 22 weeks. Twenty-six percent of those who are jobless have been unemployed for 27 weeks. Unemployment means an exhaustion of financial reserves and often permanent social, economic, emotional, and physical health problems.

Current health programs do not, and are not designed to, meet the needs of these workers. Programs such as medicaid and the maternal and child health block grant are too limited in scope to meet the needs of the so-called new poor. Further, because of the 1981-82 budget cuts, existing health services have been restricted at the very time the need for them has increased. Virtually all States have reduced their medicaid programs, and 44 States have cutback services provided by the maternal and child health block grant. Finally, fewer than one-half of all unemployed receive unemployment compensation.

Of course, the best answer to the lack of health insurance is more jobs. But even the administration predicts that the unemployment rate will not dip below 8 percent until 1987.

We have all been spending a lot of time lately lamenting the fate of the unemployed worker. It is time to put our votes where our mouths are, and support a program that will actually do American workers some good.

We must continue to respond as a government to this pressing social need. As we have attempted to eliminate hunger so too must we rally against inadequate health care.

This bill is a small but important step in that direction.

Mr. JACOBS. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Chairman, during a recession in America, it is a disgrace that our unemployed who are already suffering cannot receive adequate health care.

St. Louis had been hit hard by the recession and many people cannot receive needed health care. Despite the recovery, that everyone is gloating about, 1 out of every 10 workers in St. Louis remains unemployed. Preliminary data from the beginning of this year indicates that St. Louis' infant mortality has increased, one of the leading indicators of how well or how poorly the health system is working. In other urban areas, increasing infant mortality has been correlated with increasing unemployment and the lack of prenatal care.

Nationally, 14 million Americans are unemployed and without health insurance. Four million children are affected.

Today we could prevent a lot of needless pain and suffering if these people gain access to health care. I support this bill. It will quickly address the problem with an effective program.

We are creating a temporary block grant. For 2 years, this bill will provide health care to the unemployed. It is targeted to those people in the greatest need who cannot get health benefits. In the future, employers are being asked to continue health coverage for their employees 90 days after they are laid off. This will protect Americans in the future, insuring that they will have coverage if they are temporarily unemployed.

We are not creating an endless entitlement program. Now is not the time, when we face tremendous deficits in medicare, to start a new entitlement program. But, we must not shirk our responsibility to the unemployed of our country. They need an emergency program that meets their temporary needs.

States will have lots of flexibility as they develop this program. Missouri has already had informal discussions with some private insurers, who may help Missouri administer such a program. This will allow the unemployed of Missouri to receive health care through an efficient program as quickly as possible. Missouri may even set up a competitive program giving the unemployed several choices including local health maintenance organizations that serve the St. Louis and Kansas City areas.

Finally, St. Louis is in particular need of assistance for its public hospital, like many urban areas. The City Hospital has generously served the unemployed without demanding that they pay. This institution located in the heart of St. Louis must survive so that it can continue providing vital services.

Mr. CONABLE. Mr. Chairman, I yield 6 minutes to the gentleman from Minnesota (Mr. FRENZEL), a valued member of the committee.

Mr. FRENZEL. Mr. Chairman, I rise in opposition to H.R. 3021, a bill which incorporates the text of H.R. 3521 and is intended to provide health care coverage to the unemployed.

Like most Members, I believe that the Congress should take some action to make sure that unemployed individuals who need health care coverage receive it. In my judgment, however, the bill currently before us is a classic case of overkill.

H.R. 3021, as amended, provides over $3.2 billion through fiscal year 1985 for a new, theoretically temporary, block grant to provide health insurance for the unemployed. This money, however, is simply being thrown at the problem, without any real thought being given to targeting the money where it will do the most good. About all it takes to qualify for the assistance provided in H.R. 3021 as it will be amended is that the individual be unemployed.

If my amendment relating to an assets test should be adopted, all that will be required will be that the individual be unemployed, and that he not be exceedingly wealthy.

Because of the haphazard manner in which money is being provided for in this program, the bill will also create a serious equity problem between the health care assistance available to unemployed individuals and that which is available to the elderly, the disabled, or the single parent household.

In many cases we will be taxing the poor to give benefits to more affluent people. The 10 million people who are working but have no health insurance will of course be paying for health care for unemployed claimants who may be much richer.

Under current medicaid laws, individuals must meet stringent income and assets tests before they can be eligible for the medicaid program. H.R. 3021 contains no such limitations. Even if my amendment relating to an assets test is adopted, the unemployed will still be getting a far better deal than the medicaid recipient, and the unemployed may have vast assets and large family income. Not only would there be no comparison between the assets tests in the two programs, there would still be no income test under H.R. 3021. An unemployed individual's spouse could be earning $35,000, or more, and the individual and his/her family would still be eligible for the assistance provided in this bill.

Because of the lack of a meaningful assets or income test, the bill also creates a disparity in the treatment of the working poor or the individual who is working but has no employer sponsored health plan compared to the unemployed. As a practical matter, an individual who is working but has no medical coverage would be better off being unemployed than he/she would be working, should the need for expensive medical treatment arise.

In addition to the health care coverage block grant, the bill also contains provisions that require employers to provide open enrollment, continuation, and conversion coverage to its workers. While it may make some sense to attempt to shift some of the costs associated with providing health care coverage to the unemployed to the private sector, the logic behind the proposal in H.R. 3021 is flawed.

Employers do not usually lay off employees without a sound economic reason. Usually, that reason is that the employer cannot afford to keep its employees working. Yet H.R. 3021 would require these same employers to incur billions of dollars in additional costs to provide unemployed individuals with continued medical coverage. If employers do not have enough money to keep their workers working, it stands to reason that they will not have enough money to continue to pay for these same workers' health insurance benefits.

When ERISA was enacted, thousands of pension plans decided it was not worth the expense of complying with the new requirements, and tens of thousands of workers were left without pension coverage. I have no doubt that, if this legislation is enacted, history will repeat itself, only on a larger scale. Employers will simply terminate their health plans.

H.R. 3021 also contains several other expensive provisions. It contains a new, $233 million hospital grant program which was adopted with very little consideration as to the need or the impact of such a program. The bill also increases the maternal and child health services block grant by $110 million in fiscal year 1984, and every fiscal year thereafter. This provision, which is $148 million above the President's fiscal year 1984 request, was included in the bill without any debate in the Ways and Means Committee.

Mr. Chairman, if the Congress wants to enact a national health insurance plan, it should come right out and do so. It should not continue to add one medical assistance program on top of another, creating serious overlap problems and at the same time not helping those individuals who need assistance the most.

Until such time, the Congress should attempt to develop a solution to temporary unemployment problems within the confines of programs already in place, instead of enacting new multibillion-dollar pseudotemporary programs. Many of the people Congress wants to help with this bill could be just as easily, and more efficiently, assisted simply through making some temporary adjustments in the medicaid assets test, and by changing the rules regarding two parent families, in cases involving unemployed individuals who actually need assistance.

The recession is over, and a strong recovery is underway. Physicians and hospitals throughout the country continue to treat unemployed patients on either a pro bona or payment deferred system, and have given no indication they intend to stop. The worst thing we could do now to unemployed Americans is continue to spend billions of dollars we do not have, and choke off the economic recovery.

This bill may not be the worst of the year, but it is a contender. If this House set out to design a bad bill, it could hardly have done better.

It duplicates medicaid. It is an entitlement. It has no means test. It will tax the poor to give health care to the more affluent. It will encourage employers to terminate health care plans. The State match will delay implementation. It will probably be extended as other such welfare plans have.

It will probably pass this House, but if there are enough votes against it, it may not become law. I respectfully suggest that supporters of fiscal discipline and rational lawmaking will want to vote against it. I will.

□ 1330

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. I want to associate myself with the remarks of the gentleman from Minnesota and say that it is inconceivable to me that this Congress, facing the problems with present entitlement programs and the problems that we foresee in medicare is about to create yet another entitlement with no regard as to the revenue side. How do we intend to fund this program?

Mr. JACOBS. Mr. Chairman, I yield 4 minutes to the gentleman from Tennessee (Mr. FORD).

Mr. FORD of Tennessee. Mr. Chairman, I rise in strong support of the Health Care for the Unemployed Act of 1983. This bill will provide much needed health care assistance for the Nation's unemployed workers.

The bill that we have before us today reflects the work of two committees. Members of both the Committee on Energy and Commerce and the Committee on Ways and Means have worked long and hard on this bill. Its provisions reflect agreements that have been reached by the leadership and members of the two health subcommittees, and the two full committees that share jurisdiction over our health care programs.

We are all acutely aware that unemployment in this country is at a post-depression high of 10 percent. This represents 11.2 million Americans who are out of work. Another 1.8 million workers have lost their jobs but are not in the official unemployment count because they have become discouraged and have stopped looking for work.

The human tragedy behind these statistics lies not only in the inability of jobless individuals to earn a paycheck, but in other far-reaching and debilitating effects.

One of the most oppressive ripple effects of unemployment is the loss of job-related health insurance. Fourteen million unemployed workers and family members are currently without health care coverage, including 4 million children.

Loss of health insurance for the unemployed comes at a time when they need it most. The stress factor alone makes jobless individuals and their families more vulnerable and susceptible to health problems.

Recent statistics show that for every 1-percent rise in unemployment, there is a 2-percent increase in the mortality rate, about a 2-percent increase in cardiovascular deaths, a 5- to 6-percent increase in homicides, a 3-percent increase in first admissions to mental hospitals, and about a 5-percent increase in infant mortality.

These statistics reveal a staggering and alarming correlation between unemployment and the health of the individual. These figures also make it clear that the unemployed population needs health insurance even more than those of us who are working.

The unemployed who lose employer-based health insurance protection are generally unable to obtain coverage under other existing public health care programs. In some instances, unemployed families can gain health insurance through medicaid. But in 27 States, medicaid does not cover either impoverished unemployed two-parent families or their children.

As chairman of the Subcommittee on Public Assistance and Unemployment Compensation, my primary objective has always been to find a measure that would provide necessary health care assistance for the unemployed, and one that could be enacted.

The unemployed who have lost their health care benefits are in a situation which they did not create, and over which they have no control. Federal help is crucial in easing their access to health care while they are waiting for jobs to become available.

The legislation before us today will help many of our Nation's unemployed workers obtain health care for themselves and their families that would otherwise not be available to them. This bill is a compromise bill. It reflects the major objectives and concerns of the many Members and groups that testified at our joint subcommittee hearings conducted several weeks ago. It should have the support of every Member of this body.

Mr. GRAY. Mr. Chairman, will the gentleman yield?

Mr. FORD of Tennessee. I am happy to yield to my colleague, the gentleman from Pennsylvania.

Mr. GRAY. I would like to identify myself with the gentleman from Tennessee's remarks and certainly agree with everything he has pointed out. I would just simply add as a member of the Budget Committee and the conference committee on the budget, one of the things we were quite concerned

about, despite the optimistic signs of economic recovery, is that there are many people who are suffering physically as a result of the unemployment and other problems in our society.

Certainly this Congress, this Government, ought to be concerned about it and this is a fair and equitable way of dealing with that problem.

Mr. FORD of Tennessee. I thank my colleague for his comments and urge my colleagues to support the legislation that is before us.

Mr. CONABLE. Mr. Chairman, I now yield 7 minutes to the distinguished gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Chairman, I rise in opposition to H.R. 3021 because of four reasons—its bad health policy, bad social policy, bad fiscal policy, and bad legislative policy. To paraphrase the song, "It's the baddest bill in the whole damn town."

With respect to my first concern, bad health policy, I will not burden you with a long litany of what is happening to health care costs. We are all aware of the problem. It would seem prudent, therefore, to design any new program with as many cost and utilization controls as we can reasonably include. One such control, intuitively obvious to many of us, is the need for cost-sharing requirements.

There is an increased awareness that first dollar health insurance coverage is inflationary, it insulates consumers and providers from the cost consequences of health care decisions and it contributes to economically inefficient forms of health care financing and delivery and to the overuse of health services. While there is movement in the private sector away from such coverage, the wisdom of that movement has not affected, in a significant way, the design of this bill.

Joseph Califano, a former Secretary of HEW, a man not known for his conservative views, wrote an article in the July/August issue of the Federation of American Hospitals' Review on the health cost problem at Chrysler. In discussing the lack of cost sensitivity in health care, he stated:

"The Blue Cross card is like having a credit card to use at restaurants and never getting the bill. We would all order caviar, lobster, steaks, and Dom Perignon if we had such a card and that is the only food and champagne the restaurant would stock."

While I have had my past disagreements with Mr. Califano during the Carter administration's push for a regulatory approach to hospital cost control, I certainly could not agree more with him in regard to this matter.

But to paraphrase a now familiar line, "here we go again."

Under H.R. 3021, we have fashioned a program that would essentially allow first-dollar coverage.

When the legislation came to the Ways and Means Committee it contained no mandatory cost-sharing requirements. I was successful in amending it with an extremely modest requirement that would make mandatory the nominal cost-sharing requirements allowed under medicaid.

These amounts are truely nominal. We are talking about 50 cents on medical services under $10 up to a whopping $3 on services in excess of $50. For hospital care there would be a deductible of about $30. Contrast that with medicare where we ask our elderly to pay a current hospital deductible of $304 and coinsurance of 20 percent on physician services.

A criticism I am hearing from the National Governor's Association is that these amounts required in H.R. 3021 are so low some States will not want to bother with them. Unfortunately, in the rush to move this proposal through the committee, there was no time to work out a more appropriate cost sharing structure so we adapted the medicaid levels. But it must be kept in mind that H.R. 3021 is not directed toward medicaid recipients, who have met a very rigid means test. It would establish a nonmeans tested program providing assistance to certain, but not all, unemployed Americans.

My second concern with H.R. 3021 is that it is bad social policy. As written it will create new and serious inequities in our health care financing programs. This new proposition would, essentially, permit medicaid benefits for the unemployed, regardless of their income and assets. One can imagine how this will strike those low-paid workers who strive hard for their families every day, yet are not provided employment related health insurance and may not be able to afford to purchase health insurance on their own. Many of these employed workers may be worse off financially that the unemployed.

According to the latest data available there are about 10 million working Americans without health care coverage. These workers are generally concentrated in low wage industries such as agriculture, forestry, and personal services.

Is the need of some of these workers any less than those who would be covered under H.R. 3021?

And what about the 3 to 7 million Americans with neither private nor public coverage and who would not qualify for help under this bill—is their need any less?

If we are going to spend $4 billion, should we not at least try to help those who are the most needy?

Further, the aged, the blind, the disabled, and one-parent families have to meet tough financial tests to establish their eligibility for medicaid services. I have already mentioned the $304 hospital deductible and 20 percent coinsurance on physician services required under medicare. This new program imposes no comparable requirements upon beneficiaries. In fact, except for a small 5 percent set-aside, States are prohibited from determining eligibility on the basis of income or assets of individuals.

My third reason is that it is bad fiscal policy due to the lack of a method of financing the program.

Mr. Chairman, we just cannot continue the spend-spend-spend policies of the past. It is absolutely irresponsible, in my view, to add $4 billion to the Federal deficit with this new program. And that is exactly what will happen if we pass this legislation without a method of financing it, the budget resolution notwithstanding. We all know how easy it will be to pass the spending proposals contained in the budget but never quite get around to making the cuts or raising the revenues required to pay for this legislation.

My final reason is that it is bad legislative policy because this program will add yet another duplicative provision to the law. There is no statutory need for yet another provision to provide health insurance benefits to the unemployed. I was the author of a successful amendment to H.R. 1900 which was signed into law on April 21, 1983, and allows States for the first time the option of permitting the unemployed to voluntarily choose to have part of their unemployment compensation benefits diverted to pay for health coverage. We have not given that new authority but 3 months to work before embarking today on yet another program addressing the same problem.

Mr. Chairman, I am not opposed to providing health care assistance to unemployed workers with a demonstrated need for such assistance and certainly do not want to minimize in any way the many problems they face. But H.R. 3021 fails to provide this assistance in an equitable and fiscally responsible manner.

□ 1340

Mr. JACOBS. Mr. Chairman, I yield 3 minutes to the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. I thank my friend for yielding and compliment both committees on a job well done, specifically, the gentleman from Indiana (Mr. JACOBS) and the gentleman from California (Mr. WAXMAN).

Mr. Chairman, we are at a time in our history when some are doing very well economically in this country and some are not doing very well at all.

And the real principle here is are we going to have a little equity, a little compassion? Does it make sense for those who are doing well, those who have income, to provide for the basic needs, the health needs for those who are unemployed due to this recession? That is the basic question before us.

I yesterday got my paycheck. I opened it up and lo and behold I had $150 more in it than I had the month before. I said how come my paycheck is $150 higher? I went back through and remembered, the third year of the tax cut was due July 1 of this year, and that I remember was worth $1,354 a year to me.

So. I am $1,354 better off than I was before the third year of the tax cut which I opposed went into effect. Now, that cost this Government $30 billion a year. Now does it not make sense that those of us who do have incomes that have benefited to the tune of $30 billion from the third year of the tax cut should say, "Yes, in this country it makes sense, that we should spend $4 billion to give health coverage to the unemployed."

Mr. DANNEMEYER, Mr. Chairman, will the gentleman yield?

Mr. LOWRY of Washington. I yield to the gentleman.

Mr. DANNEMEYER. I detect a sense of pangs of conscience about receiving this $150.

Mr. LOWRY of Washington. Yes.

Mr. DANNEMEYER. My question is, Are you of a mind in order to purge your conscience to turn back the $150 tax cut?

Mr. LOWRY of Washington. I will tell my colleague right now that if this measure will pass and become law, I will absolutely do that and I hope that the gentleman from California will join me in doing it. If this measure is signed into law so the unemployed in this country can get help, I will send a check every month and send you a copy of it. Will you join me?

Mr. DANNEMEYER. I would hope in response to that offer that you tender it to the Treasury to reduce the deficit.

Mr. LOWRY of Washington. Oh, I try to reduce the deficit all the time.

Mr. JACOBS. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN of Florida. Mr. Chairman, I support H.R. 3021, and I want to particularly commend the Energy and Commerce Committee for including in this bill required coverage of prenatal, delivery, postpartum, and well-baby services.

I am privileged to serve as the chairman of the Select Committee on Children, Youth, and Families' Task Force on Prevention Strategies. Our task force held hearings recently which clearly documented the need for good prenatal and early childhood health care.

Low birth weights and other problems arising from inadequate care during critical stages of development can lead to lifelong physical, intellectual, and emotional difficulties for the child and for society as a whole. Good comprehensive prenatal care is frequently not available to low-income families, and they consequently suffer from a higher incidence of low birth weight babies and a higher rate of infant mortality.

While this legislation is only temporary and will by no means cover all low-income persons without health insurance, I believe it is an important step in recognizing the urgent need for better access to prenatal and infant care. I look forward to working with Mr. WAXMAN, the chairman of the Subcommittee on Health and the Environment, to expand the availability of such services to low-income women and children.

Mr. CONABLE. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, earlier when Mr. DOWNEY of New York, was in the well I asked if he would yield and he was, of course, entitled not to and he did not but I do not see him here now. I had a question I wanted to ask him on my time. Perhaps if he is within hearing of my voice he would come to the floor and I would like to engage him in a colloquy.

Mr. LOWRY of Washington. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman.

Mr. LOWRY of Washington. I did not hear the answer to my question. Are you going to send back the amount of the tax cut you got July 1?

Mr. DANNEMEYER. The gentleman well knows that the spirit that I have utilized here in the House is to reduce the deficit.

Mr. LOWRY of Washington. That is the way to do it, is it not?

Mr. DANNEMEYER. The day that you join with me in cutting the deficit by cutting spending is the day that I will turn my tax reduction over to the Treasury.

Mr. LOWRY of Washington. Tomorrow is the first chance to vote against the authorization bill for DOD for $186 billion. I am going to vote "no" on it, will the gentleman join me on that? That is a savings of $186 billion.

Mr. DANNEMEYER. I thank the gentleman for his contribution.

When this matter first came up before the Committee on Energy and Commerce on which I serve, it suddenly became apparent that the motivation behind the presentation of this legislation in this particular era is nothing more or less than the achievement of that No. 1 goal on the liberal agenda for America that is yet unachieved. And that is the benefits of universal medical health insurance for all Americans. Fifty years ago, Mr. DOWNEY of New York, told us, we started down this road, and today we have a $200 billion deficit and all these great programs that brought benefits to all Americans have brought us to the verge of bankruptcy. So, today we have the camel sticking its nose into the tent to achieve yet another item on the agenda, namely, who could be against medical benefits for those unfortunate enough to be unemployed? When you look at it in isolation, nobody really. When you put it all together we have total fiscal irresponsibility. For example, in this bill you will notice on page 18, lines 8 through 12, some interesting language that I would like to bring to the attention of the Members.

A state plan must provide medical benefits for A, prenatal, delivery, post-partum, and well-baby care, without limitations of amount, duration, or scope except as to medical necessity.

Now that sounds strangely like, startlingly like entitlement language. We all know what happens when we have entitlement language. Anybody who fits into the category can present themselves at public facilities and obtain that coverage and if they do not get it, they can take somebody to court and compel a State government to provide that coverage. I had an amendment to offer but the Rules Committee declined to make it in order, to clarify that this language was not intended to be in the nature of an entitlement, but I will not have the opportunity to offer that amendment for consideration by the committee because the Rules Committee did not make it in order.

The second amendment that I did offer in the Commerce Committee, but unsuccessfully, and which I would like to offer on the floor, but the Rules Committee did not make it in order, related to a very fundamental philosophical position that any of us must take in this House when we consider yet another entitlement program. That is: Where is the money going to come from?

The amendment that I offered would create a commission that would have to be in business 90 days after enactment. That commission would have the responsibility of recommending to the Congress what existing programs would remit or be reduced in order to finance this new welfare spending program.

So that if the conscience of the 98th Congress says we in this country need this for the benefit of the people of America, so far as the taxpayers are concerned, it will be a push. There will be no increased costs to the taxpayers of this country because this program is perceived to be of a higher magnitude of need than existing programs. And I think the Members who are sponsoring legislation of this type at this point in our history, considering this $200 billion deficit, have the responsibility to say to us where the money is going to come from. And if they cannot say where the money is going to come from, this commission would fulfill the responsibility of rec-

ommending to the Congress what existing programs would remit in order that we would be able to say to the taxpayers of this country that there will be no net increase to anyone.

I heard the gentleman from New York (Mr. DOWNEY) earlier talking about—and I am sorry he did not come on the floor so I could ask him a question that needs asking time and time again. Where do we who are living today get the moral authority to spend and consume and transfer to another generation the duty of paying for what we have consumed today?

Mr. JACOBS. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Chairman, I rise in strong support of H.R. 3021. "Unemployed labor means human want in the midst of plenty." Those words spoken in 1934 by Franklin Roosevelt's future Vice President Henry Wallace are appropriate in the debate we are engaged in today. The plenty exists in the fact that America leads the world in the area of health care. Technological advances in medical techniques and in the implementation of health-care services continue to grow at a rapid pace. The human want occurs when, as in the case of the unemployed, health care is denied; a result of the inability to pay.

West Virginia continues to lead the Nation in unemployment. The long-term unemployed in my district are quickly becoming the longest unemployed in the history of the State. The health needs of idled coal miners and their families cannot be denied. The sons and daughters of rail workers, construction workers, and the thousands of other victims of the recession, are lacking essential health care because their health benefits and insurance has long ago lapsed.

It is said that John Kennedy learned the realities of poverty during his visit to West Virginia during the 1960 election. Two decades later the blight of poverty, while not totally eliminated in some rural areas, can be seen to be waning. The progress made in the health and well-being of West Virginians must not be turned back. The unemployed and their families should not be forced to forgo necessary health care for want of work. The recession was not the result of their actions, nor should they be made to bear the cost of the economic shortfall, a price tag that includes the health and well-being of their spouses, their children, and in some instances, their parents.

Mr. Chairman, H.R. 3021 will insure a continuity in improved health care for all unemployed Americans.

In the Preamble to the U.S. Constitution, the Federal Government is charged with promoting the general welfare. The welfare of Americans includes adequate health care and I submit that the millions of unemployed and their families should not have their health and therefore their welfare, placed in jeopardy because economic practices and policies fail to insure they will have work.

I strongly believe we can best serve our mandate with the passage of health care for the unemployed.

Mr. JACOBS. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I rise in support of H.R. 3021, the Health Care for the Unemployed Act of 1983. Our country's strength lies in the health of its people. Often, the word "crisis" is easily thrown about, but the problem of unemployed workers and their families without adequate health care protection is truly a crisis that is growing each day.

The evidence pointing to a sharp decline in the Nation's standard of health, primarily because of high unemployment, is all too prevalent today. There are more than 25 million people who lack health care insurance because of unemployment. Eleven million Americans lost their health insurance in 1982 alone. The damage that inadequate health care causes has been well documented not only during this debate, but for two decades now, since the time we first embarked as a Nation on a course that would insure adequate and decent health care to all Americans. We believe as a nation, people should have a right to decent health care regardless of their position in life, including their employment status.

I took to the floor on behalf of this legislation on April 14, the day after it was introduced. I knew how much it would mean to the thousands of unemployed people in my district whose families no longer had health care protection. Now, almost 4 months later, I take to the floor once again because the situation is worse. Throughout this Nation, the number of persons out of work for 27 weeks or more approaches 3 million, a post-World War II high. As of July 22, 111,104 Ohioans and 4,500 Toledoans had exhausted all of their unemployment benefits. By October 1, those numbers will grow by an additional 86,000 and 3,600 respectively. In virtually all cases, the loss of unemployment benefits has been preceded by a loss of health benefits. As Business Week magazine recently reported,

> The recent upturn in the economy has not alleviated the problems of the long-term unemployed . . . In fact, one key measure of labor market distress—total weeks of unemployment—is still rising rapidly.

The plight of the long-term unemployed is growing as of the first quarter of the year, 4.6 million Americans were unemployed for 15 weeks or longer, over two times the number that existed in 1980.

H.R. 3021 is a good bill not only because it addresses a genuine crisis facing the Nation, but also because it does so in a fiscally responsible way. It does not create an open-ended entitlement that would result in uncontrolled Federal spending. Rather, it targets benefits to those who have been unemployed the longest and are therefore most in need. It sets in place reasonable changes in private health benefits to meet the health care needs of the unemployed. For those who believe that the economy's sparkle will soon reach all sectors of the economy and all regions of the country, then this is a reasonable bill. It simply provides necessary, short-term protection. To those that fear, as I do, that some economic groups and parts of the country may be left behind by the Nation's economic recovery, then this is also a reasonable bill—one that will handle a situation that will continue to confront us for quite some time.

Now, I fully expect the issue of the deficit to come up during this debate, as well it should. We all realize the rough road ahead for us because of the massive budget deficit. All programs must be scrutinized. I am as strongly committed to controlling the growth of the Federal deficit as any Member of this body. That is why I voted against the vulnerable and worthless MX missile system, which will add $30 to $40 billion to the deficit. That is why I voted against the B-1 bomber which adds $5.62 billion to the deficit in fiscal 1984. That is why I voted against the M-1 tank program which adds nearly $2 billion to the deficit in fiscal year 1984.

Now somehow, many of the same people who voted for all of those programs, as well as other wasteful measures, which add nothing to our Nation's security or strength but serve to swell the deficit, draw the line here. They are marching up to the well to speak against a bill that can save lives and add to our dignity as a people. They are trading arms for our people. Had they had the resolve to say no to real waste, they would be able to say yes to this bill; which truly makes our Nation stronger. This is the type of legislation that is worthy of taxpayers' dollars.

If we fail to pass this bill, how can we go back to our districts this weekend and look at the unemployed and their families, especially the children, who have no health care protection. How could we explain the defeat of the Health Care for the Unemployed Act and the passage of the M-1 tank program was somehow in their best interest? We cannot look at them and say we did not have a chance to help them. We do. Right here and now. What greater purpose does this body have than to relieve pain and suffering when it can. If not us, then who?

Mr. JACOBS. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, I rise in support of H.R. 3021 and I could do so for some academic reasons, many of which have been stated today.

Rather, I would like to speak for a couple of minutes to the human dimension of the problem of the absence of health insurance for unemployed Americans.

My district, as I reported on the floor yesterday, still has very high unemployment despite the beginnings of a recovery from this recession. My home county has an unemployment rate of 16 percent. The county next to mine has 18½ percent. That is an improvement, but still very high.

The steel industry has one of the best health insurance plans of any industry in America and yet, even there, after workers have been unemployed for an entire year, as some 4,000 employees of the United States Steel plant in my district have been, they no longer have health insurance. In fact, they no longer have unemployment compensation. And literally thousands of families, some steel workers with seniority of up to 31 years, are out of work and have been for a year. They are going without health insurance. Their families are postponing needed health care, needed hospitalization. And when they cannot, those families are running up hospital bills of $15,000 to $20,000.

This bill seeks in a small way to address that problem.

Mr. Chairman, this bill addresses one of the most important needs of the Nation's unemployed—their need to maintain their health and that of their families while they search for new employment.

A cruel aspect of the current recession is that those who have already lost their jobs are in danger of losing their health because they cannot afford to purchase health insurance. These are people caught in a virtual catch-22 situation: They will be unable to obtain health insurance if they cannot find work, and they will be unable to find employment if serious illness or injury should strike while they are without health insurance.

Frequently, those without insurance neglect their medical needs until a crisis develops in order to meet more immediate demands such as food and shelter. Then, when medical emergencies arise, they are forced to seek assistance wherever it is available. As a result, many hospitals have experienced rapid growth in the number of cases in which the patient is unable to pay for treatment. For example, in 1982, Lorain Community Hospital, located in my district, reported a 54-percent increase in charity cases over the level of the preceding year.

H.R. 3021 is a step in the right direction, but it is only a small step. Only a portion of those who need the assistance that is authorized by this bill will actually obtain it because the total need is much greater than available resources. My greatest concern with H.R. 3021 is that it does not do enough, either for its intended beneficiaries or for the millions of others that are lacking adequate health insurance. I am afraid that some Members and others will view the enactment of this bill as a resolution of the problem, when it really is only a limited attempt to aid some of those who are in need.

OMB Director David Stockman, in testimony before the Ways and Means Committee on this bill, indicated that the administration might undertake a review of the various Federal health programs at some point in the future. That review, which would include a reconsideration of the medicare and medicaid programs, would probably commence no sooner than 1985. Unfortunately, that schedule is of no help to those who are presently uninsured or underinsured. We in the Congress have a responsibility to act on this issue now.

Some concern has been voiced that the extended coverages that are required by this bill will impose too great a burden on employers. Admittedly, these new obligations will require more of employers, but they are slight in relation to the benefits that will be made available. The provision for conversion of group policies to individual coverage will require no additional employer contribution. In fact, 30 States have already implemented similar laws. The requirement for an open enrollment period for spouses of insured employees only restates an obligation of employers that presently offer family coverage, although employers will incur additional costs as this option is utilized by employees with unemployed spouses. The third new employer requirement, a 90-day continuation of coverage for laid-off employees, will also impose some new costs. However, 19 States presently have continuation requirements varying from 30 days to 18 months. The total added cost of these requirments to employers has been estimated by the Congressional Budget Office to be about 2 percent of their present health care expenditures.

As for Federal Government costs, H.R. 3021's level of funding is quite low compared to earlier proposals, and the total cost conforms to the limits established in the 1984 budget resolution.

Similarly, the States would contribute, on the average, only 7 percent of total program costs, not an unreasonable amount.

Mr. Chairman, this measure will contribute to the health of those who have the most compelling need for assistance. I believe that H.R. 3021 is a necessary response to the plight of the Nation's unemployed, and I urge its passage.

Mr. JACOBS. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I rise in support of this legislation. And I rise also in opposition to the Frenzel amendment and to the motion to recommit.

There is very little I can add to the debate that has already preceded me on the question of the enormous human and economic trauma that results from an unemployed person not having health care for himself and his family or herself and her family. The devastation of losing one's job and income and running out of unemployment benefits is bad enough. But when that is compounded by having an illness or accident with hospital and medical bills that cannot be paid, the tragedy reaches propositions that are hard to describe or even comprehend. It is despair. It is devastation.

□ 1400

The fact of the matter is, there are few more devastating events than to have a sick relative or dependent and not be able to get health care.

This Nation is distinguished from other nations in the world in that we care. We do not let people starve in the streets, we do not let them go without shelter, and we do not let them suffer without appropriate medical attention.

Regardless of the prudent savings or provisions a person may have made for health care, when he loses his job these provisions are almost invariably lost as well. When that job is lost because of economic circumstances and recession and not because of a worker's fault or laziness, this Nation cannot stand idly by and watch that suffering and do nothing.

This is a vital piece of legislation.

It seems to me that because it is optional to the States to participate, then each State can make a judgment as to whether it needs or wants to implement or not to implement this program.

I am told, for example, in Georgia, that the medical profession has admirably responded to the needs of the unemployed by providing free services, and yet it still does not cover hospital expenses or other medical expenses. But if my State chooses not to participate, so be it. But we have a national human concern that this legislation addresses.

The Frenzel amendment, it seems to me, is a grave mistake because it kicks middle-class Americans right in the face. The Frenzel amendment would turn this bill into another means

tested welfare program with all the bureaucracy paperwork, redtape, and fraud that goes with it. The Frenzel amendment says to middle-class Americans they have got to become destitute and welfare cases and dispose of their savings before they can have any opportunity for health care for their families. Well, I say to you that middle-class Americans, or the silent majority, have caught it in the neck long enough. These are the people who pay most of the taxes and are the backbone of our country. Why should they be made to pay and then be left out in the cold when they need temporary help? Today is the day we ought to stand up and say that a middle-class person who has lost his job through no fault of his own, does not have to become poor in order to get some health care for his family. This is a temporary program for them, and we should support middle America today and defeat the Frenzel amendment.

● Mrs. SCHROEDER. Mr. Chairman, I am extremely pleased to be a cosponsor of H.R. 3021, the Health Care for the Unemployed Act. This measure makes an important step toward widening the availability of health care in our Nation. Yet it fails to benefit some other especially deserving groups of individuals. One group among these is the RIF'ed Federal employees, the very workers who have been forced to shoulder the brunt of our economic and political policy decisions.

Congresswoman OAKAR has introduced H.R. 656, a major piece of legislation which will strengthen the Federal Employees Health Benefits Program (FEHBP) and reestablish it as a system of comprehensive, fairly priced health care coverage. I am especially grateful to the Congresswoman for including in this bill a provision I developed to address some of the longstanding and troublesome gaps in Federal health care coverage.

Over time, there has evolved a very definite pattern of linking health benefits to the workplace. When a worker loses a job in a layoff, or a person loses a connection to the worker, as in a divorce, the individual also loses health care protection for family and self. Typically, the unemployed or divorced who lose employer-based health insurance protection are unable to obtain other affordable coverage.

The impact of this problem of lost health insurance coverage has been most forcefully driven home by our country's continuing economic crisis with its disastrous double-digit unemployment rate. According to the Congressional Budget Office, during fiscal year 1984, the number of people without health insurance coverage due to unemployment will reach 19.1 million. These workers and their families have no protection against the high costs of health care. As a result, they all too often fail to receive needed medical and hospital services. The truly tragic element of this is the well-established link between a significant life change—such as loss of employment or divorce—and poor health. So at the very time when an individual or family needs health care the most, it becomes unavailable.

In recent years, many States have enacted laws to deal with the gaps in health benefit protection. Most of this legislation has focused on the needs of a worker's spouse and dependent children whose coverage is lost due to health or divorce. Other laws deal with continuing coverage for workers who are between jobs or who have been laid off. Federal workers cannot, by virtue of their Federal employment, qualify for the benefits of these State laws or, as I noted earlier, with H.R. 3021.

Section 3 of H.R. 656 addresses four limited populations who, through no fault of their own, have had their connection to the Federal workplace broken. And with that break, they lost their access to comprehensive, comparatively affordable health care insurance. These four groups are:

One, employees involuntarily separated from the civil service due to reduction-in-force (RIF);

Two, spouses of employees, or annuitants whose marriages are dissolved by divorce or annulment;

Three, unmarried dependent children over 22 who cease to be disabled; and,

Four, individuals who elect to receive a lump-sum payment rather than a monthly annuity.

Currently, the FEHBP offers a conversion opportunity to individuals in these categories which allows them to obtain health insurance coverage under a nongroup policy without proving their medical insurability. This conversion right is sorely inadequate: the costs are usually high and the coverage deficient.

Section 3 of H.R. 656 allows these individuals the right to convert, but it also provides a critical alternative—the right to continue in their current policies. Whereas conversion allows a person to obtain an individual contract when participation in a group plan ceases, the continuation provisions allow a person to continue participation in the group plan. In the case of the provision we are proposing, the individual would be able to receive the same group protection at the same premium rate with the proviso that he or she pay both the worker's share of the required premium and the contribution that would normally be paid by the agency, as employer.

Although continuation is still an extremely costly form of health insurance, it almost always beats the conversion option. For example, a 54-year-old divorced spouse of a male Federal employee would pay $1,041.36 a year to continue a self-only, high-option Aetna policy. That is outrageously high. But for that same individual to convert to an Aetna self-only, high-option policy in my State of Colorado, the cost would be $2,696 a year and for greatly reduced benefits. This is an unbelievable amount of money for anyone, much less someone without a paycheck or other source of regular income. What is more, for that same 54-year-old individual to convert to a policy in California, the cost would be $4,196—a ludicrous and prohibitive sum.

Therefore, by offering these groups the opportunity to continue in the FEHB program, we will be providing them the availability of better, more affordable health care coverage.

One of the most appealing aspects of section 3 is that its costs to Government will be negligible. Even if everyone eligible were to take advantage of the opportunity to continue, they would make up only a small percentage of the total FEHB population. This, coupled with the fact that the individual must bear 100 percent of the premium burden, makes this practically a no-cost provision for the Government. Because the costs to the individual are so high, many will not be able to afford it. Those who do choose to convert or continue will do so only until they become eligible under a more reasonable health care plan. With new employment or remarriage, their connection to the FEHB program will quite probably cease.

Therefore, with section 3, we are not establishing a new program; we are not initiating a costly new financial burden. We are simply extending an important opportunity to certain individuals who have lost their access to affordable, quality health care insurance. They have lost that access through no fault of their own: Some do to political and economic policy which has, so far, resulted in 13,000 RIF'd Federal employees; some as a result of an administrative mechanism as in the case of the lump-sum annuity recipients; some due to a change in health care status as in the case of the older dependent children; and, some as a result of unfortunate personal circumstances as in the case of the divorced. We are not providing charity for these individuals, we are not asking for their financial support. We are only asking that they be allowed to continue benefiting from the economies of scale provided by group health insurance policies. This is public policy at its best—it incurs no costs to the taxpayer yet addresses the needs of the deserving.

The insurance carriers have expressed no objections to this provision. The Reagan administration has supported this concept in another context. In his April 27, 1983, appearance

before the Senate Finance Committee, Office of Management and Budget Director David Stockman acknowledged that the problem of health benefits is one of "* * * selective gaps and discontinuities" which could be dealt with by mandated continuation of the present employer plan coverage to be financed entirely by the former worker. I can imagine no reason why the administration would not also support such self-paid continuation for these other deserving groups as well.

In my testimony before the House Subcommittee on Compensation and Employee Benefits on H.R. 656, I urged the subcommittee to delete any time limitation on the continuation right for RIF'd employees. I also asked that an additional group be added to those covered. There is a small, but extremely needy population of surviving spouses who are currently not eligible for continued participation in the FEHB program. They too should be included for the benefits of H.R. 656.●

● Mr. MARKEY. Mr. Chairman, I rise today to support H.R. 3021, the Health Care for the Unemployed Act. This desperately needed humanitarian measure has already received support from three committees in both Houses of Congress. It is time for us to add the voice of the full House to those demanding an intelligent and compassionate health care policy.

The Congressional Budget Office has estimated that 10.2 million unemployed workers and their families have no health insurance. These people face the constant fear that an unexpected illness will wipe out the savings they need to survive. They often sacrifice day-to-day preventive medicine that is crucial to the long-term health of our people.

Today, we have the opportunity to lend a hand to those in need and to make a significant investment in the health of our Nation. We are all the victims of soaring medical costs, costs which have risen unabated for the past 20 years. These costs are best controlled by prevention, not cure; prevention that both eliminates the pain and contains the cost of illness.

I urge my colleagues to remember that the people this legislation will help are not the simple victims of their own poor planning. By and large, these people are hard-working Americans who saved all their lives against the hard times, just like we are all told to do, and are now forced to use their savings to survive. These people live next door to financial ruin; any illness could move these people into bankruptcy. This legislation will offer some protection to the dedicated workers who paid taxes all their life to support our system and now need a break to keep them healthy—physically and financially.

The unemployed workers of today are not shiftless or lazy, like some cartoonists would have us believe. They are hard-working men and women who lost their jobs as our industrial base has sunk into depression. They have helped others who had hard times, and now these people find themselves in hard times and they need our help. This bill, granting limited health insurance, is the least we can do to offer protection against the whims of illness.

It is not the fault of the unemployed construction worker that the administration has enacted nearly $200 billion budget deficits that drive up interest rates. It is not the fault of the unemployed auto worker that these same administration policies artificially inflate the value of the dollar abroad, and make Japanese cars very price attractive here. It is not the fault of the unemployed steel worker that management of U.S. industry often has been slow to meet the challenge of foreign competition.

Some have estimated that the overvalued dollar costs the U.S. economy $100 billion in lost GNP and 1.6 million jobs every year. We all have seen up close the devastating impact of high interest rates on industry and trade. The cause of the highest unemployment since the depression lies not in ourselves, but in the mistaken policies of the administration and the vagaries of the economy. That is why unemployment hangs up there at 10 percent. That is why millions are left at the brink of disaster, hoping their health will not turn for the worse and push them into financial ruin. That is why we must act now.

We cannot wait for the problem to go away. It will not. Even as the administration trumpets an economic recovery, unemployment figures are expected to stay above 8.5 percent through the end of 1985. The recovery does not exist for those who have no jobs. And many of the people who now stand in unemployment lines will still be there many months from now. Their benefits will have expired and their position will be even more desperate.

The legislation before us is a carefully wrought compromise, weighing State's interests with the need to limit Federal costs. This compromise, which includes incentives for private employers to offer group health insurance to the spouses and children of unemployed workers, offers health protection to the unemployed while limiting the need for further Federal intervention. The bill makes clear to employers that their obligation to employees should not end with a pink slip.

I do have some reservations about the allocation formula for the block grants since it penalizes States that have low unemployment, and discourages them from participating. An unemployed worker suffers just as much in Massachusetts as does one in Michigan. Yet the distribution formula requires Massachusetts to pay a much higher share of the cost of the health insurance plan. This discourages full State participation. Thus, Massachusetts might choose not to cover a jobless person who would have been covered in Michigan. This system ignores the human suffering that hides behind statistics.

The compromise also requires patients to pay for a portion of the cost of care, in some cases as much as 10 percent of the total. While this copayment scheme is designed to discourage the unnecessary use of health facilities, its burden could prove too much. A hospital bed at $300 per day would cost a covered unemployed worker $30 per day, still prohibitive to the truly needy.

Nonetheless, this legislation is our only chance to address a critical problem. It is a solid first step, and we must take it now. We must bury our differences on minor points and uphold the fundamental principle: that the unemployed workers of this Nation should not be left alone in their time of trouble. When health maintenance is sacrificed, the long-term effects are severe: an unhealthy population that will pay a lot more for its health as it ages. We must also insure that the unemployed never be reduced to poverty by a catastrophic illness.

The Reagan administration has hinted darkly that it will veto any health care bill that does not include a new revenue source to pay for itself. I only wish the same criterion were applied to defense expenditures. This administration was willing to propose a nearly $200 billion deficit to finance its weapons buildup. It is blatant hypocrisy for the same administration to deny our unemployed citizens their health, the most basic necessity of life, in the name of fiscal austerity. We have been asked to spend five times the amount of money to deploy one missile system whose only justification is that it can serve as a bargaining chip in arms control negotiations. The priorities of the President are clear. We must be sure that ours are equally clear.

Congress must take a firm stand in favor of health care for the unemployed. We must make it clear that this is one of the most important pieces of social legislation to come before this Congress. And we must make clear to the American people where the blame lies if this humanitarian program is ultimately defeated by a hostile administration.

I urge you, my colleagues in the House, to consider this legislation, the people it is intended to help, and the way in which it will help them. I ask you to join me in support of this bill, so that together we may lift the

burden of illness from the unemployed workers of our Nation.●

● Mr. ROYBAL. Mr. Chairman, the need for a comprehensive plan to meet the needs of our Nation's 11.1 million unemployed is crucial. The loss of a steady income is but one of the negative results of unemployment; with it also comes the loss of the security of knowing one's individual and family health care needs will be met. Pregnancy, serious illnesses, and other health related problems do not occur on any given schedule. Consequently, health care coverage must be made available at all times, most especially during this time of widespread unemployment.

While we attempt to solve our Nation's economic and industrial problems, H.R. 3021, the Health Care for the Unemployed Act of 1983, is a means of providing these workers and their families with at least some degree of security. Joblessness can no longer be looked at as a short-term setback. The average duration of unemployment is now at 22 weeks and growing. For those collecting unemployment compensation during this time the situation is grim. For these individuals paying for health care services, at current rates, is difficult if not impossible with the meager income unemployment insurance provides. A single medical or dental bill could easily consume 100 percent of the monthly unemployment insurance payment. The burden of providing food, housing, and other basic necessities should not be compounded with health care worries.

For those workers whose unemployment has extended beyond the limits of compensation, the situation is even more grave. For these people personal financial resources have already been exhausted and the crisis escalates daily. Even though there are some health care personnel and facilities willing to provide services on a volunteer basis these instances fall far short of providing the widespread coverage necessary. What we need is a comprehensive plan available to all those persons who, because of the state of the economy, are in need.

H.R. 3021 creates a responsible mechanism through which States can provide for the health needs of their unemployed. The cost of the bill will be shared with the States, based on the severity of the unemployment situation, so as to insure an equitable distribution of services and a shared responsibility for the problem. With the passage of this bill we will be able to guarantee at least a minimal level of health services. The services to be rendered will include the basics: Inpatient hospital care, outpatient treatment, physician visits, clinical services, as well as, prenatal, delivery, and postpartum care. This action is a vital step in our struggle to assure the physical well-being of our workers and their families during this time of crisis.

Compounding the problem is the fact that adequate health care coverage can be even more important during times of high unemployment. Recent studies have proven the existence of a direct correlation between unemployment and a wide range of physical, emotional, and psychological problems. Consequently, the economic and social factors are multiplied when health care or the lack of it becomes an issue.

This bill will provide for those who, through no fault of their own, are unemployed and uninsured. If we cannot immediately meet their employment needs, it is our obligation to provide the means to meet their health care needs in the interim. Access to proper medical care should never be contingent upon one's economic status. I urge you all to join with me in voting for H.R. 3021.●

● Mr. CROCKETT. Mr. Chairman, as a cosponsor of H.R. 3021, I fully support its provisions offering health care protections to those men and women who continue to suffer under the present conditions of high unemployment now prevailing in many areas of our country. The people of my district, the 13th District of Michigan, have been especially hard hit by the continuing high levels of unemployment, and we have seen a corresponding lag in health care and preventive medical and nutritional care.

I have a special interest today in discussing the mental health aspects of the proposed health care program for the unemployed. I concur with the language included on page 15 of the June 7, 1983, committee report accompanying H.R. 3021, which stated that—

> The Committee recognizes that unemployment means not only financial hardship for the families affected, but physical and emotional stress as well. Within the benefit limitations set forth in the Bill, the unemployed should have access to * * * mental health benefits.

Dr. Matthew Dumont, a community psychiatrist, has stated that—

> Loss of work represents not only financial insecurity but a biopsychological assault of such magnitude that it must be counted as one of the greatest public health menaces of all time.

Put another way, unemployment as a major source of stress has consequences for physical health, mental health, and family functioning.

Specific examples of the consequences of unemployment can be found not only in the headlines of the daily papers, where the stresses of unemployment are mirrored in the increases in violence, depression, and unhealthy conditions, but also in scientific studies of unemployed individuals.

For instance, studies which considered mental and emotional illness demonstrate several ways unemployment affects individual well-being and stability. The impact of stress is manifested in high levels of anxiety, depression, aggression, and loss of self-esteem. The above behaviors, and stress on families resulting from life changes engendered by unemployment, cause an increased incidence of marital problems, child abuse, behavior problems in children, and juvenile delinquency. A recent series in the Detroit Free Press on the increased incidence of child abuse in Michigan documents the correlation between dysfunctional family behavior and unemployment.

The longer people experience unemployment, the more likely they are to experience mental health consequences, that is, depression and alcoholism. And the latest statistics show that the average length of documented unemployment is close to 18 months. This figure does not include those people—some 8,000 every month—who exhaust their benefits and go on the discouraged workers lists.

As the unemployment rate increases, the negative effects on physical health and mental health increase exponentially.

The Michigan community mental health system currently treats 13,093 individuals who were laid off, are looking for work, or are unemployed. This 13,000 total is conservative, in that it excludes family members who may also have received mental health care. Yet even these conservative figures show an alarming increase of 4,295 individuals since 1978.

Health care for the unemployed is cost effective. By including mental health services in the basic coverages allowed in this legislation, we insure that unemployed persons can receive treatment upon referral for their total health needs—physical, emotional, and mental care.

I encourage my colleagues to expand beyond a solely physical approach to health by expressing our intent that this legislation include psychiatric and other types of mental health service. Specifically, I encourage the inclusions of inpatient mental health services, outpatient services directed at remediation of depression, family conflicts and children's behavioral problems, and, special, short-term crisis interventions focused at unemployed individuals and their families.●

● Mr. McCANDLESS. Mr. Chairman, last week, we received more encouraging economic news. The unemployment rate dropped another one-tenth of 1 percent, a decline of 0.8 percent since December. The number of factory jobs have risen for the last 3 months. The rate of unemployment in the durable goods industries has dropped approximately 4 percent since

December. But despite this encouraging economic picture, 10 percent of the American work force remains without a job. I sympathize with these people, many of whom, through no fault of their own, are without employment.

To compound this problem, many are in need of medical assistance but, because of a layoff, have lost their health insurance. Because of increasing costs of medical care, a lifetime of savings can be wiped out overnight without the benefit of insurance. I believe there is a definite need on the part of Congress to address this problem. The proper role for the Federal Government has been contemplated by several committees of the House and Senate. The Energy and Commerce Committee has provided us with one solution—a brandnew, multibillion-dollar entitlement program which seems suspiciously close to an extended version of medicaid for the unemployed. This new entitlement would be open ended with no stipulations on participation except that you must qualify for unemployment compensation. I cannot support that. I cannot support yet another huge welfare program that would create more problems than it solves.

I do not believe the average citizen should be forced to bear the entire cost of health care coverage for every unemployed person, no matter what the particular circumstances, when there are unemployed who are financially better off than others who work. Under medicare, for instance, the aged and disabled must pay a significant amount in deductibles and copayments. No such requirements are proposed for beneficiaries of this program.

The Ways and Means Committee has made a valiant attempt to correct a majority of the problems proposed by the Committee on Energy and Commerce. However, it does not go far enough. Despite three attempts by Republican members of the committee, there is still no provision to require or permit the use of a qualifying test.

Just thinking of what happened in the food stamp program makes me cringe. Without the use of such a qualifying test, nondeserving people could qualify for assistance.

I believe in the need for health benefits for the unemployed; it is a much needed program. I cannot, however, support one laden with the possibility of abuse.●

● Mr. HOYER. Mr. Chairman, while economists hail the current boom as the end of the recession, the unemployment rate continues at double-digit levels, with little prospect in sight for any substantial reductions. This continued high rate has severely affected the ability of many Americans to obtain for themselves and their families adequate health insurance, as most Americans obtain their insurance through their employer. Private health insurance is costly, and many companies provide only short-term coverage for employees who have lost their jobs.

According to the Congressional Budget Office, 10 million jobless workers now do not have health insurance. This can be devastating to a family faced with a sudden, serious illness or injury. In many areas of the United States, the typical unemployed worker does not meet medicaid eligibility requirements, and so are faced with dealing, on a day-to-day basis, with the fear of becoming ill or injured. This merely adds further to the frustration and pain of a person who suddenly finds himself or herself without a job and the means to provide for the family.

Clearly, then, there is a need for the Federal Government to take some decisive and substantive action. We have already acted upon and implemented a solid jobs bill which we have seen has been of real help to many States confronted with serious unemployment problems. H.R. 3021 is a corollary to that bill—a prudent and effective response to the burgeoning problem of the unemployed and uninsured worker.

H.R. 3021 will directly benefit the most needy, and would do so in a way that will neither unduly burden the States nor exceed the amount provided for this effort in the first budget resolution for fiscal year 1984. By distributing the funding to the States in the form of block grants, the program permits the States wide discretion to distribute the money in the manner they feel is most efficient and effective. These matching grants are voluntary, with the States providing a portion of the funds in direct relation to the percentage of unemployed workers in the States.

Certain provisions of the bill assure that funding will go first to those who need it most, that is, those who have been unemployed the longest. In addition, provisions are included to establish direct grants to hospitals to assist them in providing services to low-income individuals without public or private insurance. It also provides for an increase in maternal and child health block grants, signaling increased congressional concern for those who do not have the means to obtain health insurance in this society.

The cooperative approach between Federal and State governments underlying this bill sets a bold precedent and establishes a framework from which future programs might be developed. I would like to commend my colleagues, Chairmen ROSTENKOWSKI and WAXMAN, for their outstanding leadership on this issue. This bill addresses forthrightly the oppressive problem of health care for the unemployed, and I urge my colleagues to support this vital legislation.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 3021, the Health Care for the Unemployed Act. Because the Nation's health insurance system is so closely linked to employment—more than 85 percent of all workers gain access to health insurance coverage through their employers—the recession has severely cut into the access to health care for the unemployed.

During February 1983, over 14 million unemployed workers and their dependents, including 4 million children, had no health insurance protection. In Michigan, over 400,000 individuals are without health care as a result of unemployment. Not only does this add to the overall cost of health care, it has resulted in several disturbing trends in my State. The Michigan Department of Public Health reported a threefold increase in walk-in deliveries by women who had no prenatal care. For the first time since World War II, the infant death rate has actually increased in my State.

Private hospitals often refuse to treat uninsured individuals and "dump" these patients on public hospitals. Public hospitals must then absorb the debts of the unemployed which adds approximately $30 per day to the costs of insured individuals. Unemployed workers and their families frequently forego preventive and diagnostic care because they are unable to pay their doctors' bills. Not only does this endanger the lives of unemployed workers and their families, it also increases the cost of the treatment which they eventually receive.

H.R. 3021 will provide States with the necessary funds to address this problem through the creation of a block grant program which expires at the end of fiscal year 1985. This bill also increases the availability of private health insurance to unemployed workers. Any employer with 25 or more employees would be required to provide 3 months of health insurance coverage to laid-off workers. In addition, employers must provide an open enrollment period for any spouse of an unemployed person. H.R. 3021 would also establish a program of discretionary grants to public and private hospitals serving large numbers of uninsured workers.

The State matching formula is of particular importance to high-unemployment State such as Michigan. The depressionlike conditions in Michigan have resulted in increased demands on the State treasury. Under the provisions of H.R. 3021, Michigan would not be required to provide any matching funds.

Mr. Chairman, this measure is not all that I had hoped for in the way of health assistance for the jobless. It

will provide a limited amount of needed relief for out-of-work Americans who have not received medical care that they need, yet are reluctant to seek since they cannot afford the cost of such care. I urge the adoption of H.R. 3021.●

● Mr. FAUNTROY. Mr. Chairman, I rise in support of the Health Care for the Unemployed Act of 1983, H.R. 3021. While the bill originally reported by the Committee on Energy and Commerce provided relief through an entitlement, I must support the compromise bill which provides for a block grant program.

I note that H.R. 3021 is supported by AFSCME, CWA, American Hospital Association, American Public Health Association, UAW, National Association of Public Hospitals, and the U.S. Catholic Conference.

H.R. 3021 establishes a new block grant program for States with the purpose of providing health care services to unemployed workers and their families. State participation in the program is voluntary. The State matching provisions require matching funds in amounts varying from nothing to 20 percent of program costs, depending on State unemployment rates.

The bill also establishes new requirements for employer-provided health insurance programs, in order to increase the availability of health insurance for the unemployed.

Finally, H.R. 3021 establishes a new program of discretionary grants to public and other hospitals serving as health care "providers of last resort" to unemployed and uninsured individuals. The bill also increases the authorized funding for the maternal and child health block grants.

The Reagan administration, as would be expected, opposes H.R. 3021. Such insensitivity to the unemployed and disadvantaged has become commonplace.

Mr. Chairman, H.R. 3021 is timely. Unemployment in this Nation is a disgrace. In the District of Columbia, the latest statistics show an unemployment rate of 10.4 percent. I am pleased that in fiscal year 1983 the District of Columbia will receive $1.1 million with no required State match. In fiscal year 1984, the District will receive $5.9 million with a required match of $300,000, 5 percent of total program expenditures.

I am also supportive of the provision providing for a discretionary Federal grant program for assistance to hospitals serving as providers of last resort to uninsured and unemployed persons. This would be especially helpful for D.C. hospitals, especially D.C. General.

Mr. Chairman, I strongly support passage of H.R. 3021.●

● Mr. BROWN of California. Mr. Chairman, I rise in support of the committee recommendations on the Health Care for the Unemployed Act. I commend the work of my colleagues, Chairmen ROSTENKOWSKI and DINGELL, and Subcommittee Chairmen WAXMAN and JACOBS.

Mr. Chairman, I am cosponsoring this legislation because it is the best feasible solution to a widespread, life-threatening situation. Although the spiraling unemployment rate seems to be winding down, we are still suffering the effects of the worst recession since the Great Depression. The Congressional Budget Office estimates that about 19 million unemployed workers and their families will be without health insurance coverage during fiscal year 1984. In my own congressional district, the May 1983 unemployment rate of 10.8 percent indicates to some degree the lack of health insurance coverage. The children's defense fund estimates that approximately 13 million children will suffer from the effects of unemployment in 1983. The Census Bureau released new data on poverty yesterday: One American in seven is living below the Government's official poverty line. That is one American in seven.

We cannot rely on private and volunteer organizations to meet the need for health care. These groups—church groups, the Salvation Army, the Red Cross, food banks, and others—are already hard pressed to meet the basic needs of food, clothing, and shelter. They do not have the facilities or the financial resources to provide even minimal health care. The States, facing severe fiscal problems, are not filling the health care void. Virtually all States have reduced their medicaid programs; 44 States made serious reductions in their title V funded maternal and child health clinics and services.

Mr. Chairman, in my service on the Agriculture Committee, I have become increasingly aware of the effects of malnutrition on children and adults. Malnutrition slows mental growth, decreases attention spans, breaks down the natural immunity system, and exacerbates other health problems. It can cause permanent mental and physical damage to children. The U.S. Department of Agriculture has made an attempt at addressing malnutrition through its commodities distribution program. The Agriculture Committee is holding hearings on this program, at which I am testifying today. Another administration attempt to address the problem came yesterday, when President Reagan announced the formation of a Task Force on Hunger. I commend the President for recognizing the problem, and encourage him to follow through with the task force recommendations—even if they include restoring some administration budget cuts in food stamp and other public assistance programs.

But malnutrition is only one health problem. The diseases of the unemployed worker and his family not covered by health insurance remain largely untreated. They can leave the sufferer mentally or physically disabled to any degree and for any length of time. In brutal fiscal terms, we cannot afford a population that is unable to learn, work, and contribute to our society.

Mr. Chairman, this legislation does not establish an open-ended entitlement program. It does target benefits to those who have been unemployed the longest, who are most in need. It does begin to address the problem on a long-term basis through modest changes in private health benefits. More long-term efforts should be made. However, we must meet the current crisis.

We are not here today to judge the unemployed, and whether they have the right to health care. There is a tremendous need; if it remains unmet, we will all suffer—economically and morally. We are here today to help meet that need in the best way we can. To use one of Robert Kennedy's favorite phrases, "You go to the tennis courts to play tennis, not to see if the lines are straight." I urge my colleagues to support the committee recommendations on H.R. 3021.●

● Mr. ACKERMAN. Mr. Chairman, I rise in strong and enthusiastic support of a landmark piece of legislation, H.R. 3021, the Health Insurance for the Unemployed Act.

Yesterday, the Census Bureau reported a dramatic rise in the number of Americans living in poverty. Amid the reams of data, a picture emerges of a Nation on the retreat, backing away from the gains made in the war on poverty.

In the Reagan recession, however, the suffering is not confined to the poor. People accustomed to steady work and steady pay have been laid off in record numbers, and now find themselves short of basic necessities. Food, shelter, and clothing—which many working families thought were a concern of the past, of their parents' or perhaps their grandparents' generation—can no longer be obtained by many people without extreme sacrifice.

Added to this burden is that of insuring the health of one's family. When a wage earner is laid off, medical benefits usually expire; unfortunately, the family's need for medical care does not. To maintain the former level of coverage, the unemployed person would have to pay premiums assessed at individual rates, rather than the much lower group rates available from his or her employer. (Often, the employer absorbs this cost entirely, or charges a nominal fee.)

Mr. Speaker, in time of medical need and economic hardship, the unemployed are faced with a choice no family in America ought to make: whether to get proper care or attempt to stay solvent. Thankfully, there are many doctors and hospitals which tend to the sick, regardless of their ability to pay.

For example, in my district—in Queens County, New York City—Jamaica Hospital, among other health care institutions, has a commitment to serve anyone who walks through the door. This policy has saddled the hospital with a $2 million debt out of a total budget of $35 million. According to David Rosen, executive director at Jamaica Hospital, there are more nonpaying patients than ever, many of whom have deferred treatment until they were gravely stricken.

But should the medical profession be made to bear this cost? Every year the administration finds millions of dollars for this bomber or that missile, with no mention of how military spending might affect the Federal deficit. Yet when we try to alleviate the ills of the legions of unemployed in this country, the administration turns cost-conscious. Perhaps our hospitals ought to hire leftist insurgents to infiltrate the emergency rooms: Then the aid would flow.

Of course, there are many Members of Congress who are addressing the problem of health care for the unemployed. H.R. 3021 is a product of their efforts. This bill channels funds to the neediest, based on a formula that is fair without being hopelessly complex. A limited amount of money is set aside for individuals who do not otherwise qualify for the program (due to the short duration of their jobs), yet are nonetheless confronted with hefty medical bills. A like amount of money is earmarked for hospitals that have incurred heavy debts from assisting the newly needy.

Payment for this program is divided among the Federal Government and the States, with a modest contribution from the recipients. Other provisions mandate that benefits be distributed uniformly, that essential medical services be provided (including prenatal, natal, and maternal care), and that administrative expenses not exceed 10 percent of the total appropriation.

By approving this measure, the House recognizes the need and importance of health care for the unemployed.

● Mrs. SCHNEIDER. Mr. Chairman, we as Representatives of the American people have, during these past 6 months, taken many steps to assist those who have shouldered much of the burden resulting from these trying economic times. The emergency jobs bill, the House budget, and mortgage relief assistance—all these actions were taken to help millions of Americans. From various indicators we are seeing signs of an economic recovery. However, this should not prevent us from continuing to provide services to those still in need. Today we take another step on that path, by voting to provide badly needed health care to the millions of unemployed men and women and their dependents. I urge all my colleagues to support this worthwhile measure.

Mr. Chairman, I am especially pleased by the inclusion of an increased maternal and child health service block grant authorization. As you will recall, the 1982 block grant appropriation was $373 million. Fortunately, through supplemental funding, an additional $110 million was provided in the emergency jobs supplemental passed earlier this year. I say fortunately because without the additional moneys, valuable prenatal, preventative service and handicapped programs would have been severely curtailed and in many instances removed entirely, H.R. 3021 is significant in that it provides $483 million for 1984 funding—therby eliminating the necessity for supplemental legislation later next year.

I, like many of you, are looking for ways in which to stretch our Federal dollars. However, penny-pinching at the expense of efficiency is most counterproductive. The programs within the maternal and child health block grant are documented as being the most cost effective and worthwhile efforts within the Federal budget. In my own State of Rhode Island for instance, moneys are utilized to service 6,000 to 7,000 preschool children for immunization, detection of lead poisoning, and the like.

The block grant is also of paramount importance in prenatal care. For instance, of the 12,000 deliveries per year, over 3,000 of these are dependent on public support for prenatal care. Moreover, vital handicapped and health care services such as those provided through the effective hemophilia-care program are available only through adequate maternal and child health funds.

I ask my colleagues to please consider the merits of this significant legislation. Without sufficient funding for the maternal and child health block grant, many of the mothers and children of unemployed families will be without the necessary primary and hospital care found in federally supported local clinics or through private providers. Let us use our wisdom and foresight and provide of our Nation's future health.●

● Mr. DICKS. Mr. Chairman, I am obviously not pleased to speak before the Members of the House of Representatives today about the chronic high rate of unemployment in my congressional district, because it is a difficult subject to discuss. But I think it is constructive to remind our colleagues that the fresh winds of economic recovery are not blowing as strongly all across the Nation, and that the problems we experienced during the recession of the past 2½ years are still very much apparent in some regions. I find it personally very hard to join in the euphoria which has overtaken the members of the administration's party here in Washington as the national unemployment rate "dropped" to 10.1 percent. I find it hard to find any consolation in knowing that 1 out of every 10 able-bodied Americans capable of full-time employment is now unable to find work—a total of 11.2 million Americans—representing a tragic waste in human potential.

Closer to home, I am reminded of the human ravages of chronic high unemployment every time I return to my congressional district in Washington State. Our statewide economy in Washington is heavily dependent upon the health of the timber and housing industries, which have been severely depressed during the past 3 years. Unemployment in some counties exceeded 20 percent during recent months. Last month the statewide level of unemployment fell to 11.5 percent, but there was very little joy in knowing that 253,000 workers could not find productive employment. In the city of Tacoma, where the published rate of unemployment has now dropped to 12.3 percent, there are nearly 25,000 people still looking for work.

But the numbers alone do not tell the entire story. The real tragedy behind the numbers is seen in the faces of families standing in lines waiting for allotments of surplus food; children and adults taxing the resources of the community health clinics in Tacoma because unemployed people have no more company health benefits; and in the faces of the hundreds of dejected people who apply for each job opening at one of our local industries. Those are the real victims of the recession. They are people who are quickly losing confidence in themselves and losing hope in a system they had trusted to provide the standard of living they are capable of earning. It is a national tragedy, a national disgrace, and it should be a constant call to action for every Member of the Congress. We have made some progress—a mid-course correction in Reaganomics, the job creation legislation and the revision of the fiscal year 1984 budget—but there's more to be done. We cannot let the so-called dramatic decline of the rate of unemployment obscure the fact that there are still more than 11 million Americans looking for work, in cities like Tacoma, Wash., and Detroit, Mich. While we debate the longer-term solutions such as a more comprehensive national industrial policy, we have to remain conscious of

the need to provide the stimulus necessary to produce jobs in the near term.

The jobs bill was a start, a very good start, but it is by no means the total solution to the problem. I hope that Congress is not only attentive to other similar job-creating legislation this summer, but also to various measures of unemployment relief which are still necessary, even during the early stages of economic recovery. One of those measures is a bill to allow for continued health care benefits for unemployed persons and their dependents, with the individuals assuming the share formerly paid by the employer. Especially in cases in which the sole income earner of a family loses a job, it is all-too-often the case that health care for the children and adults in these families is now judged to be expendable. I am concerned that access to hospital and medical services is being shut off to the unemployed and that as as result, the health status of these distraught families is being compromised. A Congressional Budget Office estimate put the number of jobless workers and their dependents who lack any form of health insurance at 10.2 million. Most people receive health insurance through group policies provided by their employers. Once they are unemployed access to health care virtually disappears and many people are forced to sacrifice needed health care. In a letter to me from Dr. Richard Tompkins, executive director of the Seattle Public Health Hospital, he pointed out:

> The long lasting unemployment combined with reductions in State health care benefits, has resulted in many millions of citizens being unable to afford the costs of essential medical care. We providers are now seeing the effects of this:
>
> Patients who no longer have health care coverage are delaying treatment of preventable illnesses and are coming to our emergency rooms with serious disease.
>
> Infant mortality is rising for the first time in many years in those communities where unemployment and poverty are high.
>
> The hospitals which provide care to all persons regardless of their ability to pay (predominantly the public hospitals) are seeing marked increases in bad debt and charity care costs due to an influx of recently unemployed patients. In many cases, these hospitals of last resort re threatened with bankruptcy.

I believe it is essential that Congress recognize the devastation being wrought on the poor and unemployed by the combination of a recession and major cuts in Federal and State health programs and adopt H.R. 3021. We must realize that the slow road back to economic recovery will require this type of action from Congress and the executive branch.

Finally, I would like to express the hope that we as a Congress and as a nation have learned some lessons from the recession, we have just expercienced. Especially from the perspective of the Pacific Northwest, I hope we have learned that trying to utilize a high-interest rate policy to fight inflation merely results in the widespread loss of jobs in industries such as housing which are particularly sensitive to interest rate fluctuations. It should not be our national policy to create that kind of massive human suffering through unemployment in order to claim credit for impressive gains in controlling the rate of inflation of our money.

Therefore, I would like to say to my colleagues that I am, of course, glad that the rate of unemployment has begun to decline this year. But I would also invite any Member who believes the recovery is here to join me in visiting the Sixth District of Washington State to view the human side of unemployment that is very much in evidence there.●

● Mr. KOSTMAYER. Mr. Chairman, I rise in support of H.R. 3021, the Health Care for the Unemployment Act. Pennsylvania, and indeed the entire country, continues to experience record high levels of unemployment. Unemployment in Pennsylvania is now over 12 percent because of this. The Congressional Budget Office says over 19 milion unemployed workers and their families will be without health insurance coverage in 1984. In Pennsylvania, over 400,000 persons with dependents receive unemployment compensation, but have lost the health insurance. The sad fact is that many unemployed Americans have a choice between eating, meeting mortgage payments, or paying for health insurance. Often, the health insurance is the first expense to be abandoned.

All of us are well aware of how expensive hospital and physician care can be. Most often, Americans receive health insurance as a benefit of being employed. However, when a worker is laid off the coverage ends. The only option for an unemployed worker is Medicaid, but this is only for the very poor. At the same time, unemployment extracts a heavier-than-normal toll on the physical and psychological health of its victims. Without health insurance, workers and their families are completely unprotected. Any illness can bring, first, extreme financial hardship, and then almost total despair.

H.R. 3021 is a rational and fiscally sound approach to supplying health insurance coverage to the unemployed. This health insurance program is a short-term program to meet the immediate needs of the unemployed. The bill would establish a block grant program entitling States to specified amounts for health insurance based upon their share of national unemployment. In fiscal year 1984, Pennsylvania will receive $122 million from the Federal Government and must provide a 5-percent matching grant or $6.4 million. Not only does this health insurance plan ask for contributions from the States and Federal Governments, but also from employers and the unemployed. For example, employers who offer health insurance and employ more than 25 people must allow enrollment fo unemployed spouses of the current employees. Also, employers must continue health coverage for 90 days after an employee is laid off. Even unemployed individuals would be required in certain cases to make contributions to their health insurance plan. The best plan is one that asks for fair sacrifices from all participants. I believe H.R. 3021 meets this criteria.

One other important aspect of H.R. 3021 is that it sets up a discretionary grant program for public hospitals that serve large numbers of unemployed persons, $233 million over 3 years would be available for discretion ary grants to hospitals.

This program has wide bipartisan support in Pennsylvania and all over the country. Governor Thornburgh has publicly stated his support for a program that provides health insurance for the unemployed and both Pennsylvania's Senators, HEINZ and SPECTER have introduced a similar bill in the Senate to provide health insurance coverage for the unemployed.

We must continue to do everything we can to encourage the economic recovery that we hope is slowly taking hold in the country. Americans do not want just Federal and State handouts, they want jobs. The sad truth is that while we are beginning to see a reduction in the national unemployment rate, it remains at an unacceptably high 10-percent level for the United States and 12.6 percent in Pennsylvania. sylvania. Even under the optimistic OMB economic forecast, the rate will decline only slowly over the next 2 years, to 8.9 percent in 1984 and 8.2 percent in 1985. While we must continue to do everything we can to put America back to work, millions of unemployed workers and their families will continue to be without health insurance protection unless we act. We cannot ignore their needs. We must implement this short-term but crucial program immediately.●

● Mr. PARRIS. Mr. Chairman, while I am in support of providing health insurnace benefits to America's unemployed workers, the legislation before us today is not the type of option the Congress should be pursuing.

I am opposed to H.R. 3021 because it would add a new title to the Social Security Act, creating a new benefit program for the unemployed. It should be quite clear to the House of Representatives that a new unfunded entitlement program will add to the existing financial burden already facing the social security trust funds. In 1977, the

Congress enacted amendments which were to keep social security solvent beyond the year 2000. Earlier this year, this Congress took some drastic steps to keep that same system from going bankrupt. If we start adding on new unfunded entitlement programs to an already beleaguered social security system, we will continue to jeopardize the benefits of social security recipients for years to come.

The Congress should consider taking steps to provide unemployed workers and their families with health insurance coverage. An unemployed person without health insurance benefits faces economic disaster if they or a member of their family have a serious accident or catastrophic illness. We need to address this situation in the near future but it is inappropriate and extremely unwise to try and accomplish this goal by further weakening social security.●

● Mr. MITCHELL. Mr. Speaker, there is no question that the measure before us is sorely needed. The Health Care for the Unemployed Act (H.R. 3021) addresses the critical problems presented when the families find themselves victimized by unemployment. I would like to commend both Chairman WAXMAN and ROSTENKOWSKI for their leadership in guiding this essential begislation through to consideration by the full House.

Let me take a few minutes to express a concern about the allocation of funds among States, as established in H.R. 3021. It is noted that the overall unemployment levels of respective States will be an integral component of the three-part block grants allocation formula. I would submit that we may run the risk of slighting some of our hard-pressed localities within the States if we pursue allocations in this manner. For example, in my State of Maryland, the overall unemployment level is approximately 7.6 percent. Needless to say, this is well below the national level, and may not be viewed as critical. However, in the city of Baltimore which I represent, the unemployment rate is a severe 11 percent, and thus, above national average. The unemployment in my city, quite like other major urban areas, is even more serious for youth, minorities, and minority youth in particular. Unemployment rates in these categories are, 24, 17.9, and 44.7 percent respectively. Without question, a failure to consider the high percentages of unemployed persons in the various localities versus the States, leaves open the distinct possibility of inadequate allocations to certain States. Again, I urge the members of both the Energy and Commerce, and Ways and Means Committees to give serious thought to this concern.

Mr. Speaker, I will close by urging my colleagues to vote in favor of H.R. 3021. It is a modest proposal which provides essential flexibility for our States to see that the health care needs of the unemployed and their immediate families are met.●

The CHAIRMAN. The Chair will advise the Committee that under the terms of House Resolution 276, the majority spokesman for the Ways and Means Committee, the gentleman from Indiana (Mr. JACOBS), has 5 minutes remaining, and that there remains from the earlier debate allotted to the Energy and Commerce Committee 10 minutes to the gentleman from North Carolina (Mr. BROYHILL) and 6 minutes to the gentleman from California (Mr. WAXMAN).

At this point the Chair will inquire of the gentleman from North Carolina (Mr. BROYHILL), what is the gentleman's disposition toward the time that he has reserved?

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. SHELBY).

Mr. SHELBY. Mr. Chairman, I rise in support of H.R. 3021 a bill to establish a program of block grants to the States to be used to provide health care services to some 19 million unemployed workers and their families throughout the Nation.

We may understand the pervasive and serious nature of unemployment in this country, but I do not think we fully appreciate the desperation and despair felt by many men and women heads-of-household, out of work for the first time in their lives, unable to adequately provide essentials for their families. Most of us have a fair chance of falling back on the girders of a former or alternate profession were we to lose our seats in Congress, but too many of our unemployed citizenry have virtually no other avenues open to them.

When the Energy and Commerce Subcommittee on Health and the Environment, upon which I serve, first began consideration of methods by which Congress could compassionately step in and assist the unemployed and their families meet the pressing concerns of health care, I had reservations about the manner by which we were to provide this assistance. I expressed my concern in subcommittee and in full committee about an entitlement approach; I was unable to reconcile my strong feelings that something needed to be done to help the jobless meet rising health care costs, and my conflicting aversion to setting up a new, open-ended entitlement approach with astronomical deficits to worry about. Moreover, I had additional problems with the bill which prevented my fully supporting the committee measure.

In this light, I am pleased with the action taken by the House Ways and Means Committee which creates a 2-year program of block grants to the States to be used at the States discretion. The total cost is considerably less than that proposed in the original committee bill and is consistent with the funding levels contained in the 1984 budget resolution. I fully support the provision allowing the States broader authority to design a health benefit package, to impose copayment requirements, and to contribute toward the Federal costs of the program.

I feel the changes and adjustments made by the Ways and Means Committee and agreed upon by the subcommittee and full committee chairmen of the Energy and Commerce Committee are positive, workable, and eminently reasonable. The faster Congress can approve a health care insurance package for the unemployed and start the States gears in motion in providing this aid, the better.

I urge my colleagues to join me in fully supporting the passage of H.R. 3021.

Mr. WAXMAN. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Chairman, I rise in support of this important legislation. I think this bill is critical because millions of unemployed Americans are falling between the cracks of our health care system. Millions of unemployed Americans have worked for decades but are still years away from bring covered by medicare. Millions of unemployed Americans have paid taxes for years, but because they have a handful of assets, they cannot get medicaid. Millions of unemployed Americans fear that one serious illness will literally wipe out everything they spent a lifetime trying to build.

Mr. Chairman, there are few things more terrifying to the American family today than the prospect that a family member will wake up in an emergency room with no health insurance coverage whatsoever. I say it is high time that those American families finally have some measure of security.

The bill before use today is not perfect. It is not going to cover everyone, and it will not meet all of the needs. But with it, many Americans will be able to sleep a little bit better at night.

The administration would have us believe that in a very short time the problem we face now will correct itself. Administration officials believe that what they call selective gaps in our health care system will be filled when the economy recovers and our citizens go back to work. Every Member here hopes that is the case. But when we have got a chance to reduce suffering among the unemployed through a program that is within the budget and can last only 2 years, I do not see how in good conscience we can walk away from that

chance. It is simply not enough to tell unemployed workers that they are merely selective gaps in the system and that their problems will be taken care of in due course. Many of those covered by this bill are dealing with the psychological trauma of being out of work in the first time in their lives. They literally have nowhere to turn to but this institution.

A vote for this program commits no one in this Chamber to a long-term Federal spending program for health care. This program has a precise beginning and a definite end. The States are in the drivers' seat because through a program of block grants they have great flexibility so that they can tailor health services for the unemployed to the needs of their State.

Mr. Chairman, today we have a chance to show that we have got heart, but a money manager's concern for the financially possible. We cannot meet all of the needs with a $200 billion deficit. We can pass this legislation, which will allow millions of unemployed Americans access to basic health care and the chance to sleep a little bit better this evening.

I urge support for the legislation.

Mr. BROYHILL. Mr. Chairman, I yield 6 minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Chairman, we have heard many sad stories today about the problems that confront the unemployed, problems in obtaining health insurance, problems in receiving appropriate health care. And I, too, could join with my colleagues in giving a list of horror stories about people whom I have personally met, have personally worked with, who have tried to do the best they can under very trying circumstances. Some have made it, some have not made it.

But the question we are debating today is not so much whether or not we should have a health insurance program for the unemployed. The question is, how are we going to fashion that program?

Let me speak first, for a moment, about the ingredients of that program and what our choices should be. Essentially, today we are being given the choice of an entitlement program with a cap, or nothing at all. We should have the choice of an entitlement program with the cap or a block grant. We should have a choice of a revenue source to fund that program, but we are not being given that choice today under the rule. So the two major issues—entitlement program or a block grant, a revenue source or no revenue source—are not going to be debated during the course of the regular discussion on this legislation. That is unfortunate.

In a motion to recommit, which I will offer, I do not have the chance to speak to the revenue source issue because of the way the Rules Committee fashioned the motion to recommit and required that it be germane to the remainder of the bill. But I will have an opportunity to raise the question of whether this should be a block grant or whether it should be an entitlement program with a cap.

□ 1410

I think those of you who are interested in dealing with the problems of those unemployed who have come and talked to you about their inability to obtain adequate health care ought to give very serious consideration to the block grant approach for several reasons.

First, it can do a better job of meeting the needs of the unemployed. Under the program offered by the Committee on Ways and Means and our friend from California, virtually every unemployed person in the country will be eligible for the program. In view of the limited numbers of dollars available, you are not going to be able to provide relatively decent health care for any of those individuals.

It seems to me it makes a great deal more sense to try to target limited resources to those who need the resources the most. We cannot do that under the program before us; we could do that under the program I will offer in the motion to recommit.

Second, this program that I am offering in the motion to recommit is better not just because it is going to be able to provide better service to those who need it, but because it has a chance of being enacted into law.

Clearly we know, as some have pointed out, that we are already late in the game when it comes to this legislation. We are going to be delayed even more if we pass a bill that has no chance of acceptance on the Senate side or that is going to be vetoed by the President. Whether we like it or not, we all have to work together in order to get a bill through.

The President has been very clear about what he will and what he will not support. He said he will support a proposal which provides for a block grant program, which provides for an ending date, and which has a revenue source. We cannot provide all three of those the way this debate is structured, but we can provide the block grant program with an ending date that has a chance of getting support on the Senate side and from the President.

If you are interested in helping the unemployed, let us not conduct a charade by passing legislation that has no chance of being enacted into law, and if it were enacted into law would provide a pittance of support for everybody unemployed. Instead, let us try to put together a piece of legislation that can be enacted into law in a timely way, that can provide meaningful support for those unemployed who have no other source of support and who absolutely need health-care assistance.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding.

Mr. Chairman, I commend the gentleman for the wisdom of his remarks, support what he is saying, support his motion to recommit because this will impose an impossible burden on the people of the country.

Mr. Chairman, I rise in strong opposition to H.R. 3021, a bill which promises Federal health benefits to the unemployed regardless of need, and all but assures another permanent, ill-advised national health insurance program that will add billions of dollars to the Federal deficit and further threaten the general health of our economy.

This measure purports to be a temporary, targeted block grant program to help the unemployed. In truth, this bill creates an entirely new and perpetual entitlement program; it contains no means test; it allows no flexibility for States to develop their own programs; it forces private employers to expand their own health coverage under criteria dictated by the Federal Government; it provides no means to finance a minimum of $4 billion in new programs; and, most importantly, the adverse economic effects of this proposal will undoubtedly lead to greater hardship, and higher unemployment for those we are seeking to help.

To compound these concerns, H.R. 3021 also includes an additional $233 million, 3-year program of Federal subsidies to hospitals providing care to the unemployed. Also included in H.R. 3021 are several nongermane provisions which increase authorization ceilings for totally separate programs, maternal and child health care and medicaid funds for U.S. territories in the Caribbean, by almost $150 million.

The major portion of this bill calls for creation of what is termed a "targeted block grant program" to States to provide health care for the jobless. This new program is to be transplanted as a new title of the Social Security Act.

States may voluntarily participate in this program and will receive funds based upon their unemployment levels and unemployment compensation beneficiaries over the last year. The bill entails a State matching funds formula, ranging from 5 to 20 percent, based upon their jobless rate.

Apart from those basic provisions, this bill departs radically from the block grant concept and imposes the Federal big brother mentality that our

State governments have learned to despise.

Little program flexibility is left to the individual State's imagination. This proposal first tells the State that it cannot alter or modify its current AFDC or medicaid programs for the unemployed if it is to receive funding. Then it requires each State to have its individual program to be transmitted to the Department of Health and Human Services, but only if the said plan meets the lengthy, open-ended minimum medical benefits that must be provided to all eligible persons and their families.

Upon establishing eligibility, the State is forced to cover individuals for at least 1 year. This legislation informs the State that it may even extend the health benefits for an additional 4 weeks after a person is reemployed.

The only allowable means test permitted under this bill is a provision that specifies that 5 percent of the State's allocation must be spent to provide services to those persons meeting a State-designed financial and/or medical means test. Thus, 95 percent of the Federal health benefits ascribed under this legislation are to be handed out with no regard to financial need, medical fitness, or any other standard of eligibility beyond one's employment status.

The Government's visible hand reaches beyond the State level. Under this bill, any private employer who has 25 workers or more and offers group health coverage must provide an open enrollment period of at least 30 days for each married employee to enroll in the plan. It also forces the employer to provide for at least 90 days of continuation coverage for any employee who loses his job on or after January 1985. Other provisions mandate private employers into offering plans for individual policies for month-long periods following a layoff. Any employer not meeting these requirements will be penalized by a 10 percent excise tax on employer paid health plan contributions.

These types of federally mandated instructions are in large part responsible for the ever-increasing costs of health care and insurance coverage. They limit the choice of the employer and the employee, and end up costing both parties more, as well as the taxpayer, without any regard to what type of health coverage is either equitable or cost effective.

These changes, particularly the requirement that they pay for the continued coverage of laid-off workers, would cost private employers an estimated $3.6 billion in 1985 and 1986. This could have the adverse consequence of causing many employers to drop health coverage for all of their employees.

Some 29 States, and certainly many employers, have already instituted their own form of extended coverage for the unemployed. By further instituting a Federal presence in the health care field, this Congress would be taking another dangerous step toward a full national health insurance program. We would be taking another irresponsible step toward fiscal insanity.

We are faced with annual deficits of $200 billion annually in the foreseeable future. Currently, our Nation is experiencing an economic recovery that is slowly, but surely, reducing unemployment, and thus, the need for more reckless and expensive Federal programs. By spending more, this Congress will not only wipe out this recovery and chance for economic growth, but we will assure the bankruptcy and ill health of all Americans.

We are elected to show leadership and responsibility for the common good. H.R. 3021 is neither responsible or for the common good. Let us show less symbolism, less false hope, and promote the overall good of the Nation by rejecting this bill.

Mr. TAUKE. I thank the gentleman.

Mr. Chairman, there is one final point that I wish to make. It is not just for the unemployed or for the people in this country who need assistance that we should adopt the motion to recommit. It is also because of the process that we have here in the House.

Under the proposal that is before us, we are again asked to spend money without going through the appropriations process. We are establishing once again one of those uncontrollable items of spending in the budget. It seems to me if we have any appreciation for the fiscal problems which confront the Government, and if we have an appreciation for the processes that we ought to follow when we spend money here in the House, we would want to go through the normal appropriations process, especially on a new program such as this.

So because this motion to recommit that I am offering does more for the unemployed who need it, because it is a program that can be enacted into law in a timely way rather than simply serve as veto bait or score political points, and because it more carefully respects the normal processes of the House, I urge my colleagues to support the motion to recommit when it is offered.

Mr. BROYHILL. Mr. Chairman, I have no other requests for time at this time.

The CHAIRMAN. Does the gentleman wish to yield back the balance of his time?

Mr. BROYHILL. If the others are going to do that, I will, too.

Mr. JACOBS. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does either gentleman seek recognition?

Mr. BROYHILL. Mr. Chairman, I suggest we all yield back our time.

Mr. JACOBS. I have reserved the balance of my time. I believe under the rule, the majority closes.

The CHAIRMAN. The majority has that opportunity. The gentleman from California (Mr. WAXMAN) can close at this point if he chooses. At some point, some Member should move forward.

The remaining time shows the gentleman from North Carolina (Mr. BROYHILL) has 2 minutes remaining, the gentleman from California (Mr. WAXMAN) has 2½ minutes remaining, and the gentleman from Indiana (Mr. JACOBS) has 5 minutes remaining.

The Chair recognizes the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, to close for the Committee on Energy and Commerce, it is my pleasure to yield the balance of our time to the distinguished chairman, the gentleman from Michigan (Mr. DINGELL).

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I am delighted to yield to my good friend, the gentleman from Texas.

Mr. LELAND. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of this issue.

Mr. Chairman, it is generally acknowledged that we are presently experiencing the worst rate of unemployment since the Depression. In accordance with this catastrophic phenomenon, the numbers of individuals losing all health insurance protection is equally critical as most of us obtain our health insurance through our jobs.

The Congressional Budget Office has estimated that over 10.2 million unemployed persons and their families are today without any form of health insurance. In 1984, it is expected that over 9.6 million jobless Americans, will be without health insurance. If we include their families, 19.1 million people will have no protection against the high costs of health care. This situation, Mr. Chairman, is an outrage against humanity.

It is not difficult to conceive of the great expense incurred by hospital and physician care costs. As we are all aware, the unemployed include individuals from all sectors of the economy. Unless workers are destitute, they do not qualify for medicaid. Medicare is limited to the aged and seriously disabled. For these reasons, health insurance protection should be made available for all who are unemployed, regardless of their economic status.

This is the opportunity to assist our fellow Americans during these difficult and unpredictable times. This legislation recognizes the equal responsi-

bility which must be shared by the Federal Government, the States, the private sector, and the individuals in need. I believe this bill is the appropriate vehicle to assure proper access to health care in our society for those for whom the need—for assistance, and for our compassion—is the greatest.

Mr. DINGELL. Mr. Chairman, to be unemployed is a disaster. To be unemployed and have a major health problem is a worse disaster.

The bill before us is carefully crafted. It meets the needs of some of the 30 million people in this Nation who are without health insurance. Over 10 million of these people are without health insurance because they have lost their jobs.

The argument has been made that this legislation is not needed because of the upturn. Let me inform my colleagues that there are over 100,000 people in Michigan still drawing unemployment insurance. In addition to this, there are a half-million others unemployed without unemployment insurance. Those are the ones who know the meaning of the word "disaster." When those individuals who have lost their jobs and their health insurance coverage are included in the calculation, as a State we are talking about almost a million people with no way to afford medical care. Most of these people do not qualify for either medicare or medicaid.

The bill before us takes care of maternal and child health benefits. The bill before us deals with the problems that are affecting the public hospitals and the communities, which are being destituted by health care costs of the unemployed. It ameliorates the problems of financing municipal hospitals.

West Virginia, Ohio, Alabama, Illinois, Mississippi, Tennessee and Washington, share the plight of Michigan.

The problems that we face are enormous. I can understand my Republican colleagues pushing their bill, but I think it is time we recognize that there are certain defects in the motion to recommit.

First of all, there is no assurance that the program will come into being if we pass the motion to recommit, because the money is not appropriated. This is a game that is played in this place, about passing authorization legislation and then never appropriating the money. Moreover, there is nothing for maternal and child health benefits. Moreover, the whole program's benefits are less than half that which is in the bill that is now before the body.

Those are serious defects. The legislation that we are talking about here is limited in duration. It provides moneys directly to the States and lets them meet their unique problems in the fashion which is best suited to the needs of the country. It will get the program going. The program is 2½ years in duration, and is a program which will go immediately into effect to address the problem of health insurance for those without jobs, something which is destituting families, individuals, and communities.

The combination of job loss and medical needs is a devastating one-two punch. Most workers now obtain health insurance through their jobs. When a worker is laid off, as so many have been, his health insurance ceases to protect him and his family after 30 days. After that moment, with income down to an unemployment insurance check, the family is unprotected. A short hospitalization, such as a child needing an appendectomy, will cost $2,000 to $4,000. The simple visit to a doctor may be put off, leading to more medical expenses later. House and car payments slip. A family can become poor very quickly, just because job loss is compounded by loss of health insurance.

The Congressional Budget Office reported to our committee that there are about 30 million people in the United States without health insurance, and over 10 million of them are people who have lost coverage because of job loss. During fiscal year 1984, 19 million people will be without health insurance because of job loss. These are the people who need the help of H.R. 3021.

Let me speak about my State of Michigan to reply to the foolish suggestion that this legislation is no longer needed. Last week there were still over 100,000 people drawing unemployment insurance in Michigan. These were the lucky people, for over 500,000 others were unemployed without unemployment insurance. When these individuals and the families of the workers who have lost health insurance coverage are included in the calculation, we are talking about almost a million people with no way to afford medical care. Most of these people do not qualify for medicaid. Public hospitals and doctors' charity cannot do the job. These people need the direct help that States can provide through this legislation.

West Virginia, Ohio, Alabama, Illinois, Mississippi, Tennessee, and Washington share Michigan's plight. Recovery is not here for people who are out of jobs or for the people who continue to lose jobs each day. Two weeks ago the State of Michigan reported on May unemployment: In the Detroit area there were 309,500 unemployed, up from 284,200 in May 1982.

I will not mislead you that the money in this bill, $350 million in 1983, $2 billion in 1984, and $1.65 billion in 1985 will solve the problem. It will help. In addition to the money that States receive in this bill, there is help for public hospitals, and for maternal and child health programs which have carried most of the burden of health care for the unemployed. And maybe most important, the requirement for 90 days of insurance coverage beyond the date of job loss will eliminate almost half of the need for this legislation in the future.

This bill demonstrates the attentiveness of the Congress to the needs of the unemployed. These men and women have purchased health insurance with their labor. They have helped build the fine medical facilities in this country. The least we can do is be sure that they can use this medical care when they are unemployed through no fault of their own.

The CHAIRMAN. The Chair would now state to the gentleman from North Carolina (Mr. BROYHILL) that he has 2 minutes remaining.

Mr. BROYHILL. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I would urge that we vote for the substitute. The gentleman from Iowa (Mr. TAUKE) has made an excellent statement. He has pointed out very clearly that the bill before us has a very poor chance of actually becoming law; that there are many problems with the bill. It creates a new entitlement program. It is not linked to a revenue source. It is fiscally irresponsible.

□ 1420

I would also point out to the Members that under the bill that comes to us from the committee, the States are going to be required to come up with substantial amounts of money in matching funds. For example, the State of California, $12,357,344. My own State of North Carolina would be required to come up with $4 million. I am going to give just rough figures here. For the State of New York, $10 million; New Jersey, $9 million; Massachusetts, $7 million, and so on, and so forth. I can at a later time put these figures in the record. For the State of Texas, it is $10,972,000. All of these are required under the bill.

The gentleman from Iowa (Mr. TAUKE) will offer a substitute that does not require these State matching funds. The program does not include all of the medicaid-like State plan requirements that are necessary and that are inconsistent with the idea that the program is a block grant program and also the idea that it is a temporary program.

So the bill that will be presented by the gentleman from Iowa is a plan that would receive Presidential signature and is far more likely to pass and to become law.

Mr. Chairman, I would urge that the Members give it favorable consideration.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. BROYHILL) has expired.

The gentleman from Indiana (Mr. JACOBS) is recognized, and he has 5 minutes remaining.

Mr. JACOBS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would first point out a misperception that has been inadvertently stated in the record. The States do not have to come up with any particular amount. Any amount the States come up with will be matched by the Federal Treasury under the scheme of this legislation.

I hear it said that under the motion to recommit or the substitute there will be more for the unemployed who really need it. That could be the case, but it does not have to be the case. It could be that there will be more for the insurance companies that do not need it.

There is nothing but a blank check in the motion to recommit. If a State legislature or a State government decided to be palsy-walsy with the insurance industry in that State, they could buy health insurance for the unemployed, and the unemployed could be one or two people, I suppose, because it is a blank check. They could buy health insurance at retail prices, profit and all, from the insurance companies.

And if Members want to talk about the States' requirement of matching funds, then I will have to ask, what ever happened to New Federalism? The last time I heard, that is what this administration wanted.

As a matter of fact, this bill was drawn to accommodate some of the statements that the President had made. It is a reasonable compromise between an entitlement program on the one hand and a blank check, block grant program on the other. It is a block grant but without the blank check.

Now, this is a serious thing. There is not anybody who does not sympathize with the unemployed from what I hear in the debate. There is not anybody who would not agree that most of the people who are unemployed in this country are certainly those who have become unemployed since the famous Laffler curve was voted into law and who have been unemployed through no fault of their own.

Everybody wants to do something for the unemployed. Yet they say, "It can't be done quite this way. It can be done maybe with a provision, a new scheme that says you can't have unemployment insurance until there is a tax increase."

And what does the President say about a tax increase? He will veto any tax increase.

So why do they not come right out and say that the thing they want to pass is an empty promise that can only take effect if there is a tax increase? And the President says we will veto any tax increase.

So what is the moral? I think the moral is that "You can't get there from here." I think that is the moral on the part of those who are proposing a substitute without substance, and their theme song ought to be "I Can't Give You Anything But Love."

Mr. Chairman, I now yield such time as may remain on the majority side to the gentleman from Pennsylvania (Mr. WALGREN).

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. WALGREN) and advises him that there are 2 minutes remaining.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. WALGREN. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, passage of this legislation is long overdue. Further delay will compound the suffering which the Nation's unemployed have experienced as a direct result of the deprivations of unemployment.

Six weeks ago, many of us joined in a special order on the House floor in which we discussed what the recession had meant in our districts. We presented a realistic, but bleak picture of the loss of savings, self-esteem, hope and, in some tragic cases, even the will to live.

The loss of employment has meant the loss of health care insurance for millions of Americans. That insurance has represented an essential protection against the real threat of financial ruin from catastrophic illness.

The Congressional Budget Office estimates that over 19 million unemployed workers and their families will be without health insurance coverage during fiscal 1984.

I represent thousands of these workers—men and women who through no fault of their own have suffered the loss of employment opportunities. In many communities on the Mesabi Iron Range in my district, unemployment exceeded 50 percent. Every county in my district has unemployment above the national average. Unemployment in Lake County has averaged 30 percent during the last year.

National economic policies have failed these people. Economic recovery is an unfilled promise.

In discussing health insurance for the unemployed, we should realize with special sensitivity, and a sense of responsibility, what the failure to enact meaningful hospital cost containment has meant for the people of this country. Without health insurance, no one dare be sick—they cannot afford to be. The fear of illness in the absence of health insurance coverage compounds the burdens of the unemployed.

We must pass H.R. 3021, it is compassionate, reasonable, fiscally responsible legislation. The bill assures the States the central role in health insurance coverage. It assigns priority in the allocation of benefits to those who have been unemployed the longest. The first budget resolution provides authority for the spending which this bill authorizes.

This legislation offers some reason for hope on the part of working men and women who have slipped from the relative prosperity of middle-level income into the hardships of prolonged unemployment. They cannot afford health insurance. They do not qualify for medicaid. They do not want welfare or charity. They want to return to work. Until they do, we should provide them with some basic level of health protection. In all seriousness, the unemployed face a far more immediate, and life-threatening threat in their unemployment and in their loss of health insurance, than they do from Soviet missiles. In fiscal 1984, we should spend a little less on defense than currently planned, and transfer the savings achieved there to fund the legislation now before us.

I urge an overwhelming House vote in favor of this legislation.

Mr. WALGREN. Mr. Chairman, I appreciate the gentleman from Indiana yielding this time to me for several thoughts and comments.

It is said that this bill would be vetoed by the President and therefore has little chance to become law. I believe that it is our obligation in this body to do what is right on issues like this regardless of what happens in the rest of the legislative process. We should have some faith that by doing right in the House of Representatives, we set in motion forces which will move the rest of society in the best way.

I think this is particularly true with this piece of legislation. Although it is just a temporary program, it is the kind of program that I would like to think our country would have in place at any time.

Those who say we should do nothing because the recession is over and new unemployment claims are falling off should be reminded that the recession is not over. There are over 150,000 people out of work in my metropolitan area alone. Moreover, it seems to me that it should not matter whether the recession is over; people who are unemployed face the same economic limits regardless of whether the unemployment rate is 4 percent, 12 percent, or in honesty what it really is, 17 to 20 percent when you count all the discouraged workers which our statistics ignore.

When employment hits a family, medical insurance is often the first thing to go. Pennsylvania recently tried to put together a special program involving Blue Cross/Blue Shield designated to provide bare bones coverage at the lowest possible price for the un-

employed. The cost was still $70 a month. We all should realize that a $70 part of a monthly budget would be one of the first things to go when unemployment strikes.

So unemployed workers will be largely uninsured from medical costs. Like the ad for preventive car maintenance, we can either pay a little to insure these costs now or we can pay more later when the families of unemployed workers go to hospital emergency rooms around the country costing our society more in the long run.

Mr. Chairman, few of us stop to realize that the taxpayer now funds over 50 percent of the Nation's hospital bills because we all agree we should provide medical services that are beyond most of our ability to pay.

But the fact is that all our constituents and everyone in this House already has the taxpayer paying half of his hospital bills. It hardly comes with good grace for all of us who receive this kind of subsidy to deny a limited system of further subsidy to continue health insurance for those unemployed by our recession.

I view today's vote on H.R. 3021, a bill which will assist the States in providing health insurance to the unemployed, as a measure of the true value of our society. The question we must ask is whether, in the wealthiest Nation in the world millions of citizens who have worked hard and saved for their futures—will either be forced to exhaust their life savings over a single illness or, more likely, go without health care for themselves and their families.

For the unemployed, loss of health insurance comes at a time when it is most needed. Stress associated with unemployment renders the jobless and their families more vulnerable to health problems. The cold statistics show that for every 1-percent increase in unemployment, there is a 2-percent increase in the mortality rate, a 2-percent increase in cardiovascular deaths, a 3-percent increase in mental hospital admissions, and a 5-percent increase in infant mortality.

It should be especially hard to accept the rise in infant mortality rates in several parts of our country, the first increase since the end of World War II. I hope we can prove ourselves a more decent society by refusing to tolerate a reversal of the progress we have made in health care this century.

To those who complain about the cost of this program, three things should be said:

First, this program is within the budget ceilings provided in the budget resolution adopted by this Congress last month—a budget that provides less deficit spending than proposed by the President.

Second, it will cost the Federal Government more in the long run if we do not pass this bill. As witnesses before our committee testified, uninsured people delay needed care hoping the condition will go away. But if it does not, their only recourse is the hospital emergency room. Surely, it is more cost effective to provide access to a private insurance policy, which requires a financial contribution from the worker, than to wait until the worker has exhausted all his assets and relies on the Government to pay the entire bill.

Third, we must realize that we already pay for health care for the unemployed. It is estimated that $30 a day out of an average hospital bill goes to pay for bills the hospitals are unable to collect.

Mr. Chairman, this bill does not provide for a new Federal entitlement program. It authorizes a limited number of dollars to the States to establish whatever program they choose. This flexibility allows for creativity and individual efforts by the States.

We should build on the efforts already started by some States, like Pennsylvania. But those are the very States hardest hit by unemployment and least able to provide the revenues to fund programs. They need Federal support.

As I indicated before, Blue Cross/Blue Shield of Pennsylvania began a health insurance program for the unemployed at rates over 40 percent lower than those otherwise available. For family coverage, the plan cost about $70 a month.

While this is a good effort, only 8,552 people have enrolled in the plan out of a potential 704,000 who are unemployed. It is understandable why most unemployed would be reluctant to spend $70 a month for health insurance because they must eliminate all avoidable expenses if they are to make ends meet. With the assistance provided for in H.R. 3210, the State can subsidize that plan in Pennsylvania so that the premium cost will be more affordable.

Finally, I want to express my disappointment that this bill provides only a temporary solution. In my view, we should use this opportunity to create a long-term program for those who become unemployed, so that each person can have access to some kind of health insurance, even if out of a job temporarily. While record-high unemployment may moderate, there still will be high unemployment pockets across the country. And we all know that business cycles repeat themselves, that unemployment rates will go up and down over the years. Just as we should have, and did enact a permanent unemployment insurance program, we should enact a permanent health insurance program for the unemployed. Their needs will not change.

Early this year I introduced legislation (H.R. 1823) to provide incentives and direction for State-administered insurance pools. It is my hope that the Congress will consider this approach when thinking about a permanent solution to the lack of available health care for the unemployed.

Enactment of this bill today, however, will do much to meet the immediate crisis we face and, although the program is not designed to continue, it will give us some experience for future Congresses to consider.

I urge adoption of this legislation.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALGREN) has expired, and all time for general debate has expired.

Pursuant to the rule, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of H.R. 3521, which shall be considered as having been read, in lieu of the amendments recommended by the Committees on Energy and Commerce, and Ways and Means now printed in the bill. No amendments are in order to the bill, or the substitute except: (First), an amendment printed in the CONGRESSIONAL RECORD of July 12, 1983, by, and if offered by Representative BLILEY, which shall not be subject to amendment except an amendment printed in the CONGRESSIONAL RECORD of July 20, 1983, by, and if offered by Representative WAXMAN; and (second), an amendment printed in the CONGRESSIONAL RECORD of July 20, 1983, by Representative FRENZEL, which shall not be subject to amendment.

The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is as follows:

Strike all after the enacting clause and insert the following:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Health Care for the Unemployed Act of 1983".

TITLE I—AMENDMENTS TO THE SOCIAL SECURITY ACT

NEW TITLE XXI (HEALTH CARE FOR THE UNEMPLOYED)

SEC. 101. (a) The Social Security Act is amended by adding at the end the following new title:

"TITLE XXI—HEALTH CARE FOR THE UNEMPLOYED

"PART A—BLOCK GRANTS TO STATES

"APPROPRIATION AND DEFINITIONS

"SEC. 2101. (a) For the purpose of enabling each State to furnish necessary medical benefits for unemployed individuals and their immediate family members, there is hereby authorized to be appropriated for fiscal years 1983, 1984, and 1985 a sum sufficient to carry out the purposes of this part. The sums made available under this section shall be used for making payments to States under allotments under section 2102 for the development and operation of plans of medical benefits for the unemployed.

"(b) As used in this part—

"(1) The term 'group health plan' has the meaning given such term in section 162(i)(2) of the Internal Revenue Code of 1954.

"(2) The term 'immediate family member' means, with respect to an individual—

"(A) in the case of a married individual, the individual's spouse, and

"(B) the individual's child, if the child is under 18 years of age.

"(3) The term 'medical benefits' means payment of part or all of the cost of the care and services described in paragraphs (1), (2), (3), (4)(C), (5), (9), and (17) of section 1905(a) (subject to subdivisions (A) and (B) thereof) and of prescribed drugs.

"(4) The term 'number of weeks of regular unemployment compensation' means, for a State for a period, the sum, for each of the weeks in the period, of the number of individuals receiving regular compensation in that week under the State's unemployment compensation.

"(5) The term 'regular compensation' has the meaning given such term in section 205(2) of the Federal-State Extended Unemployment Compensation Act of 1970.

"(6) The term 'State' includes only the 50 States and the District of Columbia.

"(7) The term 'unemployment compensation' means cash benefits payable to individuals with respect to their unemployment (A) under any State unemployment compensation law, (B) under any Federal unemployment compensation law administered by a State, or (C) under the Railroad Unemployment Insurance Act.

"ALLOTMENTS AND PAYMENTS TO STATES

"SEC. 2102. (a) There shall be available for allotments for block grants to States under this part—

"(1) $350,000,000 for fiscal year 1983,

"(2) $1,869,000,000 for fiscal year 1984, and

"(3) $1,538,000,000 for fiscal year 1985.

"(b)(1) Subject to subsection (c), the Secretary shall allot the amounts available for allotments for each fiscal year under subsection (a) among States as follows:

"(A) One-third of the amount shall be allotted among the States on the basis of the relative number of unemployed individuals in the State during the applicable period compared to the number of such unemployed individuals in all the States during such period.

"(B) One-third of the amount shall be allotted among the States on the basis of the relative number of individuals in the State who exhausted regular compensation during the applicable period compared to the number of such individuals in all the States who exhausted regular compensation during such period.

"(C) One-third of the amount shall be allotted among the States on the basis of the number of weeks of regular unemployment compensation in the State during the applicable period compared to the number of weeks of regular unemployment compensation in all the States during such period.

"(2)(A) As used in subparagraphs (A) and (C) of paragraph (1), the term 'applicable period' means—

"(i) for allotments for fiscal years 1983 and 1984, the three-month period beginning February 1983, and

"(ii) for allotments for fiscal year 1985, the three-month period beginning February 1984.

"(B) As used in subparagraph (B) of paragraph (1), the term 'applicable period' means—

"(i) for allotments for fiscal years 1983 and 1984, the period beginning May 1982 and ending April 1983, and

"(ii) for allotments for fiscal year 1985, the period beginning May 1983 and ending April 1984.

"(3) Determinations under subparagraph (A) of paragraph (1) shall be based on data of the Bureau of Labor Statistics and determinations under subparagraphs (B) and (C) of paragraph (1) shall be based on data of the Secretary of Labor.

"(c)(1) A State's allotment for fiscal year 1983 or 1984 may be carried forward and used for expenditures made under the State's plan in the following fiscal year if the State's plan remains in effect in that following fiscal year.

"(2)(A) If the chief executive officer of a State has not transmitted to the Secretary by September 15, 1983, a notice on behalf of the State of the the State's intent to establish and have in effect in the State, not later than June 30, 1984, a plan under this part, the State's allotment for 1983 shall be reduced to zero.

"(B)(i) If the chief executive officer of a State has not transmitted to the Secretary by December 15, 1983, a notice on behalf of the State of the the State's intent to establish and have in effect in the State, not later than June 30, 1984, a plan under this part, the State's allotment for 1984 shall be reduced to zero.

"(ii) A State's allotment for fiscal year 1984 shall be reduced by one-quarter for each calendar quarter (after the first calendar quarter) in which the State does not have a plan approved and in effect under this part and shall be reduced to zero if the State does not have such a plan approved and in effect by June 30, 1984.

"(C) A State's allotment for fiscal year 1985 shall be reduced to zero if the State does not have a plan approved and in effect under this part by June 30, 1984, and on October 1, 1984.

"(D) If a State has not submitted a report on its activities under its plan in accordance with section 2105(a) by February 1, 1985, the State's allotment for fiscal year 1985 shall be reduced by one-quarter.

"(3) To the extent that the total amount available for allotments under this part for a fiscal year is not otherwise allotted to States due to a reduction under paragraph (2) or because some States have indicated in their reports to the Secretary under section 2103(a)(6) that they do not intend to use the full amount of such allotments (including any reallotment under this paragraph) or to carry forward excess amounts under paragraph (1), such excess shall be allotted among the remaining States in proportion to the amount otherwise allotted to such States for the fiscal year without regard to this paragraph.

"(d)(1)(A) From the sums appropriated therefor and the allotments available under this section and subject to the succeeding paragraphs of this subsection, the Secretary shall make payments as provided by section 6503(a) of title 31, United States Code, to each State from its allotment.

"(B) Any amount paid to a State for fiscal year 1983 or 1984 and remaining unobligated at the end of such year shall remain available to such State for obligation in the succeeding fiscal year if the State has in effect a plan under this part during that succeeding fiscal year.

"(2)(A) Except as provided in subparagraph (B), the Secretary may not make payments to a State under paragraph (1) for a fiscal year unless—

"(i) the State has a plan approved and in effect under this part,

"(ii) the State has made assurances satisfactory to the Secretary that the State will provide for any State contribution required under section 2103(f) towards expenditures under the plan for that fiscal year, and

"(iii) the State has provided for (or made arrangements satisfactory to the Secretary for the provision of) any such State contribution for any previous fiscal year.

"(B) With respect to payments from the allotment for fiscal year 1983, the Secretary may make payment to a State without a plan under this part, except that such payment may not exceed 10 percent of the State's allotment for that year and may only be paid for expenses incurred in the planning and development of such a plan.

"(3) The Secretary shall provide for such reconciliations (not less frequently than annually) of the amount of the payments made to States as may be necessary to insure that such payments are only used in accordance with this part and that States contribute the required share towards expenditures under the plans under this part. Amounts improperly paid shall be treated as overpayments, and the Secretary may offset such amounts from subsequent allotments under this part or may otherwise recover such amounts.

"(4) As a condition of payment to the State under this part, the State must provide assurances satisfactory to the Secretary that each group health plan offered by the State, by any political subdivision thereof, or by any agency or instrumentality of the State or a political subdivision thereof, meets the requirements of part B as they would apply if section 2125(1)(A) did not apply with respect to that State, subdivision, agency, or instrumentality. If the Secretary, after reasonable notice and opportunity for a hearing to a State, finds that it or any of its political subdivisions, or any agency or instrumentality of the State or its political subdivisions, has failed to comply with the previous sentence, the Secretary shall terminate payments to such State under this part and notify the chief executive officer of such State that further payments under this part will not be made to the State until the Secretary is satisfied that there will no longer be any such failure to comply.

"STATE PLANS FOR MEDICAL BENEFITS FOR THE UNEMPLOYED

"SEC. 2103. (a) IN GENERAL.—Except as provided in section 2104, a State plan for medical benefits for the unemployed must—

"(1) provide for making medical benefits (as defined in section 2101(b)(3)) available to eligible individuals voluntarily enrolled under the plan for services consistent with subsection (c);

"(2) provide for making medical benefits available for such amount, duration, and scope of services (within those described in section 2101(b)(3)) as the State plan may specify consistent with subsection (d);

"(3) provide for the imposition of premiums, enrollment fees, and similar charges, and for deductions, cost sharing, and similar charges only in accordance with subsection (e);

"(4) provide for financial participation by the State in a manner consistent with subsection (f);

"(5) provide for administration of the plan and expenditures under the plan in accordance with subsection (g);

"(6) provide for reports and audits and nondiscriminatory practices in accordance with section 2105 and for periodic reports to the Secretary on the portions of the allotment to the State for each fiscal year which the State intends to use and the portions of such allotment which may be reallotted among the other States under section 2102(c)(3);

"(7) provide that—

"(A) the amount of payment to persons providing services covered under the plan may not exceed the amount of such payment that is provided for such services under the State's plan under title XIX, and

"(B) each such person must agree to comply with the conditions of subsection (e) respecting limitations on the charges that may be imposed on beneficiaries for receipt of covered services (and the provisions of section 1916(c) shall apply to such providers in the same manner as they apply to providers under a State plan under title XIX);

"(8) provide that the plan—

"(A) shall be secondary in payment to any insurance or benefit plan (including a group health plan, the insurance programs or a State plan under titles XVIII and XIX of this Act, an automobile or liability insurance plan, and no fault insurance) which provides medical benefits, and

"(B) shall require each individual enrolled in the plan, as a condition of enrolling in the plan, to assign to the State all rights to payments, under a plan described in subparagraph (A), to which the individual may be entitled;

"(9) provide that in the case of an individual enrolling for benefits under the plan who is not receiving unemployment compensation, the State will take reasonable steps to determine the eligibility under section 1902(a)(10)(A) of the individual for assistance under the State plan approved under title XIX; and

"(10) meet the requirements specified in paragraphs (1), (3), (7), (8), (9), (22)(B), (22)(D), (23), (27), (33)(A), and (33)(B) of section 1902(a) in the same manner as such requirements apply to State plans under title XIX.

"(b) APPROVAL AND DISAPPROVAL OF PLANS.—(1) The Secretary shall approve any plan which fulfills the conditions specified in subsection (a), except that he shall not approve any plan which imposes as a condition for eligibility for medical benefits under the plan any citizenship requirement which excludes any citizen of the United States or any residence requirement which excludes any individual who resides in the State.

"(2) The Secretary shall disapprove, or withdraw the approval of, any plan of a State under this part if the Secretary determines that—

"(A) the State provided for eligibility, under its plan under section 402 as of June 1, 1983, of dependent children described in section 407 (relating to dependent children of unemployed parents) and, after such date, discontinues coverage of such children under such plan;

"(B) the State provided for eligibility, under its plan under title XIX as of June 1, 1983, of individuals who are receiving, are eligible to receive, or could be eligible to receive (if coverage under its plan under title IV was as broad as allowed under Federal law) aid pursuant to the operation of section 407 (relating to dependent children of unemployed parents) or who are described in section 1905(a)(i) (but not in section 1902(a)(10)(A)(i)), and, after such date, discontinues or reduces the terms of eligibility of such individuals under such plan; or

"(C) the State has made other significant reductions in eligibility or benefits under its plan under title XIX in order to establish or operate a plan under this part.

"(3) Nothing in this section shall be construed as preventing a State from terminating its plan under this part and establishing a date after which the State is no longer obligated for expenses for medical benefits incurred under the plan.

"(4) Sections 1116 and 1904 shall apply to plans approved under this part in the same manner as they apply to plans approved under title XIX, except that any reference to the provisions of section 1902 or 1904 in those sections shall be deemed for this purpose to be a reference to the provisions of this section or this paragraph, respectively.

"(c) ELIGIBILITY FOR MEDICAL BENEFITS.—(1) Each State plan shall specify the criteria (consistent with this subsection) for determining those individuals who are eligible for medical benefits under the plan, which criteria shall be applied uniformly. Each individual who meets such criteria shall be eligible to enroll for medical benefits under the plan.

"(2) Except as provided in paragraphs (3) and (4), an individual may not be eligible for medical benefits under a State plan unless the individual is unemployed and—

"(A) is receiving unemployment compensation or received unemployment compensation for a week in the previous 104-week period, or

"(B) subject to paragraph (5)—

"(i) has been previously employed (as determined under the plan), and

"(ii) meets such reasonable financial or medical needs standards as the State plan specifies.

The State plan shall provide for standards respecting the circumstances under which an individual is considered 'employed' and 'unemployed' for purposes of the plan and the State plan may not make, as a condition of eligibility of any individual under subparagraph (A), any determination respecting the income or assets of any individual.

"(3)(A) Except as provided in paragraph (4), for any period in which an individual is entitled to medical benefits under the plan, the individual's immediate family members (as defined in section 2101(b)(2)) also shall be entitled to medical benefits under the plan.

"(B) In the case of an individual who is eligible and enrolled for medical benefits under a State plan, the plan may continue the individual's eligibility during a period (of not longer than four weeks) specified in the State plan during which the individual is reemployed.

"(4)(A) Except as provided in subparagraph (B), the State plan shall specify the uniform minimum length of time an individual must have been previously unemployed in order to be eligible for medical benefits under paragraph (2)(A).

"(B)(i) Subject to clause (ii), a State plan may provide for a minimum length of period of unemployment which is less than that specified in subparagraph (A), but only with respect to providing eligibility for pregnant women, children under 5 years of age at the time of initial eligibility under the plan, and, at the State's option, immediate family members of such individuals.

"(ii) A State plan may provide for a period under clause (i) of—

"(I) less than 1 year (but greater than 6 months), only if the period described in subparagraph (A) is no greater than 1 year, or

"(II) less than 6 months, only if the period described in subparagraph (A) is no greater than 6 months.

"(5) A State plan must be reasonably designed so as to provide an amount of medical benefits in any fiscal year to individuals made eligible under paragraph (2)(B) (and their immediate family members) which is not less than 5 percent of the amount of the Federal payments to the State under section 2102(d) for that year and is not greater than the sum of—

"(A) 5 percent of the amount of the Federal payments to the State under section 2102(d) for that year, and

"(B) the amount (if any) by which the total amount of the expenditures under the plan for the year exceeds the sum of (i) the amount of the Federal payments to the State under section 2102(d) for that year and (ii) the amount of premiums collected under the plan for the year.

"(6) A State plan may not permit an individual to be eligible for medical benefits under paragraph (2) for a week if the individual—

"(A) is covered (or could have been covered, if an election had been made and any premiums required paid on a timely basis) for the week under a group health plan for which a contribution towards the cost of the plan is being made by an employer, union, or entity other than the individual or the individual's spouse;

"(B) is (or could be, if an enrollment after the date of the enactment of this part had been made and any premiums required paid on a timely basis after the individual became unemployed) covered for the week under a group health plan for the individual's spouse for which a contribution towards the cost of the plan is being made by an employer, union, or entity other than the individual or the individual's spouse; or

"(C) is determined to be eligible for the week for assistance under the State plan under title XIX.

"(7) If a State changes the criteria for eligibility of individuals under the plan, such changes must be made public and made in a manner consistent with the State administrative procedures act or other applicable State law. A State may provide that in the case of such a change that would have the effect of disqualifying individuals who are eligible and enrolled for medical benefits under the plan, the State may provide for continuation of eligibility of the individuals for a reasonable period of time or based on such reasonable standards as the State may establish, but not beyond the period of time which they would otherwise have remained eligible.

"(8) The State plan may limit the coverage period of eligible individuals under the plan to a period specified in the plan, but such period may not be less than one year in the case of individuals eligible under paragraph (2)(A).

"(9) A State plan must permit an eligible individual to terminate voluntarily enrollment under the plan by written notice to the State.

"(d) MEDICAL BENEFITS.—(1) A State plan must provide medical benefits for—

"(A) prenatal, delivery, post-partum, and well-baby care, without limitations of amount, duration, or scope except as to medical necessity;

"(B) at least the first day of inpatient hospital care in the coverage period for each eligible individual; and

"(C) at least some ambulatory services.

"(2) The scope, amount, and duration of medical benefits provided under the plan must be the same for all individuals eligible for medical benefits under the plan, except that the coverage period of individuals eligible under subsection (c)(2)(A) may differ from the coverage period for individuals eligible under subsection (c)(2)(B).

"(3) A State plan may not provide for medical benefits for expenses incurred for services furnished before the date the plan first becomes effective or after October 1, 1985.

"(e) PREMIUMS AND COPAYMENTS.—(1)(A) A State plan may impose a weekly premium for an individual who is eligible under subsection (c)(2)(A), is receiving unemployment compensation, and is voluntarily enrolled in the plan in an amount equal to not more than 5 percent of the amount of the unemployment compensation, if any, which is payable to the enrollee for the week (determined without regard to any deductions or offsets actually taken thereon). The State may provide for the deduction of the amount of such a premium from the amount of such compensation paid to the enrollee.

"(B) A State plan may impose a premium for an individual who is eligible under subsection (c)(2)(A), is not receiving unemployment compensation, and is voluntarily enrolled in the plan in an amount equal to not more than 2 percent (or, if less, the percentage applicable under subparagraph (A) to individuals described in that paragraph) of the average monthly benefit amount in the State for unemployment compensation under State law (based on the most recent data available).

"(C) A State plan may not impose any premium, enrollment fee, or similar charge except as provided in this paragraph. If a State plan imposes a premium upon the enrollment of an eligible individual under the plan, the plan may not deem or otherwise treat the individual as being enrolled without the individual voluntarily enrolling under the plan.

"(D)(i) Except as provided under clause (ii), the applicable percentage selected under subparagraph (A) or subparagraph (B) shall be uniform within the groups of individuals described in each of such subparagraphs.

"(ii) A State plan may provide standards whereby the premiums otherwise established under the plan are waived in the case of financial hardship or other good cause established by the State.

"(E) Premiums collected under a State plan must be used for the purpose of carrying out the plan and may be used, to the extent permitted under subsection (f)(4)(B), toward the State contribution for expenditures under the plan.

"(2)(A) A State plan under this part shall provide for the imposition, to the extent permitted under paragraphs (2) and (3) of section 1916 with respect to individuals eligible for medical assistance under State plans under title XIX, of—

"(i) a deductible, for the first day of inpatient hospital services furnished to an individual under the plan under this part, in an amount equal to at least 10 percent of the estimated average payment in the previous year for a day of inpatient hospital services under the State's plan under title XIX, and

"(ii) deductions, cost sharing, and similar charges for other services in the maximum amounts permitted pursuant to such paragraphs for such individuals for such services.

"(B)(i) Except as provided under clause (ii), the deductions, cost sharing, and any similar charges imposed under this paragraph shall be imposed uniformly for all individuals eligible for medical benefits under the plan.

"(ii) A State plan may provide standards whereby the deductions, cost sharing, and any similar charges imposed under this paragraph are waived in the case of financial hardship or other good cause established by the State.

"(f) STATE CONTRIBUTIONS.—(1) The State plan must provide for a State contribution towards expenditures under the plan in accordance with this subsection.

"(2) With respect to expenditures under the plan for which amounts may be paid from allotments for 1983, the State is not required to make any State contribution.

"(3) With respect to expenditures under the plan for which amounts may be paid from allotments for fiscal year 1984 or 1985, if the State has a State unemployment rate for the fiscal year equal to—

"(A) 10 percent or more and such rate is—

"(i) equal to or greater than 133⅓ percent of the national average total unemployment rate for that year, the State is not required to make any State contribution, or

"(ii) less than 133⅓ percent of the national average total unemployment rate for that year, the State's contribution must be equal to at least 5 percent of the sum of the minimum State contribution computed under this clause and the amount of the Federal allotment paid the State under this part for that year;

"(B) less than 10 percent, but more than 6 percent, the State's contribution must be equal to at least a percentage of the sum of the minimum State contribution computed under this subparagraph and the amount of the Federal allotment paid to the State under this part for that year, such percentage equal to 20 percent minus the product of 15 percent and the ratio of (i) the percent difference between the State unemployment rate for that year and 6 percent, to (ii) 4 percent; or

"(C) 6 percent or less, the State's contribution must be equal to at least 20 percent of the sum of the minimum State contribution computed under this subparagraph and the amount of the Federal allotment paid to the State under this part for that year.

As used in this paragraph, the term 'State unemployment rate' means for a fiscal year for a State the average of the monthly civilian labor force unemployment rates in that State (as determined and published on a nonpreliminary basis by the Bureau of Labor Statistics) for the most recent 3-month period for which data are available before the beginning of the fiscal year.

"(4)(A) Except as provided in subparagraph (B), the State plan must provide for financial participation by the State in an amount not less than the State contribution required under this subsection.

"(B) A State may use premiums collected under the plan toward its State contribution required under this subsection, but such premiums may not be used to offset more than 50 percent of the State's required contribution with respect to any fiscal year.

"(g) ADMINISTRATION OF PLAN.—(1) The State plan must provide that not more than 10 percent of the expenditures under the plan for any fiscal year are for expenses for administering the plan, except that this restriction shall not apply to 10 percent of the allotment to the State for fiscal year 1983.

"(2) A State may elect to provide for the administration of part or all of its plan under this part by the single State agency (and in accordance with its plan approved) under title XIX. In such case, the State shall provide the Secretary with such information as may be reasonably necessary to identify or otherwise compute the costs of administration under title XIX which are attributable to the administration of this part and which are to be reimbursed from amounts paid the State under this part.

"(3) If the State plan provides for any administrative functions under the plan to be performed by or through the State agency administering the State's unemployment compensation law, the State plan must make appropriate arrangements to reimburse such agency (and, to the extent the Railroad Retirement Board performs similar functions pursuant to section 2105(c), to make appropriate and similar arrangements to reimburse the Board) for its reasonable expenses of performing such functions under the plan.

"ALTERNATIVE STATE ARRANGEMENTS

"SEC. 2104. (a)(1) A State plan under this part may provide an enrollee with the voluntary option of electing to receive medical benefits through an arrangement with a health benefits plan (including a private insurer, prepaid health plan, provider, or a provider group), rather than in accordance with section 2103, if—

"(A) the scope, amount, and duration of benefits made available under the arrangement are at least equal to the scope, amount, and duration of benefits otherwise provided under the plan;

"(B) with respect to services covered under the State plan, any premiums and charges provided under the arrangement do not exceed the premiums and charges permitted under section 2103(e); and

"(C) under the arrangement, the amount of payment under the plan may not exceed the actuarial value of payments for medical benefits which the State reasonably estimates would otherwise have been made under the plan.

"(2) The State may provide that an enrollee who has exercised an election under this subsection may not terminate or modify such an election (other than for cause) for a period of up to 6 months beginning with the first month in which the election takes effect.

"(b)(1) A State plan under this part may provide an eligible individual enrolled with the State under this part with the voluntary option of electing, in lieu of otherwise receiving medical benefits under the plan, of having the State make a cash payment (in the amount determined under paragraph (2)(A)) toward the premium or similar charge of enrolling the individual (and immediate family members) in a health insurance or benefits plan described in paragraph (3).

"(2) In the case of an individual making an election under this subsection—

"(A) the amount of the cash payment by the State toward the cost of the plan shall not exceed the actuarial value of payments for medical benefits which the State reasonably estimates would otherwise have been made under the plan, and

"(B) the State plan may provide that the individual may not terminate or modify such an election (other than for cause) for a period of up to 6 months beginning with the

first month in which the election takes effect.

"(3) A health insurance or benefits plan (including a private insurer, prepaid health plan, provider, or a provider group), in order to be eligible under a State plan under this subsection must make an arrangement suitable to the State under which it provides to each individual, before the individual is enrolled with the plan under this subsection, a written description of the benefits, charges, and costs under the plan. The benefits provided under such a plan and the premiums and other charges imposed under the plan need not comply with the provisions of subsections (d) and (e) of section 2103.

"(c) A State plan may provide for an arrangement with one or more private health benefits plans under which health insurance or health benefits are made available in accordance with the plan and section 2103 for all individuals in the State eligible under the plan.

"REPORTS, AUDITS, AND MISCELLANEOUS PROVISIONS

"SEC. 2105. (a) Each State shall prepare and submit not later than February 1, 1985, to the Secretary and each House of Congress (in such form and manner as the Secretary determines, after consultation with the States and the Comptroller General, to be appropriate) a report on its activities through fiscal year 1984 under its plan. Such report shall include, among other items, a description of—

"(1) the criteria for eligibility of individuals under the plan and the number of individuals enrolled for benefits through the period under the plan, and

"(2) the medical benefits made available under the plan, the total amount of expenditures made under the plan through the period, the portion of such expenditures spent on inpatient and ambulatory services, and amount of expenditures under the plan per enrollee through the period.

"(b)(1) The provisions of sections 506 (other than subsection (a)) and 508 of this Act (relating to audits and access to information and nondiscrimination under the maternal and child health services block grant) shall apply to expenditures and activities under this part in the same manner as those provisions apply to expenditures and activities under title V; and for this purpose any reference to that title in any of those sections shall be deemed a reference to this part.

"(2) The provisions of section 1909 shall apply to State plans under this part in the same manner as they apply to State plans under title XIX.

"(3) A waiver granted a State under section 1115 or 1915(b), as such waiver applies to the requirements of a State plan approved under title XIX, shall be considered to be approved as a waiver of the corresponding requirements of this part.

"(4) A State plan approved under this part shall be treated as a State plan approved under title XIX for purposes of applying section 1307(d) of the Public Health Service Act.

"(5) The provisions of section 1128A shall apply to payments made from an allotment to a State under this part in the same manner as they apply to payments made from an allotment to a State under title V, and any reference to a State agency under such section shall be deemed for this purpose to be a reference to any agency or entity administering part or all of the State plan under this part.

"(c)(1) If, in a State, the State agency administering the State's unemployment compensation law is responsible for collection of weekly premiums under section 2103(e) with respect to individuals receiving unemployment compensation under that law, the Railroad Retirement Board shall be responsible for the collection of weekly premiums under such section with respect to individuals receiving unemployment compensation under the Railroad Unemployment Insurance Act and residing in that State.

"(2) In the case of other functions which a State agency administering the State's unemployment compensation law is required to perform under the State plan with respect to individuals receiving unemployment compensation under that law, the Railroad Retirement Board shall, to the extent feasible, perform such functions with respect to individuals receiving unemployment compensation under the Railroad Unemployment Insurance Act and residing in that State.

"(d) The Secretary may not delegate to the States his authority under this part to establish standards for the approval of State plans, to determine the acceptability of such plans, or to make other determinations required to be made by the Secretary under this part (including the specification of information to be contained in the report described in subsection (a)).

"PART B—OPEN ENROLLMENT, CONTINUATION, AND CONVERSION RIGHTS OF INDIVIDUALS

"REQUIREMENTS FOR EMPLOYEE HEALTH BENEFITS PLANS

"SEC. 2121. (a) Any group health plan offered by a large employer (as defined in section 2125(1)(B)) to employees shall meet the requirements of sections 2122 and 2123 and, if applicable, section 2124.

"(b) The Secretary, after consultation with the Secretary of the Treasury, shall promulgate such regulations as may be necessary to carry out this part.

"(c)(1) The requirements of this part shall not be construed as preventing employers (under collective bargaining agreements or otherwise) from providing additional or other health care benefits respecting employees or former employees.

"(2) The requirements of this part shall not apply to employees covered under collective-bargaining agreements entered into before the date of the enactment of this title during the period covered by such agreements (as in effect on such date).

"(d)(1)(A) For an excise tax on the expenses incurred by large employers for group health plans failing to meet the requirements of this part, see section 4912 of the Internal Revenue Code of 1954.

"(B) A person (including a class of individuals) or State which is adversely affected by the failure of a group health plan offered by a large employer to comply with the requirements of this part may bring an action in the appropriate district court of the United States seeking such injunctive relief as may be appropriate in order to assure such compliance and to remedy any failure previously to comply with such requirements. In any action under this subparagraph, the court, in its discretion, may allow the prevailing party a reasonable attorney's fee as part of the costs.

"(2) For a requirement that the group health plans of each State, and political subdivisions thereof, comply with the requirements of this part as a condition of payment of block grants to the State under part A, see section 2102(d)(4).

"REQUIRING OPEN ENROLLMENT FOR SPOUSES OF UNEMPLOYED WORKERS

"SEC. 2122. (a) A group health plan meets the requirement of this section only if it provides for an open enrollment period of at least 30 days duration for each married employee who is (or at a previous time was) eligible to enroll or is enrolled under the plan and whose spouse loses coverage under a group health plan due to the involuntary layoff or involuntary separation (other than for cause) from the spouse's employment. For purposes of this preceding sentence, a spouse shall not be considered to have lost coverage during any period (after the involuntary layoff or separation from employment) in which such coverage is continued and for which a contribution toward the cost of the coverage is being made by an employer, union, or entity other than the spouse.

"(b) The terms of an enrollment during a period provided under subsection (a) shall be the same as the terms (including any option for coverage of immediate family members) most recently offered with respect to the enrollment of that employee or (at the employer's option) to newly hired or other employees similarly situated, except that such enrollment may not require or discriminate on the basis of lack of evidence of insurability and if the employee was previously covered and only exercises the option to cover immediate family members the coverage of such immediate family members shall begin on the date the option is exercised.

"(c) The requirements of this section shall apply to individuals whose spouses lose coverage under a group health plan on or after January 1, 1984.

"REQUIRING CONTINUATION OF GROUP HEALTH CARE COVERAGE FOR UNEMPLOYED WORKERS

"SEC. 2123. (a) A group health plan meets the requirements of this section only if an employee covered under the plan who would otherwise lose such coverage as a result of the individual's involuntary layoff or involuntary separation (other than for cause) from employment, is provided continuation of such coverage under a group health plan meeting the requirements of subsection (b) for a period of not less than 90 days following the date of the individual's involuntary separation or layoff (except as provided in subsection (c)). If at the time of the individual's layoff or separation some or all of the individual's immediate family members also were covered under the group health plan, the health benefits coverage under this subparagraph also must cover such immediate family members, unless the individual elects otherwise.

"(b) In the case of continuation of coverage of health care benefits under subsection (a) under a group health plan—

"(1) the continued health care benefits must not be less, in amount, duration, or scope of benefits, than either the benefits provided under such group health plan or ten physician visits and nine days of inpatient hospital services in any calendar year, whichever particular benefits are less, and

"(2) the employer must provide for a contribution toward the cost of such continued health care benefits for an individual (and immediate family members) which is not less, in proportion to the cost of such continued benefits, than the proportional contribution the employer makes toward the cost of the group health plan for employees in the same classification as the individual involved.

"(c) Subsection (a) shall not be construed as requiring continuation of coverage with respect to a former employee after the date—

"(1) the individual provides written notice to the employer of his intention not to accept or continue such coverage,

"(2) the individual has been reemployed for a period of 4 consecutive weeks, or

"(3) the individual has failed to provide for timely payments of any premiums required.

"(d) For purposes of this section and section 2124, the term 'employee' does not include a temporary employee (as defined by the Secretary).

"(e) The requirements of this section shall apply to individuals who are involuntarily laid-off or separated from employment on or after January 1, 1985.

"REQUIRING UNEMPLOYED WORKERS COVERED UNDER INSURED GROUP HEALTH PLANS TO HAVE THE RIGHT TO CONVERT TO INDIVIDUAL POLICIES

"SEC. 2124. (a) An insured group health plan meets the requirement of this section only if an employee covered under the plan is permitted the option, during the period described in subsection (b), of securing health benefits coverage, without evidence of insurability of the individual or immediate family members, where the loss of coverage under the group health plan is the result of the individual's involuntary layoff or involuntary separation (other than for cause) from employment. If at the time of the individual's layoff or separation some or all of the individual's immediate family members also were covered under the group health plan, the individual must be given the option of securing health benefits coverage under this subsection that also covers immediate family members.

"(b) The period referred to in subsection (a) for a former employee is the 31-day period beginning on the date of the individual's layoff or separation from employment, or, at the option of the individual, beginning on the last day of any continuation of health benefits coverage under the group health plan or under section 2123.

"(c) The requirements of this section shall apply to individuals involuntarily laid-off or separated on or after January 1, 1985.

"DEFINITIONS

"SEC. 2125. As used in this part:

"(1)(A) The term 'employer' does not include the Government of the United States, the government of the District of Columbia or any territory or possession of the United States, a State or any political subdivision thereof, or any agency or instrumentality (including the United States Postal Service and Postal Rate Commission) of any of the foregoing, except that such term includes nonappropriated fund instrumentalities of the Government of the United States.

"(B) The term 'large employer' means an employer who, on each of some 20 days during the calendar year or the preceding calendar year, each day being in a different calendar week, employed for some portion of the day (whether or not at the same moment of time) 25 or more individuals.

"(2) The term 'group health plan' has the meaning given such term in section 162(i)(2) of the Internal Revenue Code of 1954.

"(3) The term 'insured group health plan' means a group health plan under which an entity, which is subject to the insurance laws or regulations of a State or to the laws of a State respecting hospital, medical, or dental service corporations, assumes the financial risk for paying benefits under the plan in exchange for payment of premiums under the plan.

"(4) The term 'immediate family member' means, with respect to an individual—

"(A) in the case of a married individual, the individual's spouse, and

"(B) the individual's child, if the child is under 18 years of age.

"PART C—ASSISTANCE TO HOSPITALS SERVING THE UNEMPLOYED

"GRANTS

"SEC. 2141. (a)(1) The Secretary shall make grants to hospitals meeting the requirements of subsection (b) to assist the hospitals in providing services to persons unable to pay for such services.

"(2) In making such grants, the Secretary shall—

"(A) first give priority to hospitals which are either (i) public hospitals (or hospitals operated by a public benefit corporation) or (ii) hospitals serving areas not served by a public hospital, and

"(B) then give priority to other hospitals which demonstrate that they serve a significantly disproportionate number of patients who are unemployed and who are unable to pay for hospital services.

"(b) A hospital is not eligible for a grant under this section unless the hospital—

"(1)(A) is located in an area experiencing high unemployment (as determined by the Secretary), or (B) serves primarily medically underserved populations (as defined in section 330(b)(3) of the Public Health Service Act);

"(2) serves a significantly disproportionate number of patients who have low income and who are unable to pay for hospital services;

"(3) provides services to persons without regard to their ability to pay;

"(4) provides evidence, satisfactory to the Secretary, that if the hospital is required, pursuant to an assurance under title VI or XVI of the Public Health Service Act, to make available a reasonable volume of services to persons unable to pay therefor, the hospital has made (and is making) such a volume of services available for the period for which the assistance is sought; and

"(5) offers assurances satisfactory to the Secretary that it will use the sums provided in the grant in addition to, rather than in lieu of, existing Federal, State, and local funds currently available for the purposes described in subsection (a).

"(c)(1) No grant may be made under this section unless an application therefor is submitted to, and approved by, the Secretary. Such an application shall be submitted in such form and manner and contain such information as the Secretary shall prescribe.

"(2) The amount of any grant under this section shall be determined by the Secretary.

"(d) The Secretary shall report to the Congress not later than March 31, 1985, and March 31, 1986, on the identity and location of hospitals provided assistance under this section and an estimate of the change in the number of individuals who are unable to pay for services and who were provided services in each of such hospitals receiving such assistance compared to the number of such individuals in the previous period.

"(e) For the purpose of making grants under this part, there are authorized to be appropriated—

"(1) for fiscal year 1984, $96,000,000,

"(2) for fiscal year 1985, $77,000,000, and

"(3) for fiscal year 1986, $60,000,000.".

(b) Part A of title XXI of the Social Security Act (as added by subsection (a))—

(1) is effective for calendar quarters beginning on or after July 1, 1983, and

(2) is repealed, effective for services furnished on or after October 1, 1985.

(c)(1) The Secretary of Health and Human Services shall cause to be published in the Federal Register a notice of the interim final regulations required to carry out part A of title XXI of the Social Security Act no later than September 15, 1983, and allow for a subsequent period of public comment thereon.

(2) The regulations with respect to part A of such title shall become effective on September 15, 1983, without the necessity for consideration of comments received, but the Secretary, after taking into consideration any such comments received respecting such part, shall by notice published in the Federal Register affirm or modify the regulations by December 31, 1983. Any such modification of such regulations shall apply only for quarters beginning on or after April 1, 1984.

(3) The Secretary of Health and Human Services, after consultation with the Secretary of the Treasury, shall prescribe on a timely basis such regulations as may be necessary to implement the requirements of part B of title XXI of the Social Security Act in accordance with the effective dates contained in that part.

MISCELLANEOUS AMENDMENTS

SEC. 102. (a) Section 501(a) of the Social Security Act is amended by striking out "fiscal year 1982" and inserting in lieu thereof "fiscal years 1982 and 1983 and $483,000,000 for fiscal year 1984".

(b) Effective beginning with fiscal year 1984, paragraphs (1) through (5) of section 1108(c) of the Social Security Act (42 U.S.C. 1308(c)) are amended to read as follows:

"(1) Puerto Rico shall not exceed $77,100,000,

"(2) the Virgin Islands shall not exceed $2,600,000,

"(3) Guam shall not exceed $2,400,000,

"(4) the Northern Mariana Islands shall not exceed $600,000, and

"(5) American Samoa shall not exceed $1,300,000.".

(c)(1) Section 1866(a)(1)(F) of the Social Security Act is amended by inserting "with a professional standards review organization (if there is such an organization in existence in the area in which the hospital is located as of July 1, 1983) or" before "a utilization and quality control".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1984.

TITLE II—INTERNAL REVENUE CODE AMENDMENT AND MISCELLANEOUS PROVISION

IMPOSITION OF EXCISE TAX ON CERTAIN HEALTH PLANS OF LARGE EMPLOYERS

SEC. 201. (a) Chapter 41 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subchapter:

"Subchapter B—Health Plans of Large Employers Which Do Not Meet Coverage Requirements for the Unemployed

"Sec. 4912. Tax on expenses of health plans of large employers which do not meet coverage requirements for the unemployed.

"SEC. 4912. TAX ON EXPENSES OF HEALTH PLANS OF LARGE EMPLOYERS WHICH DO NOT MEET COVERAGE REQUIREMENTS FOR THE UNEMPLOYED.

"(a) TAX IMPOSED.—In the case of a large employer, there is hereby imposed a tax equal to 10 percent of the amount of the nonqualified employee health expenses paid or incurred during the taxable year.

"(b) LARGE EMPLOYER.—For purposes of this section, the term 'large employer' has the meaning given to such term by section 2125(1) of the Social Security Act (as in effect on the day after the date of the enactment of this section).

"(c) NONQUALIFIED EMPLOYEE HEALTH EXPENSES.—For purposes of this section—

"(1) IN GENERAL.—The term 'nonqualified employee health expenses' means the expenses paid or incurred by the employer for a group health plan to the extent such expenses are allocable to a period during which such plan does not meet each requirement contained in part B of title XXI of the Social Security Act (as in effect on the day after the date of the enactment of this section) which under such part such plan is required to meet.

"(2) GROUP HEALTH PLAN.—The term 'group health plan' has the meaning given to such term by section 162(i)(2).

"(d) TERMINATION.—Subsection (a) shall not apply to amounts paid or incurred after December 31, 1986.

"(e) CROSS REFERENCES.—

"(1) For provision denying deduction for tax imposed by this section, see section 275(a)(6).

"(2) For provisions making deficiency procedures applicable to tax imposed by this section, see section 6211 et seq."

(b)(1) Chapter 41 of such Code is amended by striking out the chapter heading and inserting in lieu thereof the following:

"CHAPTER 41—PUBLIC CHARITIES; CERTAIN HEALTH PLANS OF LARGE EMPLOYERS

"SUBCHAPTER A. Public charities.

"SUBCHAPTER B. Health plans of large employers which do not meet coverage requirements for the unemployed.

"Subchapter A—Public Charities".

(2) The table of chapters for subtitle D of such Code is amended by striking out the item relating to chapter 41 and inserting in lieu thereof the following:

"CHAPTER 41. Public charities; certain health plans of large employers."

(3) Subparagraph (B) of section 6104(c)(1) of such Code is amended by striking out "or chapter 41 or 42" and inserting in lieu thereof ", subchapter A of chapter 41, or chapter 42".

(c) The amendments made by this section shall apply to amounts paid or incurred after December 31, 1983, in taxable years ending after such date.

MEDICARE HOSPICE AMENDMENT

SEC. 202. Section 1814(i)(2) of the Social Security Act is amended—

(1) striking out "located in a region (as defined by the Secretary)" and "for the region" in subparagraph (A), and

(2) by amending subparagraph (B) to read as follows:

"(B) For purposes of subparagraph (A), the 'cap amount' for a year is $6,500, increased or decreased, for accounting years that end after October 1, 1984, by the same percentage as the percentage increase or decrease, respectively, in the medical care expenditure category of the consumer price index for all urban consumers (United States city average), published by the Bureau of Labor Statistics, from March 1984 to the fifth month of the accounting year.".

The CHAIRMAN. Are there any amendments?

If not, the question is on the amendment in the nature of a substitute.

The amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

□ 1430

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DURBIN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3021) to amend the Social Security Act to provide for a program of grants to States to provide health care benefits for the unemployed, and for other purposes, pursuant to House Resolution 276, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. TAUKE

Mr. TAUKE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. TAUKE. Yes, I am in its current form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. TAUKE moves to recommit the bill, H.R. 3021, to the Committee on Energy and Commerce with instructions to report the same to the House forthwith with the following amendments (page and line numbers refer to the amendment in the nature of a substitute, text of H.R. 3521, previously agreed to):

Page 2, strike out line 4 and all that follows through page 29, line 15, and insert in lieu thereof the following:

"AUTHORIZATION OF APPROPRIATION

"SEC. 2101. (a) For the purpose of making allotments to States under section 2102, there are authorized to be appropriated for—

"(1) fiscal year 1984, $900,000,000, and

"(2) fiscal year 1985, $900,000,000,

to carry out this part for that fiscal year.

"ALLOTMENTS

"SEC. 2102. (a)(1) The Secretary shall allot the amounts appropriated for allotments under section 2101 for fiscal years 1984 and 1985 among the States as follows:

"(A) One-third of the amount shall be allotted among the States on the basis of the relative number of unemployed individuals in the State during the applicable period compared to the number of such unemployed individuals in all the States during such period.

"(B) One-third of the amount shall be alloted among the States on the basis of the relative number of individuals in the State who exhausted regular compensation during the applicable period compared to the number of such individuals in all the States who exhausted regular compensation during such period.

"(C) One-third of the amount shall be allotted among the States on the basis of the number of weeks of regular unemployment compensation in the State during the applicable period compared to the number of weeks of regular unemployment compensation in all the States during such period.

"(2) As used in paragraph (1):

"(A) The term 'regular compensation' has the meaning given such term in section 205(2) of the Federal-State Extended Unemployment Compensation Act of 1970.

"(B) The term 'number of weeks of regular unemployment compensation' means, for a State for a period, the sum, for each of the weeks in the period, of the number of individuals receiving regular compensation in that week under the State's unemployment compensation law.

"(b) To the extent that all the funds appropriated under section 2101 for a fiscal year and available for allotment in such fiscal year are not otherwise allotted to States because—

"(1) one or more States have not submitted an application or description of activities in accordance with section 2105 for that fiscal year,

"(2) one or more States have notified the Secretary that they do not intend to use the full amount of their allotment, or

"(3) some State allotments are offset or repaid pursuant to the operation of section 2106(b),

such excess shall be allotted among each of the remaining State in proportion to the amount otherwise allotted to such States for the fiscal year without regard to this subsection.

"PAYMENTS TO STATES

"SEC. 2103. (a) For calendar quarters in fiscal years 1984 and 1985, the Secretary shall make payments, as provided by section 203 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4213), to each State from its allotment under section 2102 from the amounts appropriated for that fiscal year.

"(b) Any amount paid to a State for a fiscal year and remaining unobligated at the end of such year shall remain available for the next fiscal year to such State for the purposes for which it was made.

"(c) As a condition of payment to the State under this part, the State must provide assurances satisfactory to the Secretary that each group health plan offered by the State, by any political subdivision thereof, or by any agency or instrumentality of the State or a political subdivision thereof, meets the requirements of part B as they would apply if section 2125(1)(A) did not apply with respect to that State, subdivision, agency, or instrumentality. If the Secretary, after reasonable notice and opportunity for a hearing to a State, finds that it or any of its political subdivisions, or any agency or instrumentality of the State or its

political subdivisions, has failed to comply with the previous sentence, the Secretary shall terminate payments to such State under this part and notify the chief executive officer of such State that futher payments under this part will not be made to the State until the Secretary is satisfied that there will no longer be any such failure to comply.

"USE OF ALLOTMENTS

"SEC. 2104. (a) Except as otherwise provided in this section, a State may use amounts paid to it under section 2103 to provide health care or other health care benefits or coverage for unemployed workers and their family members and for related activities.

"(b)(1) Under this part each State may choose, as it determines to be appropriate—

"(A) those groups of individuals (and their immediate families) who shall be provided health care coverage with funds available under this part;

"(B) the period of time during which such coverage is provided;

"(C) the particular type, duration, and scope of services with respect to which such coverage is provided;

"(D) any standards for financial participation (whether through premiums, deductibles, copayments, or otherwise) by beneficiaries, which standards may vary with respect to different groupings of beneficiaries, different types of services, different provider arrangements, and varying coverage periods; and

"(E) the amount of State funds to be made available for such coverage, if any.

The State may provide, with the consent of the individual, for the deduction of the amount of a premium described in subparagraph (D) from the amount of unemployment compensation benefits paid to the individual.

"(2) Such coverage may be provided through varying arrangements, which include—

"(A) financial assistance in the purchase of continued health benefits coverage under an employer's or other health benefits plan,

"(B) payment of money or credits toward premiums of eligible organizations under section 1876 or health maintenance organizations under section 1903(m);

"(C) provision of care and services by providers under arrangements negotiated by the State; or

"(D) any insurance or health benefits plan approved by the State for purposes of this part.

"(3) The State may provide that the payment for any care and services received by an individual under this part is reduced by the amount of any other payment which is or could be made with respect to such care and services under any other health plan or public program, or from a third party, and may require each such individual beneficiary to assign all rights to such payments as he may have to the State as a condition of receipt of benefits under this part from the State.

"(4) Payment by the State for care and services provided to individuals under this part may be made through the same administrative mechanisms through which payments are generally made under the State plan for medical assistance under title XIX, or any other such mechanism as the State deems appropriate.

"(c) The State may not use funds provided under this part to provide health care coverage—

"(1) to an individual (or to the immediate family members of such an individual) unless the individual (i) is receiving unemployment compensation benefits (as defined by the State), (ii) is unemployed and has exhausted such benefits within a previous period established by the State, or (iii) was eligible within the previous 30-day period for such benefits but lost such eligibility on account of employment;

"(2) to an individual who is eligible for medical assistance under the State plan under title XIX;

"(3) to an individual who is covered (or could have been covered, if an election had been made and any premiums required paid on a timely basis) under a group health plan (as defined in section 162(i)(2) of the Internal Revenue Code of 1954) for which a contribution toward the cost of the plan is being made by an employer, union, or entity other than the individual or the individual's spouse (regardless of whether or not the individual also makes such a contribution);

"(4) to an individual who is (or could be, if an enrollment after the date of the enactment of this part had been made and any premiums required paid on a timely basis after the individual became unemployed) covered under a group health plan (as so defined for the individual's spouse for which a contribution toward the cost of the plan is being made by an employer, union, or entity other than the individual or the individual's spouse (regardless of whether or not the individual or spouse also makes such a contribution); or

"(5) with respect to care and services other than care and services for which medical assistance may be made available under section 1905(a).

"(d) Of the amount paid to any State under this part, not more than 10 percent may be used for administering the funds made available to the State under this part.

"APPLICATION AND DESCRIPTION OF ACTIVITIES

"SEC. 2105. (a) In order to receive an allotment for a fiscal year under section 2102 each State must prepare and transmit to the Secretary—

"(1) a description, certified by the chief executive officer of the State, of the intended use of payments the State is to receive under this part for the fiscal year, including information respecting the items described in section 2104(a); and

"(2) a statement of assurances that represents to the Secretary that—

"(A) funds allotted to the State under this part will only be used, consistent with section 2106(a), in accordance with the provisions of this part;

"(B) the State will permit and cooperate with Federal investigations undertaken in accordance with section 2106(b); and

"(C) the funds made available under this part for any period will be so used as to supplement and increase the level of State, local, and other non-Federal funds that would in the absence of such Federal funds be made available for the programs and activities for which funds are provided under this part and will in no event supplant such State, local, and other non-Federal funds.

The description and statement shall be made public within the State in such manner as to facilitate comment from any person (including any Federal or other public agency) during the development of the description and statement and after its transmittal. The description and statement shall be revised (consistent with this section) throughout the year as may be necessary to reflect substantial changes in any element of such description or statement, and any revision shall be subject to the requirements of the preceding sentence.

"REPORTS AND AUDITS; WITHHOLDING; NONDISCRIMINATION; AND CRIMINAL PENALTY FOR FALSE STATEMENTS

"SEC. 2106. (a) The provisions of sections 506, 507 (other than subsection (b) thereof), and 508 of the Social Security Act (relating to reports and audits, criminal penalties, and nondiscrimination, respectively, under the maternal and child health services block grant) shall apply to activities, funds made available, and allotments under this part in the same manner as those provisions apply to activities, funds made available, and allotments under title V of such Act; and for this purpose—

"(1) any reference to title V of such Act in any of those sections shall be deemed a reference to this part, and

"(2) a reference to section 502(a) or 502(b) or to section 505 in any of those sections shall be deemed to be a reference to section 2102 or to section 2105, respectively.

"(b) The provisions of section 1907 of the Public Health Service Act (relating to withholding of misspent funds) shall apply to the requirements of this part in the same manner as those provisions apply to the requirements of part A of title XIX of that Act; and for this purpose any reference to section 1905 in any of those provisions shall be deemded to be a reference to section 2105.

Page 31, line 7, strike out "2102(d)(4)" and insert in lieu thereof "2103(c)".

Page 36, line 22, insert after the period closing quotation marks.

Page 37, strike out line 1 and all that follows through page 39, line 13.

Page 39, line 17, strike out "July 1, 1983" and insert in lieu thereof "October 1, 1983".

Page 39, beginning on line 18, strike out "for services furnished on or after" and insert in lieu thereof "on".

Page 40, strike out line 15 and all that follows through page 41, line 12, and insert in lieu thereof the following:

(d) Section 1101(a)(1) of the Social Security Act (42 U.S.C. 1301(a)) is amended by striking out "and XIX" and inserting thereof "XIX, and XXI" and by striking out "title XIX" and inserting in lieu thereof "titles XIX and XXI".

Mr. TAUKE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The SPEAKER. The gentleman from Iowa is recognized for 5 minutes in support of his motion to recommit.

Mr. TAUKE. Mr. Speaker, as I indicated in the general debate on this amendment, there are two fundamental issues relating to this question. One is whether or not we should provide assistance to the unemployed in meeting their health needs. I think virtually all of us would agree that we should.

The second question is how do we go about doing that. That is what I would like to spend these few moments talking about.

It seems to me that the proposal that is offered by the Ways and Means

Committee is a proposal which has some fatal flaws in it. First of all, it provides limited amounts of money; but yet at the same time requires that everyone who is unemployed be eligible for the program. It is virtually impossible, given the dollars involved, to provide extensive health care to all of those people who will qualify; yet because the States do not have the option of setting some kind of means tests or making other determinations limiting the groups to which health care should be extended, it is going to be very difficult to pattern this program in a way that it truly can meet effectively the health care needs of any of the unemployed.

The second problem that this proposal before us has is that it is a capped entitlement program with no revenue source. We do not know if it is possible for us to get that kind of legislation approved in the Senate. We are quite certain that that kind of legislation will be vetoed by the President. Consequently, if we are really serious about helping the unemployed, it seems to me that we ought to be passing something that has a reasonable chance of being enacted into law.

The motion that I am offering, the motion to recommit, gives us an opportunity not only to solve the problems that I mentioned that we have with the bill before us, but it also gives us an opportunity to pass legislation that has a chance of being signed.

The motion to recommit, if it is adopted, provides for a streamlined block grant to the States, giving the States maximum flexibility to determine the type, duration, and scope of services to be covered. It gives the States the maximum latitude to have a means test.

Now, what this means is that the States will be able to take the limited dollars available and target them to those who need it most. Without that, we are going to have a program that is designed to serve everybody, but does not have sufficient resources to serve anybody.

The motion to recommit will also allow a program to come to the floor which is more fiscally responsible than the bill before us. It provides that the bill be subject to the appropriations process, which I think this program ought to be.

The motion to recommit, finally, will provide us with a program that does not impose unnecessary and unfair State matching requirements. My own State, which is generally recognized to be fiscally responsible, is right at the brink right now; we are just teetering between going into deficit and not going into deficit. Our State constitution does not permit us to have a deficit. We do not have the extra millions of dollars needed to match a Federal program. Other States are in even worse shape. Ironically, the States that are least able to match are the ones that most need the program. The proposal that I am offering will help the States without requiring a match.

In order to provide a better program for the unemployed who need it, in order to give us a program that we have a chance of having signed into law, in order to give us a program that will allow the States that have severe fiscal problems to participate, I urge you to vote for the motion to recommit. That way you can help the unemployed who really need it.

Mr. THOMAS of California. Mr. Speaker, will the gentleman from Iowa yield?

Mr. TAUKE. I am happy to yield to the gentleman.

Mr. THOMAS of California. I would just like to thank the gentleman for his comments and would like to identify with them.

What the gentleman has outlined is, of course, a rational program that would have some opportunity to help those unemployed who truly need help. The motion to recommit would also pass the Senate and be signed by the President.

What we have in the measure before us is a political document that is going nowhere. The gentleman from California just wishes we could put the gentleman from Iowa's program into effect.

I thank the gentleman for his very good statement and thank him for yielding.

● Mr. FRENZEL. Mr. Speaker, I support the Tauke motion to recommit. Because it is constrained by the limits of germaneness, it is not perfect. Nevertheless, it represents an enormous improvement over the committee bill.

It reduces the expense. It allows States to create their own programs without matching funds. States may adopt any means test they wish. The program is a real block grant with a real termination date.

It clears up many of the deficiencies of the committee bill, and I urge its adoption.

On another matter, I regret that I was not able to offer my means test amendment. However, even if it had been adopted, it could not have helped this fatally flawed bill very much. One tiny amendment simply cannot repair all the wreckage in this bill. Even with my amendment, I would still be obliged to vote against the bill.●

The SPEAKER. The Chair recognizes the gentleman from California (Mr. WAXMAN) for 5 minutes in opposition to the motion to recommit.

Mr. WAXMAN. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I rise in opposition to the motion to recommit.

It is perfectly obvious what is being attempted. The motion to recommit is offered on behalf of the people who are opposed to this bill. They have been opposed to the whole program. They have been opposed to the legislation. They did not want a bill. They voted against the rule which made in order the consideration of the bill. They voted against the rule which made in order their offering of this motion to recommit that is against the bill.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Yes; I will yield.

Mr. BROYHILL. We voted against the rule because it would not permit us any amendments.

Mr. WRIGHT. Well, as the gentleman is fully aware, he is offering an amendment right now which the rule did permit and the gentleman voted against that rule.

It was perfectly obvious to all of us on the floor that there was a partisan attempt to eviscerate the bill, and failing in that then to defeat the bill.

Now, we want the bill because it is absolutely, desperately needed, by many millions of American people who have exhausted their unemployment compensation.

Let us just analyze what this Republican recommittal motion would do. One of the criticisms they offered is that we do not provide a needs test. Well, theirs does not provide a needs test. It simply permits the State to develop whatever kind of needs test it might want to have.

Now, there is not any incentive for the State to be efficient in the distribution of the funds, because it does not call on the State to match any of the funds at all. It gives an entirely inadequate amount of Federal funds with no guarantee of how much Federal money would be spent or available, no limit on the amount of financial obligation that would be required of the unemployed by a given State; no assured safety net for those most desperately in need of help, those thrown out of a job and sick and in need of medical care. I cannot imagine anybody in worse condition than that.

The maximum amount of funds allowed under this Republican substitute would be less than half that which is guaranteed by the bill; so it is perfectly obvious that it is an effort to cut it in half, to reduce its impact, to make less care and service available to fewer people.

Under H.R. 3021, the committee bill, the States would have enough resources available to them to offer an average of 9 hospital days and 10 physician visits for 12.7 million people.

If you apply the same cost estimate to the Republican substitute in order for the States to cover the same number of people with the maximum resources made available to them under this Republican recommittal motion, they would have to cut their

benefits from 9 hospital days to 3 hospital days and from 10 physician visits to 3 physician visits; so it is manifestly an inadequate bill.

It is obvious that the attempt is simply to cut the heart and soul out of this earnest effort that we are making to try to provide a measure of help to those most helpless in our society. It is not going to do any good to have a study commission to study why these people are in need. It does not do any good to have a study commission just to study why people are hungry.

□ 1440

We have had enough commissions and we have had enough studies and the time now is for some action to provide some measure of relief and some measure of help to those who are the most helpless in our whole society, those who have exhausted their unemployment benefits are out of a job and cannot find a job in this society because the recovery has not filtered through to those people who have been thrown out of work. Finding themselves sick, they find no help, no succor, no place where they can go to gain assistance in their medical need.

So we have offered a bill. I hope Members will vote down this recommittal motion and vote for the bill, and give some lifeline of hope to those millions of people who have been unemployed for so long that they have exhausted their unemployment compensation.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. TAUKE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present. Pursuant to the provisions of clause 5, rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the question of the passage of the bill.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 171, nays 255, not voting 7, as follows:

NOT VOTING—7

Ackerman	Hall, Ralph	Stokes
Anderson	Heftel	
Dickinson	Martin (NC)	

The Clerk announced the following pair:

On this vote:

Mr. Dickinson for, with Mr. Stokes against.

□ 1450

Messrs. DINGELL and DAVIS changed their votes from "yea" to "nay."

Mr. CARNEY changed his vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

● Mrs. JOHNSON. Mr. Chairman, we have been through a period of severe and prolonged unemployment and I believe we face many years during which at least some areas of our Nation will endure high unemployment and all the human suffering that accompanies it. Consequently, I support the legislative initiative on the floor today to provide health insurance for the unemployed. Government has a responsibility to help those who are out of work through no fault of their own and an interest in preventing the erosion of the health of the unemployed, their children, spouses, and families.

I voted for the motion to recommit of the gentleman from Iowa, because his motion provides money for a simple block grant program with minimum regulations and maximum flexibility. It also requires no State matching funds. This is very important because the very States we most need to

help are probably the least able to provide matching dollars. My one concern with the Tauke substitute is that it omits funds for the vitally important maternal and child health block grant program.

As we all know, this program provides significant services for mothers and infants, and targets towns with high unemployment. In my own State of Connecticut, there are 3,000 mothers and 4,500 infants eligible for services under the maternal and child health block grant program, yet there is only enough money to include half of them in the program as it has experienced significant cuts in recent years.

These are difficult times when the need for fiscal restraint and the pressing needs of people require hard choices. While I preferred the gentleman from Iowa's approach, I support the bill before us as a viable alternative. It will help the great majority of unemployed merely through its requirements for extended insurance coverage of laid off employees. With careful State implementation, the entitlement portion of the bill can be responsibly, yet compassionately implemented. In addition, the section that bolsters the maternal and child health block grant program will address the critical needs of our families and children. I support this important initiative to address the health care needs of the unemployed and urge my colleagues to do likewise.●

PARLIAMENTARY INQUIRY

Mr. DANNEMEYER. I have a parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. DANNEMEYER. Mr. Speaker, if the House of Representatives adopts this new social welfare spending program with money that we do not have in the Treasury, will Members be personally responsible out of their own resources to provide the funds to finance it?

The SPEAKER. The gentleman is not making a parliamentary inquiry; the gentleman knows it.

The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 252, nays 174, not voting 7, as follows:

[Roll No. 316]

NOT VOTING—7

Ackerman	Hall, Ralph	Tallon
Boggs	Heftel	
Dickinson	Stokes	

The Clerk announced the following pair:

On this vote:

Mr. Stokes for, with Mr. Dickinson against.

□ 1500

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. ACKERMAN. Mr. Speaker, I was unavoidably detained on my way to the floor during the votes on H.R. 3021, health care for the unemployed. I strongly support this bill, and, had I been present, I would have voted "nay" on rollcall 315, the motion to recommit, and "aye" on rollcall 316, final passage of the bill.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO HAVE UNTIL 5 P.M. TUESDAY, AUGUST 9, 1983, TO FILE REPORT ON H.R. 555 AND H.R. 3244

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until 5 p.m. on Tuesday, August 9, 1983, to file the committee's report on H.R. 555, the Construction Work in Progress Policy Act of 1983, and the report on H.R. 3244, on appliance efficiency standards.

Mr. Speaker, this request has been cleared with the minority.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

STUDENT LOAN CONSOLIDATION AND TECHNICAL AMENDMENTS ACT OF 1983

Mr. SIMON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3394) to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 22, line 14, strike out all after "1983-1984" down to and including "1985-1986" in line 15 and insert "and 1984-1985".

Page 22, strike out all after line 23 over to and including line 5 on page 23.

Page 32, line 16, strike out all after "by" down to and including line 18 and insert "striking out "September 30, 1984" and inserting in lieu thereof "September 30, 1988" ".

Mr. SIMON (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. COLEMAN of Missouri. Mr. Speaker, reserving the right to object, I do so in order for the gentleman from Illinois to explain the amendments.

□ 1510

Mr. SIMON. Mr. Speaker, if the gentleman will yield, there are basically two changes, as the gentleman from Missouri knows. The House bill, when it passed, extended the Student Loan Marketing Association, better known as Sallie Mae, in perpetuity. The Senate amendment simply extends it for 5 years.

The second change is the 1985-86 increase in the commuter allowance was deleted. We frankly will have a chance to deal with that in the future, so I think the Senate amendments are agreeable.

Mr. COLEMAN of Missouri. Further reserving the right to object, Mr. Speaker, I support these changes.

Mr. Speaker, I rise in support of the bill.

H.R. 3394 has come back to the House from the Senate with two amendments. These amendments are both minor in nature and do not alter the basic provisions of the bill. The major amendment which we adopted during consideration of this legislation under suspension of the rules on Monday, deleting the expansion of the loan consolidation program, was not altered by the Senate. For this reason, I believe we have produced a bill that meets the concerns expressed by the administration regarding the costs of the loan consolidation program.

H.R. 3394 would permit loan consolidation only to be performed by the Student Loan Marketing Association (Sallie Mae), which currently has the authority to do so, until November 1, 1983. This short extension will allow Sallie Mae to continue to service loans already in consolidation status. The administration was concerned that extending the authority to consolidate student loans to States and private lenders as originally provided for in H.R. 3394 would increase significantly the costs of the student loan program. Our intention never was to increase so greatly the costs of the student loan program through consolidation, and therefore, we deleted the provision expanding loan consolidation authority to States and private lenders. With the November 1, 1983, expiration date for Sallie Mae's authority, we will have to address the issue of loan consolidation again this fall, and we will work with the administration to design a program that will aid students and yet be fiscally responsible.

The other provisions in H.R. 3394 are far more important to students now in school than the loan consolidation provisions. The bill before us now contains the family contribution schedules for the next 2 academic years, 1984-85 and 1985-86, for the Pell grant program, and for the guaranteed student loan program. Without the family contribution schedules, students and their parents will not be able to finalize their plans for college. For the past several years, these schedules have been published late, resulting in confusion and delays in awarding aid to students. By putting into law these schedules for the next 2 academic years, we will be providing students across the Nation with the necessary information and program stability they need to determine what grant and loan aid they might be eligible for. This is the most important mission of H.R. 3394.

The Senate included two very minor amendments when they considered H.R. 3394. These amendments actually should make the bill more palatable to the administration. One would limit the increase to the commuter student living allowance to just one year, so that we can reexamine it again next year in light of current appropriations. The other amendment would extend Sallie Mae's Federal debt priority to 1988, rather than extending it permanently.

Mr. Speaker, thanks to the help of my subcommittee chairman, Mr. SIMON, of Illinois, in agreeing to address the concerns of the administration relating to loan consolidation, we have been able to save the important aspects of H.R. 3394, the family contribution schedules for Pell grants and guaranteed student loans. I urge my colleagues to support this bill and help millions of students plan ahead for their postsecondary academic careers.

Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, I rise in support of H.R. 3394.

This legislation is essentially the same bill passed by the House on Monday by a voice vote. The Senate has passed this legislation making only two minor amendments. Both of these amendments, in my estimation, improve the bill and make it more acceptable to the administration.

The first Senate amendment deletes the second year of the increase in the cost of attendance allowance for students not living with their parents or in institutionally owned or operated housing. Under H.R. 3394 as passed by the House, this provision called for a cost of attendance allowance of between $1,100 and $2,100 for the 1985-86 academic year. This increase would have raised the so-called full-funding cost of the Pell grant program by approximately $200 million. Given the continued need to restrain the growth of the Federal budget, this increase was inappropriate and could have led to the use of the statutory reduction formula had appropriations been insufficient to cover the full cost of the program.

The second Senate amendment limits the clarification of the status of Sallie Mae debt to September 30, 1988. The House bill had made this clarification on a permanent basis. While I continue to believe that there is no reason not to extend this provision permanently, I am happy the Senate chose to limit the expiration on this provision to a date which will enable us to reconsider this issue during the reauthorization of the Higher Education Act. This act expires September 30, 1985.

The remaining provisions of the bill before us are identical to those already approved by the House. The most important of these provisions are the

Pell grant and GSL family contribution schedules, revisions in student loan truth-in-lending disclosure requirements, and provisions relating to nondiscrimination in the availability of student loans. All of these provisions represent a large step toward restoring stability and predictability to Federal student aid programs. By enacting this legislation we will help students and their families know what student aid will be available as they make their educational plans.

H.R. 3394 as presently written extends the existing Sallie Mae loan consolidation program, commercially know as "options," for only 3 months. This short extension will require us to reconsider the issue of loan consolidation when we return in September. At that time I am hopeful that we will be able to develop a bill which addresses the administration's concerns relating to the cost of loan consolidation. I agree with the administration that loan consolidation should not be structured in such a manner to expose the taxpayer to future, potentially huge new costs. If we were to allow this to happen, the primary purpose of the guaranteed student loan program, providing capital to students to finance their higher education, will be undermined.

In closing, Mr. Speaker, let me once again thank the gentleman from Illinois, the chairman of the Subcommittee on Postsecondary Education, for his cooperation in helping us meet the concerns expressed by the administration. Through his efforts we are today producing a bill which I believe the administration will be able to support.

● Mr. FORD of Michigan. Mr. Speaker, I strongly considered objecting to the motion to accept the Senate amendments to H.R. 3394 and forcing a conference to be held on the differences between the House and the Senate concerning this bill. I contemplated this action because of my opposition to one of the Senate amendments. I will not object, however, since the bill contains provisions that will enable the delivery of student financial aid to proceed in an orderly manner using family contribution schedules that do not incorporate the changes proposed by the administration. These changes would have resulted in severe decreases in awards to students from moderate income families only slightly above the poverty line as well as the elimination of several hundred thousand middle-income students from the programs. The bill also contains a number of other meritorious provisions which I described in my statement when this bill was considered by the House on August 1.

The Senate amendment which I find particularly outrageous and obnoxious deletes from the House bill the $500 increase for 1985–86 in the living allowance for students who do not live on campus and who do not commute from their parents' home—those who commute from their own apartment or home. Under the House-passed bill this allowance would have been increased by $500 for the 1984–85 academic year and by another $500 for the academic year 1985–86. This living allowance for commuting students has not been modified since the creation of the Pell grant program in 1972, and this has resulted in artificially and arbitrarily lowering the Pell grant awards particularly of low-income students attending low-cost schools such as community colleges and State colleges.

The other body apparently yielded to the arguments of those who represent high-priced schools who believe that any gain for low-income students attending low-cost schools is a loss for them. Rather than devoting their energies to attaining adequate funding for the Pell grant program, so that all Pell grant recipients at both low-cost and high-cost schools could make up for the reductions made in recent years, these representatives shortsightedly focus instead on protecting their share of an all too meager pie. Providing students with the choice of attending the school best suited to their interests, needs, and talents never will and never should be built on the backs of low-income students who attend low-cost schools.

Mr. Speaker, I will continue my efforts to assure that all students can achieve equal educational opportunity through student financial assistance. In particular, I will continue my efforts to remedy the gross inequity in the Pell grant awards of low-income students attending low-cost schools. I will also continue my efforts to guarantee to all students both access to postsecondary education and the ability to chose a postsecondary education best suited to their needs.●

Mr. COLEMAN of Missouri. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Illinois that the amendments be considered as read and printed in the RECORD?

There was no objection.

The SPEAKER. Is there objection to the initial request of the gentleman from Illinois?

There was no objection.

A motion to reconsider was laid on the table.

INTERNATIONAL RECOVERY AND FINANCIAL STABILITY ACT

The SPEAKER. Pursuant to House Resolution 249 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2957.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2957) to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by United States banks, and provide for continued United States participation in multilateral development banks, with Mr. PEASE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, July 29, 1983, titles III through V were open to amendment at any point. All time for debate under the 5-minute rule had expired.

Are there further amendments to titles III, IV or V?

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair will advise the membership that this bill constitutes the major remaining business for the day. If we can expedite our treatment of it, we will all get out of here earlier.

All time under the 5-minute rule has expired. We are thus likely to have a series of amendments, some of which cannot be debated at all, others of which will be subject to 10 minutes of debate only. That can mean a series of votes. Under those circumstances, the situation is occasionally chaotic on the floor. The Chair would beg the indulgence of the Members in maintaining some reasonable semblance of order so that we may proceed and complete our business at an early hour.

AMENDMENT OFFERED BY MR. ST GERMAIN

Mr. ST GERMAIN. Mr. Chairman, I offer an amendment which was printed in the CONGRESSIONAL RECORD of July 29, 1983, at page H6030.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. ST GERMAIN:

Page 29, strike out line 16 and all that follows through line 19.

Page 30, beginning on line 6, strike out "Pursuant to regulations promulgated by the Examination Council, each" and insert in lieu thereof "Each".

Page 30, line 8, insert ", by regulation," after "shall require".

Page 31, beginning on line 12, strike out "The" and all that follows through "enactment of this title." on line 14.

Page 31, beginning on line 16, strike out "ninety days after the promulgation of such Examination Council regulations." and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 31, line 20, strike out "Examination Council" and insert in lieu thereof "appropriate Federal banking agencies".

Page 32, beginning on line 3, strike out "The" and all that follows through "enactment of this title." on line 5.

Page 32, beginning on line 7, strike out "ninety days" and all that follows through "regulations." on line 9, and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 32, beginning on line 12, strike out "Pursuant to regulations promulgated by the Examination Council, each" and insert in lieu thereof "Each".

Page 32, line 14, insert ", by regulation," after "shall require".

Page 32, line 17, strike out "the Examination Council" and insert in lieu thereof "such".

Page 32, beginning on line 18, strike out "Pursuant to regulations promulgated by the Examination Council, each" and insert in lieu thereof "Each".

Page 32, beginning on line 23, strike out "The" and all that follows through "enactment of this title." on line 25.

Page 33, beginning on line 2, strike out "ninety days" and all that follows through "regulations." on line 4, and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 33, line 7, strike out "(a) The Examination Council and the" and insert in lieu thereof "The".

Page 33, strike out line 13 and all that follows through page 35, line 7, and insert in lieu thereof the following:

CAPITAL ADEQUACY

SEC. 408. (a)(1) Each appropriate Federal banking agency shall cause banking institutions to achieve and maintain adequate capital by establishing minimum levels of capital for such institutions and by using such other methods as the agency deems appropriate.

(2) Each appropriate Federal banking agency shall have the authority to establish such minimum level of capital for an institution as the agency, in its discretion, deems to be necessary or appropriate in light of the particular circumstances of the institution.

(b)(1) Failure of a banking institution to maintain capital at or above its minimum level as established pursuant to subsection (a) may be deemed by the appropriate Federal banking agency, in its discretion, to constitute an unsafe and unsound practice within the meaning of section 8 of the Federal Deposit Insurance Act.

(2)(A) In addition to, or in lieu of, any other action authorized by law, including subsection (b)(1), the appropriate Federal banking agency may issue a directive to a banking institution that fails to maintain capital at or above its required level as established pursuant to subsection (a).

(B)(i) Such directive may require the institution to submit and adhere to a plan acceptable to the agency describing the means and timing by which the institution shall achieve its required capital level.

(ii) Any such directive issued pursuant to this paragraph, including plans submitted pursuant thereto, shall be enforceable under the provisions of section 8(i) of the Federal Deposit Insurance Act to the same extent as an effective and outstanding order issued pursuant to section 8(b) of such Act which has become final.

(3)(A) Each appropriate Federal banking agency may consider such institution's progress in adhering to any plan required under this subsection whenever such institution, or an affiliate thereof, or the holding company which controls such institution, seeks the requisite approval of such agency for any proposal which would divert earnings, diminish capital, or other wise impede such institution's progress in achieving its minimum capital level.

(B) Such agency may deny such approval where it determines that such proposal would adversely affect the ability of the institution to comply with such plan.

(c) The Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall encourage governments, central banks, and regulatory authorities of other major banking countries to work toward maintaining and, where appropriate, strengthening the capital basis of banking institutions involved in international lending.

Page 36, line 16, strike out "The Examination Council is" and insert in lieu thereof "The appropriate Federal banking agencies are".

Page 36, beginning on line 17, strike out "the Examination Council and".

Page 37, strike out line 20 and all that follows through line 24.

Page 38, line 1, strike out "(e)" and insert in lieu thereof "(d)".

Page 38, strike out line 14 and all that follows through page 40, line 14.

Page 40, line 16, strike out "SEC. 412." and insert in lieu thereof "SEC. 411".

Page 40, beginning on line 17, strike out "the Examination Council (as defined in section 402(c) of this Act) and".

Page 40, line 25, strike out "Examination Council and the".

Page 42, line 8, strike out "the Examination Council or".

Page 42, line 13, strike out "the Examination Council or".

Page 42, line 17, strike out "the Examination Council or".

Page 42, beginning on line 24, strike out "the Examination Council or".

Page 43, beginning on line 1, strike out "the Examination Council or an" and insert in lieu thereof "each".

Page 43, beginning on line 5, strike out "The Examination Council or an" and insert in lieu thereof "Each".

Page 43, line 15, strike out "the Examination Council or".

Page 43, after line 18, insert the following:

REPORTS TO CONGRESS

SEC. 412. (a) Within 120 days after the date of the enactment of this title, the Secretary of the Treasury shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the statutes, regulations, and examination and supervisory procedures and practices, governing international banking in each of the Group of Ten Nations and Switzerland with particular attention to such matters bearing on capital requirements, lending limits, reserves, disclosure, examiner access, and lender of last resort resources.

(b) Not later than 120 days after the date of the enactment of this title, the Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the progress made in reaching the goal specified in section 408(c).

(c)(1) Within one year after the date of the enactment of this title and for each of the two succeeding years, the appropriate Federal banking agencies shall report to the Committee on Banking, Finance and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on actions taken to implement the provisions of this title.

(2) The report shall include a description of the actions taken in carrying out the objectives of the title, and any actions taken by any appropriate Federal banking agency that are inconsistent with the uniform implementation by the appropriate Federal banking agencies of their respective authorities under this title, and any recommendations for amendments to this or other legislation.

Mr. ST GERMAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. ST GERMAIN. Mr. Chairman, since the committee reported favorably H.R. 2957 on May 10, a bipartisan effort has been underway to eliminate, to the maximum extent possible, controversy not central to the primary purposes of titles III and IV which provide for the controversial quota increase accompanied by stricter regulatory requirements for international lending than now exist.

Those who oppose the use of the Federal Financial Institutions Examination Council have misconstrued its basic purpose and its potential, but in the spirit of compromise the committee amendment eliminates this greater role for the Council, leaving for another day what, in essence, are consolidation issues. The inclusion of the Council in title IV was intended to bring about greater unity among the three bank regulatory agencies. It was the committee's view that it was unreasonable to call for greater consultation and coordination internationally when our own regulators do not adequately consult and agree with each other. The committee amendment deletes all reference to the Exam Council in this title, relying upon existing regulatory agencies to carry out its mandate. After receiving and evaluating the reports required by title IV, we will return to the question of the most efficient manner in which to bring about necessary worldwide regulatory and supervisory improvements.

The committee amendment also deletes the legislative review provision in the bill. This provision would have given Congress the authority to review regulations issued to implement title IV of the bill. While we believe that such a review would be beneficial and could be accomplished without significant slowing of the regulatory process, we are also mindful of the confusion

and uncertainty about all types of legislative review and veto provisions in the wake of the Supreme Court decision in Chadha.

In an effort to minimize still further controversy, we have decided to delete the provision and review it in the context of the overall effort now going on in the House to develop alternatives to the traditional legislative veto provisions. In the meantime, we are confident that the oversight function that is maintained and indeed strengthened in other parts of this committee amendment will provide ample ways for the Banking Committee to closely monitor regulatory activities under this legislation. I assure Members that the Banking Committee intends to remain vigilant in carrying out its oversight responsibilities.

The reports required in title IV will enhance the committee's ability to carry out its oversight responsibilities. The committee's amendment consolidates all of the requirements for congressional reports in title IV of the bill into one section. These reports call for an assessment of international bank supervision in other countries, a report on progress in strengthening the capital bases of banks involved in international banking throughout the world, and a report on actions taken by the agencies for implementation.

The committee amendment also strikes a section of the bill which exempts the regulators from the requirements of the Paperwork Reduction Act and the Regulatory Flexibility Act, which was included in an effort to assure prompt implementation of the requirements of this title. This provision was originally requested by the regulators, but as a result of understandable concern raised by several Members, the committee has reconsidered and agrees that without the most compelling reasons for so doing Congress should not begin a pattern of exempting the regulatory agencies from these two statutes. The effect of the committee amendment, however, is not intended to impede the bank regulatory agencies from requiring and collecting substantial amounts of new information from international financial institutions as required by title IV.

The Paperwork Reduction Act requires a decrease in the information collection burden imposed by the Government. The committee amendment is not intended to be interpreted as requiring the bank regulatory agencies to reduce the other information requirements and collections they carry out in order to compensate for the increased reporting mandated in this title. The importance we associate with the regulatory and information requirements of this title are reflected in the fact that we have in the committee amendment reduced the time available to the agencies to issue their new supervisory and informational regulations.

Moreover, we do not intend by the committee amendment that the Regulatory Flexibility Act should in any way interfere with the proper performance by the banking agencies of their responsibilities under this legislation. The Regulatory Flexibility Act is intended to prevent undue regulatory burdens on small businesses. The requirements of H.R. 2957, however, would fall on large international banks and the agencies that regulate them. Therefore, it is our hope that the exemption and flexibility provisions of sections 605 and 606 of the Regulatory Flexibility Act be fully utilized to facilitate implementation of this legislation.

The fourth provision of the committee amendment relates to the extremely important subject of adequate bank capital. The gentleman from Iowa, Mr. LEACH, has truly performed yeomanlike services in the area of requiring banking institutions to maintain adequate capital levels. His previous amendment was accepted in committee. His continuing efforts have led to the committee's clarifying amendment today which spells out the committee's intent that banks involved in international lending should strengthen their capital bases, and that capital standards for banks should not discriminate on the bases of asset size. It is interesting to note that after nearly 20 years of debate, analysis, meditation and what have you, the regulators finally on June 13, thirty-three days after committee action, adopted more stringent capital adequacy standards.

This fourth provision of the committee amendment clarifies the authority of the Federal banking agencies to establish minimum levels of capital for banks. The provision also confirms the authority of each agency to require individual banks to achieve such other capital level as deemed appropriate in light of the particular circumstances of each institution. That is, the amendment confirms the remedial authority of an agency to prescribe such higher level as may be appropriate for a specific bank, or to waive the generally applicable standard in extraordinary circumstances. This essential supervisory authority was recently clouded by the decision of the U.S. Court of Appeals for the Fifth Circuit in the First National Bank of Bellaire against Comptroller of the Currency. The committee believes that the authority of an agency to require a bank to maintain adequate capital is properly within the expertise and discretion of the agency, subject to the appropriate standard of judicial review.

I urge the House's acceptance of the committee amendment.

Mr. Chairman, I yield to the ranking minority Member, the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Chairman, I rise in support of the gentleman's amendment. But I really think, fellow Members, that the time has come to pass this important piece of legislation. World economic recovery is dependent upon this legislation. "The U.S. stands to gain the most by encouraging global growth and recovery, and that is what this legislation will accomplish."

That is the statement contained in a letter I just received from Secretary of State George Shultz.

All living former Secretaries of State have signed a letter to like effect. Ten former Secretaries of the Treasury support the passage of this legislation. The National Chamber of Commerce, the AFL–CIO, American Farm Bureau Federation, National Farm Co-ops, National Realtors Association, the Speaker, the minority leader and the President of the United States all support passage of this legislation.

The IMF grew out of a need for economic recovery following the chaos and the debilitating effect of the most devastating war in our history, World War II. It has been working fairly smoothly for 40 years. What this bill means is jobs, jobs, and more jobs for Americans. Failure to pass this bill means weakened economic recovery and a lessening of our leadership role in world economic affairs.

Mr. Chairman, I feel passage of this legislation is something we must do today.

Mr. Chairman, I thank the gentleman from Rhode Island for yielding me this time.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from California.

Mr. PANETTA. Mr. Chairman, included in this bill is an amendment offered by myself and my colleague, Mr. STARK, which expresses concern about the potential and actual spread of nuclear weapons capabilities around the world and provides the current administration and future administrations with an additional tool to slow down this dangerous trend.

My amendment requires that the U.S. Executive Director of the International Monetary Fund consider, in carrying out his duties, whether a country seeking an IMF loan has detonated a nuclear device, is not a party to the 1968 Treaty on Nonproliferation of Nuclear Weapons, or is not a party to the 1963 treaty banning nuclear weapons tests in the atmosphere, in outer space, and underwater. It does not prevent the United States from approving loans to countries which do not meet these criteria. However, it does require that our executive director take these factors into consideration.

The practical effect of the amendment is to provide leverage that could

be used by an administration as a means of advancing nonproliferation efforts. An administration could use this provision to persuade any country in need of an IMF loan and which is also pursuing nuclear capabilities not to move in that direction. Because not signing on to either of these nuclear treaties or detonating a nuclear device would provide a reason for possible denial of a loan, this would be a means of persuasion without actually binding the administration to take a particular action.

I do not propose a radical departure from current U.S. international lending policies. Indeed, my amendment is modeled after 22 U.S.C. 262d(b)(3), which was enacted in 1977 and which already applies to every international lending institution, other than the IMF, in which the United States participates. These institutions are the World Bank, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, The African Development Fund, and the Asian Development Bank. This provision requires that the U.S. executive director of those banks take into consideration whether a recipient country has detonated a nuclear device or is a party to the Treaty on Nonproliferation of Nuclear Weapons.

My amendment simply applies this provision to the IMF and adds another important factor which the U.S. Executive Director of the IMF should consider—whether the recipient country has ratified the 1963 Nuclear Test Ban Treaty, which bans testing of nuclear weapons in the atmosphere, in outer space, and underwater. Mr. STARK has contributed this element of the amendment, and I share his deep concern about the impact of atmospheric and other environmentally hazardous testing of nuclear weapons.

The need for my amendment is clear. The fact is that some of the countries in greatest need of financial assistance from the International Monetary Fund are among the relatively few countries which have not committed themselves to halting the spread of nuclear weapons by signing the nuclear nonproliferation treaty. For example, Brazil, which owes more money to public and private lenders throughout the world than any other country, and Argentina, which is third in this category, have not signed this treaty. Both are in rapid pursuit of nuclear weapons. In addition, countries which already owe heavy debts to the IMF, such as India, Pakistan, and South Africa, are on the verge of gaining nuclear capabilities, if they do not already possess such weapons.

I do not believe it makes sense to provide U.S. support for loans to these nations without even considering the fact that they are actively pursuing something—indeed, are spending money which has been freed up by the infusion of IMF funds—which could contribute enormously to a dangerous instability in international relations. I do not think any of my colleagues is not concerned about the potential for an escalation to a world nuclear war from a nuclear confrontation between India and Pakistan, for example. Why should this country, which clearly has an interest in preventing nuclear proliferation and in maintaining international stability, not use every tool at its disposal to persuade countries not to go nuclear?

Mr. Chairman, this amendment offers a reasonable approach to a very difficult problem. I am pleased that the managers have accepted and the House will include my amendment. More importantly, it is my hope that it will be enacted into law and will be used wisely and forcefully by the current administration and by future administrations.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Rhode Island (Mr. ST GERMAIN).

The amendment was agreed to.

PARLIAMENTARY INQUIRY

Mr. GONZALEZ. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. GONZALEZ. At the outset of the Chairman's announcement about the procedure, I was under the impression he had called for further amendments on title III. The amendment we just considered was on title IV. Are we now considering title IV, and is it open to amendment at any point?

The CHAIRMAN. The bill is open to amendment in titles III, IV, or V.

Mr. GONZALEZ. I thank the Chair.

AMENDMENT OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire of the gentleman from Texas (Mr. PAUL) as to whether the amendment has been printed in the RECORD.

Mr. PAUL. Yes, it has been, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. PAUL: Page 28, after line 8, insert the following:

CONGRESSIONAL AUTHORIZATION OF CERTAIN ACTIONS

SEC. 308. Section 5 of the Bretton Woods Agreements Act (22 U.S.C. 286c) is amended by adding at the end thereof the following: "Unless Congress, in advance and by law, authorizes such action, neither the President nor any person or agency shall, on behalf of the United States, make any commitments whatsoever (1) regarding any request for, or the granting of consent to, any change in the quota of the United States under Articles III, section 2(a), of the articles of Agreement of the Fund, or (2) regarding the making of any loan to the Fund or the Bank.".

□ 1520

The CHAIRMAN. The gentleman is recognized for 5 minutes in support of his amendment.

Mr. ST GERMAIN. Mr Chairman, will the gentleman yield briefly for a parliamentary inquiry?

Mr. PAUL. I yield to the gentleman from Rhode Island.

PARLIAMENTARY INQUIRY

Mr. ST GERMAIN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ST GERMAIN. Mr. Chairman, I would like to ask one question.

In calling up my amendment a few moments ago, I gave the date that it was printed in the RECORD and the page number at which it appeared.

Would it be possible to require that of other amendments that are submitted so that we could save a lot of time?

The CHAIRMAN. The Chair would state that it would be highly desirable if Members offering amendments would be prepared to state at the time of offering the amendments the page number and date of the CONGRESSIONAL RECORD where the amendment is cited. It has not been treated as an absolute requirement unless a point of order is raised. The Chair will take on the faith of Members the statement that it has been printed in the RECORD, but it certainly would expedite the consideration of the bill if Members would be prepared to do that.

Mr. PAUL. Mr. Chairman, I am a bit disappointed about how things have transpired with this particular piece of legislation, because it is going to be most difficult to have any discussion since the debate has been closed out rather early.

But I do have an amendment here which I think Members should take serious note of because I think it is a significant improvement in the legislation that is before us.

One of the arguments that we have heard throughout the debate has been that we must support our President, and this is not the first year that that argument has been used. As a matter of fact, I remember as far back as 1976 this was the same reason we had to vote and acquiesce in going along with the administration because they made these commitments. I know it is very tempting for partisan reasons to go along with these commitments.

The statement has been made that the President has been somewhat embarrassed because he used to be against the IMF, now he is for the IMF, and now he has made international commitments, and it would be a bit embarrassing for him not to have the funds. Of course, I consider it a bit embarrassing to my constituents to go to them and take from them what is theirs and give to some banker or some foreign nation what is not theirs.

So I think the issue is very clear. It is a moral as well as an economic issue. The intent and the purpose of my amendment would mean that the President no longer can go and make these commitments. He signs these commitments, and then uses this as a leverage, coming back to the Congress and saying, "I have made these commitments."

This in no way would preclude him from negotiations, but he could not be able to make the commitment. Present law today requires congressional consent after the fact, but this is after the meetings have been held. This would mean the President, regardless of the administration, would come to us and say, "Look, we want to commit another $8 billion or another $15 billion of American taxpayers' money or credit," and no matter what you call it, it is going to cost the American taxpayer something.

They would have to come to us first and tell us what they are doing, rather than going and having these international conferences, signing these commitments, and practically having a treaty commitment and putting the prestige of the Presidency on the line.

The amendment is rather simple. It would just meant that they must come to us first to get this permission. I think this is a very appropriate amendment for this time. We have had an attack by the courts on the legislative veto. I think it is very clear in the Constitution what our responsibilities are with the power of the purse. It is up to us to take care of the spending and the taxes, and yet we so easily give in to the administration on this commitment and go along with what they have said. This would prevent that.

I think this is a much better way of doing it, rather than waiting for that crisis period, and then the administration coming and saying, "If you do not fund the IMF tomorrow, the banking system is going to collapse."

I had somebody call me not too long ago, since the last time we had the IMF on the floor, a rather well known banker in a large bank in Houston, who said, "Please do not offer your amendments," because I was obstructing. I cannot quite understand how I am obstructing when I never even had a chance to present one single amendment. He said, "Well, the banking situation is so bad that if you present your amendments, this might help precipitate a banking crisis."

I said, "You know what? I have four amendments." At that time I had four amendments in the RECORD. I get 5 minutes apiece. I thought, boy, if my talking for 20 minutes could have some effect on the international banking situation, then I never realized what a powerful individual I was.

But quite frankly, it has nothing to do with what I am offering here on what the situation is internationally. That was created in a time past, past inflation, past abuse of the system by those who desire to cling to power. This is an issue of power that we are dealing with today. Who has the power of the money, the power of the purse? I think the power of the purse is and should be in the hands of the Congress.

So, therefore, if you happen to believe that, you would have to vote "yes" on this amendment, saying that the administration should come, present to us what the plans are.

It is said they need $8.4 billion in the IMF this year, but the plain truth is that that is a token amount of what they really need to prop up the system. The system no doubt is in trouble. The question is: Who is going to suffer the consequences. Are the notes and the loans going to be rolled over? Will the responsibility fall on the backs of the bankers and their stockholders or is it going to fall on the backs of the American taxpayers? It is as simple as that.

A year or so ago when Poland met their crisis, only about one-half of their debt was insured by governments. The other half was private loans that were rolled over and extended by the private banks. They choose not to foreclose and it is in their interest not to foreclose.

I ask for an "aye" vote on this amendment.

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Congress is, indeed, in firm control of the IMF quota increase. That is quite obvious as a result of the hearings we held last year in the last Congress on this particular increase, very extensive hearings that were held before the various subcommittees of the Committee on Banking as well as before the full committee, and the very elaborate and extensive debate that has been held on the floor of this House.

For that reason, I think that, indeed, we are in consultation; we are the ones who are approving or disapproving.

In addition to that, in the amendment that was adopted last week, we indeed stated that the President and the Secretary of the Treasury has to consult with the Congress before any additional commitments are made to the IMF.

For that reason, I oppose the amendment.

Mr. MCKINNEY. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. I appreciate the chairman yielding.

Mr. Chairman, I am a great follower and I respect my good friend, the gentleman from Texas (Mr. PAUL) but I had some problems with this amendment. As an American history major, I was having a real problem with the idea that I thought that in foreign policy, foreign monetary policy and every other foreign agreement, that the President proposed and we disposed; that the President did, in fact, make agreements and would come back to us and we would give him, in the other body, our advice and consent, and then in this body we would control the purse, which would follow through behind that.

One of the things that really bothers me has been a conversation that has been going on here on the floor about the power of the banks versus the inability of the individual, the taxpayer. Let me tell the chairman something, and I believe he is aware of this: If, in fact, we were to fail in our international role, if in fact we refused, as the Western leader, to come in with our share, guess what would fly tomorrow to Zurich or London, but not into the United States? It would be called gold. Who would pay for that disruption? The U.S. taxpayer.

□ 1530

I would suggest to the Members that there is really a dangerous argument here. This House will vote the money and approve the loans, and the chairman and the ranking minority member and I will recede to disclosure amendments and many other things, but the fact of the matter is that the only people who are going to benefit if, in fact, we fail to do our duty are those who would promote the cause of gold, and the very people who are going to pay are the taxpayers of this country.

Mr. Chairman, I thank the committee chairman for yielding to me.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I hope that I have time enough left to yield to the gentleman. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I thank the chairman of the committee for yielding.

The committee accepted an amendment on Friday, I would submit, which requires prior congressional consultation on all new quota increases. Conditioning quota increases on prior congressional approval, I think, upsets the balance between the proper role of the executive branch and the legislative branch. Can you imagine 435 Members of Congress traveling around the world negotiating the proper U.S. share of an IMF quota subscription?

I think the amendment is of questionable constitutionality. For that reason, Congress is consulted in all discussions pertaining to the quota increases. As a matter of fact, there were 12 Members of Congress in attendance at Toronto when this quota increase

was negotiated, and Members have always been invited to attend conferences. I have participated in three myself.

So for those reasons, Mr. Chairman, I do oppose the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas, (Mr. PAUL).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PAUL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Texas (Mr. PAUL) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

□ 1540

AMENDMENT OFFERED BY MR. CARPER

Mr. CARPER. Mr. Chairman, I offer an amendment. The amendment appeared in the RECORD of July 26, 1983, at page H5714.

The Clerk read as follows:

Amendment offered by Mr. CARPER: On page 43, insert the following new section after line 18:

EQUAL REPRESENTATION FOR THE FEDERAL DEPOSIT INSURANCE CORPORATION

SEC. 413. As one of the three Federal bank regulatory and supervisory agencies, and as the insurer of the United States banks involved in international lending, the Federal Deposit Insurance Corporation shall be given equal representation with the Federal Reserve Board and the Office of the Comptroller of the Currency on the Committee on Banking Regulations and Supervisory Practices of the Group of Ten Countries and Switzerland.

Mr. CARPER. Mr. Chairman: My amendment responds to a problem uncovered during our committees hearings on the IMF replenishment. A great deal of attention was focused on questions about the prudence of our banks getting so heavily involved in international lending and the adequacy of our regulators' supervisory activities. The regulators pointed out that one of the biggest problems is obtaining information on the total international exposure and trying to achieve some coordinated approach to supervision with other lending nations.

The committee was shocked to find that the FDIC, which has all the financial responsibility if any bank should fail as a result of its international lending, is not permitted to attend meetings of the Committee on Banking, Regulatory and Supervisory Practices of the Group of Ten Countries and Switzerland. This committee—also known as the Cooke committee—is the principal forum for the exchange of information critical to the proper supervision of international lending activities but because of the way it operates FDIC cannot even attend as an observer.

In its report on the bill the committee indicated its concern about this and its intention that FDIC be granted one of the three seats allocated to the U.S. delegation to the Cooke committee. However, I fear report language may not suffice to achieve the objective so the purpose of may amendment is to assure this.

I urge adoption of the amendment because the FDIC is the one agency principally concerned with safety and soundness of our insured banks and the proper disclosure of their financial condition.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. CARPER. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Chairman, I rise in strong support of the amendment.

As I recall, we inquired of the Chairman of the FDIC about this amendment and he indeed agreed that the FDIC should be represented and I, therefore, recommend acceptance and adoption of the amendment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. CARPER. I yield to the ranking minority member.

Mr. WYLIE. Mr. Chairman, we support the amendment on this side. I think it makes sense that the FDIC be represented. The gentleman presented this in the committee and we are glad to accept the amendment here on the floor.

Mr. CONTE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, last Friday, I offered a preferential motion to include the IMF funding in the supplemental appropriations conference report, subject to the enactment of this authorizing bill. As you will recall, that effort failed by a vote of 165 to 213, or 48 votes.

In reviewing that vote, I believe that a clear majority in the House would have supported that appropriation if the House had completed action on this authorizing bill. I also believe that after 4 days of extensive and exhaustive debate on this bill, it is time to vote it up or down.

But I want to make a couple of points before the vote is taken, and this is the first time I have spoken on the floor on the authorization bill.

First, I want to address those Members on the Republican side of the aisle. What does our Republican President say about this IMF increase? In a letter to Members of this body, President Reagan has stated:

The IMF is the centerpiece of the efforts to maintain a healthy and open trading system in the world. IMF resources are necessary to protect our own interests in a stable financial system, a growing world economy, and sustained economic recovery and higher employment levels.

Sustained economic recovery and higher employment levels—

That is what this IMF increase is all about. A letter from Secretary of State Shultz and Secretary of the Treasury Regan continues this theme:

Nearly 20 percent of total U.S. goods are exported. The jobs of millions of Americans, the health of our banking system, and the prospects for a sustained U.S. economic recovery all depend on the IMF's success in maintaining the stable financial framework essential for world trade to prosper. Failure of the United States to participate in the increase of IMF resources would thus have serious consequences for our own economic recovery and the preservation of American jobs.

One final quote: The President summed up the situation earlier this month when he stated:

No legislation now before the Congress is more important to a healthy world economy and to a continuing economic recovery here in the United States.

It is no secret that this particular President's political career is closely tied to continued economic recovery, as are possibly the careers of many here in Congress who have supported his economic and fiscal policies. If you want to continue to support his policies on this side of the aisle, vote for this bill.

And for my friends on the other side of the aisle, a vote for this bill is a vote for all those workers in your districts who are critical to your own political survival. As the only surviving Republican in the House from the State of Massachusetts, I would observe that out of 600,000 jobs in my State, more than 100,000 are export-related. More than 10 percent of the total dollar value of Massachusetts products are exported and are, therefore, dependent on a healthy and growing world economy. The IMF is the key institution in the promotion of world economic health and growth which will lead to future exports of products from Massachusetts as well as all of your other States.

Recovery and jobs, recovery and jobs. That is what this vote is all about. For only twenty percent of the tab, we can get other members of the

IMF to put up eighty percent of the resources needed to assist our own economic recovery. That is a deal we should not turn down.

One final point: There seems to be a general undercurrent here on the floor, sometimes spoken, sometimes not, that this IMF increase is just another form of foreign aid.

This is not foreign aid, and I ought to know foreign aid. Since I came to the Congress in 1959, we have appropriated $194 billion for foreign aid. That was in the form of economic and military grants and concessional loans to the underdeveloped countries of the world. Some of that aid has been effective, some of it has not. Some of it has been repaid, some of it has not.

But IMF assistance is not foreign aid. IMF loans are repaid in full, with interest. As pointed out by the chairman of the authorizing subcommittee, no country has ever defaulted or rescheduled an IMF loan.

If anything, IMF assistance is aid to those countries doing business with the borrowing country—in particular, the United States. Developing countries buy more than a third of our exports. If they go bankrupt, where will we sell those exports? We will not it is as simple as that. We will not sell the $3.4 billion in exports that Brazil bought from the United States last year, or the $12 billion that Mexico bought. That is a minimum of 500,000 U.S. jobs right there, not to speak of the social and political ramifications of a bankrupt Mexico and Brazil.

So, if some of you insist on calling this foreign aid, at least keep in mind who is really benefiting from the IMF: we have seen who it is, and it is us—the United States. Do not gamble with our fragile recovery. Do not gamble with our slowly decreasing unemployment rate. Vote for this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Delaware (Mr. CARPER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PATTERSON

Mr. PATTERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PATTERSON: Page 46, after line 8, insert the following:

"(c) Whereas the Republic of China is a charter member in good standing of the Asian Development Bank;

Whereas the Republic of China has grown from a borrower to a lender in the Asian Development Bank; and

Whereas the Republic of China provides, through its economic success, a model for other nations in Asia: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the support provided by the United States to the Asian Development Bank will be terminated if the Republic of China is denied full membership in the Asian Development Bank.

Mr. PATTERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PATTERSON. Mr. Chairman, this amendment was printed in the RECORD on page H6030 on July 29. It was known as the Kemp amendment. I have discussed the matter with the gentleman from New York (Mr. KEMP).

I believe both the majority and the minority accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PATTERSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr Chairman, I offer an amendment. It was printed in the RECORD on July 29, 1983, at page H6030. It is the last of a series, No. 9.

□ 1550

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ: page 41, strike out line 6 and all that follows through line 18.

Mr. GONZALEZ. My colleagues, I think this is a very, very important issue and in the big bill here we have something that I think none of us knowing the implications of it would want to be on the Record as being for: that is, the sleeper clause that remotes the teeth from the GAO watchdog.

My amendment strikes it.

It is very simply that it restores the authority of the GAO to audit the most important functions of the Federal Reserve.

As the bill stands, the Federal Reserve would be subject to a GAO audit only of its administrative and housekeeping functions. Anything that is really important is being exempted.

The bill treats the GAO in a way that is truly astonishing, circumscribing its authority so much as to make it meaningless. It is like fencing off the Pentagon's procurement program from any kind of independent scrutiny.

There is no basis whatsoever for cutting off the arms of the GAO with respect to auditing the Federal Reserve.

In the past 3 days, for example, the Fed has been pumping hundreds of millions of dollars into the foreign exchange market with the purpose of reducing the value of the dollar on the international markets, hundreds of millions of dollars just in 72 hours.

These transactions will amount to billions, yet the GAO under this bill and under this provisions will be exempt from checking those transactions out.

This is where the hanky-panky has been. The reason we have this provision in the law to give GAO the right to enter was as a result of the accusations some of us made just a few years ago about the criminal leaking of information of the Open Market Committee that resulted in windfall profits, illegal profits on the part of some of the financial institutions in New York.

As a result, we demanded an investigation. We did not have the right then to have the GAO do it.

The Chairman of the Fed came before our committee and said "We will do it." They conducted an in-house inquiry. We had to wait 2 years before we could even get the results of the report.

They hired the lawyer to do the investigating that was also the law firm for the banks, and he came out with a peculiar finding. I put it in the RECORD last year. He said, yes, this was bad, but it was not malicious. It was a mistake in the release of information.

Now, what we are doing here today, if you approve this bill unchanged, and my amendment addresses itself simply to deleting that section that hog-ties the GAO, if you vote, I think that you will have it very difficult in your own conscience to justify before an ultimately indignant electorate when the American people find out what is being done to them, and you and I are going to have to answer equally and coequally.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Louisiana.

Mr. ROEMER. I just want to tell the gentleman that I support his amendment. I point out in response to an earlier speech that those of us who oppose this IMF bill are not attempting to kill the IMF but are trying to improve it. I would also point out that if jobs are at stake the stated goal of the IMF is to impose austerity on every economy on Earth, and the first priority in that austerity is to reduce their imports.

That means the exports of Americans will be reduced and those 100,000 jobs in Massachusetts will be a lot less than 100,000 with the IMF quota.

I thank the gentleman for yielding.

Mr. GONZALEZ. Let me just say that if we exempt from GAO looking in and exerting accountability responsibility from the Federal Reserve with respect to its foreign currency operations we will abdicate our responsibility. Why is it that it is so sacred they should be exempted?

Particularly with what has happened just in the last 72 hours where for the first time it has been admitted publicly that the Federal Reserve has intervened massively in these foreign exchange currency markets. And here we are exempting them from any accountability.

We talk about how we hold control as Congress. Control over this agency,

but let me assure you that as minimal as it is, the language now contained, unamended, will remove any last vestige of hope of accountability to the Congress on the part of the Federal Reserve. All my amendment does is to reassert congressional power to exact accountability.

Mr. BARNARD. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I must speak in opposition to the gentleman from Texas well intentioned amendment. He might or might not be correct that the GAO should have augmented authority to audit the Federal Reserve's international transactions and the actions of the Open Market Committee. However, I must emphasize that this entire area was finely tuned in 1977 by numerous hearings and agreements and detailed bills that resulted in the Federal Banking Agency Audit Act of 1977. These entailed very specific understandings between the Chairman of the Federal Reserve Board, the Comptroller of the Currency, the Chairman of the Federal Deposit Insurance Corporation, the then chairman of the Banking Committee, the current chairman of the Banking Committee, the current chairman of the Committee on Government Operations, and the then chairman of the Subcommittee on Commerce, Consumer, and Monetary Affairs of the Committee on Government Operations, Ben Rosenthal. I now chair the latter subcommittee.

Without hearings on this matter of further exposing the Federal Reserve System to GAO audit, which the gentleman from Texas amendment would do, I fear we would needlessly enmesh the Federal Reserve in problems of communicating with other central banks, just at a time when that kind of communication is needed. If changes are to be made in this delicate area they cannot be made precipitously.

Present section 412 of this bill, H.R. 2957, is really a clarifying amendment to GAO authority that was and is intended to let the GAO look into bank regulators coordination of bank examination and supervision on an international level and not to look into monetary policy. It is in this bill only because Chairman BROOKS of the Committee on Government Operations, which has authorizing jurisdiction over the GAO and the Federal Banking Agency Audit Act of 1977, specifically, and Chairman ST GERMAIN and I agreed to its insertion in its present form, as really a technical change, without having to refer it to the Committee on Government Operations.

The letter from Chairman ST GERMAIN to Chairman BROOKS of May 23, 1983, expressing this agreement is part of my extended remarks. That letter, further, accurately expresses my intention to hold hearings on expanded GAO authority.

Finally, I must point out the committee report on H.R. 2957 stressed that "the safeguards incorporated—in section 412—are identical to those now governing GAO audits." This sentence thus refers specifically to the Banking Committee's intention to maintain the current exclusion of Federal Reserve monetary policy and foreign exchange operations from GAO audit.

Because of the extremely complex nature of what the gentleman from Texas is suggesting, I must respectfully ask my esteemed colleagues' amendment not be approved.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON BANKING,
FINANCE AND URBAN AFFAIRS,
Washington, D.C., May 23, 1983.

Hon. JACK BROOKS,
Chairman, Committee on Government Operations, Washington, D.C.

DEAR JACK: As you know, the House Committee on Banking, Finance and Urban Affairs reported out favorably Monday, May 9, H.R. 2930, the International Recovery and Financial Stability Act of 1983, and reported out Thursday, May 10, an omnibus bill, H.R. 2957, combining provisions relating to the Export-Import Bank, the International Monetary Fund and multilateral banks.

Both bills contain identical language clarifying the authority of the General Accounting Office to audit the financial regulator's performance in the area of international lending supervision, particularly with respect to cooperation and coordination among themselves and with various committees of international regulators. (Title III. Sec. 311 of H.R. 2930; Title IV, Sec. 412 of H.R. 2957.)

This Committee has been deeply concerned over a number of severe international lending problems for a considerable period of time. Last year beginning with the crisis involving primarily Mexico and Brazil, hearings were begun by the Committee on all aspects of international lending culminating in Committee action last week. During the course of those hearings, testimony was received from the Comptroller General on GAO's report of September 2, 1982, entitled "Bank Examination for Country Risk and International Lending," (GAO/ID-82-52). That report, interestingly enough, has its origin in two sets of hearings held in early 1977. In February 1977 joint hearings were held by subcommittees of our respective Committees on the jointly sponsored performance audit of the Federal banking regulators. The success of that survey and the outstanding cooperation of our two Committees was responsible, in large part, for the subsequent adoption by your Committee of H.R. 2176, amending the Accounting and Auditing Act of 1950 providing continuous authority for GAO to audit the regulatory functions of the Federal Reserve, Comptroller of the Currency and FDIC (P.L. 95-320—Federal Banking Agency Audit Act).

This Act has assisted both our Committees in discharging our responsibilities for the continuing oversight of Federal banking agencies and has been responsible for the development by GAO of an outstanding group of GAO personnel thoroughly familiar with banking terminology and issues. The support you gave our distinguished colleague Ben Rosenthal on that occasion was responsible for the passage of P.L. 95-320. During floor debate, I was pleased to state the following:

"Mr. ST GERMAIN. Mr. Chairman, the need for greater oversight on the activities of the Federal Bank supervisory agencies is painfully apparent and our colleague, the distinguished chairman of the Commerce, Consumer, and Monetary Affairs Subcommittee, is to be commended for bringing this audit bill to the floor.

"And I know that Ben Rosenthal joins me in commending Jack Brooks, chairman of the full Committee on Government Operations, who has so steadfastly supported the work of the subcommittee and who has worked diligently to clear the roadblocks from the path of this much-needed legislation. It has been an excellent display of teamwork within the committee and it is the kind of cooperation that makes legislation move." (Cong. Rec., October 14, 1977, p. 33783)

Immediately following the joint hearings, the Subcommittee on Financial Institutions Supervision, Regulation and Insurance conducted hearings on International Banks Operations at which time the GAO testified concerning the lack of country risk evaluation system. Subsequently, such a system has been established and GAO's evaluation of that system, pursuant to authority conferred by P.L. 95-320, became a part of this Committee's deliberations on international lending legislation.

It may be necessary at some point in the future to amend the Federal Banking Audit Act of 1978 as requested by Comptroller General Bowsher in his testimony April 20. A copy of his testimony is enclosed for your information. We do feel, however, for the time being that the clarifying language of Section 311 should be of invaluable assistance. I very much appreciate the willingness of the Committee on Government Operations, which is the authorizing committee for the General Accounting Office and which approved the Banking Agency Audit Act in 1978, to permit the Banking Committee to clarify GAO's right to audit certain international activities of the Federal banking agencies.

We know that should an amendment to the Act itself be necessary that we can rely upon the assurances given during mark-up by our good friend and colleague Doug Barnard, in carrying on the splendid tradition of excellence established by Ben Rosenthal, that the Commerce, Consumer & Monetary Affairs Subcommittee of Government Operations will give speedy and thoughtful consideration to approving such an amendment; and that, in the interim, he will indeed use the Sec. 311 mandate to monitor both GAO and the regulators to strengthen our present regulatory system insofar as international lending is concerned.

Your continued support and cooperation is especially appreciated. I look forward to a dialogue with you on the floor when H.R. 2957 is scheduled.

With kindest personal regards.

Sincerely,

FERNAND J. ST GERMAIN,
Chairman.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I rise, reluctantly, in opposition to the amendment of my good friend from

Texas (Mr. GONZALEZ). I do so, however, for several important reasons:

First, the gentleman's amendment would alter dramatically the General Accounting Office's current authority to audit the operations and activities of the Federal Reserve Board. This authority, and the limitations thereto, were carefully crafted after extensive hearings in 1978 by the Committee on Government Operations—the authorizing committee for the GAO. The language that the gentleman's amendment would strike is taken from Public Law 95-320 which was reported by the Government Operations Committee 5 years ago.

Second, the gentleman's amendment would permit the GAO to audit the most sensitive domestic and international financial and monetary policy decisions made by the Federal Reserve Board. The GAO has not requested this new authority. No hearings have been held by the GAO's authorizing committee on the specific need for or costs of this additional authority. No hearings have been held by the House Banking Committee on how such additional GAO authority would impact domestic monetary policymaking or the U.S. Government's relations with foreign central banks, foreign governments, and nonprivate international financial organizations. An amendment of this magnitude should only be considered by the House after thoughtful and comprehensive hearings by the relevant committees.

I want to assure my colleagues that the Government Operations Committee has long been committed to the effective operation of the General Accounting Office and fully sensitive to the needs of that office for appropriate access to information. The chairman of our Commerce, Consumer, and Monetary Affairs Subcommittee, Mr. BARNARD, who is also a member of the Banking Committee, has advised Chairman ST GERMAIN that hearings will be held to examine the need for additional GAO authority in the international financial area. There may very well be a need for such additional authority. But an amendment to provide the GAO with sweeping new authority should not be approved without comprehensive hearings. Accordingly, I urge a "no" vote on the Gonzalez amendment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding and I want to oppose the amendment also.

This is a very sensitive subject and the gentleman from Texas (Mr. BROOKS) has pointed out that it is very complicated. No hearings have been held on it. They are sensitive matters.

□ 1600

I think that the Fed at least should be protected on this and that there should be some hearings on it. It would surely slow down commerce between the Fed and central banks, foreign central banks.

So, I therefore must reluctantly oppose the amendment of the gentleman from Texas as being very mischievous. May I say it is also opposed by the Chairman of the Federal Reserve Board.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. I thank the gentleman for yielding.

He is chairman of the Subcommittee on Government Operations, on which I used to serve. I think he is aware of the fact that I was indeed responsible for the legislation that was adopted in Government Operations a few years back on this subject.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

The question is on the amendment offered by the gentleman from Texas (Mr. GONZALEZ).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GONZALEZ. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1610

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Texas (Mr. GONZALEZ) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ: Page 18, line 21, strike out "4,250 million" and substitute "500 million".

POINT OF ORDER

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment. The amendment proposes to change a portion of the bill that has already been changed in an amendment to strike out and insert new text contained in the St Germain amendment agreed to on Friday, July 29. It is not in order to either amend or move to strike language previously agreed to in an amendment to strike and insert new text (Deschler's chapter 27, section 29). I ask the Chair to rule the amendment out of order.

The CHAIRMAN. Does the gentleman from Texas (Mr. GONZALEZ) desire to be heard on the point of order?

Mr. GONZALEZ. Mr. Chairman, the amendment I am offering on page 18, line 21 is in that section in title III unamended. Mr. Chairman, if my memory serves me correctly, this amendment on this page in title III addresses a section that is unamended, that is unperfected.

The CHAIRMAN (Mr. PEASE). The Chair is prepared to rule.

The Chair would rule that the amendment offered by the gentleman from Texas (Mr. GONZALEZ) does deal with a portion which was amended by the gentleman from Rhode Island (Mr. ST GERMAIN) last Friday. And therefore the point of order is sustained.

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ: Page 31, line 16, strike out "ninety" and substitute "sixty".

POINT OF ORDER

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, the amendment proposes to change a portion of the bill that has already been amended in the St Germain amendment adopted earlier. It is not in order to amend the text of a bill that has previously been perfected by amendment (Deschler's ch. 27, sec. 27.)

I ask the Chair to rule the amendment not in order.

The CHAIRMAN. Does the gentleman from Texas (Mr. GONZALEZ) desire to be heard on the point of order.

Mr. GONZALEZ. Mr. Chairman, this one certainly on page 31 addresses itself to title IV in that portion that is amendable to amendment.

The CHAIRMAN (Mr. PEASE). The Chair is prepared to rule.

The portion of the bill sought to be amended by the gentleman from Texas (Mr. GONZALEZ) is the same portion which was amended earlier today by an amendment by the gentleman from Rhode Island (Mr. ST GERMAIN).

Therefore, the point of order is sustained.

The CHAIRMAN. Are there further amendments to the bill?

AMENDMENT OFFERED BY MR. RITTER

Mr. RITTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RITTER: Page 28, after line 8, insert the following:

STUDY

SEC. 308. Section 4 of the Bretton Woods Agreements Act is amended by adding at the end thereof the following:

"(d)(1) The National Advisory Council on International Monetary and Financial Policies shall conduct a study of the impact on the United States steel industry of steel subsidies by nations who are borrowers from the Fund.

"(2) Not later than 12 months after the date of the enactment of this subsection, the Council shall transmit a report to the President and both Houses of the Congress regarding the Council's findings and recommendations for appropriate action.".

Mr. RITTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The Chair would inquire whether the amendment has been printed in the RECORD.

Mr. RITTER. Yes, Mr. Chairman, the amendment has been printed in the RECORD on the 27th.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. RITTER) is recognized for 15 minutes in support of his amendment.

Mr. RITTER. Mr. Chairman, I am offering an amendment to bring attention to the problem of steel subsidies by countries which borrow from the International Monetary Fund and the impact on the U.S. steel industry.

The quota increase for the International Monetary Fund has generated considerable debate on the issue of foreign subsidization of commodities such as steel. Don Trautlein, chairman of the Bethlehem Steel Corp., the Nation's second largest steel producer, stated before the Senate Judiciary Committee and I quote:

If I were to single out the most troublesome source of imports today, it would not be Europe or Japan, the traditional major suppliers of steel imports to the United States. Instead, it would be the newly industrialized countries of the Third World. These countries have expanded their capacity rapidly in recent years in spite of the world oversupply. Such expansion has been financed by heavy borrowing with the backing of World Bank loans, other quasi-public financings and their respective governments.

If we wish to survive in the world steel market, we must address the problem of foreign subsidization of steel. A healthy domestic steel industry is not only critical in maintaining U.S. jobs, it is vital to a strong U.S. manufacturing economy and our national defense. However, little information is available for our Government to make an appropriate assessment of loans to countries where steel is being subsidized.

My amendment calls on the National Advisory Council to conduct a 12-month study on the impact on the U.S. steel industry, of steel subsidies by nations who are borrowers from the International Monetary Fund. The Council must report to the President and both Houses of Congress its findings and make recommendations on appropriate action.

The National Advisory Council is responsible for U.S. participation in the international financial institutions. It coordinates the policies and practices of all agencies of the U.S. Government which make, or participate in making, foreign loans, or, which engage in foreign financial exchange or monetary transactions. The Council is made up of the Secretaries of the Treasury, State, and Commerce; the Chairman of the Board of Governors of the Federal Reserve System; and the President of the Export and Import Bank. This amendment calls attention to a thorny problem which impacts powerfully on present and future modernization of our American steel industry and will provide the administration, Congress, and the International Monetary Fund with appropriate decision-making data.

I would like to add that I totally reject the idea that smoke stack industries are dead. They can flourish if they are modernized and if labor and management work together. Indeed, they provide a vast market for high-technology products, as well as large numbers of well-paying jobs. However, they will need an economic climate which does not contribute to the tendency of industrializing nations to treat steel as a showcase industry, to be subsidized whether or not it is profitable.

This amendment has the support of both the United Steel Workers of America and the House Steel Caucus. I urge my colleagues to support this amendment.

□ 1620

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent that the amendment be read.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will read the amendment.

The Clerk read the amendment.

Ms. OAKAR. Mr. Chairman, I rise in opposition to the amendment, to make a point necessary and I do so to really question my colleague, because no one is more supportive of the steel industry than I am. Yet I am very, very concerned about this amendment because, as the gentleman from Pennsylvania knows, I have, as a member of the committee, put in section 409, which addresses the U.S. loss in competitive parity with foreign subsidized competition in steel, copper or other metals and mineral industries, and I noticed, to be honest, the gentleman's vote on an amendment that gutted the whole bill; so I cannot help feeling a little bit paranoid about my section 409 in the bill which perfects the bill, and I do not mean to impugn the gentleman's motives, because I have a great deal of respect for him, but his amendment really is very redundant and it adds a little bit of flourish, but not much substance to my section, and I know when they get in conference, with all the difficulties we have had in putting in my section in the Banking Committee, as a member of that committee I know what is going to happen. They will say, "Oh, this is so embellished, we are going to cut the whole section." And if the gentleman's motive is to change the focus of the bill or gut the bill, or whatever it is, fine, but do not hurt the steel industry by adding this amendment.

Mr. RITTER. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Pennsylvania.

Mr. RITTER. I thank the gentlewoman for yielding.

Mr. Chairman, as I understand the Oakar section—and, as a matter of fact, I am a proponent of that section.

Ms. OAKAR. I know. And I appreciate it.

Mr. RITTER. I have no intention to see the Oakar section removed in conference. Nothing could be further from my mind.

But the gentlewoman's section addresses the loan application. I think that is excellent. I guess what my amendment does is, it also addresses the fact that a loan application can be made for purposes other than having to do with steel, and yet that country at the same time is subsidizing the steel industry. I offer this amendment to cover the possibilities that the loan application involved may not have anything to do with the borrowing country's subsidies of steel, but yet the loan application and the subsidization of steel are related in that, the borrowing country will end up with one pot of money for its various budgets.

Mr. LEACH of Iowa. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. If I may reclaim my time for a second, for a response, I will

be happy to yield to the gentleman from Iowa.

I really believe that this is redundant. I do not like getting up and opposing an amendment that indeed is related to supposedly protecting the steel industry. The fact of it is, I think, after thinking about the gentleman's amendment for quite some time, the gentleman has added to the section that I have already put in the bill. What the gentleman is doing is making the old section more prey to being cut out in the conference committee. The problem is that the gentleman knows and I know how many various lobbying groups have been trying to gut this section, including the Department of the Treasury. If this section is gutted in conference, then the bill is dead.

So my feeling is that if you are really a proponent of the steel industry, you do not want to put all of these little odds and ends that really muddy up the spirit of what is already in the bill and what is already focused in the bill.

I now yield to the gentleman from Iowa (Mr. LEACH).

Mr. LEACH of Iowa. Mr. Chairman, I will just say, very quickly, that the gentleman has proposed a terribly reasonable amendment, and if the gentlewoman insists in her opposition and prevails, this Member in the conference will be very biased against the gentlewoman's amendment. If, however, this is accepted, this Member would be much more sympathetic. This is very reasonable. The gentlewoman will be jeopardizing her own amendment if this amendment goes down.

Ms. OAKAR. It is fine to see the gentleman from Iowa to commit himself to protecting section 409. Therefore I have no further objection.

Mr. BARNARD. Mr. Chairman, will the gentlewoman yield so that I may ask a question of the proponent of the amendment?

Ms. OAKAR. I yield to the gentleman from Georgia.

Mr. BARNARD. Mr. Chairman, I would like to ask the gentleman from Pennsylvania (Mr. RITTER), if this amendment passes, does the gentleman intend to vote for the bill?

Mr. RITTER. I would say to the gentleman from Georgia, a good friend and a former colleague on the committee, that I do have certain problems with the bill.

Mr. BARNARD. Would this make it sufficient so that the gentleman could support it?

Mr. RITTER. Well, it would certainly increase my tendency to support it.

Mr. BARNARD. In other words, at this moment the gentleman is openminded?

Mr. RITTER. I would like to think I was.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. RITTER).

The question was taken; and the chairman being in doubt, the committee divided, and there were—ayes 29, nays 0.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer an amendment which was printed in the RECORD on August 2, 1983, at page H6356.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. PAUL: Page 19, strike out line 16 and all that follows through line 20, and insert in lieu thereof the following:

"USE OF THE FUND'S GOLD RESERVE

"SEC. 40. The United States Governor of the Fund shall request the Fund to sell part of the Fund's gold reserve in order to provide such amounts as are necessary to alleviate the current problems of international borrowers.".

The CHAIRMAN. It is the understanding of the Chair that the amendment has been printed in the RECORD.

The gentleman from Texas (Mr. PAUL) is recognized for 5 minutes in support of his amendment.

PARLIAMENTARY INQUIRY

Mr. VENTO. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. VENTO. Mr. Chairman, if something has been printed in the RECORD after the date on which there has been a time agreement, is it still considered in order for consideration today?

The CHAIRMAN. Yes. Any amendment now printed in the RECORD on any day is protected.

The gentleman from Texas (Mr. PAUL) is recognized for 5 minutes.

Mr. PAUL. Mr. Chairman, this is a rather straightforward amendment. It would save the American taxpayers a lot of money and it would require the IMF to use the assets they already hold. They now hold 103 million ounces of gold, and they do not use it. I am suggesting what they should do is instead of granting the quota increase, instead of the funding, to use the gold; sell the gold.

It is the largest hoard of gold by any one institution except for the United States, and they can afford to use the gold.

□ 1630

Giving the IMF a loan is like giving the richest kid on the block a loan. The bankers are in charge and they do not want to jeopardize what they have. I understand that. But the asset is there. There is absolutely no necessity to further fund the IMF when they already have a valuable asset.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, what use of the 103 million ounces of gold is being made now by the IMF? Certainly they are putting it to some use.

Mr. PAUL. Absolutely none. It is sitting there in case they have an emergency.

Mr. ROEMER. If the gentleman will yield further, what is the value of the 103 million ounces of unused, unclaimed, noncollateralized asset?

Mr. PAUL. This is an asset that earns no interest. They have an official policy, both our Government and the IMF. The official policy is that gold is no longer money, and yet they cling to it tenaciously and will not give it up. So it is a bit inconsistent.

Mr. ROEMER. If the gentleman would yield one more time, what is that gold worth at today's market price that the IMF has but does not use?

Mr. PAUL. This would yield them over $40 billion. They are requesting a total increase by all nations of about $30 billion.

Mr. ROEMER. So the gentleman is telling the House that they have more gold in possession now than they are asking for in increased IMF quotas?

Mr. PAUL. Absolutely, That is the case. They already have the assets, and this argument that they need it for an emergency contradicts their argument that we are in the midst of an emergency and, therefore, we must come to the American taxpayer but we cannot use the emergency funds, which is the gold.

Mr. ROEMER. If my colleague would yield further, are you suggesting here or requiring in your amendment that the gold has to be sold? Is there any other use that might be made of this asset?

Mr. PAUL. In this amendment, this would provide for the selling of the gold. This is in distinction to two other amendments I have which would give other options, where the gold would be returned to the host nations, or the gold could be used to convert the SDR's, which is a little more complicated, but in this case it is strictly to sell the gold to gain the assets.

Mr. ROEMER. Would I state the gentleman's case wrong, if the gentleman would yield further, by saying that the gentleman would prefer that all the options for use of the gold be analyzed, but given the procedural situation we have now, this is your only option to offer the amendment that requires the sale of the gold? Do I overstate the case, or does the gentleman think it ought to be sold?

Mr. PAUL. Yes. This is the case. This is a real option that we should look at, and hopefully we can get a

vote on this as an option where we do not literally have to come up with more cash, more funding from the American taxpayers, and they can use this asset.

Mr. ROEMER. Is it the gentleman's position, then, finally, that if we exercise the gentleman's option, the taxpayer would be served, that the burden on the taxpayer would be lessened and not increased?

Mr. PAUL. The gentleman is exactly correct. This would be a tremendous help to the American taxpayer, and the taxpayers of the world. As a matter of fact, the little people of the world are going to suffer from this because they have to fund these institutions which are beneficial to governments, socialist governments as well as the international banking institutions. So, therefore, this would help a lot of people.

Mr. ROEMER. I thank the gentleman.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, did I hear the gentleman correctly? Under his amendment the IMF would have to sell the gold to use it as collateral?

Mr. PAUL. Yes, but it does not mean that we sell it immediately. One of the arguments the gentleman brings up is the point about how they would sell it and what they would do, because those individuals who are negative on gold say, "Do not sell the gold because the gold price is going to drop down."

You know, we sold the gold from the IMF once before, a total of 25 million ounces of gold, and during that period of time of the sales of the IMF, gold prices went up nearly 40 percent.

Mr. KEMP. I agree with the gentleman. I just wonder, however, since we demonetized gold, as the gentleman pointed out in his colloquy with the gentleman from Louisiana, would it not be possible for the IMF to simply use the gold as collateral, issuing bonds backed by the 103 million ounces of gold resources?

Would that not be a more positive way to help countries deal with some of their debt problems through restructuring of their loans?

I favor an IMF but do not favor the pain, austerity, and no-growth policies of the IMF in dealing with our neighbors, friends, and allies in the Third World.

Mr. WYLIE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, yesterday I received a call from a gentleman who works for Merrill Lynch. He asked me what the prospects of passage of this bill might be today. I said to him I remain optimistic, but I think it is a close vote and I am not making any bets on it, and I would suggest that would be good advice to you.

He wondered if it might not be put off for a while, and if that might not be a good thing. I disagreed with him, and I said, "Why do you say that?"

He said, "Well, I am biased because I am on the Gold Market Desk of Merrill Lynch. I am a gold market analyst. For 6 months the gold market has been quiet. A delay would have a positive impact on gold prices."

I called Mr. Walt Chambers, who is with the Securities Industry Association of America in Columbus, Ohio, who is one of the leaders of that industry, and asked him about that.

He was very disconcerted about that observation. He said, "We sell bonds and stocks, too, and I will call Washington and get the position of the Securities Industry Association."

He did call, and they called me, and the Securities Industry Association says it is very important that we pass this bill today and that we not support such an amendment.

It suddenly hit me, Mr. Chairman, that a considerable amount of this opposition has come from those people we refer to as gold bugs, who are willing to risk a country default or two in order to advance their own position. I hate to say that, but it seems to me as if that is where some of it is coming from.

I say that that puts us in a very dangerous posture as far as the rest of the world and gold is concerned. Over three-fourths of all of the world's gold is produced in two countries, South Africa and the Soviet Union. They would be the main beneficiaries of any action which would restore us to anything that looked like or resembled the gold standard or would give gold any further value as far as this bill is concerned.

How much would this gold be sold for, for instance? Would it be sold for $430 an ounce or $860 an ounce? I think these are all questions which we have to ask ourselves. But in any event, I do not think that this is the proper time to give this kind of a role for gold and, therefore, suggest that we oppose the amendment.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the chairman of the committee, the gentleman from Rhode Island.

Mr. ST GERMAIN. I thank the gentleman for yielding.

Mr. Chairman, I think it is proper to remind the members of the fact that in the substitute that I offered on behalf of myself and the gentleman from Ohio (Mr. WYLIE) last Friday that was adopted overwhelmingly by the membership of this House, the amendment contained a section stating that the Secretary of the Treasury would certify to the Congress the fact that the IMF had taken every step possible, including looking into the possibility or probability of selling some of the gold, a portion of the gold, or indeed of using the gold as collateral.

So we have addressed the dilemma here that some people have about the fact that there is gold that is now owned by the IMF by stating that the IMF should indeed look to the use of this gold in a proper manner so as to not sell the gold in any way, shape, or fashion that would reduce the price of gold or adversely affect the markets.

We have got to remember that selling gold would have the same interest rate effect as if we had the Treasury borrowing necessitated by the quota increase. The Treasury sale of securities reduces the pool of loanable funds, and similarly, the sale of gold reduces demand deposits, which are also a source of loanable funds.

Mr. WYLIE. I thank the chairman for his contribution.

I just reiterate. I do not think we should sell it. I do not think we should use it as collateral. I do not think we should return to any form of a gold standard.

□ 1640

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Texas (Mr. PAUL).

The question was taken; and the chairman announced that the noes appeared to have it.

Mr. PAUL. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. DORGAN

Mr. DORGAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORGAN: page 28, after line 8, insert the following:

PROHIBITION ON RENEGOTIATION FEES

SEC. 308. (a)(1) Notwithstanding any other provision of law (including any other provision of this title), in order to avoid excessive debt service burdens on debtor countries, no banking institution shall charge, in connection with the restructuring of an international loan, any fee exceeding the administrative cost of the restructuring.

(2) Notwithstanding any other provision of law (including any other provision of this title), any fee which is authorized to be charged under paragraph (1) shall be amortized over the effective life of the loan involved.

(b) The requirements of subsection (a) shall take effect on the date of the enactment of this section. Each appropriate Federal banking agency shall promulgate such regulations as are necessary to further carry out the provisions of this section.

Mr. DORGAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

Mr. ST GERMAIN. Mr. Chairman, I would like to hear the amendment read. I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk concluded the reading of the amendment.

The CHAIRMAN. The Chair will inquire of the gentleman from North Dakota whether this amendment has been printed in the RECORD.

Mr. DORGAN. Yes, it has, Mr. Chairman.

The CHAIRMAN. The gentleman from North Dakota (Mr. DORGAN) is recognized for 5 minutes in support of his amendment.

Mr. DORGAN. Mr. Chairman, this amendment is very simple. In the first section, it prohibits any fees exceeding the administrative costs on restructuring of the debt between the debtor countries and the creditors, and, second, it provides that the administrative fees that are charged shall be amortized over the effective life of the loan involved.

I would like to use the time not only to encourage support of this amendment but to point out to the Members of the House some information that I have received in a study that was published internally in the International Monetary Fund in April 1983. The study is very interesting because the study suggests that there are some dimensions to this problem that we have not yet discussed on the floor of this House.

It seems to me that when you start down a road, you had better figure out how far you are going to go and what direction you are headed, and I do not think this House has done this with the IMF issue.

We are being told that we ought to commit ourselves to an $8.4 billion contribution to the International Monetary Fund. Some ask the question, how much more is there that we are going to be asked to commit to in the years ahead? That question has not been answered. Some allege that there is going to be a great deal more required of our Government and other governments in contributions to the IMF if the problem is going to be solved. The study I am going to refer to was provided to me—and I assume it has been provided to some others—was marked "Confidential," but it was published in April 1983 at the IMF, and I would like to read a couple of sections.

First, on page 5, in the introduction the economists provided a standard disclaimer: "These calculations are of course hypothetical and in practice, it is highly unlikely that the present cumulative access limits would be reached as a result of arrangements at the current" level, provided that repurchases are made on schedule, et cetera, et cetera, it states.

Then we have 35 pages of analysis. I would like to read from the conclusion on page 35. It says this:

> The foregoing discussion on the potential new access limits reflects the persisting strain in the international financial system and the continuing need of member countries for balance of payments assistance from the Fund. It is evident from the projections presented in the paper that the potential demand for Fund resources would put the Fund's liquidity position under considerable strain within the two years following the increase in quotas.

Let me read the last sentence again, because I think it is important:

> It is evident from the projections presented in the paper that the potential demand for Fund resources would put the Fund's liquidity position under considerable strain within the two years following the increase in quotas.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. DORGAN. Mr. Chairman, the question that I think we need to answer here is, where are we headed, and how far? Is this the first installment of a large debt that we are going to have to ask the American people to assume? Is the ultimate contribution going to be $18 billion in a 2-year period, or $20 billion?

If so, what does that mean to our credit markets? What does it mean to interest rates? What does it mean for housing?

I think we have to answer these questions, and it seems to me that saying, "Yes, let us go ahead with the $8.4 billion" without understanding that there are probably going to be further requests, is a very serious error.

This document comes from the International Monetary Fund. It makes an important point, and I think Members ought to consider this point when they vote on this bill. I think we should vote this bill down until we understand the dimensions of the problem.

Mr. Chairman, I would be happy now to yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I thank my colleague, the gentleman from North Dakota, for yielding.

As I understand it, the gentleman is telling the House that by a study done the IMF itself, they raise the possibility that this is just a first payment, this being "only" $8.4 billion, and that there might be other payments.

What kind of probability do they put on that? As I noticed it, the caveat to exemption said, "If repayment is made."

As I read the newspapers now, if they are any judge of economic sense, repayments are in great difficulty at present. So it seems that this possibility might be a probability, and this is just the first of many times we will come to the House floor and ask the taxpayer to put up money in this regard.

Mr. DORGAN. Well, it seems to me that is likely, and the caveat is in the introduction, a caveat that is likely to appear in any economic analysis. It says that these are hypothetical, and so on, but then it gets to the conclusion and it says:

> It is evident from the projections presented in the paper that the potential demand for Fund resources would put the Fund's liquidity position under considerable strain within the two years following the increase. * * *

The question is this: Where are we headed, and how far? The Members of the House do not know the answers to those questions, and I think we ought to know the answers before we vote affirmatively on the quota increase for the IMF. This bill is asking the American taxpayers to bail out the big banks. Members stand up here and say that is not true, but that is exactly what it is. You could dye that money purple and the Wall Street bankers would have purple pockets a month after the IMF gets the money because that is the circle it is traveling in.

Mr. Chairman, it is asking the American taxpayer to bail out the banks, and we do not know how far that bailout is going to take us.

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think it is important that we not lose sight of the amendment that is before us. I shall not take too much time. I ask my staff member to tug at my coattail here in about a minute and a half so I may address the amendment.

As to the quote from the study, it is from a very lengthy study, and the gentleman from North Dakota arrives at some very interesting conclusions. But, very frankly, when I began the hearings before the full Committee on Banking on this legislation back last year, one of the first caveats I came up with was to ask the proponents from the administration, the Federal Reserve Board, and the other witnesses as to the adequacy of the request for the increase and when they might think another request for an increase might be made.

I also made it very clear to them that we would consider the pending increase very carefully, and that they were on notice of the fact that increases in the future would be looked at with even more stringency than this one. And believe you me, I say to the ladies and gentlemen of the House, never before have such thorough hearings been held, and never before has such a study been made.

Certainly anything is possible. It is possible indeed that the gentleman from North Dakota might vote for the legislation at the conclusion of our en-

treaties. That is possible. Probably not.

The report from which he read an excerpt was one, as he himself stated, that took some very—well, let me quote from it:

These calculations are of course hypothetical and in practice, it is highly unlikely that the present cumulative access limits would be reached as a result of arrangements at the current annual or triennial access limits if repurchases are made on schedule.

Therefore, I want to make it very clear that the report is very hypothetical.

□ 1650

Now, let us get to the amendment itself, and I am not about to yield any time. Let us get to the amendment itself.

The amendment presented by the gentleman from North Dakota has to do with fees and the restructuring of fees. I think it is important that we recall the fact that we have indeed addressed this in three other areas already in our amendments and in the bill itself. The amendment that was offered by the gentleman from Rhode Island on behalf of himself and the gentleman from Ohio (Mr. WYLIE), the Schumer amendment, as well as title IV of the reported bill all addressed this issue. So as a result thereof, I think it is important to realize that we have not neglected this. We have addressed it.

Therefore, I would call for defeat of the amendment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I, too, want to oppose the amendment.

As the gentleman from Rhode Island just suggested, in the amendment which was offered last Friday we have language which prohibits banks from charging "Any fee exceeding the administrative cost of the restructuring, unless it amortizes such fee over the effective life of the loan."

Now, we have prohibited the loading up of front-end fees on rescheduling; but to suggest that there should never be any fee on rescheduling would discourage any rescheduling.

Mr. ST GERMAIN. That is not the case.

Mr. WYLIE. What we are trying to do is get these banks to reschedule some of these loans to these countries.

Whereas this is substantially the same amendment which we adopted last Friday, there is enough of a difference, it seems to me, that it would defeat the whole purpose of what we tried to do. If we do prohibit any profit, it would remove any disincentive for every borrower in the world to demand a rescheduling of his debt; so I think that the amendment should be defeated.

Mr. ST GERMAIN. Mr. Chairman, I want to thank the gentleman for his contribution.

I want to repeat that in the opinion of the chairman of the committee, we have sufficiently addressed this area of controversy. For that reason, I recommend defeat of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota (Mr. DORGAN).

The question was taken; and the Chairman being in doubt, the committee divided, and there were—ayes 24, noes 16.

So the amendment was agreed to.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DANNEMEYER: Page 19, line 16, insert "(a)" after "SEC. 40."

Page 19, after line 20, insert the following:

"(b)(1) Not later than eighteen months after the date of the enactment of this section, the Secretary of the Treasury shall establish a par value for the dollar in gold and thereafter shall redeem in gold at such price all Federal Reserve notes which are presented to the Secretary for redemption.

"(2) Subsection (a) shall not take effect until the date on which the Secretary of the Treasury transmits a notice to both Houses of the Congress specifying that the Secretary has complied with the provisions of paragraph (1).".

The CHAIRMAN. The Chair would inquire of the gentleman whether the amendment has been printed in the RECORD.

Mr. DANNEMEYER. It has been, Mr. Chairman.

POINT OF ORDER

Mr. ST GERMAIN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment on the ground that it affects matters beyond the scope of the legislation and is therefore not germane.

The bill directs the Secretary of the Treasury to take certain actions regarding the IMF international lending institutions, and affects lending by U.S. banks.

The amendment requires the Secretary of the Treasury to redeem gold for Federal Reserve notes. This, in turn, would require the Federal Reserve to manage the money supply with a eye toward keeping the market and dollar-convertible gold prices equal. Such a policy would be an abrupt shift from managing the money supply to maximize U.S. employment and price stability, as is now required by the Federal Reserve Act. Neither of these topics—the Secretary's responsibilities with respect to the value of gold, nor the monetary policy duties of the Federal Reserve—are covered by the legislation.

Thus, the amendment would require the Secretary of the Treasury and the Federal Reserve to take actions beyond the scope of the bill and far different in character than those required in the bill. I ask the Chair to rule the amendment out of order.

The CHAIRMAN. Does the gentleman from California (Mr. DANNEMEYER) seek to be heard on the point of order?

Mr. DANNEMEYER. Yes; I do, Mr. Chairman.

1. Deschler's Procedure, Chapter 28 § 14.4: "The rule on germaneness does not require that an amendment offered as a separate section be germane to the preceding section of the bill, but it is sufficient that it is germane to the subject matter of the bill as a whole."

2. Chapter 28 § 14.14: (Parliamentarian's Note) "The general rule that an amendment must be germane to the portion of the bill to which offered is limited by the proposition that an amendment in the form of a new section or paragraph need not necessarily be germane to the section or paragraph immediately preceding it." (8 Cannon's Precedents §§ 2932, 2935)

3. Chapter 28 § 14.10: "An amendment in the form of a new section need not necessarily be germane to the preceding section of the bill, it being sufficient, where the bill contains diverse subjects, that the amendment relate to the bill as a whole."

And the final point:

4. Deschler's Procedure, Chapter 27 § 27.14: "To a bill continuing authority under existing law to make contributions to an international financial organization and authorizing appropriations for those contributions, an amendment adding a further restriction on the use of U.S. contributions to those already contained in that law is germane."

For these reasons, Mr. Chairman, I would submit that the point of order is not well taken.

The CHAIRMAN. The Chair is prepared to rule.

The Chair agrees with the gentleman from Rhode Island that the matter covered by this amendment goes well beyond the scope of this bill and deals with the responsibilities of the Secretary of the Treasury in managing monetary policy of this country and also goes to the question of the powers of the Federal Reserve Board.

For that reason, the point of order is sustained. The amendment is not in order.

AMENDMENT OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DANNEMEYER: Page 19, line 16, insert "(a)" after "SEC. 40."

Page 19, after line 20, insert the following:

"(b)(1) Not later than eighteen months after the date of the enactment of this sec-

tion, the Secretary of the Treasury shall establish a par value for the dollar in gold.

"(2) Subsection (a) shall not take effect until the date on which the Secretary of the Treasury transmits a notice to both Houses of the Congress specifying that the Secretary has complied with the provisions of paragraph (1)."

The CHAIRMAN. The Chair would inquire of the gentleman from California whether this amendment has been printed in the RECORD.

Mr. DANNEMEYER. Yes, it has, Mr. Chairman; it has been printed in the RECORD.

POINT OF ORDER

Mr. ST GERMAIN. Mr Chairman, I raise a point of order against the amendment.

The CHAIRMAN. The gentleman from Rhode Island will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment on the ground that it affects matters beyond the scope of the legislation and is therefore not germane.

The bill directs the Secretary of the Treasury to take certain actions regarding the IMF, international lending institutions and affects lending by U.S. banks.

The amendment requires the Secretary of the Treasury to establish a par value for the dollar in gold. In order to do this the Secretary would have to take some action in the gold market to defend this action, such as agreeing to sell gold at its par value. This, in turn, would require the Federal Reserve to manage the money supply with an eye toward keeping the market and dollar-convertible gold prices equal. Such a policy would be an abrupt shift from managing the money supply to maximize U.S. employment and price stability, as is now required by the Federal Reserve Act. Neither of these topics—the Secretary's responsibilities with respect to the value of gold, nor the monetary policy duties of the Federal Reserve—are covered by the legislation

Thus, the amendment would require the Secretary of the Treasury and the Federal Reserve to take actions beyond the scope of the bill and far different in character than those required in the bill. I ask the Chair to rule the amendment out of order.

The CHAIRMAN. Does the gentleman from California desire to be heard on the point of order?

Mr. DANNEMEYER. I do, Mr. Chairman.

The distinction between this amendment and the one that this Member from California previously offered is very simple. I have deleted from the amendment that is now pending before the committee the paragraph or the clause that says: "and thereafter shall redeem in gold at such price all Federal Reserve notes which are presented to the Secretary for redemption."

That clause is gone.

□ 1700

It is the opinion of this Member from California that the deletion of that clause will eliminate the impediment which caused the Chair to previously rule that the point of order to the previous amendment should be and was sustained.

And the points of authority I would like to cite on behalf of that position are consistent with the points and authorities that I cited with respect to the previous point of order on that amendment.

The CHAIRMAN. The Chair is prepared to rule.

The Chair would rule that the distinctions between this amendment and the one previously offered are minor distinctions and that the reasoning advanced by the gentleman from Rhode Island (Mr. ST GERMAIN) on the point of order against the previous amendment also holds true for this amendment.

The point of order is sustained and the amendment is not in order.

AMENDMENT OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PAUL: Page 19, after line 20, insert the following:

"(b) The United States Governor of the Fund shall not consent to the increase in the quota specified in subsection (a) unless each country which contributes to the quota increase involved is given an amount of gold from the Fund which is equal, at a market related price, to the value of such country's quota contribution.

Page 19, line 16, strike out "The United States" and insert in lieu thereof "(a) Subject to subsection (b), the United States".

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. Before proceeding, the Chair would request that the gentleman from Texas and other Members who have more than one amendment to offer might consult with the Clerk's office and number the amendments just for ease of identification.

The Chair would inquire of the gentleman from Texas whether this amendment has been printed in the RECORD.

Mr. PAUL. It has, Mr. Chairman, on July 19.

The CHAIRMAN. The gentleman from Texas is recognized for 5 minutes in support of his amendment.

Mr. PAUL. Mr. Chairman, earlier I presented an amendment which would have required the sale of gold rather than the funding of the IMF through further appropriations from the American taxpayer.

This amendment is somewhat different because it does not affect the appropriation. The appropriation still would occur.

But we would do something with the gold. As was pointed out in the very short debate on the other amendment, this gold is just sitting there and the official policy is that gold is no longer money and that it is not to be made money anymore by the authorities. Yet it still is sort of bewildering to me how the antigold forces, those who detest the notion that gold might be money, cling to it.

So I would suggest: Let paper be money. Let Federal Reserve flow forth. Let SDR's flow forth and we will all be wealthy. Run the presses faster and we will be richer.

This is what we have been saying to the world. We are trying to convince the world that wealth comes out of a printing press.

If this be the case, why do we not be consistent? Why do we say one thing and then the next moment cling to the only asset the IMF has?

So I am suggesting here and requesting that our people be protected in this country by saying that if they have to cough up another $8.4 billion, simply do what the IMF and the U.S. Government has already done, really and truly demonetize gold, return the gold, sell it to the people. Let them make jewelry out of it. But do not let it stay in the IMF unless for some reason it makes the IMF more powerful, unless for some reason they need it as an emergency monetary asset.

My amendment would do this: If we gave $8.4 billion to the IMF they would return the appropriate amount of gold in terms at the market price. It is as simple as that, and other country that comes up with an appropriation, with their quotas, they would also receive the gold which is merely only returning the gold from where it came.

So to me this would conform with their policy. It would be a more appropriate use of gold. It would forever, once and for all, lay the fears at rest to those who fear that someday we may have honest money again, money that cannot be printed by the politicians.

So if you fear the day when the people control the money, you must support the position that IMF keep the gold.

The IMF would then have this full power.

So, to me, it sounds very reasonable. There are 103 million ounces of gold there. There is plenty of leeway. Even at today's prices there would be gold left over.

This would be very appropriate.

You know the terms we hear is that there is going to be an exchange of assets. Just think about it. The Fed prints up the money and we give it to the Treasury. The Treasury sends it over to IMF and they send us pieces of paper and they say that is a true transfer and exchange of assets.

That is a bunch of hokus-pokus. The true exchange of assets is if we give them paper and get some gold. Now, that is the exchange of assets that I would like to see. We need to get the gold back into the country and actually into the hands of the people, which I think would be proper. In a free society the gold is held by the people and they are given the choice of whether or not they choose to use it as money. It is never given to a central bank and giving it to an international central bank such as the IMF is even worse. Let us hope someday the gold will be given to its rightful owners, the individual citizens of the United States.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I yield to the gentleman from Louisiana.

Mr. ROEMER. There is a lot of misinformation about this IMF thing. I would point to the Washington Post editorial this morning where they have a long editorial supporting the IMF and they talk about Mexico.

This has absolutely nothing to do with Mexico. As Paul Volcker said before our subcommittee this morning, Mexico has already been handled.

But on the question of gold, does the IMF own the gold and, if so, where did they get it?

Mr. PAUL. They got the gold from the member countries. So we have at one time submitted that gold from our country, a certain percentage of it. So it would be in essence a smooth vehicle for returning the gold, since it has been demonetized, and that would in no way disrupt any of the wonderful, wonderful functions of the IMF.

So any of you who really like the IMF could support this because it does not disrupt any of the functions. It would merely be a true exchange of assets.

Mr. ROEMER. Is the gold owned by the IMF or is it owned by individual member nations who have loaned it to the IMF?

Mr. PAUL. I understand that the IMF owns this gold.

Mr. WYLIE. Mr. Chairman, I rise in opposition to the amendment.

I spoke briefly to this a little while ago.

But in 1981 and 1982 the gentleman from Texas and I served on the Congressional Gold Commission to establish a role for gold in domestic and international monetary systems. I know the gentleman from Texas would like for us to return to a gold standard, but I asked the Members who would be the major beneficiaries of having a role for gold?

The gentleman's amendment would suggest that the Fund would have to give up all its gold before they could get any part of this $8.4 billion quota increase. If the price of gold doubles from $430 an ounce to $860 an ounce as a result of this new role, then what does that do to the world markets?

We have a question of where we get into an inflation pattern all over again.

I would also suggest that three-fourths, and I mentioned this earlier, three-fourths of all of the world's gold is produced by two countries: South Africa and the Soviet Union. These two countries would be the major beneficiaries of returning to a role for gold at this time.

Now, to vote for gold and against the IMF quota increase it seems to me is to vote for the Soviet Union and for South Africa so that they would have a better role in international monetary affairs.

□ 1710

I submit that with all sincerity. I do not think that we should tie our economy to the quantities of gold which might be made available on the world market through the International Monetary Fund.

For these reasons, Mr. Chairman, I would oppose the amendment of the gentleman from Texas.

Mr. NEAL. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from North Carolina.

Mr. NEAL. On this subject of gold, our office has received a number of postcards from an organization called Free the Eagle.

I had not heard of that organization before, but all of a sudden a little newsletter turned up in my office. The author of it is a fellow by the name of Howard Ruff. He is trying to make some money, of course. He says, talking about "Free the Eagle," that his group may actually "block the big bank bailout." Then he says—and this is sort of interesting: "If we win, I am concerned about the consequences to the world." A modest statement. He goes on to ask, "Would our victory bring about a great depression?"

"It is possible," he says, but he shows no concern whatsoever about that possibility.

That might not be so bad for someone who could make a little money on gold.

The gentleman from Ohio made an excellent point earlier on this question of gold. This amendment would ask our IMF executive director to vote for something the IMF obviously is not going to do. So, we would make null and void our influence in the IMF. Certainly other countries would not go along with this; it makes no sense.

Actually, the gold held by the IMF helps to back up and protect our assets in the Fund. Instead of handing the gold back to 146 member countries, we would be a lot better off having it right there to keep the IMF strong.

Mr. WYLIE. I thank the gentleman for his contribution.

Mr. Chairman, may I say this was a distinguished committee, this Commission on Gold, to study the matter.

The Chairman of that was Donald Regan, Secretary of the Treasury of the United States. The report concluded, "The majority of us at this time favor essentially no change in the present role of gold."

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Texas (Mr. PAUL).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PAUL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1730

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The committee will resume its business.

The pending business is the demand of the gentleman from Texas (Mr. PAUL) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. GRAMM

Mr. GRAMM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GRAMM: On page 22, line 17, after the word "apartheid" add "and communist dictatorships".

On page 22, line 21, strike the word "practice" and all that follows through the word "labor" on line 23, and insert in lieu thereof the following: "practices of apartheid and communist dictatorship result in severe constraints on labor and capital mobility and other highly inefficient labor and capital."

On page 23, line 4, strike the period and insert in lieu thereof "or communist dictatorship."

The CHAIRMAN. The Chair will inquire of the gentleman from Texas (Mr. GRAMM) whether his amendment was printed in the RECORD.

Mr. GRAMM. It was printed in the RECORD on July 29, at page H6030, Mr. Chairman.

The CHAIRMAN. The gentleman from Texas (Mr. GRAMM) is recognized for 5 minutes in support of his amendment.

Mr. GRAMM. Mr. Chairman, in a very interesting section of this bill, on page 22, a very strong and cogent argument is made that apartheid represents an impediment to labor mobility and economic growth, creates balance of payments problems and, therefore, it contradicts the goals of IMF. IMF should not, therefore, lend money to nations which practice apartheid.

I think this is a very important concept. It brings into consideration the economic environment in a country in determining eligibility for IMF loans.

Mr. Chairman, I would like to expand on that concept by noting that if apartheid represents an impediment to labor mobility and, therefore, violates the objectives of IMF, and countries that practice it should, therefore, not be granted loans; surely that logic applies to an economic system which limits both capital and labor mobility. Therefore, recognizing the important—in fact, pathbreaking—idea embodied in this section of the bill, I seek to expand this section of the bill to include not only apartheid but also Communist dictatorship. Since Communist dictatorships limit both capital and labor mobility, impede economic growth and violate the objectives of IMF; I simply move to expand the concept embodied in the bill to include Communist dictatorships.

I, in the process, give my colleagues an opportunity to cast a real and clear-cut vote: Do you want to instruct our IMF representative to vote against lending the American taxpayers' money to Communist dictatorships?

Mr. PATTERSON. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from California.

Mr. PATTERSON. Mr. Chairman, the gentleman raises a point I think by adding that language, but he bars only Communist dictatorships. I think if you are making an economic argument, which the gentleman so stated, then would the gentleman support an amendment to not make loans to any dictatorship?

Mr. GRAMM. If the gentleman offers an amendment, I will certainly read it. I think it is very clear what I am talking about in terms of Communist dictatorship. It has a clear economic definition. Communist dictatorships impede the flow of labor and capital, and the system is clearly one of the greatest proven economic failures in history.

Mr. PATTERNSON. And the same would be true of a rightwing dictatorship?

Mr. GRAMM. It depends on what kind of economic elements exist in the economy in question. In general, dictatorships which limit political freedom also limit economic freedom.

If the gentleman would like to offer an amendment, I will be here on the floor and will be happy to debate it and, in all probability, support it. I have offered this amendment, and I ask the gentleman to support it.

Mr. PATTERSON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment really would not do what it is intended to do. Our subcommittee held hearings on this matter, and we had considerable testimony that showed that apartheid, the practice of apartheid, where virtually 70 percent of the population of a country is not allowed to be in any management position whatsoever, has a definite impact on the economy of such country. And that was the purpose of the apartheid amendment, to stop loans to countries that choose to practice economic waste through duplicity and exclusion.

By the addition of this amendment to specify that our Executive Director to the IMF will oppose loans to Communist dictatorships—perhaps the same economic argument can be made of all dictatorships.

If we are really trying to forge ahead and fight communism on every economic level, then this amendment would achieve exactly the opposite of its stated language. As a matter of fact, it would be very harmful to the United States' foreign policy and national security interests.

For example, the Soviet Union and its satellites such as Cuba, East Germany, Poland, and Bulgaria, are not members of the IMF, and receive no loans.

In addition to that, the amendment would hurt all U.S. efforts to wean countries away from the Soviet Union and to bring them over from the Communist system to a capitalist system.

The intent of the amendment, I am certain, was well meant. But we have very, very few IMF loans to communist countries, in the first place. In the second place, where we have tried to persuade countries to break away from Soviet domination, such as Hungary and Yugoslavia, we will lost this anti-Soviet battle. This amendment should be more specific as to country, because we have some communist countries that are of strategic defense value to us, and we are also weaning some of them away from the solid Soviet Communist bloc.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Chairman, I would just make the observation that there are at the present time three so-called Communist-oriented Eastern bloc countries. They are Yugoslavia, Hungary, and Romania.

May I say that I was at the International Monetary Fund meeting in Belgrade, Yugoslavia, and the Yugoslavians are certainly friendly to the United States. I do not think that they have ever been as friendly with Stalin and Stalinism and the Soviet Union as they are to our country.

Now, they have inherited their membership, I might say, also, through previous administrations. But from the perspective of having another Communist government in the IMF, I think sometimes it helps bring them closer to us, and in some cases they have, through the IMF, imposed market-type solutions to their own economic problems. And the IMF can, I think, in some cases, help influence Communist governments away from their typical state planning solutions.

I mentioned Yugoslavia, Hungary, and Romania because I think those three countries would really like to be friendly to the West, and as far as I know, they are the only three Eastern European Communist bloc countries which are now members of the IMF.

□ 1740

Mr. PATTERSON. The gentleman is absolutely correct. Hungary, Romania, and Yugoslavia are independent of the Soviet Union. They are using the IMF to move closer to the West. It seems to me it is very important that we not turn our back on those three countries. As a matter of fact, the IMF tries to teach Communists to become capitalists and this amendment would simply be extremely harmful.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to my chairman, the gentleman from Rhode Island.

Mr. ST GERMAIN. I want to extend my appreciation to the gentleman for yielding so that I might rise in opposition to the amendment.

Mr. Chairman, I must say the chairman of our subcommittee spoke very eloquently, as did the ranking member on the minority, and to those Members who are not on the floor at the moment, as floor manager of this legislation I would like to deliver a message via our excellent telecommunications network to the effect that we could certainly conclude this legislation early this evening if we could get more of our colleagues to join us. Now that you have been working feverishly at your desks long enough, you might want to come over here and join us in this wonderful debate. We will have a quorum present. We can avoid the quorum calls and really move this legislation along and give everyone an op-

portunity to hear the debate on both sides.

Mr. Chairman, I thank my colleague, the distinguished chairman of the subcommittee, for yielding this very precious time to me.

Mr. PATTERSON. I thank the chairman for his contribution to this debate, Mr. Chairman, let me finally point out that there is no Communist country, which is a member of the IMF, which is now in arrears on their loan. They are paying them back. We are weaning them away from Soviet-dominated Communist countries, and this amendment is very damaging to our national interest.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. GRAMM).

The question was taken; and on a division (demanded by Mr. GRAMM) there were—ayes 12, noes 35.

Mr. GRAMM. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1750

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Texas (Mr. GRAMM) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 242, noes 185, not voting 6, as follows:

[Roll No. 317]

NOT VOTING—6

Hall, Ralph	Jones (NC)	Udall
Heftel	Stokes	Weaver

□ 1810

Messrs. MORRISON of Washington, ZSCHAU, SMITH of Florida, and SMITH of Iowa changed their votes from "aye" to "no."

Messrs. EDWARDS of Alabama, ANDREWS of Texas, KOGOVSEK, and CLARKE changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. PORTER. Mr. Chairman, I support President Reagan's request that the Congress increase the U.S. participation in the International Monetary Fund by $8.4 billion.

My support for this increase, however, hinges on provisions of the legislation that will instill discipline in international lending practices of U.S. banks. In no way will I support an IMF bailout of financial institutions which have employed shoddy lending practices in the past. In other words, I will not support the additional money without strong requirements with respect to and restraints on foreign lending by U.S. financial institutions.

The requested increase—$5.8 billion to supplement the basic resources of the IMF, and $2.6 billion to the General Agreements to Borrow—comes after months of negotiating with the IMF and the other 145 member nations to replenish the IMF's resources to encourage balanced worldwide economic growth.

There is no question that commercial banks have overextended themselves in some lesser developed countries (LDC's) in the hope that commodity prices would remain artificially high due to inflation and that debtor countries would remain in a strong po-

sition to continue exporting products to foreign markets. These exports permitted the LDC's to use their commodities as collateral when negotiating loans with commercial banks. Unfortunately, given the LDC's high inflation and export-rich economic conditions of the past 7 years, some commercial banks abandoned prudent and accepted banking practices and overextended themselves in the LDC's. Once the rate of inflation was substantially reduced, thereby devaluing the LDC's commodities, exports by LDC's quickly fell off and the countries were unable to service their debts.

The funding increase request now before us will not provide money for debtor nations to directly repay loans made by the large commercial banks. The increase is a loan to the IMF, which, like all loans, will be repaid with interest to the United States. The loan will enable the IMF to continue to negotiate loans with member nations and to impose its stringent austerity programs to stabilize the economies of the LDC's seeking IMF support.

Mr. Chairman, the large commercial banks should be encouraged to return to more prudent loan practices, and this legislation provides for a market-oriented loan loss reserve requirement to provide economic disincentives for banks to enter into questionable loan agreements. The loan-loss-reserve provisions mandate that Federal agencies establish a uniform loan reserve standard and phase-in schedule for loans where there is a substantial likelihood that the loan will not be repaid as expected without additional borrowing or major restructuring. These loan loss reserve requirements provide incentives for banks to enter into more prudent loan agreements with debtor nations.

This legislation is not direct foreign aid because all 146 member nations, including the United States, are eligible for IMF loans. In fact, the United States and the United Kingdom are the two leading borrowers of IMF funds. The loans are usually 3 to 5 years at near market rates, currently about 10 percent. The IMF has never experienced a loan default and chances are excellent that it will repay our loan with interest.

Furthermore, increasing the U.S. share to the IMF will provide jobs to U.S. workers. Twenty percent of the manufacturing jobs in the United States can be directly attributed to exporting. Of the 26 current IMF programs, 19 have provided higher growth levels and increased imports in the first year of the program. In Mexico, for instance, estimated U.S. exports in 1983 with the IMF program is $11.9 billion, compared to estimated $4.9 billion without the IMF program. Clearly, the Congress must take advantage of as many export opportunities as possible given the fact that the recovery will soon be entering a stage in which exports will become an increasing dominant element.

Mr. Chairman, it is important to world economic stability that the United States join the other 145 IMF member nations in increasing its share of IMF funding. If we do not provide these funds, other member nations will withdraw support from the IMF and further imbalance world economic growth and the possibility of international monetary collapse could result. I urge my colleagues to support this legislation.

Mr. BEDELL. Mr. Chairman, I rise reluctantly today in favor of H.R. 2957 and only after thoroughly examining the alternatives to a quota increase and the consequences of failing to pass this legislation.

As a Congressman, my concerns lie not with big banks, but with the people, our constituents, and how they might be affected by worldwide loan defaults and an international banking crisis. While some say that they are willing to take the risk that such a crisis would not be precipitated by American rejection of a quota increase to IMF, it would appear that such action might force at least some nations into default as they are deprived of additional IMF assistance. Because it is impossible to forecast exactly how extensive a potential collapse might be or to what degree such defaults would damage the world economy, and because Americans have so much to loose in an extensive banking collapse, I must, in the best interests of my constituents, support a responsible action aimed at preventing extensive loan defaults.

It is my belief that the $5.8 billion quota increase and the $2.6 billion contribution to the General Arrangements to Borrow (GAB) authorized in H.R. 2957 represent just such a responsible and necessary action for several reasons.

First, the American economy is today, more than ever, dependent on world trade. It is estimated that in 1982, 40 percent of our agricultural products were sold abroad and 5 percent of our total civilian work force was engaged in manufacturing jobs for export. Even the most conservative estimates place the fall in GNP at 1.5 percent and the rise in unemployment at 0.5 percent if the LDC's are forced into default.

Major markets for U.S. agricultural exports include Brazil, Mexico, and South Korea, all of which have received IMF financing in the last year. In light of the severity of low domestic prices, large surpluses, and continuing financial problems, the consequences of failing to provide the IMF with funding would be particularly severe for the U.S. farmer.

In this era of increasing budget deficits and high interest rates, defaults would also mean even higher interest rates and higher deficits as American banks are forced to write off billions of dollars in loans and the Government meets the problems of unemployment with further budget outlays. While I do not believe defaults would result in the type of "economic catastrophe" prophesized by many, they most certainly would damage any chance for a sustained economic recovery in the United States.

Second, although many of my colleagues and constituents are opposed to this bill because they view it as a "bailout" of big banks with billions of dollars of the taxpayers' money, I am convinced that this is not the case. The IMF is not providing funds to countries to turn around and pay off commercial bank loans but only to finance essential imports while the country stabilizes its economy. It is also critical to emphasize that not only are commercial loans not paid back with IMF loans, but orderly economic adjustments require increased bank lending to troubled LDC's that are prepared to adopt serious revitalization programs. Commercial banks are lending, on average, $4 to debtor countries for every $1 IMF lends.

In addition, H.R. 2957 contains provisions which will help to provide a long-term solution to our current world debt difficulties. By requiring banks to report foreign lending more frequently, to spread the earnings from rescheduling fees over the effective life of the loan, to establish loan loss reserves, and to strengthen existing procedures for country risk evaluation, this bill forces banks to act more responsibly and openly when granting loans to developing countries in the future. As amended, H.R. 2957 also explicitly states that:

> The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to oppose where, in his judgment, the Fund resources would be drawn principally for the purpose of repaying loans which have been imprudently made by banking institutions to the member country.

Thus, I feel that a vote for this bill is not a vote intended to benefit the big banks. It is a vote to protect the farmer, the manufacturer, and the blue collar worker. Rather than a bank "bailout," I see this as a bank "bail-in," as a way of insuring that banks take some responsibility for achieving a workable solution to current world economic problems.

The fact that U.S. contributions to the IMF are not foreign aid, but loans made at near market rates, also makes this bill seem less sinister. The cost of a quota increase to the American taxpayer is not the $8.4 billion authorized by H.R. 2957, but is instead the difference between the interest rate at

which the United States borrows the money for the contribution and the rate at which it is loaned to the debtor nation. Let us not be mistaken too about the fact that the IMF serves the developed nations as well as the LDC's. The United States is the second largest user of the Fund's resources after Great Britain, drawing a loan as recently as 1978 to help meet balance-of-payment deficits caused by skyrocketing oil prices.

An increased quota contribution is the only method by which the IMF can safely obtain the funds needed to continue to fulfill its role in stabilizing balance-of-payment deficits. Although some advocate the sale of IMF gold reserves to finance further loans, I believe this proposal to be unsound because in the end, the Treasury Department estimates that the value of American gold reserves would fall by more than the $8.4 billion authorized by H.R. 2957. Approval of such a sale would require 85 percent member approval, support that would be difficult to obtain when a vote for gold sales would substantially reduce the quality of claims held on IMF by these same nations.

Finally, Mr. Chairman, I would like to point out that many aspects of this current debate are reminiscent of the debates on other issues that were perceived as bailouts. Precedents such as those loans made to Lockheed in 1971, New York City in 1975, and Chrysler Corp. in 1979, offer some evidence that countries such as Mexico and Brazil can possibly be saved from default with responsible loan programs.

I believe passage of this bill is important to the future of our world and national economies. It seeks serious and responsible solutions to the problems that we, as a Nation, fact today, while its alternatives offer little but further economic hardship for all Americans.

AMENDMENT OFFERED BY MR. BURTON OF INDIANA

Mr. BURTON of Indiana. Mr. Chairman, I offer an amendment.

The Clerk read the amendment as follows:

Amendment offered by Mr. BURTON of Indiana. Page 28, after line 8, insert the following:

OPPOSITION TO CONCESSIONARY LOANS

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"OPPOSITION TO CONCESSIONARY LOANS

"SEC. 46. The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to actively oppose and vote against the Fund providing any loan with a rate of interest, based on the maturity of such loan, which is less than the average rate of interest for loans of a similar maturity which are guaranteed by the Small Business Administration.".

The CHAIRMAN. The Chair would inquire of the gentleman if this amendment has been printed in the RECORD.

Mr. BURTON of Indiana. It has, Mr. Chairman.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair will advise the Committee that in the last 3 hours we have disposed of 14 amendments. There remain 56 amendments noted.

The Chair would appreciate the cooperation of the Members in expediting the business of the Committee.

□ 1820

Mr. BURTON of Indiana. Mr. Chairman, I wish the Chair had not told how many outstanding amendments there were before I talked.

I am going to be very brief.

Mr. Chairman, I was appalled when I found out that Communist and Third World countries are able to get loans through the IMF using American taxpayers dollars at rates 6, 7, and 8 percent below what our best businessmen can get in this country.

And what this amendment does very simply is it says that we instruct our IMF Representatives to vote against any loan which would give a Communist or Third World country a rate less than the SBA guaranteed loan rate.

In the last quarter of 1982, for example, the prime interest rate in this country was 12.8 percent. Most American small businessmen were paying an average interest rate of 15.4 percent. Yet the International Monetary Fund was handing out loan money, most of which came from American taxpayers, at an interest rate of 8.9 percent—6½ percent below the rate available to our own citizens in loans guaranteed by the Small Business Administration.

It is unthinkable that we would loan money to Communist and Third World countries at 6, 7, or 8 percent below what our best businessmen can borrow money for at our own institutions.

So, Mr. Chairman, I sincerely hope that the Members will look favorably upon this amendment because I cannot see bow Members can go back to their districts and justify voting for Communist and Third World loans at an interest rate much less than we can give to our people in this country.

Mr. ANNUNZIO. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. I thank the gentleman for yielding.

Mr. Chairman, I rise to support the gentleman's amendment and point out that on August 1 the FHA announced loans for FHA insured mortgages, 13½ percent. If you want to make a conventional mortgage in this country on a home, you pay 14½ percent. On consumer loans, our Americans are being asked to pay 25 percent.

Anybody who votes for this legislation I say shame, shame, shame, because the interest rates in this country are high and are going to go still higher if we pass out $8.1 billion to the IMF, moneys that the people of other countries will never see. It will be just an exchange between the leaders of those countries and the bankers. There will not be one nail produced or for that matter one house built.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I yield to the gentleman from California.

Mr. LEWIS of California. I thank the gentleman for yielding.

Let me see if I understand the issue here. Is the gentleman suggesting that if the IMF is to make loans to foreign countries, that indeed they must make them at an interest rate at least as high as the market charges business people and homeowners in this country for private loans.

Mr. BURTON of Indiana. Yes, I am.

Mr. LEWIS of California. I thank the gentleman.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. BURTON of Indiana. I yield to the gentleman from Connecticut.

Mr. McKINNEY. I thank the gentleman for yielding.

Is it not quite true that the gentleman's amendment says nothing about Communist countries, does not even mention Communist countries?

Mr. BURTON of Indiana. The amendment is very specific. It was read in its entirety. And I think the gentleman understands it.

The point of the amendment is very, very clear. And that is to make sure that those people to whom we loan money through the IMF do not get a better interest rate than our small businessmen in this country. And much of that money goes to Communist countries and the gentleman knows it.

Mr. McKINNEY. I would suggest since the gentleman's amendment about which I will have to say more later, if the Chairman will give me time, I would suggest that I think to try to bring in the last vote on the gentleman's amendment is, in fact, doing a disservice to the gentleman.

Mr. BURTON of Indiana. It is germane and the gentleman knows that.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

It is all well and good to make a plea such as this. And it sounds terrific. But let us look at the facts.

At the present time the interest rate charged on IMF loans depends on how they are funded. Loans financed from quota resources carry a charge of 6.6 percent. Loans financed from borrowed funds reflect the cost of these funds to the IMF, currently around 10 percent.

As a practical matter, loans are usually granted from both these funds and end up being given at approximately 9 percent.

Now, why do I oppose this amendment? It sounds great, oh, sure.

We know what is happening to our small businessmen. I have as many small business people, probably many more in my district, who have had problems, than the gentleman who offers the amendment.

But while I sympathize with their plight when the interest rates go up, I can also point out that high interest rates were one of the key causes of the problem we now face internationally. And I think it would be far wiser for us to explore ways of reducing the cost of capital for our small businessmen than to seek ways of increasing the cost of capital to these countries who are already strapped to the bone.

Two wrongs do not make a right. And in this instance I think that is about all we would be doing.

Now this has nothing to do with Communist nations, nothing whatsoever. As a matter of fact, the amendment that was adopted a few moments ago states that there will not be any IMF loans or we should oppose any IMF loans rather to any Communist nations. So that herring has now been cleansed. It is no longer red. It is a pure white herring.

Mr. McKINNEY. Mr. Chairman, will the gentleman yeild?

Mr. ST GERMAIN. I yield to my distinguished colleague from Connecticut.

Mr. McKINNEY. I thank the gentleman for yielding.

Mr. Chairman, we tend to get ourselves somewhat tied up here in what we say. We have talked about an $8.4 billion giveaway. We know it is not. We know it is a deposit that may not even be drawn on.

It was amazing to me on the day we had our last meeting over this subject, we threw away $6.4 billion in actual outlays on cotton PIK 2 hours later.

Most of the loans from the Small Business Administration are for 8½ years. Loans from the IMF usually average 3 or 5 years at the very most. One of the reasons that the nations of the world, particularly the LDC's, have not been able to pay back their loans is because interest rates have consumed too much of their capital.

Mr. ST GERMAIN. I am sorry, I must reclaim my time.

Mr. Chairman, I am sending an amendment up to the desk, an amendment to the amendment.

Mr. Chairman, if I ask that the amendment be read, does it come out of the 5 minutes in opposition to that amendment?

□ 1830

The CHAIRMAN. The gentleman may talk about the amendment but may not send the amendment to the desk under his 5 minutes in opposition to the pending amendment. The gentleman will have to wait until his 5 minutes are up.

Mr. ST GERMAIN. Mr. Chairman, I will be sending an amendment to the desk that will in fact instruct the Secretary of the Treasury and the U.S. Executive Director to the Fund to propose and work for the adoption of Fund policies regarding the rate of remuneration paid on the use of member's quota subscriptions and the rate of charges on Fund drawings to bring those rates in line with market rates. The Secretary of the Treasury shall report to the appropriate committees of Congress within 180 days of enactment on the progress made in implementing this provision.

This would, indeed, direct the Secretary and the Executive Director of the Fund to look into the matter that concerns the gentleman.

As I said, two wrongs do not make a right, but I think in this instance, if we could agree to this study, we could do it in a deliberate manner. We have held no hearings on the amendment pending. But the amendment that I shall offer to the amendment in a moment would, I think, cure the defect and certainly address the problem of the gentleman.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I do not believe that the small businessmen of this country who are going to be reading about this in the papers are going to be fooled by this amendment. It does not do anything, and the gentleman knows it.

Mr. ST GERMAIN. I do not yield any further.

The point will be that we are going to study the matter to determine if that which the gentleman contends in his explanation is valid, and, if so, indeed we will do everything possible to equalize the interest rates. For that reason, I shall be offering the amendment to the gentleman's amendment.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. ST GERMAIN TO THE AMENDMENT OFFERED BY MR. BURTON OF INDIANA

The CHAIRMAN. Does the gentleman from Rhode Island (Mr. ST GERMAIN) wish to offer his amendment?

Mr. ST GERMAIN. I do, Mr. Chairman, and I believe it is at the desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. ST GERMAIN to the amendment offered by Mr. BURTON of Indiana: On page 28, after line 8, in lieu of the matter proposed to be inserted insert:

"SEC. 46. The Secretary of the Treasury shall instruct the U.S. Executive Director to the Fund to propose and work for the adoption of Fund policies regarding the rate of remuneration paid on use of member's quota subscriptions and the rate of charges on Fund drawings to bring those rates in line with market rates. The Secretary of the Treasury shall report to the appropriate Committees of Congress within 180 days of enactment the progress made in implementing this provision."

The CHAIRMAN. The matter is not debatable.

The question is on the amendment offered by the gentleman from Rhode Island (Mr. ST GERMAIN) to the amendment offered by the gentleman from Indiana (Mr. BURTON).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. BURTON of Indiana. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. A quorum is present.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Indiana (Mr. BURTON) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 286, noes 136, not voting 11, as follows:

[Roll No. 318]

NOT VOTING—11

Dorgan	McCollum	Vander Jagt
Hall, Ralph	Pritchard	Waxman
Heftel	Stokes	Whitten
Jacobs	Udall	

□ 1850

Mr. PRICE changed his vote from "no" to "aye."

So the amendment to the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. BURTON), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. BETHUNE

Mr. BETHUNE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BETHUNE. Page 28, after line 8, insert the following:

REIMBURSEMENT FROM BENEFICIARIES OF QUOTA INCREASES

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"REIMBURSEMENT FROM BENEFICIARIES OF QUOTA INCREASES

"SEC. 46. (a) The Congress hereby finds—

"(1) depository institutions have charged excessive rates of interest on loans made to foreign countries;

"(2) such excessive rates of interest were often imposed in order to compensate for the declared high-risk rate of lending to such countries;

"(3) the United States Government, by increasing its quota contribution to the International Monetary Fund, has substantially reduced the risk of lending to those foreign countries which benefit from the increased resources of the International Monetary Fund;

"(4) such quota contribution by the United States Government will result in a considerable financial burden to the American taxpayer; and

"(5) permitting depository institutions to retain the profits earned from the excessive interest rates charged to such foreign countries results in unjust enrichment to such depository institutions in light of the increase in the United States quota contribution.

"(b) Each depository institution shall transmit a report to the Secretary of the Treasury specifying—

"(1) all loans made by such depository institution to any foreign country;

"(2) with respect to each such loan—

"(A) the rate of interest charged on such loan;

"(B) all service fees imposed on such loan;

"(C) the unpaid balance on such loan;

"(D) the total amount of interest collected on such loan; and

"(E) such other information as may be requested by the Secretary.

"(c)(1) The Secretary may examine the books and records of any depository institution in order to insure compliance with the provisions of this section.

"(2) The Secretary shall consult with the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and other appropriate Federal and State regulatory agencies in order to obtain information on foreign loans by depository institutions which may have been reported to such agencies.

"(d)(1) The Secretary shall determine which loans made by depository institutions or subsidiaries thereof have been extended, refinanced, or made more secure, or in any other manner affected by the increased United States quota contribution to the International Monetary Fund made pursuant to section 40.

"(2) The Secretary shall determine the interest rate charged, and the interest rate earned, on such loans. All such interest rates shall be determined in accordance with provisions of the Truth in Lending Act and the regulations issued pursuant to such Act.

"(e)(1) With respect to loans identified in subsection (d), the Secretary shall determine which loans have earned for the depository institution involved a rate of return which is greater than the rate of return which would have been earned by such depository institution if the principal amount involved had been lent in the United States to a corporate borrower with a rating of AAA for a similar maturity.

"(2) The amount determined by the Secretary to have been earned in excess of the amount which would have been earned from a domestic loan (as determined under paragraph (1)) shall be paid to the Treasury as a reimbursement for the increased quota contribution made pursuant to section 40 of this Act.

"(f) For purposes of this section—

"(1) the term "depository institution" shall have the same meaning given such term in section 19(b)(1)(A) of the Federal Reserve Act;

"(2) the term "loan" means any extension of credit to—

"(A) a foreign government or any agency or instrumentality thereof;

"(B) any entity owned in whole or in part by a foreign government unless United States persons own at least 10 percent of such entity;

"(C) any entity which is not more than 10% percent owned by United States persons.".

Mr. BETHUNE. (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The CHAIRMAN. The Chair would inquire of the gentleman whether this amendment has appeared in the RECORD.

Mr. BETHUNE. It has, Mr. Chairman. It was printed August 2, at page H6355.

The CHAIRMAN. The gentleman from Arkansas is recognized for 5 minutes in support of his amendment.

Mr. BETHUNE. Mr. Chairman, I, of course, could have had the Clerk read the entire amendment. This is an important amendment. I have discussed it with members of the committee. It is an attempt to address one of the serious concerns I have heard most

often throughout this entire debate, and that is, what are we going to do about the big banks lining their pockets with excess fees and interest rates that were exorbitant, given the fact that if this bill passes we are reducing the risk that they would have had, had they continued on with that particular loan.

So as I said, I have talked to many of my friends. The gentleman from Maryland (Mr. MITCHELL) and I discussed this. Our interests were shared in that we were concerned about the banks taking advantage of this situation and that this might be a bailout of the big banks. I have heard other Members talk about that.

We have seen instances where they were charging interest rates in excess of 20 percent and fees in addition to that.

This amendment is pretty simple when you get right down to it. It says that if this bill passes, the Treasury Secretary will determine the amount of profit that the banks made on these loans over and above the amount they would have made on a domestic loan, triple A rating, for a comparable maturity and they will be required to reimburse that amount to the Treasury.

Now, the idea here is pretty simple. It turns out that they did not have the risk that they told us they had, because we are coming in and bailing them out. They are benefiting from this circumstance; so it is only fair to the taxpayers that we do what we can to recover the unjust enrichment they would gain by this incident.

I got this idea when the gentleman from New York (Mr. SCHUMER) offered his amendment. He was concerned about the same point; so he was going to try to compel the banks, through this legislation, to stretch out their maturities and charge lower interest rates on prospective loans.

What I am saying is if we pass this quota increase, at a minimum we ought to go back and recover the unjust enrichment that the banks will pocket if you do not pass an amendment of this nature. That is all there is to it.

I think it is a good amendment. I think it treats the problem that I have heard more often than any other in this particular bill.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Illinois.

Mr. CORCORAN. Mr. Chairman, I thank my friend and colleague for yielding.

Let me propose a question to the gentleman. The gentleman from Arkansas and the gentleman from Illinois and many others, as the gentleman has pointed out, have registered objections to the pending legislation because it would appear, and we think it does, amount to a bailout for the big banks.

Is the gentleman suggesting that the adoption of this amendment would go a long way toward removing that objection to the bill?

Mr. BETHUNE. Well, I think it does. I think there are two other parties to the transactions; one, of course, being the lesser developed countries and the IMF is also a party to the transaction.

I have consistently argued all the way through that I do not think we put enough pressure on any of the parties. If the bill were defeated, we would get a better deal if we would go back and rethink this situation.

I do not have the opportunity to fashion the entire legislation, but I do have the opportunity to address this one problem. It is the one that I think is the burning issue for most Members, and so I ask you to support this amendment to correct the problem of unjust enrichment that will occur if we do not pass an amendment like this.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, I thank the gentleman for yielding.

I would say to the gentleman I think he has an excellent amendment. There may have been some confusion about whether the big banks were behind the bill and whether they are going to benefit from it. Of course, when the nine biggest banks in America are extended to the point of having loaned 222 percent of their capital to certain countries, then it would appear that they do have a strong interest in this bill.

I would like to say to the chairman and to the gentleman from Ohio (Mr. WYLIE) though, that when I made mention of the situation as I thought it was on July 26, I said then it certainly is the effort of the sponsors of this bill to come to the aid of the big banks. I did not mean them. I meant the outside sponsors and certainly not the legislative sponsors, such as the chairman, the gentleman from Rhode Island (Mr. ST GERMAIN) and the ranking member of the Republican Party on the Committee on Banking, two gentlemen for whom I have the greatest respect.

The gentleman's amendment would take away some of the unjust enrichment, some of the extra profit that the banks would make and make it more of a humanitarian effort on our part and on the part of the IMF to come to the aid of these countries. It would strengthen the IMF, strengthen its work in trying to bring solvency back to these countries that are so heavily in debt.

Frankly, I think one of the major obstacles to the bill and one of its major defects is that it embarks us and the IMF on a project of long-term involvement with the foreign affairs and with the foreign debts of these nations in the world that have become so heavily overextended.

I congratulate the gentleman on his amendment, and urge its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas (Mr. BETHUNE).

The question was taken; and on a division (demanded by Mr. BETHUNE) there were—ayes 45, noes 2.

So the amendment was agreed to.

□ 1900

AMENDMENT OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PAUL: Page 28, after line 8, insert the following:

NOTICE TO CONGRESS REGARDING BORROWING IN UNITED STATES CREDIT MARKETS

SEC. 308. Section 5 of the Bretton Woods Agreements Act (22 U.S.C. 286c) is amended by adding at the end thereof the following: "Neither the President nor any person or agency shall, on behalf of the United States, consent to any borrowing (other than borrowing from a foreign government or other official public source) by the Fund of funds denominated in United States dollars unless the Secretary of the Treasury transmits a notice of such proposed borrowing to both Houses of the Congress at least 60 days prior to the date on which such borrowing is scheduled to occur.".

The CHAIRMAN. The Chair will inquire of the gentleman from Texas whether this amendment has been printed in the RECORD.

Mr. PAUL. Yes, it has, Mr. Chairman, on August 2.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I am delighted to yield to the gentleman from Ohio.

Mr. WYLIE. We may be prepared to accept the gentleman's amendment if we can get an affirmative answer here.

To clarify one point of concern to the administration, does the gentleman's amendment apply only to a case where the IMF would issue securities in the private capital markets of the United States and borrow dollars, something the Fund has the authority to do today but has chosen not to do?

Mr. PAUL. The gentleman is correct.

Mr. WYLIE. The answer to my question is yes?

Mr. PAUL. Yes.

Mr. WYLIE. Then we are prepared to accept the gentleman's amendment on this side of the aisle.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I will be glad to yield.

Mr. ST GERMAIN. Under the circumstances, having heard the gentleman's explanation, I, too, am glad to join my ranking minority member in accepting the amendment.

Mr. PAUL. I thank the gentleman.

I will just close by saying that all the amendment does is that if the IMF decides to borrow in the capital markets they will be required to notify both Houses to this effect within 60 days before they issue these bonds.

As the gentleman from Ohio pointed out, they have not done this yet, but they have suggested they might with this amendment and we will be notified to that effect.

I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. PAUL).

The amendment was agreed to.

Mr. JACOBS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JACOBS: Page 28, after line 8, insert the following:

SALARIES OF EMPLOYEES OF THE FUND

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

SALARIES OF EMPLOYEES OF THE FUND

"SEC. 46. Notwithstanding section 40 of this Act, the United States Governor of the Fund may not consent to the increase in the United States quota in the Fund which is described in such section unless the United States Governor of the Fund is satisfied that the Fund has established, and will maintain, requirements that—

"(1) employees of the Fund (including the Managing Director, Executive Directors, Alternate Executive Directors, and the staff of the Fund) may not be paid at a rate in excess of the rate payable for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code; and

"(2) advances of salaries and other loans to employees may not be made at a rate of interest which is less than the rate of interest charged on loans (for one- to four-family dwellings) insured under title II of the National Housing Act on the date on which such advance or loan is made.".

Mr. ST GERMAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The CHAIRMAN. The Chair would inquire of the gentleman from Indiana whether this amendment has been printed in the RECORD.

Mr. JACOBS. It was printed on July 20, at page 20127, Mr. Chairman.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. JACOBS. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Am I correct that the gentleman's amendment was at page 20127 and it is in the RECORD?

Mr. JACOBS. The gentleman is correct.

Mr. Chairman, I do not know how many of you remember the Bill Mauldin cartoons in World War II, but there was one that showed a truck tearing down the road and one GI said to the other, "You would hurry home too if you worked in the supply dump."

Now, I want to draw your attention to the people who work in the supply dump of the IMF: the employees. There are about 1,500 of them. They are employed here in Washington, D.C. They pay no taxes on their salaries so the salaries I am going to cite are the taxable equivalent of a family of four paying American taxes. They can make up to $144,000. As a matter of fact, one-third of them, 500, make more than $67,500, which is what our man at the IMF draws under American law. That is, one-third of them would make more than that.

It is also true down at the supply dump that every, each employee can obtain a home mortgage loan at 5 percent. And what is it now? About 13 or 14 percent for every American citizen.

Now, this is a goose and gander amendment. It simply says that until the IMF gets its house in order and gets its own employees' hands out of this cookie jar this extra $8.4 billion or whatever it is that they want from the American taxpayers they cannot have it. But as soon as they get their salaries down to that paltry sum of $67,500, which happens to put a person in about the highest 4 percent of all American taxpayers making that amount of money, until they do that, and until they pay for mortgage interests exactly the same as the average American taxpayer is asked to make this sacrifice, they cannot have the money.

The amendment is just as simple as that.

About 10 years ago I had a friend running for office out home and he needed money he said pretty badly. So I made a contribution to him of $500, which would be more now, I guess.

A few days later some of his campaign aides wanted to have a little meeting. I went to that meeting over at the Indianapolis Athletic Club. While we were there having this meeting these fellows ordered big steak dinners and a couple of hookers of brandy, and I saw them sign my friend's campaign to it.

I had given $500 for him to try to get reelected. I did not give $500 for his campaign workers to stiffen up their vests and walk in and live high on the hog on somebody else's money.

As I see it, that is approximately the problem that we have here.

If you believe that this money ought to go directly to those worthy bankers or if, on the other hand, you believe this is actually going to help somebody else—and if you believe that I have some costume jewelry out in the car that I would like to show you—whatever you happen to believe, surely to God you do not believe that it ought to be siphoned off in the form of 5 percent mortgage loans to employees at the IMF, or for salaries that exceed the salaries of our representative to the IMF.

That is about it, and I yield back the balance of my time.

Mr. LEACH of Iowa. Mr. Chairman, I rise in opposition to the amendment.

I would only say to the gentleman that we are dealing with an international institution that hires largely Ph.D. professionals that hold the fate of the world economic order in their hands.

It is certainly true, as the gentleman points out, that they earn more than Members of this body. That is a grating phenomenon.

By the same token, if you compare their salaries with comparable people in the private sector, that is, the professional leadership of Citicorp, Bank of America, the various British, French, German banks, the fact is they are underpaid by comparison.

But I would certainly hate for this body to cast aspersions on the professionalism and the salary remuneration of such an important institution as the International Monetary Fund.

This is one of those votes that it is very tempting to say makes sense. It is very tempting to say no one should be paid more than we are. After all, we are elected by the American people.

But the fact of the matter is, even though this body may not choose of its own discretion to raise our salaries, I do not think that should imply that we should not pay fairly and competitively the people at the International Monetary Fund.

Mr. JACOBS. Would the gentleman be so kind as to yield?

Mr. LEACH of Iowa. I will be happy to yield.

Mr. JACOBS. I would like to make two points.

The first point is that they are not in the private sector.

Mr. LEACH of Iowa. That is true.

Mr. JACOBS. Nor are they in a public sector business that is showing very much success. And if they were in a private sector business and had the success that they have had in this enterprise they would be taking pay cuts because of the pressure of the private enterprise.

Mr. LEACH of Iowa. Let me reclaim my time.

As far as showing any success, the International Monetary Fund has never made a loan that has not been repaid.

The group that is showing the lack of success is this U.S. Congress that has a $200 billion deficit to our "credit"; it is the American banks, British banks that have overextended abroad. By comparison the International Monetary Fund has done very well in its lending.

I would stress also that in this legislation we are talking about aid to the United States of America. Not only are private sector exports aided but we are the second largest borrower from the IMF; only Great Britain has borrowed more.

These are career people, operating in a competent way, people of the highest integrity, people of the highest professionalism.

I do not know of any respected international economists who have concluded anything except that the IMF is doing a first-class job.

Mr. JACOBS. Mr. Chairman, will the gentleman yield for my second point?

My second point is I am not talking about Members of Congress, I am talking about our Executive Director in the IMF right now. He gets $67,500 a year. In the words of Montaigne, "Sit ye never so high upon a stool, yet sit ye but upon your own tail."

It is one more mouth to feed as far as I am concerned. I am talking about how much the people, who are asked to put up this money, make, the U.S. taxpayers. And about 97 percent of them are behind the $67,000 salary. Is the gentleman saying by the way, there are no outstanding loans from the IMF?

Mr. LEACH of Iowa. No. I am saying no loan has not been repaid from the International Monetary Fund. It is the most successful Bank that has ever existed in the history of the world.

The gentleman has quoted Montaigne; it is a high-minded quote, a high-minded intellectual that has brought forth this amendment. But this still does not deny the impact of the amendment itself, which is less than high minded.

Mr. JACOBS. One last point. I hope the gentleman will think of what I said for the next 30 seconds and change his heart and stand up for these folks that are paying this money and bring these salaries down a little bit.

The American taxpayers will bless you.

Mr. BROWN of Colorado. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman.

Mr. BROWN of Colorado. The gentleman has brought up an interesting point with regard to the U.S. borrowings. Perhaps I could get him to amplify it. Does the gentleman mean to say that the United States has been a net borrower, in other words, borrow more than it has put in or have the borrowings been something short of what we donated?

Mr. LEACH of Iowa. We have put in a fair amount of funds but of what we put in we also got a return of interest. The average direct annual cost to the taxpayer over the last several decades is something around $46 million. This represents the difference of what we would have received with other investments and what we actually received. But, to answer the gentleman's question, I would say we have borrowed far more than the income that we have lost; yes, that is correct.

Mr. BROWN of Colorado. But I take it we have not been a net borrower, at times we have used some of the money, if you permit that expression, used some of the money we have put into the Fund, but we have not become a net borrower. Is that a correct statement?

Mr. LEACH of Iowa. At the moment we have no borrowing outstanding from the Fund; the Fund generally concentrates on short-term lending.

Mr. BROWN of Colorado. Is it the gentleman's impression that the salaries paid at IMF are competitive with the private market? In other words, private bankers with similar responsibilities?

Mr. LEACH of Iowa. I think you would find that private bankers earn far more than employees of the IMF. It is Members of Congress that are competitively behind the eight ball in that regard.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. JACOBS).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. LEWIS OF CALIFORNIA

Mr. LEWIS of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEWIS of California: Page 18, strike out line 15 and all that follows through page 19, line 20, and insert in lieu thereof the following:

SEC. 301. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"DISCUSSIONS REGARDING A TEMPORARY QUOTA INCREASE

"SEC. 40. The United States Governor of the Fund is authorized to enter into discussions regarding a temporary increase in funding for the Fund or not more than $8,400,000,000.".

Mr. LEWIS of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The Chair inquires of the gentleman whether this amendment has been printed in the RECORD.

Mr. LEWIS of California. It has, Mr. Chairman.

This debate, Mr. Chairman, has been a long and extended one. At times quite contentious.

I understand from my other colleagues who have had dozens of additional amendments introduced into the RECORD that there is a loosening of that and we may be drawing close to a vote here. This amendment is designed to be a very moderate amendment attempting to address itself to the fundamental problem that is before us. That is, all of those who are responsibly looking at this difficulty are willing to concede that we do have, indeed, a legitimate crisis in the international marketplace. Indeed, a crisis that could create political problems for our own economy as well as the world economy. The debate has centered around what the actual solutions might be to those problems. Almost everybody agrees that the vast percentage of those difficulties before us are the direct results of an international recession, a worldwide recession that has created a shortfall in the money markets. Experts say that the problem is temporary. Indeed, as we come out of the recession, and all agree we are coming out of that recession, that the problem itself will be self-liquidating.

So, this amendment takes everybody at their word and recognizes that reality and suggests that the simple way to handle this difficulty is to first strike the money that is a part of this bill, then specifically instruct our Governor to the IMF to renegotiate a circumstance whereby we would provide the full amount of the money but it would be temporary money to be withdrawn at the time that the recovery takes place. It is an attempt to recognize that the IMF has not handled well the increments in the past. Just 2 years ago, for example, we raised their allotment by some 50 percent and today suddenly they cannot handle the problems out there. Yet, just 1 year ago, they made a long-term loan to India in the neighborhood of $5.5 billion. It is clear that there is a need to send a message to the IMF. It is clear that the opponents and supporters of this measure agree that this is a temporary difficulty.

So, we would take them, once again, at their word. We would strike the money initially, tell our Governor to renegotiate a temporary allotment of funds to the IMF until such time as the difficulty is overcome.

I yield back the balance of my time.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the last word. I rise in respectful opposition to the amendment.

Mr. Chairman, I rise to oppose the gentleman's amendment for the following reasons: To begin with, the amendment is inconsistent; as specified in section 17(b) of the Bretton Woods Act (22 U.S.C. 286 et seq.), all increases in GAB resources are permanent.

More important, however, is the issue of making the increase tempo-

rary. There are at least three points that concern me with this.

First, prompt and effective action by the IMF was a key factor in the containment of the past year's financial crises. We must insure that the IMF has sufficient resources available to react just as quickly to future events. Because the GAB requires consultation with all of its members before it can be used, and because a member who has loaned money to the IMF under the GAB can request early repayment if its own balance-of-payments situation deteriorates, I believe that the arrangement set forth in the bill before you—in which two-thirds of our contribution is via a quota increase—is a far better means of insuring that the IMF will always have available the resources needed to deal with a sudden emergency.

Second, if we choose to channel all of our increased support for the IMF through the GAB rather than a quota increase, our voting shares in the Fund will be reduced to less than 15 percent of the total. This will sharply reduce our influence in this critical international body, and eliminate our veto over such crucial decisions as future quota increases, SDR allocations, and the disposition of the IMF's gold stocks.

As well as some of the other amendments that have been adopted during the consideration of this legislation.

We would get weaker, weaker in the IMF.

Finally, given the aforementioned limitations of the GAB, a failure to permanently increase the U.S. quota might eventually force the IMF to borrow directly in the private capital markets our private capital markets. Such borrowing would occur, in large part, in the United States of America and would probably result in a far greater absorption of domestic savings than would Treasury borrowing to finance payments of the U.S. quota subscription.

And what would that mean? I think the gentleman from Ohio will agree with me, that would mean increased interest rates to all citizens of this country, our small business people, potential home purchasers, to each and every one of them. People wanting education loans, all over the place. For that reason, I have to oppose this amendment.

□ 1920

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Chairman, I do agree that if we do not have this quota increase that it will mean higher interest rates to American citizens.

In addition to that, 146 member nations, including the United States, have already agreed to this package and I do not think the United States can change the rules in the middle of the game.

If this amendment is adopted, then we would have to go back and renegotiate any quota increase which would, in effect, force the administration and 145 other nations, which had agreed to this quota increase 11 months ago, to suggest that it is only temporary.

Now may I respectfully suggest that the amendment shows the misunderstanding of what the IMF really does and how it works. The quota increases are in effect temporary in that they are reviewed every 5 years.

So for those reasons, Mr. Chairman, I join the gentleman in associating myself with the gentleman's remarks and in opposition to the gentleman's amendment.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

Just briefly, I think that the gentleman from California has been as thoughtful a critic of the IMF as anyone in this body, but I would stress the world economy is in an enormously precarious position. Now is not the time to take the risks involved in not facing up to our obligations.

I would say to my own political party, do we as Republicans want to jeopardize the chance of recovery in this country? Do we want to turn our back on the leadership of the White House on the single most important international economic issue that he will be dealing with in the next year?

Let us take the risk, to as great an extent as possible, out of international economics today. Let us be prudent about this bill and let us be prudent about this amendment and defeat it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LEWIS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. LEWIS of California. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1930

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from California (Mr. LEWIS) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

□ 1940

AMENDMENT OFFERED BY MR. CORCORAN

Mr. CORCORAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CORCORAN: Page 28, after line 8, insert the following:

BENEFICIARIES OF THE QUOTA INCREASE

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"BENEFICIARIES OF THE QUOTA INCREASE

"SEC. 46. The Secretary of the Treasury shall transmit a report to the Congress specifying—

"(1) the total amount of new funding which will be provided by the Fund as a result of the United States quota increase specified in section 40; and

"(2) the countries which will receive loans as a result of such quota increase.".

The CHAIRMAN. The Chair will inquire, is the amendment printed in the RECORD?

Mr. CORCORAN. Yes, it is, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes in support of his amendment.

Mr. CORCORAN. Mr. Chairman, I have several amendments that are contained in the CONGRESSIONAL RECORD. However, I intend to only offer two of them.

This is one, Mr. Chairman, which I suspect will find favor with the leadership of the committee. It relates to what would happen in the event, over my objection, that title III of the pending bill would be adopted by this House, ultimately by the other body, and signed by the President.

I would prefer, of course, that we would now have the information as to the countries involved that will be participants in the new funding that will be available through the efforts of the United States and the other member countries of the International Monetary Fund.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Chairman, we have just had a chance to look at the amendment on our side, and we think the amendment is superfluous, but if the gentleman is determined to have his amendment adopted, we will agree to support it.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield to me?

Mr. CORCORAN. I yield to the chairman of the committee, the gentleman from Rhode Island.

Mr. ST GERMAIN. I thank the gentleman for yielding.

Mr. Chairman, is this the amendment that would direct the Secretary of the Treasury to report to Congress the total amount of new funding that will be provided by the IMF due to the quota increase, and which countries will receive loans resulting from the increase?

Mr. CORCORAN. It is.

Mr. ST GERMAIN. Is that an accurate description?

Mr. CORCORAN. Yes, it is.

Mr. ST GERMAIN. Under the circumstances, if the gentleman would like to revise and extend his remarks, I would be prone to accept the amendment.

Mr. CORCORAN. I thank the chairman of the committee, the gentleman from Rhode Island, and the gentleman from Ohio for their support for my amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. CORCORAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CORCORAN

Mr. CORCORAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CORCORAN: Page 18, strike out line 17, and all that follows through page 19, line 3.

Page 19, line 4, strike out "(3)" and insert in lieu thereof "(1)".

Page 19, line 15, strike out "(4)" and insert in lieu thereof "(2)".

Page 19, strike out line 16 and all that follows through line 20 and insert in lieu thereof the following:

"SEC. 40. The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to encourage the Fund to assist foreign countries to renegotiate existing loans in order to establish more favorable terms for such loans.

The CHAIRMAN. The Chair will inquire, has this amendment been printed in the RECORD?

Mr. CORCORAN. Yes, it has, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized for 5 minutes in support of his amendment.

Mr. CORCORAN. Mr. Chairman, as I indicated during the consideration of the previous amendment, this is the second of the two amendments which I intend to propose to the Committee of the Whole House. This, Mr. Chairman, however, is clearly a controversial amendment because it goes to the heart of title III of the pending bill.

With the adoption of the previous amendment, Mr. Chairman, we will ultimately learn who the beneficiaries are of the quota increase amounting to some $5.8 billion. It seems to me, Mr. Chairman, that we ought to, instead of getting this information after the United States coughs up some $8.4 billion to assist the International Monetary Fund, learn in advance of the participation of the U.S. Government in the expansion of the quotas and in the assistance to the general arrangements to borrow fund, the emergency fund, at the International Monetary Fund itself.

We should know in advance, and make contingent upon our support for this legislation, all of the information that would tell us who the new beneficiaries are going to be, that would tell us which loans are sour, which loans are potentially in default, and where it is that there is, in fact, a problem.

The great difficulty, Mr. Chairman, that I have with the pending legislation is that we are not given the kind of information so that we would know the nature and the detailed, specific information about the loans that are in difficulty. That is why I have offered this amendment.

I do not strike title III. That is an amendment that the Committee of the Whole House has considered previously and has rejected. There are a number of good features in title III of the pending bill which will enable us to have more information about the nature of the U.S. participation in the International Monetary Fund itself, but the problem is, we do not know the new borrowers, we do not know the loans that are near default and that may, indeed, be renegotiated or may, indeed, be assisted in some way or other if this pending legislation goes forward.

I do not serve on the Banking Committee. As a matter of fact, Mr. Chairman, by virtue of the way in which the debate has been handled, with the cutoff in time and the limitation on the number of amendments and the debate thereto, I intend at some point in the near future, Mr. Chairman, to offer an amendment to the rules of the House to make every Member of the House ex-officio a member of the Banking Committee so that we could all get recognized, and consider, and debate, and participate in this kind of legislation.

It seems to me, Mr. Chairman, as I look at this, that we ought to get the information. I know, for instance, Mr. Chairman, that if I were a member of the board of directors of a community bank back in my district and somebody came in, the professional people at the bank, the president of the bank, and the others, the loan officers, and said: "We need to renegotiate these loans. We have problems with this particular loan," I would have a lot of questions to be answered. I would have a fidiciary responsibility to make sure that if we were going to extend the commitment in some way or other to a borrower from the bank that we would have the information, that we would know who the borrower is.

Today we cannot find out who the borrowers are that are going to participate as a result of the expansion of the quotas.

Mr. Chairman, that brings me to another disadvantage in the pending legislation.

We are told that we have an emergency. We are told that there is a crisis. We are told that there are a number of lesser developed countries who may have notes in default, but we are never told who they are. We are never told in any detailed way either the magnitude of the loans in question or the people who are signatories to those loans. We are never told which specific banks in the United States have sour loans and need to get the assistance that is provided in this legislation.

In fact, what we do with the $8.4 billion is not provided just for the emergency but, rather, we put the major portion of the $8.4 billion, $5.8 of that amount, into an expansion of the quotas. It means that under the guise of dealing with the emergency, we expand the program. We are going to have new countries participating in the largesse of the International Monetary Fund. We are going to have additional banks involved.

Mr. Chairman, if the crisis were the problem, then the way to deal with that is through the GAB account and, of course, we do that, but only to the extent of $2.6 billion in the legislation before us.

So, Mr. Chairman, we have had many hours of debate, many hours of consideration. I think it is time to send this legislation back to the drawing board. That would be the effect of my amendment, and I hope it is adopted.

□ 1950

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the profferor of the amendment in his concluding phrase stated, indeed, the intent of his amendment, to wit, to send it back to the drawing board, because what the amendment does is to strike the IMF funding. No matter how you try to dress that one up, that is the end of the legislation.

Every argument that has been made on behalf of the legislation still stands and, of course, many have listened to those arguments against; but I think at this point in time most of the Members as we approach the conclusion of the consideration in the amendatory process have pretty well decided which way they are going on this legislation.

I think they have heard from their constituencies pro and con and I think they have made up their minds. I feel that many of them will look at the improvements in the legislation and realize that they do not want to have to think of themselves: "Gee, if I vote against this legislation, if it fails, I will be responsible for the consequences."

I do not think there are too many Members that want to feel that way. In fact, many of those Members who are going to vote against this are probably hoping against hope and praying on bended knee that the legislation will, indeed, succeed because even they realize that the consequences of failure of this legislation would really and truly ruin the economic recovery that we all hope is occurring in this country at this point in time; but just as important, the economic recovery that we hope is happening internationally at this time; so for those reasons, with all due respect, because of my high regard for the gentleman, I have to oppose the amendment.

I would say to the gentleman as to the change of the rules—I thought the gentleman was running for the Senate—that the gentleman wanted to change the Senate rules. A fellow named JAKE GARN might want the gentleman on his committee, if he were fortunate enough to be elected.

We would love to have the gentleman from Indiana on our committee; but very frankly, we have so many Members on it now, we probably have almost a majority of the House.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I am happy to yield to the gentleman from Iowa.

Mr. LEACH of Iowa. Mr. Chairman, the gentleman properly points out that this amendment goes to the heart of the bill. It would gut the bill; so I think it is fair to take a little bit of perspective. This deal that has been struck by the President of the United States is a conservative deal done by a conservative President to conserve the world economic order.

I think we have to realize that we are putting in about 19 percent of the total funding package. This is the lowest percentage addition the United States has given to any international body in the postwar history of this country.

It is very prudent; let us not take the risks involved in turning our back on the IMF and going forward with this amendment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, this amendment would, indeed, gut the bill and I oppose it.

The IMF is important as a catalyst for world trade and commerce. I think this was best said in an editorial in the Columbus Dispatch, which is a conservative Republican newspaper, published in my district, the second largest district in Ohio.

It says:

Strengthening the IMF is important to the United States for several reasons. One of the most important reasons is that the loaned money enables borrowing nations to safeguard their own economies. Strong—or at least stable—foreign economies are absolutely essential to the well-being of the U.S. economy since this nation exports so much of the goods it produces to consumers overseas. If foreign consumers cannot afford to buy U.S. goods, American production and employment will suffer.

In short, the money the United States contributes to the IMF works for the American citizen. Not only is interest paid on the loans, but the U.S. money helps prime the pump of international trade which results in jobs, production and tax revenues benefiting all Americans.

Mr. Chairman, I oppose the amendment and thank the gentleman for yielding.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. CORCORAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. CORCORAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 2000

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Illinois (Mr. CORCORAN) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 174, noes 249, not voting 10, as follows:

[Roll No. 319]

NOT VOTING—10

Biaggi	Hall, Ralph	Stark
Edwards (AL)	Heftel	Stokes
Ford (MI)	Long (LA)	
Forsythe	McCollum	

□ 2020

Mr. VANDERGRIFF and Mr. LENT changed their votes from "aye" to "no."

Messrs. GRAMM, HERTEL of Michigan, WISE, DAVIS, RAHALL, and NIELSON of Utah, and Ms. KAPTUR changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 2030

AMENDMENT OFFERED BY MR. PHILIP M. CRANE

Mr. PHILIP M. CRANE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PHILIP M. CRANE: Page 28, after line 8, insert the following:

PAYMENT OF QUOTA INCREASE

SEC. 308. The Bretton Woods Agreement Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PAYMENT OF QUOTA INCREASE

"SEC. 46. The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to propose and work for the adoption of an amendment to Article III of the Articles of Agreement of the Fund to provide that the balance of any quota increase shall be paid by member countries in United States dollars, German marks, French francs, British pounds, or Japanese yen.".

The CHAIRMAN. The Chair will inquire of the gentleman from Illinois (Mr. PHILIP M. CRANE) whether this amendment has been printed in the RECORD.

Mr. PHILIP M. CRANE. It has been printed in the RECORD, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois is recognized for 5 minutes in support of his amendment.

Mr. PHILIP M. CRANE. Mr. Chairman, I will not consume time. I know Members have been here long and have labored considerably on this bill already. I have already cleared this amendment with the distinguished chairman, to whom I will be happy to yield at this point.

Mr. ST GERMAIN. If I understand the gentleman's amendment properly, to make it very easily understandable to all, this is the amendment that says we should work for, and propose, and hope that, in the future, monopoly money will not be used but real money; is that not correct?

Mr. PHILIP M. CRANE. That is precisely correct.

Mr. ST GERMAIN. Under the circumstances, I am happy to accept and join the gentleman in this amendment.

Mr. PHILIP M. CRANE. I thank the chairman.

Whether monopoly money or toilet paper money, it seems to me that all of the members of the IMF who make contributions should do so in convertible currencies, and the currencies designated in the amendment are the only ones that are in fact convertible. As a result, it is a very easy thing for some nations to urge increases in the contributions by member nations through the International Monetary Fund when in fact they are making meaningless contributions.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PHILIP M. CRANE. I yield to the gentleman from Ohio, the distinguished ranking minority member.

Mr. WYLIE. Mr. Chairman, the gentleman from Illinois did me the courtesy of discussing this amendment with me previously, and we are happy to accept it on this side of the aisle.

Mr. PHILIP M. CRANE. I thank both gentlemen.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. PHILIP M. CRANE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 28, after line 8, add the following:

SEC. 308. Consistent with the objective of sustaining worldwide economic growth and recovery set forth in this title, section 3 of Public Law 96-389, the Bretton Woods Agreements Act Amendments of 1980, is amended by striking it in its entirety and inserting in lieu thereof the following: Beginning in fiscal year 1985, the total budget outlays of the Federal Government shall not exceed its receipts.

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The Chair will inquire of the gentleman from Pennsylvania (Mr. WALKER) whether this amendment has been printed in the RECORD.

Mr. WALKER. It has been printed in the RECORD of July 29, on page 21753, Mr. Chairman.

POINT OF ORDER

Mr. ST GERMAIN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, my point of order is that it relates to a balanced budget for the United States and is therefore not germane to that part of the legislation before us.

Title III of the legislation provides for U.S. contributions to the IMF, as well as certain conditions and restrictions of those contributions and on lending by U.S. banks. The title does not address the far broader issues of overall Federal Government spending and taxing raised by this amendment.

The amendment also has a different fundamental purpose from title III, in that it seeks to impose limitations on aggregate receipts and expenditures of the Federal Government, which has nothing to do with the purposes of the IMF legislation.

The mere fact that previous nongermane amendments dealing with budget outlays and receipts have been attached to IMF legislation in past Congresses does not make the amendment germane. The amendment must be germane to the bill, not to the underlying law being amended in the bill.

Deschler's Procedure, chapter 28, section 27.

I ask the Chair to rule the amendment out of order.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. WALKER) wish to be heard on his point of order?

Mr. WALKER. Yes, I do, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized for that purpose.

Mr. WALKER. Mr. Chairman, the amendment that I have placed before the House relates precisely to the law to which this particular piece of legislation speaks. And let me also cite Deschler's Procedure. Deschler's Procedure, 28.55, says that a bill amending several sections of an existing law may be sufficiently comprehensive to

permit amendments which are germane to other sections of that law.

That is precisely what I am doing here. The language of this amendment relates to balanced budget language that is in the present law. This bill amends several sections of that law. So, therefore, this particular amendment is entirely germane to that which is before us.

Deschler's Procedure also says, in section 28.57, to a bill amending a law dealing with several subjects within a definable class, an amendment further amending that law to add another subject within the same class is germane.

This again is the same subject area. We have balanced budget language which exists in the present law. This is in the same class. So, therefore, it seems to me that under precedents of the House it is entirely germane to the bill that we are considering.

The CHAIRMAN (Mr. PEASE). The Chair is prepared to rule on the point of order.

Although the balanced budget provision of law which would be amended by this amendment was originally added to the Bretton Woods Agreement Act as a nongermane Senate amendment in the 95th Congress and was subsequently amended in a similar bill in the 96th Congress, the pending bill does not relate to the entire Federal budget.

The Chair rules that the amendment must be germane to the pending bill, it not being sufficient that the amendment relate to a nongermane provision of a law being amended by the pending bill.

Therefore, the Chair sustains the point of order.

Are there further amendments?

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 28, after line 8, add the following:

SEC. 308. Consistent with the objective of sustaining worldwide economic growth and recovery set forth in this title, Congress reaffirms its commitment to the mandates required under section 7 of Public Law 95-435, the Bretton Woods Agreements Act Amendments of 1978.

The CHAIRMAN. The Chair will inquire, has this amendment been printed in the RECORD?

Mr. WALKER. Mr. Chairman, it was printed in the RECORD on July 29, at page 21753.

POINT OF ORDER

Mr. ST GERMAIN. Mr. Chairman, I raise a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. ST GERMAIN. Mr. Chairman, the amendment relates to a balanced budget for the United States and is therefore not germane to that part of the legislation before us. Title III of the legislation provides for U.S. contributions to the IMF, as well as certain conditions and restrictions on those contributions and on lending by U.S. banks. The title does not address the far broader issues of overall Federal Government spending and taxing raised by this amendment.

The amendment also has a different fundamental purpose from title III, in that it seeks to impose limitations on aggregate receipts and expenditures of the Federal Government, which has nothing to do with the purposes of the IMF legislation.

The mere fact that previous nongermane amendments dealing with budget outlays and receipts have been attached to IMF legislation in past Congresses does not make this amendment germane. The amendment must be germane to the bill, not to the underlying law being amended in the bill.

Deschler's, chapter 28, section 27.

I ask the Chair to rule the amendment out of order.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. WALKER) desire to be heard on the point of order?

Mr. WALKER. Yes, I do, Mr Chairman.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, in the case of this amendment, it does two things. No. 1, it speaks to exactly the same kinds of issues that were involved in amendment language that was added in the committee to the bill dealing with apartheid. This particular language simply says that consistent with the objectives sustaining worldwide economic growth and recovery set forth in the title—so it relates directly to the title of the bill under consideration. We are reaffirming the process of the law that was previously decided by this Congress. This simply reaffirms section 7 of Public Law 95-435 which already exists. This is a different amendment from the previous one. The precedent cited by the gentleman—I could agree with the Chair—applied to the previous amendment. In this case, though, the amendment language is specifically consistent with the title under consideration, and I think that the amendment is entirely germane to the bill that we are considering.

The CHAIRMAN (Mr. PEASE). The Chair rules that the issues raised with this amendment are fundamentally the same as those raised by the previous amendment. The issues are not germane to the bill at hand, and the point of order is sustained.

● Mr. MOLLOHAN. Mr. Chairman, I rise to express my opposition to the International Monetary Fund quota increase contained in title III of H.R. 2957. This bill provides for a 50-percent increase in our financial commitment to the IMF—an amount totaling over $8 billion. This is not, by any means, a modest increase. The IMF is seeking an overall increase from $7 billion to $19 billion as a means of alleviating the current international debt crisis. The question surrounding this bill is not whether we should take action in this crisis; but, rather, what kind of assistance would be of greatest use to both developing nations and to ourselves? I believe that we could best help developing nations by first shoring up our own economic position.

The International Monetary Fund was founded in 1946 to provide emergency loans to countries that were having difficulty meeting their balance of payments. This Fund has been of great service to developing nations and now seeks an enormous increase in funding to continue its mission.

The recent crisis is the culmination of years of poor banking practices and the worldwide, severe recession we are experiencing. During the oil crisis, OPEC nations searched for places to deposit their newly accrued billions of dollars. Obliging international banks offered to invest the money, which they did in capital-hungry developing nations in large amounts without adequate consideration. Unfortunately, we then entered into a recession that caused commodity prices to fall sharply. The income-developing countries derived from their commodity exports thus also fell sharply. As a result, these countries began experiencing difficulties in repaying their large international loans.

The IMF is not solely responsible for this crisis. Commercial banks lend four times as much money to developing countries as the IMF. The IMF, however, does play a significant role in the international financial crisis, for the granting of an IMF loan is similar to receiving the Good Housekeeping seal of approval: Once a country receives IMF funds, commercial banks are reassured and are more likely to continue making loans to the country. In addition, only the IMF is in a position to impose conditions on the loan, forcing countries to reduce their product subsidies or take other measures to reduce their national debt.

The sad situation we are left with is this: By the end of 1982 the nine largest U.S. banks had loaned $60.3 billion to 40 major non-OPEC countries, $30 billion of this went to Mexico, Brazil, and Argentina alone. The total capital assets of these banks was $24 billion, thus the banks lent 222 percent of their capital. Lending such a large amount of money in excess of one's capital is not a wise banking practice under any standards. The situation is exacerbated by the fact that these loans were simply poor investment risks. If the banks would continue to make loans of this nature to my con-

stituents, all of them would own beautiful new homes and none of them would have their mortgages foreclosed. These unwise loans were made by banks to nations who were thought to have only a remote chance of defaulting simply because the debtors were sovereign nations. Estimates of the total world debt of Eastern bloc and developing countries remain uncertain, but some are as high as $750 billion.

The IMF unquestionably has an important role to play in the current debt crisis. Developing nations are staggering under the weight of too many loans carrying high interest rates and austerity measures imposed upon them by the IMF. The question is: Will additional support help developing countries and help us out of our own economic crisis?

In this country and in my district, our response to this question is colored by our experiences of the past few years. The economy at home is still struggling in the wake of the worst recession we have experienced since the 1930's. Currently over 11 million workers are unemployed. My own State of West Virginia claims the unfortunate distinction of having the highest unemployment of any State in the Nation.

Last March, the Commerce Department estimated that our trade deficit would increase by 20 percent to $42.7 billion. Our national debt, I would like to note, currently stands at the record high level of over $1 trillion. During the 1970's, it is estimated that 30 to 50 million American jobs were lost due to plant relocations, closings, and contractions. The pace of these closings has only accelerated during this decade.

These statistics do not reflect a healthy U.S. economy. They indicate that this country is in great need of more capital to create more domestic jobs. The proposed IMF quota increase contained in H.R. 2957 would most likely aggravate the drain of U.S. capital out of this country.

I contend that a healthy U.S. economy will do more to aid developing countries than this IMF quota increase. A quick fix on an international debt crisis is simply not enough. We need first to take care of our own economic troubles and only then can we think about any increases in economic assistance to other nations.

While the situation is serious, a 50-percent IMF quota increase is not the only solution. Our international banking system has more flexibility in loan agreements than one would think—especially when the cost of inflexibility is the potential bankruptcy of a nation and perhaps even the subsequent collapse of the international banking system itself.

There are also other sources of funds, such as the Bank of International Settlements, which has already come to the aid of Brazil. In addition, the IMF has its own large gold reserves, which are being held in reserve for a crisis situation. I would think that the current debt emergency qualifies as such a crisis. Another alternative is that the United States could simply make a one-time loan to the Fund or make the quota increase temporary rather than committing us to a permanent increase.

Regarding employment, the IMF quota increase may well have a negative impact on American jobs because the IMF imposes severe austerity measures on developing countries, causing these countries to decrease their demand for American goods. In 1981, this country lost over 200,000 jobs dependent upon our trade with Mexico alone when Mexico began swaying under the weight of too many debts. In addition, the continued drain of U.S. capital to foreign markets may increase our interest rates, which will push unemployment rates even higher.

Unfortunately, under this proposal the commercial banks continue to benefit from their poor judgment. Each time an international banking institution renegotiates a loan with the financially crippled developing nation, the bank charges a fee for the service. In addition, as the risk of these loans increases, so do the interest rates. In this case the increased interest is of no use to anyone except the bank ledgers which appear to be in a better shape because they reflect an increased return on the investment—no matter that the likelihood of repayment continues to diminish. Imposing more costs on the developing countries at this point only increases the possibility of default—perhaps more so than would this Chamber's refusal to approve the requested IMF quota increase.

While IMF loans are technically supposed to only go to countries that are suffering balance of payments problems, it is common knowledge that the money is in fact used for a variety of purposes. For example, India, which has no balance of payments problem, received the largest single loan the IMF has ever approved—over $5 billion—and purchased large amounts of arms shortly after receiving the IMF funds.

One of my primary concerns regarding the use of these loans is that, either directly or indirectly, they may be used to unfairly subsidize industries that compete with American industry. In these cases, we would be paying another country to invade our market, a foolish policy at best.

This bill, as modified last week by the passage of the St Germain amendment, seeks to placate these concerns in several ways. First, it makes the $2.6 billion General Agreements to Borrow (GAB) quota increase contingent upon Treasury Department certification that an emergency exists—which has already been admitted by Treasury officials.

Second, the bill adds language suggesting that studies be done and regulations modified to minimize the possibility of future unwise loans. The modified IMF bill also includes the McNulty amendment, which requires U.S. IMF representatives to consider the potential adverse impact of an IMF loan on U.S. industry, especially industries experiencing a surplus of their commodities.

The St Germain amendment we adopted last week certainly improves the quality of the overall bill, but it does not seriously address fundamental concerns over the causes of the international debt crisis and proposed solutions.

Passage of this bill would still find this country providing billions of dollars to a fund to help commercial banks recover their losses on their loans to developing countries. If we pass this legislation, we will reward the banks for their folly and make American workers and American taxpayers pay for it. I therefore continue to oppose H.R. 2957 and admonish my colleagues to do likewise.●

● Mr. TOWNS. Mr. Chairman, I am pleased that the House Banking Committee has included a provision, supported by my colleague, the gentleman from California (Mr. DIXON) requiring U.S. opposition to loans for countries who practice apartheid. I would like to use this opportunity to voice my support for this provision and explain my opposition to the amendment offered by the gentleman from Texas (Mr. GRAMM) which I believe weakens the antiapartheid section of the bill.

First and foremost, countries which practice apartheid are in direct violation of the International Monetary Fund's articles of agreement. I speak of article I: The "promotion and maintenance of a high level of employment and real income," and also article IV: "The development of the productive resources of all members," as well as the continued support of policies which encourage "sound economic growth." Clearly any apartheid practicing countries would not meet these standards.

In fact, South Africa, the only country which does in reality practice apartheid, employs policies which work toward the manipulation and subjugation of the black majority. These policies, in turn, lead to mass unemployment, abject poverty, and dehumanizing living conditions for the country's blacks which comprise 69.9 percent of the population, while the country's white population enjoys one of the highest per capita rates in the world. Testimony by several econo-

mists, before the Banking Committee, indicated that apartheid does, in fact, cause unique labor supply bottlenecks. Unlike this wealth of evidence, no substantial facts have been demonstrated to support a prohibition on U.S. support of loans to Communist dictatorships.

Communist dictatorships do not create unique economic problems. In fact, their problems are quite similar to those of corrupt captialist regimes which channel their funds to private bank accounts and stifle individual freedom and enterprise. In addition, it is unclear as to which countries would be affected by this amendment since "Communist dictatorships" are not defined.

What is clear is that neither the Soviet Union or Cuba would be affected by this amendment since these countries do not belong to the IMF. The only recent loans to Communist countries have been Romania, China, and Yugoslavia. U.S. foreign policy encourages these countries to act independently from the Soviet Union. We cannot expect these countries to develop stronger ties with the West if the United States opposes loans to them merely on the basis of political ideology. In attacking only Communist dictatorships, the gentleman's amendment reveals its true political and noneconomic bias. This bias is incompatible with the goals of the IMF.

I would urge my colleagues to oppose this amendment and to retain the integrity of the committee's prohibition on U.S. support for loans to countries practicing apartheid.●

● Mr. COLEMAN of Texas. Mr. Chairman, I rise in strong support of the amended legislation pending before us today and request unanimouation, a composite of three separate bills as well as a bipartisam compromise, and commend the Banking, Finance and Urban Affairs Committee for their unfailing commitment to lend stability to international banking.

This legislation is particularly important to my district and all of the districts that share a common border with Mexico as well as all of the districts who derive employment from our international commerce with Mexico. It is important to keep in mind that Mexico is our third largest trading partner; they provide a market for $11.8 billion of American exports. Their economic failure has been diverted through the loans of the International Monetary Fund. This is just one of many examples that testifies to the success of the IMF and its programs.

There are several provisions in the entire package that I would like to highlight. One of the best recommendations in this legislation concerns world economic growth and the dramatic improvement that could be realized if the industrialized nations could arrange for the debt of the developing nations to be extended in maturity. That recommendation, if implement, could substantially increase the developing countries ability to repay their loans. Moreover, a lengthening of the maturity on developing nation debt would mitigate the effects of the austerity programs that are put in place in tandem with IMF loans and allotments.

I am similarly heartened by the language regarding the supervision of international lending procedures and the stabilization of exchange rates. Improved reporting of international lending and borrowing could help us avoid the fantastic increase in foreign lending that we saw at the end of the 1970's. Additionally, the study of exchange rates is mandatory if we intend to realize a worldwide economic recovery.

The requested increases in the United States contribution to the African Development Bank, the Inter-American Development Bank, and the Asian Development Bank also merit widespread support. At a time when the turmoil in Central America is reaching an apex, multilateral lending institutions, like the Inter-American Development Bank, can complement U.S. foreign policy and provide loans which we could not afford on a bilateral basis. As the committee report points out, every dollar of U.S. contributions paid into the multilateral banks has resulted in a net export from this country to developing nation of $1.57 of U.S. goods and services. Clearly, we would simply exaggerate our current unemployment situation by denying these multinational banks our contributions.

Finally, I would like to point out to those who believe that this legislation is unwise from a budget standpoint, the proposed quota increase serves our best interests. The United States is the second largest user of the International Monetary Fund, second only to Great Britain. This issue is a two-way street. As the second largest user, we can ill-afford to deny the Fund either the requested increase in quota or the increase in the general arrangements to borrow.

The transfer of funds from the U.S. Treasury to the IMF simply constitutes a loan, to be repaid, with interest. The true cost of that loan is the difference between the cost of the money to the U.S. Treasury versus the appreciation of the dollar by comparison with the special drawing right, the monetary unit of the IMF. In terms of our budget, I do not see how an interest bearing, liquid international monetary asset will violate the budget. Should we deny developing countries access to badly needed funds so that they too can become fertile grounds for the spread of communism and international terrorism? I think not. I respectfully urge all of my colleagues to support this requisite legislation.●

□ 2040

(By unanimous consent, Mr. MICHEL was allowed to speak out of order.)

RESPECTS TO THE HOUSE ON PASSAGE OF IMF LEGISLATION

Mr. MICHEL. Mr. Chairman, I take this liberalized minute or two, to pay my respects to the committee chairman, and the ranking member and all those Members who have over an extended period of time conducted themselves in exemplary fashion on this very controversial piece of legislation.

It is quite obvious from repeated statements made by our President that he strongly support this legislation and wants it passed expeditiously. When we initially had a problem with it—and I would concede it was particularly on our side of the aisle—there were entreaties made to the chairman of the committee by the Secretary of the Treasury to help with a compromise, particularly with respect to title III.

A lot of work went into that compromise and we had several good test votes on this floor that endorsed the work of those who participated in that compromise. Now I think we have given those Members of independent mind ample opportunity to express their will as they have rather extensively today. I think we are at that point now where the will of the House ought to be expressed. Naturally, my own preference is that Members would join with the majority members of the committee and our President and pass this legislation.

I want to particularly thank again the members of the committee for their forbearance.

I think it says something about the House. When it has to move in a certain way it can. In this case there were several starts and stops along the way, but we have now come to the hour of decision and I trust it will be the right one.

The CHAIRMAN. Are there further amendments?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PEASE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2957) to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by U.S. banks, and provide for continued U.S. participation in multilateral development banks, pursuant to House Resolution 249, he

reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. PAUL

Mr. PAUL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. PAUL. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. PAUL moves to recommit the bill, H.R. 2957, to the Committee on Banking, Finance and Urban Affairs.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PAUL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 217, nays 211, not voting 5, as follows:

[Roll No. 320]

NOT VOTING—5

Hall, Ralph	McCollum	Wilson
Heftel	Stokes	

□ 2100

The clerk announced the following pair:

On this vote:

Mr. Stokes for, with Mr. McCollum against.

Mr. LEVITAS changed his vote from "yea" to "nay."

Mr. CLAY and Mr. GRAY changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ST GERMAIN. Mr. Speaker, pursuant to the provisions of House Resolution 249, I call up from the Speaker's table the Senate bill (S. 695) to amend the Bretton Woods Agreements Act to authorize consent to and authorize appropriations for an increase in the U.S. quota in the International Monetary Fund and to authorize appropriations for increased U.S. participation in the IMF's General Arrangements to Borrow, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

MOTION OFFERED BY MR. ST GERMAIN

Mr. ST GERMAIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ST GERMAIN moves to strike out all after the enacting clause of the Senate bill, S. 695, and to insert in lieu thereof the text of the bill, H.R. 2957, as passed, as follows:

SECTION 1. This Act may be cited as the "International Recovery and Financial Stability Act".

TITLE I—EXPORT-IMPORT BANK ACT AMENDMENTS OF 1983

SHORT TITLE

SEC. 101. This title may be cited as the "Export-Import Bank Act Amendments of 1983".

EXTENSION OF THE EXPORT-IMPORT BANK ACT

SEC. 102. Section 8 of the Export-Import Bank Act of 1945 (12 U.S.C. 635f) is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985".

COMPETITIVE TIED AID FUND; FINDINGS AND PURPOSE; ESTABLISHMENT

SEC. 103. (a)(1) Tied aid credit is defined by the Arrangement on Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development (hereinafter in this section referred to as the "Arrangement") as credit which is provided for development aid purposes and which is financed either exclusively from public funds, or, as a mixed credit, partly from public and partly from private funds. Tied aid credit is tied to the purchase of exports from the country granting the credit.

(2) Tied aid credit can easily be abused. In general, such abuse occurs when—

(A) tied aid credit is utilized primarily to promote exports, in the name of foreign aid;

(B) the country to which the credit is granted is in a sufficiently strong financial position to be a credit-worthy borrower on commercial or Arrangement terms;

(C) tied aid credit is used to finance exports for projects whose potential contributions to the economic development of low income countries is relatively modest, compared to alternative development projects to which foreign aid funds could be devoted; or

(D) tied aid credit is utilized to finance exports on terms which do not carry a large grant element, but are nonetheless somewhat more concessionary than the terms permitted on official direct credit under the Arrangement.

(3) The abuse of tied aid credit by other governments is likely to be especially injurious to American exporters, since it may deny them opportunities for which they could offer highly competitive goods or services, but for which they cannot obtain financing equivalent to the highly subsidized tied aid credit offered by foreign governments.

(b)(1) It is the policy of the United States to insist that participants in the Arrangement honor their pledge not to offer tied aid credit containing a grant element less than the minimum specified in the Arrangement.

(2) The United States Government shall make every effort to negotiate an increase in such minimum, since the incentive to abuse tied aid credit will diminish as its grant element is increased.

CAPITAL LEVEL OF THE BANK

SEC. 104. The Export-Import Bank Act of 1945 (12 U.S.C. 635 et seq.) is amended by adding at the end thereof the following:

"SEC. 13. If, at the end of any quarter of any fiscal year after fiscal year 1983, the value of the total capital stock and retained earnings of the Bank falls below 50 per centum of the value of the total capital stock and retained earnings of the Bank at the end of fiscal year 1983, the Board of Directors shall notify the Congress of the decrease in the level of the capital stock of the Bank not later than thirty days after the end of the quarter of such fiscal year and the Congress shall take appropriate action.".

PRIMARY PURPOSE OF THE BANK

SEC. 105. (a) The second sentence of section 2(b)(1)(A) of the Export-Import Act of 1945 (12 U.S.C. 653(b)(1)(A)) is amended by striking out "which are competitive with" and inserting in lieu thereof "which are competitive, in all its programs, with".

(b) Section 2(b)(1)(B) of the Export-Import Act of 1945 (12 U.S.C. 635(b)(1)(B)) is amended by striking out "(B) It is further the policy of the United States" and all that follows through "with exports of other countries;" and inserting in lieu thereof the following: "(B) It is further the policy of the United States that loans made by the Bank shall bear interest at rates determined by the Board of Directors of the Bank, taking into consideration, foremost, the Bank's mandate to support United States exports, in all of the Bank's programs, at rates and on terms and conditions which are competitive with exports of other countries and, second, the average cost of money to the Bank;".

ASSISTANCE TO SMALL BUSINESSES

SEC. 106. (a) Section 2(a) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(a)) is amended by adding at the end thereof the following:

"(2) In furtherance of the Bank's policy of actively assisting in the development of small business exports—

"(A)(i) not less than 6 per centum of the principal amount of new direct loans the Bank may approve, as provided in appropriation Acts, for fiscal year 1984, shall be reserved for the financing of exports by small business concerns (as defined in section 3 of the Small Business Act);

"(ii) not less than 6 per centum of the principal amount of loans the Bank may guarantee, as provided in appropriation Acts, for fiscal year 1984, shall be reserved for guaranteeing loans to such small business concerns;

"(iii) not less than 10 per centum of the principal amount of new direct loans the Bank may approve, as provided in appropriation Acts, for fiscal year 1985, shall be reserved for the financing of exports by such small business concerns; and

"(iv) not less than 10 per centum of the principal amount of loans the Bank may guarantee, as provided in appropriation Acts, for fiscal year 1985, shall be reserved for guaranteeing loans to such small business concerns; and,

"(B) it shall be a goal of the Bank to provide not less than 10 per centum of the dollar amount of the Bank's loans and guarantees during fiscal year 1984 and not less than 20 per centum of the dollar amount of such loans and guarantees during fiscal year 1985 to such small business concerns.".

(b) Section 9(a) of the Export-Import Bank Act of 1945 (12 U.S.C. 635g(a)) is amended to read as follows:

"SEC. 9. (a) The Export-Import Bank of the United States shall transmit to the Congress on January 1 of each year a complete and detailed report of its operations for the preceding fiscal year."

(c) Section 9(b) of such Act (12 U.S.C. 635g(b)) is amended—

(1) by inserting "comprehensive and detailed" after "contain a"; and

(2) by inserting after the first sentence the following: "The report shall also contain a comprehensive and detailed description of plans which the Bank will implement during the next fiscal year in order to carry out the provisions of section 2(a)(2) of this Act regarding loans and guarantees to small business concerns. With respect to each loan or loan guarantee made during the previous fiscal year, each such report shall specify the amount of such loan or loan guarantee, the company which received such loan or loan guarantee, and whether or not such company is a small business concern.".

(d) Section 2(b)(1)(A) of such Act (12 U.S.C. 635(b)(1)(A)) is amended—

(1) in the fourth sentence, by inserting ", including the Small Business Committees," after "Committees of Congress";

(2) by inserting after the fourth sentence the following: "This report shall be transmitted to the Congress not later than three months after the end of the reporting period."; and

(3) in the sixth sentence, as in effect before the amendment made by paragraph (2)—

(A) by inserting ", including small business exporters," after "a representative number of United States exporters"; and

(B) by inserting ", including regional and local banks," after "commercial lending institutions".

BOARD OF DIRECTORS

SEC. 107. (a) Section 3(c) of the Export-Import Bank Act of 1945 (12 U.S.C. 635a(c)) is amended by inserting after the second sentence thereof the following: "Of the five members of the Board appointed by the President, not less than one such member shall be selected from among the small business community and shall represent the interests of small business.".

(b) In order to carry out the amendment made by subsection (a), the first member appointed by the President to the Board of Directors of the Export-Import Bank of the United States after the date of the enactment of this section shall be selected from among the small business community and shall represent the interests of small business.

COMPETITIVE INSURANCE

SEC. 108. Section 2 of the Export-Import Bank Act of 1945 (12 U.S.C. 635) is amended by adding at the end thereof the following:

"(d)(1) In carrying out its responsibilities under this Act, the Bank shall work to ensure that United States companies are afforded an equal and nondiscriminatory opportunity to bid for insurance in connection with transactions assisted by the Bank.

"(2) In furtherance of that effort, the Chairman of the Bank shall review Bank policies and programs in regard to this issue, and in coordination with the United States Trade Representative and the appropriate agencies of the Department of State, the Department of the Treasury, and the Department of Commerce, undertake actions designed to promote equal and nondiscriminatory opportunities to bid for insurance in connection with all aspects of international trade activities.

"(3) The Bank shall report to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate not later than May 15, 1984, regarding—

"(A) the existing obstacles to equal and non-discriminatory bidding for insurance related to transactions assisted by the Bank;

"(B) the efforts that the Bank has taken in addressing such problems; and

"(C) any recommendations for additional action by the appropriate agencies of the executive branch or the Congress.".

ADVISORY COMMITTEE

SEC. 109. Section 3(d) of the Export-Import Bank Act of 1945 (12 U.S.C. 635a(d)) is amended to read as follows:

"(d)(1) There is hereby established an Advisory Committee to consist of twelve members who shall be appointed by the Board of Directors on the recommendation of the President of the Bank, and who shall be broadly representative of production, commerce, finance, agriculture, labor, services, and State government, except that not less than three members appointed to the Advi-

sory Committee shall be representative of the small business community.

"(2) The Advisory Committee shall meet at least once each quarter.

"(3) The Advisory Committee shall advise the Bank on its programs, and shall submit, with the report specified under section 2(b)(1)(A) of this Act, its own comments to the Congress on the extent to which the Bank is meeting its mandate to provide competitive financing to expand United States exports, and any suggestions for improvements in this regard.".

REPORT TO CONGRESS

SEC. 110. Section 9 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(c)(1) The report shall include a detailed description of all actions which have been taken by the Bank or which will be taken by the Bank—

"(A) to maintain the competitive position of key linkage industries in the United States;

"(B) to support industries which are engaged in the export of high value added products;

"(C) to support industries which are engaged in the development of new capital goods technology;

"(D) to preserve and create high skilled jobs in the United States economy; and

"(E) to enhance the opportunity for growth and expansion of small businesses and entrepreneurial enterprises.

"(2) Such report shall include the comments of the Advisory Committee regarding the objectives specified in paragraph (1).".

REPORT

SEC. 111. Section 1911 of the Export-Import Bank Act Amendments of 1978 is amended by adding at the end thereof the following: "After October 1, 1983, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.".

NONCOMPETITIVE FINANCING DETERMINATION

SEC. 112. Section 1912 of the Export-Import Bank Act Amendments of 1978 is amended—

(1) in subsection (a)(1), by adding at the end thereof the following: "The inquiry, and, where appropriate, the determination and authorization to the Export-Import Bank of the United States referred to in this section shall be completed and made within sixty days of the receipt of such information."; and

(2) in subsection (b)(1), by striking out "determining factor" and inserting in lieu thereof "significant factor".

MEDIUM-TERM FINANCING

SEC. 113. Section 2(a) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(a)) is amended by adding at the end thereof the following:

"(3) In order for the Bank to be competitive in all of its financing programs with countries whose exports compete with United States exports, the Bank shall—

"(A) provide medium-term financing—

"(i) at rates of interest to the customer which are equal to the rates established by the Organization for Economic Cooperation and Development; and

"(ii) in amounts up to 85 percent of the total cost of the exports involved; and

"(B) cooperate fully with the Secretary of Commerce and the Administrator of the Small Business Administration to develop a program for purposes of disseminating information, using existing private institutions, to small business concerns regarding the medium-term financing provided under this paragraph.".

TITLE II—INTERNATIONAL ECONOMIC RECOVERY

FINDINGS

SEC. 201. The Congress hereby finds that—

(1) efforts by one nation to improve its economic well-being without regard to that of other nations are ultimately self-defeating;

(2) the well-being of all United States citizens depends on world economic growth and prosperity; and

(3) world economic recovery is being impeded—

(A) by high interest rates, particularly in the United States;

(B) by the enormous magnitude and short maturity of the foreign debt of some nations; and

(C) by the risk and uncertainty associated with a competitive international banking system in which bank regulatory programs, which differ markedly from nation to nation—

(i) were designed to meet national rather than international safety and soundness concerns;

(ii) may have contributed significantly to the international debt problem; and

(iii) are not adequate to address potential future threats to international bank safety and soundness;

(4) millions of American jobs have been lost through the worldwide recession; and

(5) a substantial portion of the decline in the United States gross national product in recent years was due to a sharp drop in exports;

(6) renewed growth in the developing countries would help to restore United States export markets and millions of American jobs;

(7) the financial resources within the developing countries could be turned to renewed growth; and

(8) the international debt crisis would substantially ease if the time allowed for debt repayment were lengthened for those nations most severely burdened by foreign debt.

ECONOMIC GROWTH; SUPERVISION OF INTERNATIONAL LENDING

SEC. 202. (a) The President shall encourage the industrialized nations—

(1) to take actions on a cooperative, multilateral basis to adopt fiscal and monetary policies which will result in sustainable, noninflationary economic growth and increased employment on a worldwide basis;

(2) to develop plans for reducing the financial pressures on nations whose growth is being constrained by the size and short maturity of their foreign debt by extending, where appropriate, the maturity of such debt; and

(3) to begin immediately to promote the effectiveness and the consistency of the regulation and supervision of international banking.

(b) Not later than one year after the date of the enactment of this Act, the President shall transmit a report to the Congress—

(1) regarding actions taken to carry out the provisions of subsection (a); and

(2) which includes such recommendations as the President considers advisable for legislative actions needed to assure sustainable and noninflationary economic growth on a worldwide basis.

TITLE III—INTERNATIONAL MONETARY FUND

PROMOTING ECONOMIC GROWTH AND CONDITIONS FOR EXCHANGE RATE STABILITY

SEC. 301. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING ECONOMIC GROWTH AND THE CONDITIONS FOR EXCHANGE RATE STABILITY

"SEC. 42. (a) In order to help assure that the resources provided under section 40 are used to support progrowth policies which will help establish the economic conditions necessary for greater financial and exchange rate stability, it is the sense of Congress that the Secretary of the Treasury shall instruct the United States Executive Director of the Fund to work for adoption of policies in the Fund, both within the framework of article IV consultations and with respect to the conditions associated with Fund-supported balance of payments adjustments programs, that—

"(1) promote sustained noninflationary economic growth, monetary stability, and higher levels of productive employment;

"(2) support the evolution of broadly based, nondiscriminatory, low-rate tax systems which will encourage private sector savings and provide incentives for productive employment, investment, and private sector growth;

"(3) encourage the establishment of sound monetary and fiscal policies which limit Government preemption of real and financial resources and which are conducive to sustainable economic recovery and growth, full employment, and price and exchange rate stability;

"(4) discourage Government regulation and Government allocation of real and financial resources;

"(5) encourage international capital flows and investment by providing a predictable economic and legal climate based on sanctity of contracts with, and property rights of, foreign investors;

"(6) ensure that policies adopted by Third World countries pursuant to their borrowing from the Fund are fair and equitable to all strata of their economy and society; and

"(7) would allow prices to better reflect underlying market forces.

"(b) In negotiating with Third World countries, the United States Executive Director of the Fund shall work through the Fund for policies which assist low- and moderate-income families to maintain and increase their level and standard of living, and which provide for and foster the creation of democratic institutions.

"(c) The Secretary shall also instruct the United States Executive Director of the Fund to propose and work for the adoption of policies by the Fund that would strengthen efforts to promote conditions contributing to greater stability of exchange rates. Among other steps, the United States Executive Director of the Fund shall propose that—

"(1) Fund-approved economic adjustment programs seek to promote greater exchange rate stability by supporting policies which would reduce the need for abrupt or damaging exchange rate changes;

"(2) as part of the article IV consultation process, the Fund review the efforts of each Fund member to collaborate with the Fund to promote stable exchange rates. If as a result of such review, it is determined by the Fund that a member is not pursuing policies which promote a stable system of exchange rates, the Fund shall recommend and en-

courage the adoption of policy changes to better promote greater economic, price, and exchange rate stability.

"(d) The Secretary of the Treasury, as the United States Governor of the Fund, shall report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and to the Committee on Banking, Finance and Urban Affairs of the House of Representatives on a semiannual basis concerning the above directives to the United States Executive Director of the Fund.".

QUOTA INCREASE

SEC. 302. That the Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended—

(1) in section 17(a)—

(A) by striking out "decision of January 5, 1962, and inserting in lieu thereof "decisions of January 5, 1962, and February 24, 1983, as amended in accordance with their terms,"; and

(B) by striking out "not to exceed $2,000,000,000 outstanding at any one time," and inserting in lieu thereof "in an amount not to exceed the equivalent of 4,250,000,000 Special Drawing Rights, limited to such amounts as are appropriated in advance in appropriation Acts, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

(2) in section 17(b), by striking out "$2,000,000,000," and inserting in lieu thereof "4,250,000,000 Special Drawing Rights, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

(3) by adding at the end of section 17 the following:

"(d) Unless the Congress by law so authorizes, neither the President, the Secretary of the Treasury, nor any other person acting on behalf of the United States, may instruct the United States Executive Director to the Fund to consent to any amendment to the Decision of February 24, 1983, of the Executive Directors of the Fund, if the adoption of such amendment would significantly alter the amount, terms, or conditions of participation by the United States in the General Arrangements to Borrow."; and

(4) by adding at the end thereof the following:

"SEC. 40. (a) The United States Governor of the Fund is authorized to consent to an increase in the quota of the United States in the Fund equivalent to 5,310.8 million Special Drawing Rights, limited to such amounts as are provided in advance in appropriation Acts.

"(b) The Secretary of the Treasury shall consult with the chairman and the ranking minority member of—

"(1) the Committee on Banking, Finance and Urban Affairs and the Committee on Appropriations of the House of Representatives, and any appropriate subcommittee of each such committee; and

"(2) the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Banking, Housing, and Urban Affairs of the Senate, and any appropriate subcommittee of each such committee,

for purposes of discussing the position of the executive branch and the views of the Congress with respect to any international negotiations being held to consider any future quota increase for the International Monetary Fund which may involve an increased contribution, subscription, or loan by the United States. Such consultation shall be made (A) not later than thirty days before the intitiation of such international negotiations, (B) during the period in which such negotiations are being held, in a frequent and timely manner, and (C) before a session of such negotiations is held at which the United States representatives may agree to such quota increase.

"SEC. 41. (a) It is the sense of the Congress that—

"(1) the lack of sufficient information currently available to allow lenders to make sound and prudent decisions concerning their international lending threatens the stability of the international monetary system; and

"(2) in recognition of the Fund's duties, as provided particularly by Article VIII of the Articles of Agreement of the Fund, to act as a center for the collection and exchange of information on monetary and financial problems, the Fund should adopt such measures as are necessary and appropriate to ensure that more complete and timely financial information will be available.

"(b) To this end, the Secretary of the Treasury shall instruct the United States Executive Director to the Fund—

"(1) to initiate relevant discussions with other directors of the Fund and with the Fund management; and

"(2) to propose, and vote for the adoption of, procedures, within the Fund—

"(A) to collect and disseminate information, on a quarterly basis, from and to Fund members, and to such other persons as the Fund deems appropriate, concerning the extension of credit by banks or nonbanks to private and public entities, where such banks or nonbanks are not principally established within the borders of the member country to which the credits are extended; and

"(B) to publicly disseminate information which is developed in the course of the Fund's collection efforts and which the Fund determines would serve to enhance the informational base upon which international borrowing and lending decisions are made.

"(c) The President is authorized to use the authority provided under section 8 of this Act to require any person (as defined in such section) who is subject to the jurisdiction of the United States to provide such information as the Fund determines to be necessary in order to carry out the provisions of this section.

"(d) Within one year after the date of the enactment of this section, the Secretary of the Treasury shall prepare and transmit to the Committee on Foreign Relations and the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives, a report regarding the progress made toward establishing collection, review, comment, and reporting procedures within the Fund, as provided by this section.

"(e) For purposes of this section, the term 'credit' includes—

"(1) outstanding loans to private and public entities, including government entities, instrumentalities, and central banks of any member; and

"(2) unused lines of credit which have been made available to such private and public entities of any member,

where such loans or lines of credit are repayable in freely convertible currency.".

SPECIAL DRAWING RIGHTS

SEC. 303. Section 6 of the Special Drawing Rights Act (22 U.S.C. 286q) is amended to read as follows:

"SEC. 6. Unless Congress by law authorizes such action, neither the President nor any person or agency shall on behalf of the United States vote to approve any new allocation of Special Drawing Rights.".

INSTRUCTIONS TO THE EXECUTIVE DIRECTOR REGARDING THE ECONOMIC IMPACT OF APARTHEID AND COMMUNIST DICTATORSHIPS

SEC. 304. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 43. The Congress hereby finds that the practices of apartheid and Communist dictatorship result in severe constraints on labor and capital mobility and other highly inefficient labor and capital supply rigidities which contribute to balance of payments deficits in direct contradiction of the goals of the International Monetary Fund. Therefore, the President shall instruct the United States Executive Director of the Fund to actively oppose any credit drawings on the Fund or any of its facilities by any country which practices apartheid or Communist dictatorship.".

ELIMINATION OF IMPORT RESTRICTIONS

SEC. 305. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 44. (a)(1) The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to present proposals to the Executive Board of the Fund for the purpose of ensuring that each member country using Fund resources takes steps to eliminate expeditiously all import restrictions and unfair export subsidies which have been determined to be inconsistent with the General Agreement on Tariff and Trade, or other international agreements, and which have a serious adverse impact on United States, or any other member's, exports or employment.

"(2) If the Fund does not adopt such proposals, the Secretary of the Treasury shall consult with the appropriate committees of the Congress prior to instructing the United States Executive Director to vote to provide Fund resources for a country whose policies are inconsistent with the above instructions.

"(b) As part of this effort, the United States Trade Representative, the Secretary of Labor, and the Secretary of Commerce shall inform the Secretary of the Treasury and the Congress of all import restrictions and export subsidies by member countries which have been determined to be inconsistent with the General Agreement on Tariffs and Trade or other multilateral agreements and which have a serious adverse impact on exports from, or employment in, the United States.".

SEC. 306. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 45. (a) Within ninety days of enactment of this section, the President shall report to the appropriate committees of Congress outlining the role of the International Monetary Fund and the United States Government with regard to maintaining realistic, market-related exchange rates with other major currencies and making recommendations as to what can be done to avoid exchange rate manipulation. In particular, such report shall examine the

policies of major trading partners which (1) maintain a substantial trade surplus with the United States, and (2) encourage export of capital to such an extent that exchange rates do not appear to reflect adjustments based on trade patterns alone. Such report shall also include the status of the proposals set forth in subsection (b) of this section.

"(b) The President shall instruct the Secretary of the Treasury to propose and work for the adoption of proposals by the Fund to promote conditions contributing to the stability of exchange rates and avoid the manipulation of exchange rates between major currencies. Among other initiatives, the Secretary or his designee shall propose: (1) a comprehensive study by the Fund of exchange rate problems with recommendations as to steps that can be taken to correct any structural imbalances identified and (2) strengthening the article IV consultation procedures of the Fund to attempt to ensure that countries which are artificially maintaining undervalued or overvalued rates of exchange agree to adopt realistic, market-related exchange rates.

"(c) The Secretary of the Treasury shall take into account in determining his vote whether a country's policies are consistent with the requirements of article IV.".

ELIMINATION OF AGRICULTURAL EXPORT SUBSIDIES

SEC. 307. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 46. The Secretary of the Treasury shall instruct the United States Executive Director to the Fund to propose and work for the adoption of a policy requiring that prior to receiving any International Monetary Fund assistance Fund borrowers must eliminate all predatory agricultural export subsidies which might result in the reduction of other member countries' exports. The Secretary shall report to the relevant committees of Congress within one hundred and eighty days of enactment of this provision as to the progress achieved in reaching this goal.".

REPORT ON FUND POLICIES

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 47. (a) Not later than one hundred and eighty days after the date of the enactment of this section, the Secretary of the Treasury shall transmit to the Congress a report containing a thorough review and detailed analysis of the policies of the International Monetary Fund regarding—

"(1) the ability of the Fund to promote real economic growth and sustained, noninflationary recovery, pursuant to its mandate in article I of the Articles of Agreement, in countries which enter into stabilization programs with the Fund;

"(2) the feasibility of the Fund issuing securities in the private capital markets as a means of increasing its resources, either in lieu of, or in addition to, future quota increases, together with an evaluation of how such borrowing would affect the credit markets of the United States;

"(3) the feasibility of returning all or part of the Fund's gold reserves to Fund members or of selling the Fund's gold reserves in the private markets, together with an evaluation of how such sales would affect the credit markets of the United States;

"(4) the feasibility of establishing temporary, supplemental financing facilities at the Fund; and

"(5) recommendations for amendments to the Fund's Articles of Agreement, if any, to improve the role of the Fund in the international monetary system.

"(b) Such report on the policies of the Fund shall be referred to the Committee on Banking, Finance and Urban Affairs of the House of Representatives, and to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate.".

SUSTAINING ECONOMIC GROWTH

SEC. 309. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SUSTAINING ECONOMIC GROWTH

"SEC. 48. (a)(1) The President shall instruct the Secretary of the Treasury, the Secretary of State, and other appropriate Federal officials, including the Chairman of the Board of Governors of the Federal Reserve System, to use all appropriate means to encourage countries to formulate economic adjustment programs to deal with their balance of payment difficulties and external debt owed to private banks.

"(2) Such economic adjustment programs should be designed to safeguard, to the maximum extent feasible, international economic growth, world trade, employment, and the long-term solvency of banks, and to minimize the likelihood of civil disturbances in countries needing economic adjustment programs.

"(b) To ensure the effectivenes of economic adjustment programs supported by Fund resources—

"(1) the United States Executive Director of the Fund shall recommend and shall work for changes in Fund guidelines, policies, and decisions which would—

"(A) convert short-term bank debt which was made at high interest rates into long-term debt at lower rates of interest;

"(B) assure that the annual external debt service, which shall include principal, interest, points, fees, and other charges required of the country involved, is a manageable and prudent percentage of the projected appeal expect earnings of such country; and

"(C) provide that in approving any economic adjustment program the Fund shall take into account the number of countries applying to the Fund for economic adjustment programs and the aggregate effects that such programs will have on international economic growth, world trade, exports and employment of other member countries, and the long-term solvency of banks.

"(2)(A) Except as provided in subparagraph (B), the United States Executive Director of the Fund shall oppose and vote against providing assistance from the Fund for any economic adjustment program for a country in which the annual external debt service exceeds 85 per centum of the annual export earnings of such country unless the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives that—

"(i) the economic adjustment program converts short-term bank debt which was made at high interest rates into long-term debt at lower rates of interests;

"(ii) the annual external debt service required of the country involved is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(iii) the economic adjustment program will not have an adverse impact on international economic growth, world trade, exports, and employment of other member countries, and the long-term solvency of banks.

"(B) The provisions of subparagraph (A) shall not apply in any case in which the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives that—

"(i) an emergency exists in a nation that has applied to the Fund for assistance that requires an immediate short-term loan to avoid disrupting orderly financial markets;

"(ii) a sudden decrease in export earnings in the country applying to the Fund for assistance has increased the ratio of annual external debt service to annual export earnings, to greater than 85 per centum for a period projected to be no more than one year; or

"(iii) other extraordinary circumstances exist which warrant waiving the provisions of subparagraph (A).

"(c) The National Advisory Council on International Monetary and Financial Policies shall include in each of its annual reports to the Congress copies of the analyses and any written documentation prepared by the United States Executive Director of the Fund pursuant to paragraphs (2)(A) or (2)(B) of subsection (b) and a statement detailing the actions and progress made in carrying out the requirements of subsections (a) and (b).".

PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

SEC. 310. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

"SEC. 49. (a)(1) The cornerstone of a healthy world economy and international trading and financial system is a growing domestic economy in the United States with price stability and low interest rates.

"(2) Sustained noninflationary economic growth in the United States, full employment in United States basic industries, and a robust economy are essential to avoiding the imposition of protectionist barriers that would inhibit the free flow of trade and undermine the economic and financial stability of countries using the Fund.

"(3) Provision of adequate credit at affordable rates of interest to the United States economy by the United States banking system is essential to promoting a growing domestic economy.

"(b) To that end, and especially to provide working capital to promote the expansion of domestic industries, the appropriate Federal banking agencies, as defined in section 402 of the International Lending Supervision Act of 1983, are directed to develop regulations to implement subsections (c) through (f) within thirty days of the date of the enactment of this section.

"(c) This section shall apply to all banking institutions which have foreign loans which are excessive. A banking institution's loans shall be considered excessive if the aggregate of such loans to public and private sector borrowers in a foreign country described in section 404 of such Act exceeded such banking institution's primary capital on June 30, 1983, or on any date thereafter until January 1, 1986.

"(d)(1) Except as provided in subsections (e) and (f), from the date of the enactment of this section until January 1, 1986, no banking institution having excessive loans under subsection (c) shall make any new loans to foreign countries described in section 404 of such Act if such loans shall cause the growth rate of such banking institution's aggregate loans to all such foreign countries to exceed one-half of the growth rate of such banking institution's aggregate loans to all such foreign countries during the period of January 1, 1980, through June 30, 1982.

"(2) Notwithstanding the provisions of this section, banking institutions may honor binding commitments, which were effective before July 30, 1983, to lend in such countries.

"(e)(1) Any banking institution having excessive loans under subsection (c) may exceed the limits set forth in subsection (d) if the annual rate of growth of such banking institution's domestic lending exceeds the limit so specified.

"(2) In such cases, the rate of growth of aggregate loans to all foreign countries described in section 404 of such Act shall not exceed the rate of growth of domestic lending.

"(f) This section shall not be enforced if—

"(1) the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System find that such enforcement would adversely affect the domestic economy; or

"(2) the President determines that enforcement of this section would be detrimental to the national interest.".

PROHIBITION OF FRONT END FEES

SEC. 311. (a) In order to avoid excessive debt service burdens on debtor countries, no banking institution shall charge, in connection with the restructuring of an international loan, any fee exceeding the administrative cost of the restructuring unless it amortizes such fee over the effective life of each such loan.

(b) The requirement of subsection (a) shall take effect on the date of the enactment of this section. Each appropriate Federal banking agency shall promulgate such regulations as are necessary to further carry out the provisions of this section.

OPPOSING FUND BAILOUTS OF BANKS

SEC. 312. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"OPPOSING FUND BAILOUTS OF BANKS

"SEC. 50. Except as provided in section 48 (a section entitled 'Sustaining Economic Growth'), the Secretary of the Treasury shall instruct the United States Executive Director of the Fund—

"(1) to oppose and vote against any Fund drawing by a member country where, in his judgment, the Fund resources would be drawn principally for the purpose of repaying loans which have been imprudently made by banking institutions to the member country; and

"(2) to work to insure that the Fund encourages borrowing countries and banking institutions to negotiate, where appropriate, a rescheduling of debt which is consistent with safe and sound banking practices and the country's ability to pay.".

FLOATING EXCHANGE RATES

SEC. 313. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"FLOATING EXCHANGE RATES

"SEC. 51. (a) The Secretary of the Treasury shall, in consultation with the Secretary of State and the United States Trade Representative, initiate discussions with other countries regarding the economic dislocations which result from structural exchange rate imbalances.

"(b) Not later than one hundred and eighty days after the date of the enactment of this section, the Secretary of the Treasury shall transmit a report to the committee on banking, housing, and Urban affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives regarding proposals to reform the floating exchange rate system. Such report shall contain such recommendations for legislative or administrative actions as the Secretary of the Treasury considers advisable.".

SURPLUS COMMODITIES REPORT

SEC. 314. (a) Section 4(b) of the Bretton Woods Agreements Act (22 U.S.C. 286b) is amended—

(1) in paragaph (5)—

(A) by inserting "(A)" after "(5)"; and

(B) by adding at the end thereof the following:

"(B) Beginning one hundred and eighty days after the date of the enactment of this paragraph, and at intervals of one hundred and eighty days thereafter for the next three years, the Council shall prepare and transmit to the President and to the Congress a report listing all applications which have been filed during the preceding one hundred and eighty days with the Fund and with the Bank for project assistance which would establish or enhance the capacity of any country to produce a commodity for export, if—

"(i) such commodity is in surplus on world markets or is likely to be in surplus on world markets at the time the resulting productive capacity is expected to become operative; and

"(ii) such project assistance will cause substantial injury to the United States producers of the same, similar, or competing commodity."; and

(2) by adding at the end thereof the following:

"(8) The general policy objectives for the guidance of the United States Executive Director of the Fund and the Bank shall take into account the effect that country adjustment programs have upon individual industry sectors and international commodity markets—

"(A) to minimize projected adverse impacts; and

"(B) to avoid, wherever possible, government subsidization of production and exports of international commodities without regard to economic conditions in the markets for such commodities.".

HUMAN NEEDS REPORT

SEC. 315. Section 33 of the Bretton Woods Agreements Act (22 U.S.C. 286s) is amended by adding at the end thereof the following:

"(d) Not later than one hundred and eighty days after the date of the enactment of this subsection, the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance, and Urban Affairs of the House of Representatives specifying the actions which have been taken to carry out the provisions of this section.".

NON-PROLIFERATION OF NUCLEAR WEAPONS

SEC. 316. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"NON-PROLIFERATION OF NUCLEAR WEAPONS

SEC. 52. The United States Executive Director of the Fund shall consider, if appropriate, in carrying out his duties, whether a recipient country has detonated a nuclear device, whether the country is not a State Party to the Treaty on Non-Proliferation of Nuclear Weapons, and whether the country is not a State Party to the Treaty Banning Nuclear Weapon Tests In the Atmosphere, in Outer Space, and Under Water.".

POLICIES ON INTERNATIONAL LENDING

SEC. 317. The Secretary of the Treasury shall instruct the United States Executive Director of the International Monetary Fund to propose that the Fund adopt the following policies with respect to international lending:

(1) in its consultations with a member government on its economic policies pursuant to Article IV of the Fund Articles of Agreement, the Fund should intensify its examination of the trend and volume of external indebtedness of private and public borrowers in the member country and comment as appropriate in its report to the Executive Board from the viewpoint of the contribution of such borrowings to the economic stability of the borrower, and the Fund should consider the extent that and form in which these comments should be made available to appropriate national bank regulatory authorities, the international banking community, and the public;

(2) as part of any Fund-approved stabilization program, the Fund should give consideration to placing limits on public sector external short- and long-term borrowing; and

(3) as a part of its annual report, and at such other times as it may consider desirable, the Fund should publish its evaluation of the trend and volume of international lending as they affect the economic situation of lenders and borrowers, and the smooth functioning of the international monetary system.

STUDY

SEC. 318. Section 4 of the Bretton Woods Agreements Act is amended by adding at the end thereof the following:

"(d)(1) The National Advisory Council on International Monetary and Financial Policies shall conduct a study of the impact on the United States steel industry of steel subsidies by nations who are borrowers from the Fund.

"(2) Not later than twelve months after the date of the enactment of this subsection, the Council shall transmit a report to the President and both Houses of the Congress regarding the Council's findings and recommendations for appropriate action.".

PROHIBITION ON RENEGOTIATION FEES

SEC. 319. (a)(1) Notwithstanding any other provision of law (including any other provision of this title), in order to avoid excessive debt service burdens on deptor countries, no banking institution shall charge, in connection with the restructuring of an international loan, any fee exceeding the administrative cost of the restructuring.

(2) Notwithstanding any other provision of law (including any other provision of this title), any fee which is authorized to be charged under paragraph (1) shall be amortized over the effective life of the loan involved.

(b) The requirements of subsection (a) shall take effect on the date of the enactment of this section. Each appropriate Federal banking agency shall promulgate such regulations as are necessary to further carry out the provisions of this section.

SEC. 320. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SEC. 53. The Secretary of the Treasury shall instruct the United States Executive Director to the Fund to propose and work for the adoption of Fund policies regarding the rate of remuneration paid on use of member's quota subscriptions and the rate of charges on Fund drawings to bring those rates in line with market rates. The Secretary of the Treasury shall report to the appropriate Committees of Congress within one hundred and eighty days of enactment the progress made in implementing this provision.".

REIMBURSEMENT FROM BENEFICIARIES OF QUOTA INCREASES

SEC. 321. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"REIMBURSEMENT FROM BENEFICIARIES OF QUOTA INCREASES

"SEC. 54. (a) The Congress hereby finds—

"(1) depository institutions have charged excessive rates of interest on loans made to foreign countries;

"(2) such excessive rates of interest were often imposed in order to compensate for the declared high-risk rate of lending to such countries;

"(3) the United States Government, by increasing its quota contribution to the International Monetary Fund, has substantially reduced the risk of lending to those foreign countries which benefit from the increased resources of the International Monetary Fund;

"(4) such quota contribution by the United States Government will result in a considerable financial burden to the American taxpayer; and

"(5) permitting depository institutions to retain the profits earned from the excessive interest rates charged to such foreign countries results in unjust enrichment to such depository institutions in light of the increase in the United States quota contribution.

"(b) Each depository institution shall transmit a report to the Secretary of the Treasury specifying—

"(1) all loans made by such depository institution to any foreign country;

"(2) with respect to each such loan—

"(A) the rate of interest charged on such loan;

"(B) all service fees imposed on such loan;

"(C) the unpaid balance on such loan;

"(D) the total amount of interest collected on such loan; and

"(E) such other information as may be requested by the Secretary.

"(c)(1) The Secretary may examine the books and records of any depository institution in order to insure compliance with the provisions of this section.

"(2) The Secretary shall consult with the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and other appropriate Federal and State regulatory agencies in order to obtain information on foreign loans by depository institutions which may have been reported to such agencies.

"(d)(1) The Secretary shall determine which loans made by depository institutions or subsidiaries thereof have been extended, refinanced, or made more secure, or in any other manner affected by the increased United States quota contribution to the International Monetary Fund made pursuant to section 40.

"(2) The Secretary shall determine the interest rate charged, and the interest rate earned, on such loans. All such interest rates shall be determined in accordance with provisions of the Truth in Lending Act and the regulations issued pursuant to such Act.

"(e)(1) With respect to loans identified in subsection (d), the Secretary shall determine which loans have earned for the depository institution involved a rate of return which is greater than the rate of return which would have been earned by such depository institution if the principal amount involved had been lent in the United States to a corporate borrower with a rating of AAA for a similar maturity.

"(2) The amount determined by the Secretary to have been earned in excess of the amount which would have been earned from a domestic loan (as determined under paragraph (1)) shall be paid to the Treasury as a reimbursement for the increased quota contribution made pursuant to section 40 of this Act.

"(f) For purposes of this section—

"(1) the term 'depository institution' shall have the same meaning given such term in section 19(b)(1)(A) of the Federal Reserve Act;

"(2) the term 'loan' means any extension of credit to—

"(A) a foreign government or any agency or instrumentality thereof;

"(B) any entity owned in whole or in part by a foreign government unless United States persons own at least 10 per centum of such entity;

"(C) any entity which is not more than 10 per centum owned by United States persons.".

NOTICE TO CONGRESS REGARDING BORROWING IN UNITED STATES CREDIT MARKETS

SEC. 322. Section 5 of the Bretton Woods Agreements Act (22 U.S.C. 286c) is amended by adding at the end thereof the following: "Neither the President nor any person or agency shall, on behalf of the United States, consent to any borrowing (other than borrowing from a foreign government or other official public source) by the Fund of funds denominated in United States dollars unless the Secretary of the Treasury transmits a notice of such proposed borrowing to both Houses of the Congress at least sixty days prior to the date on which such borrowing is scheduled to occur.".

SALARIES OF EMPLOYEES OF THE FUND

SEC. 323. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SALARIES OF EMPLOYEES OF THE FUND

"SEC. 55. Notwithstanding section 40 of this Act, the United States Governor of the Fund may not consent to the increase in the United States quota in the Fund which is described in such section unless the United States Governor of the Fund is satisfied that the Fund has established, and will maintain, requirements that—

"(1) employees of the Fund (including the Managing Director, Executive Directors, Alternate Executive Directors, and the staff of the Fund) may not be paid at a rate in excess of the rate payable for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code; and

"(2) advances on salaries and other loans to employees may not be made at a rate of interest which is less than the rate of interest charged on loans (for one-to four-family dwellings) insured under title II of the National Housing Act on the date on which such advance or loan is made.".

BENEFICIARIES OF THE QUOTA INCREASE

SEC. 324. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"BENEFICIARIES OF THE QUOTA INCREASE

"SEC. 56. The Secretary of the Treasury shall transmit a report to the Congress specifying—

"(1) the total amount of new funding which will be provided by the Fund as a result of the United States quota increase specified in section 40; and

"(2) the countries which will receive loans as a result of such quota increase.".

PAYMENT OF QUOTA INCREASE

SEC. 325. The Bretton Woods Agreement Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PAYMENT OF QUOTA INCREASE

"SEC. 57. The Secretary of the Treasury shall instruct the United States Executive Director of the Fund to propose and work for the adoption of an amendment to article III of the Articles of Agreement of the Fund to provide that the balance of any quota increase shall be paid by member countries in United States dollars, German marks, French francs, British pounds, or Japanese yen.".

TITLE IV—INTERNATIONAL LENDING SUPERVISION

SEC. 401. This title may be cited as the "International Lending Supervision Act of 1983".

DEFINITIONS

SEC. 402. (a) The term "appropriate Federal banking agency" has the same meaning assigned to the term in section 3(q) of the Federal Deposit Insurance Act (12 U.S.C. 1813(q)), and, for purposes of this title, the "appropriate Federal banking agency" for bank holding companies and any nonbank subsidiary thereof, Edge Act corporations organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611-631), and agreement corporations operating subject to section 25 of the Federal Reserve Act (12 U.S.C. 601-604(a)) is the Board of Governors of the Federal Reserve System.

(b) The term "banking institution", for purposes of this title, means any "insured bank", as that term is used in section 3(h) of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)) or any subsidiary of an insured bank; any Edge Act corporation organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611-631); and any agreement corporation operating subject to section 25 of the Federal Reserve Act (12 U.S.C. 601-604(a)). To the extent determined by the appropriate Federal banking agency, the term "banking institution" shall also include any agency or branch of a foreign bank, and any commercial lending company owned or controlled by one or more foreign banks or companies that control a foreign bank as those terms are defined in the International Banking Act of 1978 (12 U.S.C. 3101). The term "banking institution" shall not include a foreign bank.

STRENGTHENED SUPERVISION OF INTERNATIONAL LENDING

SEC. 403. Each appropriate Federal banking agency shall evaluate banking institution foreign country exposure and transfer risk for use in banking institution examination and supervision. Each such agency shall establish examination and supervisory procedures to assure that factors such as foreign country exposure and transfer risk are taken into account in evaluating the adequacy of the capital of banking institutions.

RESERVES

SEC. 404. (a) Each appropriate Federal banking agency shall require, by regulation, a banking institution to establish and maintain a special reserve whenever in the judgment of such agency:

(1) the quality of such institution's assets has been impaired by a protracted inability of public or private borrowers in a foreign country to make payments on their external indebtedness as indicated by such factors, among others, as a failure by such public or private borrowers to make full interest payments on external indebtedness, or to comply with the terms of any restructured indebtedness, or a failure by the foreign country to comply with any International Monetary Fund or other suitable adjustment program, or where no definite prospects exist for the orderly restoration of debt service; or

(2) there is a substantial likelihood that such debt cannot reasonably be expected to be repaid in accordance with its original terms and conditions without additional borrowing or a major restructuring.

(b) The appropriate Federal banking agency shall have the discretion to grant reasonable time periods to a banking institution required to establish such a special reserve to come into compliance with the requirement, if such action is taken to avoid disrupting orderly international lending.

(c) Special reserves established pursuant to this section shall be charged against current income and shall not be considered as part of capital and surplus or allowances for possible loan losses for bank regulatory or supervisory purposes.

(d) The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within one hundred and twenty days after the date of enactment of this title.

ACCOUNTING FOR FEES ON INTERNATIONAL LOANS

SEC. 405. (a) The appropriate Federal banking agencies shall promulgate regulations for accounting for agency, commitment, management and other fees charged by a banking institution in connection with an international loan. Such regulations shall establish the accounting treatment of such fees for regulatory and supervisory purposes to assure that the appropriate portion of such fees is accrued in income over the effective life of each such loan.

(b) The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within one hundred and twenty days after the date of the enactment of this title.

COLLECTION AND DISCLOSURE OF CERTAIN INTERNATIONAL LENDING DATA

SEC. 406. (a) Each appropriate Federal banking agency shall require, by regulation, each banking institution with foreign country exposure to submit, no fewer than four times each calendar year, such information regarding that exposure in a format prescribed by such regulations.

(b) Each appropriate Federal banking agency shall require, by regulation, banking institutions to disclose to the public information regarding material foreign country exposure in relation to assets and to capital.

(c) The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within one hundred and twenty days after the date of the enactment of this title.

INTERNATIONAL COOPERATION AND STUDY OF INTERNATIONAL SUPERVISION

SEC. 407. The Federal banking agencies shall consult with the banking supervisory authorities of other countries to reach understandings aimed at achieving the adoption of effective and consistent supervisory policies and practices with respect to international lending.

CAPITAL ADEQUACY

SEC. 408. (a)(1) Each appropriate Federal banking agency shall cause banking institutions to achieve and maintain adequate capital by establishing minimum levels of capital for such institutions and by using such other methods as the agency deems appropriate.

(2) Each appropriate Federal banking agency shall have the authority to establish such minimum level of capital for an institution as the agency, in its discretion, deems to be necessary or appropriate in light of the particular circumstances of the institution.

(b)(1) Failure of a banking institution to maintain capital at or above its minimum level as established pursuant to subsection (a) may be deemed by the appropriate Federal banking agency, in its discretion, to constitute an unsafe and unsound practice within the meaning of section 8 of the Federal Deposit Insurance Act.

(2)(A) In addition to, or in lieu of, any other action authorized by law, including subsection (b)(1), the appropriate Federal banking agency may issue a directive to a banking institution that fails to maintain capital at or above its required level as established pursuant to subsection (a).

(B)(i) Such directive may require the institution to submit and adhere to a plan acceptable to the agency describing the means and timing by which the institution shall achieve its required capital level.

(ii) Any such directive issued pursuant to this paragraph, including plans submitted pursuant thereto, shall be enforceable under the provisions of section 8(i) of the Federal Deposit Insurance Act to the same extent as an effective and outstanding order issued pursuant to section 8(b) of such Act which has become final.

(3)(A) Each appropriate Federal banking agency may consider such institution's progress in adhering to any plan required under this subsection whenever such institution, or an affiliate thereof, or the holding company which controls such institution, seeks the requisite approval of such agency for any proposal which would divert earnings, diminish capital, or otherwise impede such institution's progress in achieving its minimum capital level.

(B) Such agency may deny such approval where it determines that such proposal would adversely affect the ability of the institution to comply with such plan.

(C) The Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall encourage governments, central banks, and regulatory authorities of other major banking countries to work toward maintaining and, where appropriate, strengthening the capital bases of banking institutions involved in international lending.

FOREIGN LOAN EVALUATIONS

SEC. 409. (a)(1) No banking institution shall extend credit, whether by loan, lease, guarantee, or otherwise, which individually or in the aggregate exceeds $1,000,000, to finance any project involving the construction or operation of any mining, processing or manufacturing facility located outside the United States or its territories and possessions unless a written economic feasibility evaluation of such foreign project is prepared and approved in writing by a senior official of such banking institution.

(2) Such evaluation shall—

(A) take into account the profit potential of the project, the impact of the project on world markets, the inherent competitive advantages and disadvantages of the project over the entire life of the project, and the likely effect of the project upon the overall long term economic development of the country in which the project is located;

(B) document that the extension of credit can reasonably be expected to be repaid from revenues generated by such foreign project without regard to any subsidy or guarantee provided by the government involved, any instrumentality of any country, or by any international organization; and

(C) shall be available to representatives of the appropriate Federal banking agency and such other individuals and entities as have lawful access to such information.

(b) Such economic feasibility evaluations shall be reviewed by representatives of the appropriate Federal banking agencies whenever an examination by such appropriate Federal banking agency is conducted.

GENERAL AUTHORITIES

SEC. 410. (a) The appropriate Federal banking agencies are authorized to interpret and define the terms used in this title, and each appropriate Federal banking agency shall prescribe rules or regulations or issue orders as necessary to effectuate the purposes of this title and to prevent evasions thereof. The appropriate Federal banking agency is authorized to apply the provisions of this title to any affiliate of an insured bank, but only to affiliates for which it is the appropriate Federal banking agency, in order to promote uniform application of this Act or to prevent evasions thereof. For purposes of this section, the term "affiliate" shall have the same meaning as in section 23A of the Federal Reserve Act (12 U.S.C. 371c(b)) except that the term "member bank" in such section shall be deemed to refer to "insured bank", as that term is used in section 402(b) of this title.

(b) The appropriate Federal banking agencies shall establish uniform systems to implement the authorities provided under this title.

(c) The powers and authorities granted in this title shall be supplemental to and shall not be deemed in any manner to derogate from or restrict the authority of each appropriate Federal banking agency under section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818) or any other law including the authority to require additional capital or reserves. Any such authority may be used by an agency to ensure compliance by a banking institution with the provisions of this title and all rules, regulations, or orders issued pursuant thereto.

(d) Any banking institution which violates, or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such banking institution, who violates any provision of this title, or any rule, regulation, or order, issued under this title, shall forfeit and pay a civil penalty of not more then $1,000 per day for each day during which such violation continues. Such violations shall be deemed to be a violation of a final order under section 8(i)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(i)(2)) and the penalty shall be assessed and collected by the appropriate Federal banking agency under the procedures established by, and subject to the rights afforded to parties, provided in said section.

GAO AUDIT AUTHORITY

SEC. 411. (a) Under regulations of the Comptroller General, the Comptroller General shall audit the appropriate Federal banking agencies (as defined in section 402(a) of this Act), but may carry out an onsite examination of an open insured bank or bank holding company only if the appropriate Federal banking agency has consented in writing. An audit under this subsection may include a review or evaluation of the international regulation, supervision, and examination activities of the appropriate Federal banking agency, including the coordination of such activities with similar activities of regulatory authorities of a foreign government or international organization. Audits of the Federal Reserve Board and Federal Reserve banks may not include—

(1) transactions for or with a foreign central bank, government of a foreign country, or nonprivate international financing organization;

(2) deliberations, decisions, or actions on monetary policy matters, including discount window operations, reserves of member banks, securities credit, interest on deposits, and open market operations;

(3) transactions made under the direction of the Federal Open Market Committee; or

(4) a part of a discussion or communication among or between members of the Board of Governors and officers and employees of the Federal Reserve System related to paragraphs (1) through (3) of this subsection.

(b)(1) Except as provided in this subsection, an officer or employee of the General Accounting Office may not disclose information identifying an open bank, an open bank holding company, or a customer of an open or closed bank or bank holding company. The Comptroller General may disclose information related to the affairs of a closed bank or closed bank holding company identifying a customer of the closed bank or closed bank holding company only if the Comptroller General believes the customer had a controlling influence in the management of the closed bank or closed bank holding company or was related to or affiliated with a person or group having a controlling influence.

(2) An officer or employee of the General Accounting Office may discuss a customer, bank, or bank holding company with an official of an appropriate Federal banking agency and may report an apparent criminal violation to an appropriate law enforcement authority of the United States Government or a State.

(3) This subsection does not authorize an officer or employee of an appropriate Federal banking agency to withhold information from a committee of Congress authorized to have the information.

(c)(1) To carry out this section, all records and property of or used by an appropriate Federal banking agency, including samples of reports of examinations of a bank or bank holding company the Comptroller General considers statistically meaningful and workpapers and correspondence related to the reports shall be made available to the Comptroller General, including such records and property pertaining to the coordination of international regulation, supervision and examination activities of an appropriate Federal banking agency. The Comptroller General shall give each appropriate Federal banking agency a current list of officers and employees to whom, with proper identification, records and property may be made available, and who may make notes or copies necessary to carry out an audit. Each appropriate Federal banking agency shall give the Comptroller General suitable and lockable offices and furniture, telephones, and access to copying facilities.

(2) Except for the temporary removal of workpapers of the Comptroller General that do not identify a customer of an open or closed bank or bank holding company, an open bank, or an open bank holding company, all workpapers of the Comptroller General and records and property of or used by an appropriate Federal banking agency that the Comptroller General possesses during an audit, shall remain in such agency. The Comptroller General shall prevent unauthorized access to records or property.

REPORTS TO CONGRESS

SEC. 412. (a) Within one hundred and twenty days after the date of the enactment of this title, the Secretary of the Treasury shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the statutes, regulations, and examination and supervisory procedures and practices, governing international banking in each of the Group of Ten Nations and Switzerland with particular attention to such matters bearing on capital requirements, lending limits, reserves, disclosure, examiner access, and lender of last resort resources.

(b) Not later than one hundred and twenty days after the date of the enactment of this title, the Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the progress made in reaching the goal specified in section 408(c).

(c)(1) Within one year after the date of the enactment of this title and for each of the two succeeding years, the appropriate Federal banking agencies shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on actions taken to implement the provisons of this title.

(2) The report shall include a description of the actions taken in carrying out the objectives of the title, and any actions taken by any appropriate Federal banking agency that are inconsistent with the uniform implementation by the appropriate Federal banking agencies of their respective authorities under this title, and any recommendations for amendments to this or other legislation.

EQUAL REPRESENTATION FOR THE FEDERAL DEPOSIT INSURANCE CORPORATION

SEC. 413. As one of the three Federal bank regulatory and supervisory agencies, and as the insurer of the United States banks involved in international lending, the Federal Deposit Insurance Corporation shall be given equal representation with the Federal Reserve Board and the Office of the Comptroller of the Currency on the Committee on Banking Regulations and Supervisory Practices of the Group of Ten Countries and Switzerland.

TITLE V—MULTILATERAL DEVELOPMENT BANKS

INTER-AMERICAN DEVELOPMENT BANK

SEC. 501. The Inter-American Development Bank Act (22 U.S.C. 283 et seq.) is amended by adding at the end thereof the following:

"SEC. 31. (a)(1) The United States Governor of the Bank is authorized to vote for resolutions—

"(A) which were proposed by the Governors at a special meeting in February 1983;

"(B) which are pending before the Board of Governors of the Bank; and

"(C) which provide for—

"(i) an increase in the authorized capital stock of the Bank and subscriptions thereto; and

"(ii) an increase in the resources of the Fund for Special Operations and contributions thereto.

"(2)(A) Upon adoption of the resolutions specified in paragraph (1), the United States Governor of the Bank is authorized on behalf of the United States to—

"(i) subscribe to four hundred twenty-seven thousand three hundred and ninety-six shares of the increase in the authorized capital stock of the Bank; and

"(ii) contribute $380,000,000 to the Fund for Special Operations.

"(B) Any commitment to make such subscriptions to paid-in and callable capital stock and to make such contributions to the Fund for Special Operations shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(b) In order to pay for the increase in the United States subscription and contribution provided for in this section, there are authorized to be appropriated, without fiscal year limitation, for payment by the Secretary of the Treasury—

"(1) $5,155,862,744 for the United States subscriptions to the capital stock of the Bank; and

"(2) $380,000,000 for the United States share of the increase in the resources of the Fund for Special Operations.

"SEC. 32. It shall be the policy of the United States that no initiatives, discussions, or recommendations concerning the placement or removal of any Inter-American Development Bank, African Development Bank, or Asian Development Bank personnel shall be based on the political philosophy or activity of the individual under consideration.".

ASIAN DEVELOPMENT BANK

SEC. 502. The Asian Development Bank Act (22 U.S.C. 285 et seq.) is amended by adding at the end thereof the following:

"SEC. 27. (a)(1) The United States Governor of the Bank is authorized to subscribe on behalf of the United States to one hundred twenty-three thousand three hundred and seventy-five additional shares of the capital stock of the Bank.

"(2) Any subscription to the capital stock of the Bank shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in subsection (a), there are authorized to be appropriated, without fiscal year limitation, $1,322,999,476 for payment by the Secretary of the Treasury.

"(c) The Congress finds that the Republic of China is a charter member in good standing of the Asian Development Bank, the Republic of China has grown from a borrower to a lender in the Asian Development Bank, and the Republic of China provides, through its economic success, a model for other nations in Asia. Therefore, it is the sense of the Congress that the support provided by the United States to the Asian Development Bank will be terminated if the Republic of China is denied full membership in the Asian Development Bank.

"SEC. 28. (a)(1) The United States Governor of the Bank is authorized to contribute on behalf of the United States $520,000,000 to the Asian Development Fund, a special fund of the Bank.

"(2) Any commitment to make the contribution authorized in paragraph (1) shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution to the Asian Development Fund provided for in this section, there are authorized to be appropriated, without fiscal year limitation, $520,000,000 for payment by the Secretary of the Treasury.".

AFRICAN DEVELOPMENT FUND

SEC. 503. The African Development Fund Act (22 U.S.C. 290g et seq.) is amended by adding at the end thereof the following:

"SEC. 213. (a)(1) The United States Governor of the Fund is authorized to contribute on behalf of the United States $150,000,000 to the Fund as the United States contribution to the third replenishment of the resources of the Fund.

"(2) Any commitment to make the contribution authorized in paragraph (1) shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution provided for in this section, there are authorized to be appropriated, without fiscal year limitation, $150,000,000 for payment by the Secretary of the Treasury.".

HUMAN RIGHTS

SEC. 504. Section 701 of the International Financial Institutions Act (22 U.S.C. 262g) is amended—

(1) in subsection (a)(1), by striking out "consistent"; and

(2) in subsection (g)(1), by striking out "The Secretary of the Treasury, in consultation with the Secretary of State, shall report quarterly" and inserting in lieu thereof "Not later than thirty days after the end of each calendar quarter, the Secretary of the Treasury, in consultation with the Secretary of State, shall report.".

STUDY

SEC. 505. (a) It is the sense of Congress that—

(1) the multilateral development institutions serve an invaluable role in promoting development abroad;

(2) foreign direct investment, trade, and commercial lending make a contribution at least equal to that of development assistance in promoting development;

(3) United States economic interests are vitally affected by conditions in developing countries; and

(4) the multilateral development banks already play an important, although indirect, role in encouraging private investment flows.

(b)(1) The Secretary of the Treasury shall conduct a study of how the multilateral development institutions could more actively encourage foreign direct investment and commercial capital flows and channel such investment and capital flows to developing countries for sound and productive development projects through a new investment banking facility at one or more of these institutions. In addition, such study shall evaluate whether the multilateral development institutions could help increase foreign direct investment and commercial capital flows by insuring that the interests of investors and host governments are adequately protected.

(2) The Secretary of the Treasury shall solicit comments on such study from the multilateral development institutions and shall incorporate such comments with the study in a report to be transmitted to both Houses of the Congress within one hundred and eighty days of the date of the enactment of this section.

EFFECTIVE DATE

SEC. 506. This title shall take effect on October 1, 1983, except that section 503 shall take effect on the date of the enactment of this title.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by United States banks, and provide for continued United States participation in multilateral development banks."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2957) was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 695

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that, in the engrossment of the House amendment to S. 695 the Clerk be authorized to correct section numbers, punctuation, and cross references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending the bill H.R. 2957.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3329) entitled "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 1, 23, 28, 36, 39, 41, 53, 60, 61, 64, 65, 66, 67, and 69 to the above-entitled bill.

The message also announced that the Senate recedes from its amendment numbered 21 to the above-entitled bill.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate numbered 70 with an amendment.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. LEHMAN of Florida. Mr. Speaker, I move to take from the Speaker's table the bill (H.R. 3329) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purpose, with Senate amendment No. 70 thereto, and concure in the Senate amendment to the House amendment to the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendment to the Senate amendment as follows:

At the end of the matter proposed to be inserted by the amendment of the House of Representative, insert:

SEC. 323. None of the funds appropriated by this Act or any other Act may be obligated or expended before October 15, 1983—

(1) to adopt, to issue, or to carry out a final rule or regulation, a final revision, addition, or amendment to regulations, or a final statement of policy based on any proposed rule or regulation any proposed revision, addition, or amendment to regulations, or any proposed statement of policy of which a notice was published in parts III-VI of the Federal Register on March 30, 1983 (48 F.R. 13,342 to 13,381) or in part III through VI of the Federal Register on July 14, 1983 (48 F.R. 32,275 to 32,312); or

(2) to adopt, to issue, or to carry out any final rule or regulation, any final revision, addition, or amendment to a regulation, or any final statement of policy which effectuates the purposes of any proposed rule, regulation, revision, addition, amendment, or statement of policy referred to in clause (1).

Mr. LEHMAN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

These was no objection.

The SPEAKER. Does the gentleman from Florida (Mr. LEHMAN) desire time on the motion?

Does the gentleman from Pennsylvani (Mr. COUGHLIN) desire time on the motion?

Without objection, the Senate amendment to the House amendment to the Senate amendment is agreed to.

Mr. COUGHLIN. Mr. President, I object.

I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The gentleman from Florida (Mr. LEHMAN) brought this up as a privileged motion. He did not ask unanimous consent, so the question was on the gentleman's motion.

The Chair asked if the gentleman wanted time and he would have been entitled to 30 minutes, as would the gentleman from Florida (Mr. LEHMAN). Neither asked for time so the Chair put the question and the motion was agreed to.

Now if the gentleman wants unanimous consent to revise and extend his remarks at this particular time, then that is the only thing that is in order.

Mr. COUGHLIN. Mr. Speaker, I would like a vote on the motion.

The SPEAKER. The Chair put the question, but if the gentleman was standing seeking recognition while the Chair put the question and wants a vote, the Chair will put the question again.

Mr. COUGHLIN. I want a vote, Mr. Speaker.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. COUGHLIN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is present.

Mr. COUGHLIN. Mr. Speaker, may I ask for the yeas and nays?

The SPEAKER. The gentleman asks for the yeas and nays.

Those in favor of taking this by the yeas and nays will kindly rise.

The Chair will count.

Mr. COUGHLIN. Mr. Speaker, I withdraw my request.

The SPEAKER. The gentleman withdraws his request.

The motion is agreed to.

A motion to reconsider was laid on the table.

□ 2110

RELATING TO THE CONTEMPT CITATION OF ANNE M. (GORSUCH) BURFORD

Mr. HOWARD. Mr. Speaker, I call up a privileged resolution (H. Res. 180) relating to a citation of contempt, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 180

Whereas, on December 16, 1982, the House of Representatives adopted a resolution citing Anne M. (Gorsuch) Burford, Administrator of the Environmental Protection Agency, for contempt of the House for her refusal to comply with a subpena issued by the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation calling for production of certain records; and

Whereas, on December 17, 1982, the Speaker certified the contempt resolution to the United States Attorney for the District of Columbia by law; and

Whereas the United States District Court for the District of Columbia dismissed, upon motion by the House, a civil suit commenced by the Department of Justice against the House of Representatives and certain of its officers seeking injunctive and declaratory relief with respect to the aforementioned citation of contempt; and

Whereas upon dismissal of the suit by the court and in order to obtain the most expeditious and timely access to the documents essential to the subcommittee's investigation, representatives of the Subcommittee on Investigations and Oversight, the President of the United States, and the Department of Justice executed an agreement providing for access to and copying of the records previously subpenaed; and

Whereas, as a part of said agreement, the chairman of the subcommittee represented that, upon satisfactory implementation of the agreement, he would introduce a resolution containing recitals that implementation of the procedures established therein constitutes a purging of the aforesaid resolution of December 16, 1982, certifying that compliance has been effected and that further proceedings concerning the contumacious conduct of the witness were unnecessary; and

Whereas, by the terms of the agreement, as subsequently modified by the parties, access to and copying of the documents for which the subpena was issued has been in substantial part, effected to the satisfaction of the subcommittee; and

Whereas the House of Representatives does not acknowledge, by reason of this resolution, that substantial compliance with a subpena after certification of contempt for failure or refusal to testify or produce documents pursuant to subpena, constitutes compliance therewith, or that any efforts by a witness subsequent to the return date of a subpena precludes proceeding in accordance with section 194 of title 2, United States Code; and

Whereas the House of Representatives reasserts that the statutory means of compulsion provided by law for compliance with subpenas is applicable to executive branch officials; and

Whereas the House of Representatives reasserts that no officer charged with the responsibility to discharge duties required by section 194 of title 2, United States Code, is, or was at any time, relieved of or excused from the duties imposed upon him by such law: Now, therefore, be it

Resolved, That the Speaker shall certify this resolution, reciting the additional facts pertinent to the contempt citation of Anne M. (Gorsuch) Burford to the United States Attorney for the District of Columbia.

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all after the resolving clause and insert in lieu thereof the following: "That the Speaker shall certify this resolution, reciting the additional facts pertinent to the contempt citation of Anne M. (Gorsuch) Burford, to the United States Attorney for the District of Columbia."

The SPEAKER. The gentleman from New Jersey (Mr. HOWARD) is recognized for 1 hour.

Mr. HOWARD. Mr. Speaker, I yield, for debate purposes only, 30 minutes to the gentleman from New York, (Mr. MOLINARI), and pending that, I yield myself such time as I may consume.

Mr. Speaker, on December 16, 1982, this body adopted a resolution citing Anne M. (Gorsuch) Burford, Administrator of the Environmental Protection Agency, for contempt of the House for her refusal to comply with a subpena issued by the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation calling for production of certain records. The resolution against Anne M. (Gorsuch) Burford arose out of the issuance of a subcommittee subpena for Agency records on November 1982, necessitated by the EPA's refusal to make available to the

subcommittee pertinent and crucial information documenting how the EPA was carrying out its responsibilities under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, the so-called Superfund statute, which provides for the cleaning up of abandoned hazardous chemical waste dumps. The EPA Administrator's refusal to comply with the subpena and the withholding of certain documents led ultimately to the House's citation for contempt.

The Congress created the EPA for the specific purpose of protecting the natural resources of this country; the health and welfare of its citizens and to give us clear water and clean air. Mrs. Burford as Administrator of EPA held the ultimate responsibility for carrying out the environmental program which Congress enacted. The Committee on Public Works and Transportation, one of the creators of the Superfund program, has the ultimate responsibility through its oversight jurisdiction of reviewing the actions of EPA.

The EPA Administrator should faithfully, openly, and directly carry out the environmental programs. This is the first test of responsible administration. There should be cooperation between the Congress and EPA and between the administration and the committees of Congress who handle EPA programs.

Of all the administrators who have served this Nation as the head of EPA, Mrs. Burford certainly failed to meet the test. She displayed a contemptuous attitude toward the public by operating behind closed doors. Her agency consistently refused to cooperate with the Congress of the United States in matters pertaining to our mutual interest. During Mrs. Burford's administration EPA fell upon evil times and became a shell of its former self. Mrs. Burford was a disgrace to the administration and a menace to the environment. It is my fervent hope that in the days to come an effort will be made to repair the damage done to this Agency and the Nation by the actions of Mrs. Burford. The failure of Mrs. Burford to act, lead to the subpena issuance and the contempt citation which followed.

This administration showed its disregard for this body and compounded the situation by the following action: Moments after the overwhelming and bipartisan vote by the House and before the Speaker of the House had actually certified the resolution of contempt to the U.S. attorney for presentment to the grand jury, the Department of Justice filed a civil lawsuit in the U.S. District Court for the District of Columbia, seeking to enjoin and restrain the House of Representatives from taking any further action to enforce the subcommittee's subpena and to declare the subpena unconstitutional. The House filed a motion with the district court seeking to have the Department of Justice's lawsuit dismissed. Primary among the House's arguments was that the court lacked jurisdiction over the subject matter and over the House Members and officers actually named as defendants in the suit. The U.S. District Court for the District of Columbia dismissed the Department of Justice's suit.

The resolution before us today clarifies the matters brought about by the inaction of EPA and Mrs. Burford in failing to do what they should have done. It in no way relieves anyone including executive officers of future responsibility for complying with a congressional subpena and if they fail to do so, from being cited for contempt.

Let me quote from a portion of this resolution:

Whereas the House of Representatives asserts that the aforesaid agreement and this resolution, relating solely to the subpoena issued by the subcommittee, does not constitute a precedent or concession with respect to the rule of law that substantial compliance with a subpoena after certification of contempt for failure or refusal to testify or produce documents pursuant to subpoena, constitutes compliance therewith, or that any efforts by a witness subsequent to the return date of a subpoena precludes proceeding in accordance with section 194 of title 2, United States Code; and

Whereas the House of Representatives reasserts that the statutory means of compulsion provided by law for compliance with subpoenas is applicable to executive branch officials; and

Whereas the House of Representatives reasserts that no officer charged with the responsibility to discharge duties required by section 194 of title 2, United States Code, is, or was at any time, relieved of or excused from the duties imposed upon him by such law.

Mr. Speaker, we heard testimony at a hearing relative to this citation by the U.S. attorney for the District of Columbia and he indicated that the existing law relative to procedures to carry out a contempt citation gave him wide latitude to act or not to act. He may delay or postpone proceedings before the grand jury indefinitely. I find this situation intolerable Mr. Speaker. It is a flaunting of the will of the Congress. for this reason, I have introduced H.R. 3456 which has been referred to the Committee on the Judiciary which would clarify the duty of the U.S. attorney to bring before the grand jury certain matters certified by the President of the Senate or the Speaker of the House of Representatives. This bill requires the U.S. attorney to act as follows:

The duty of the U.S. attorney under the preceding sentence is nondiscretionary and shall be carried out not later than sixty days after the date on which the President of the Senate or the Speaker of the House of Representatives, as the case may be, makes the certification.

Mr. Speaker, we found that the U.S. attorney did nothing after your certification of this contempt citation. The U.S. attorney said that he had prosecutorial discretion. And that meant despite an overwhelming vote of the Congress of the United States, this U.S. attorney, for any reason or perhaps for no reason, could just sit back and do nothing.

We find that this is intolerable. And we have many people here tonight who will be voting for this resolution which really cannot purge Anne Burford of contempt because this was an action by another Congress, but what it really says in effect is, "if at this time since all of the papers have come to the Congress that we required, if they do not take her to court, if they do not put her in jail, we do not mind."

But I wish so many people who are going to label Anne Burford as a "martyr" in the situation, the poor young lady who wanted to cooperate with the Congress but was refused to do that, was not allowed to do that because of higher ups, I just hope that those people who stand up so much for this person who was in contempt of Congress, would also stand up for the Congress of the United States and be willing to cosponsor this resolution, and have the Judiciary Committee bring it out, that says once the Congress of the United States acts on a contempt citation and it is certified by the Speaker of the House of Representatives then that U.S. attorney has no discretion, that U.S. attorney must, at least, present it to the grand jury, for whatever action they may take.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I am going to vote for this resolution. I believe that it is the right thing to do but it in no way lessens the need for us in this Congress to see that this kind of delay by the U.S. attorney no longer may happen once the Congress of the United States speaks.

□ 2120

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Speaker, I will address the resolution at a later point if I am yielded time, but at this point I want to commend my chairman for introducing his legislation.

And I think it should be sponsored in a bipartisan way because what we saw in this situation was not only a flaunting of this Congress, but an abuse of power.

The U.S. attorney, whose responsibility it was under the statute, and it said: Whose duty it shall be—whose duty it shall be to present the matter

to the grand jury for its action, failed to do so.

The Assistant Attorney General said, "We will never prosecute Anne Gorsuch." They told us what they were going to do. They did not keep it a secret. It was like writing Mein Kampf. Hitler said what he was going to do and he did it. These people said what they were going to do or not do, and they did not.

If we do not have a law in place which leaves no question that when this Congress, this House or the other body, votes a contempt that it will be presented to a grand jury, then we might as well pack up our investigative powers and our subpena powers.

I believe that one of the reasons the jury acquitted Rita Lavelle in a contempt of Congress, not a one of the reasons is that jury saw that Anne Gorsuch, who was held in contempt of Congress, never even got it presented to the grand jury. And Rita Lavelle, who was made the scapegoat, was indicted in a very short period of time.

That is why we need the gentleman's legislation.

Mr. HOWARD. I thank the gentleman for his comments.

What happened, to some of us who are not attorneys, Mr. Speaker, and who do not quite understand it, but apparently in law the word "shall" does not mean "must" or is not mandatory. The word "shall" occasionally means "maybe." And this is what we want to clear up.

We are very confused because all of our lives we thought that "shall" meant that something must be done. If "shall" does not necessarily mean "shall," maybe "shalt not" does not mean "shalt not." And I do not know what that would do with the Ten Commandments. Perhaps maybe "shalt not" means maybe once in a while.

But I think that we have got to get this cleared up. And we can get it cleared up by having the resolution that I recently introduced passed by this Congress.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore (Mr. MOAKLEY). The gentleman from New York (Mr. MOLINARI) is recognized for 30 minutes.

Mr. MOLINARI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of House Resolution 180 introduced by the gentleman from Georgia (Mr. LEVITAS) which would require the certification of new facts to the U.S. attorney with respect to the Gorsuch contempt matter. This resolution, hopefully, will pass the House of Representatives today and mark the end of a sad chapter in the relationship between the executive and legislative branches of our Government. If there is any lesson to be learned from the events that transpired during the past year, it would seem to me that the very least should be an awareness that the confrontation that took place between the two branches never should have occurred. It was a terrible mistake of judgment by some individual or individuals who were never fully identified. So, that even as we debate this resolution today, we are still not sure of the precise parties who created this conflict which resulted in a tremendous loss of time on the part of several congressional committees as well as the Environmental Protection Agency and the Department of Justice.

When the original contempt resolution came before the House of Representatives on December 16, 1982, many of my Republican colleagues were critical of the gentleman from Georgia (ELLIOTT LEVITAS) chairman of the Investigations and Oversight Subcommitee of the Public Works and Transportation Committee. there were concerns expressed during the floor debate that this was a rash act, that Congress was moving too quickly, and that we should have allowed more time to attempt to work out a reasonable compromise.

The cold, hard facts were that we were unable to reach such an agreement and that many months were consumed in a vain attempt to do so. If the House was to fulfill its important oversight responsibility of examining the management of the Superfund law through its committees and subcommittees, it was imperative that we have access to Environment Protection Agency files. To have accepted the administration's position on executive privilege with respect to the documents would have had the effect of eviscerating our inquiry.

I do not wish to recount the events that took place thereafter except to comment that they were somewhat bizarre. The U.S. Attorney for the District of Columbia did not promptly take the matter before the grand jury in the District of Columbia as required by law, and the Department of Justice chose to thwart the will of Congress by instituting a civil action against the House of Representatives to set aside the criminal contempt resolution adopted by the House. The ill-conceived suit was quickly dismissed by Federal Court Judge Smith with the admonition that the matter should be resolved by negotiation and compromise between the two branches of Government without further judicial involvement.

This led to the execution of a memorandum of understanding among Chairman LEVITAS; Fred Fielding, Counsel to the President; and Ed Schmults, Deputy Attorney General. An amended memorandum of understanding was entered into among the same parties on March 22, 1983.

Both agreements provided that when certain conditions on the part of the executive branch were adhered to to the satisfaction of Chairman LEVITAS, he would introduce a resolution which would endeavor to purge Mrs. Anne Gorsuch Burford of contempt. Formal hearings were conducted by the subcommittee which clearly established that all of the conditions to be performed by the administration were fully met. I am now fully satisfied that the Public Works Subcommittee on Investigations and Oversight has complete access to files necessary for the Superfund investigation. Subcommittee staff, both minority and majority, have interviewed many EPA personnel and examined numerous Superfund enforcement sensitive and confidential files both at headquarters and two regional offices. As far as I am concerned, the subcommittee has enjoyed full and complete access to the Agency's files. In my judgment, it is now our responsibility to complete this matter and adopt the instant resolution.

Historically, I would like to point out that the issue arose in my congressional district when Chairman LEVITAS, at my request, toured several toxic dump sites in New York and New Jersey and subsequently agreed to convene an inquiry into EPA's administration of Superfund. When EPA refused to cooperate in the inquiry, it led to the unprecedented confrontation that took place. Had we not moved forward with a criminal contempt resolution, we still would be unable to have access to the files necessary for us to proceed with this extremely important work which affects every citizen in the United States.

There were several significant points that emerged around the time that Congress voted in favor of the criminal contempt resolution. We should remember that Mrs. Burford was directed by the President not to release the so-called enforcement sensitive documents and that similar admonitions were given to her by the Department of Justice. We subsequently learned that Mrs. Burford was actually willing and anxious to give open access of all files to our subcommittee. At the same time, we became involved in some very complicated legal questions—the issue of executive privilege, the question of whether one Congress can purge a contempt resolution of another Congress, the role of the Department of Justice, possible conflict of interest problems and other serious issues.

I would like to pay special tribute to the gentleman from Georgia (Mr. ELLIOTT LEVITAS) for the responsible, bipartisan approach that he maintained throughout this controversy. There were some who would try to convert

this into a political issue, but Mr. LEVITAS maintained a steady course, looking solely for answers and information—not retribution. Given the history of this entire sorry episode, it was probably inevitable and no doubt necessary, in order to restore public confidence in the Agency that the problems at EPA highlighted during this period resulted in mass dismissals of upper level agency personnel and needed changes in Superfund policy. The new Administrator, Bill Ruckelshaus, has been acclaimed by leaders of both parties as the right person for the job, and I am optimistic that, given the proper resources, he will be able to set about fulfilling the assignments and statutory mandates that were given to EPA.

Mrs. Burford resigned many months ago and, since her resignation, was totally incapable of playing any role in effectuating the agreements that were reached with the administration in providing access to Superfund files. As one who was a rather severe critic of Mrs. Burford while she was the Administrator and one who argued strongly in favor of the original contempt resolution, I now say, in the spirit of fairness, we have achieved our goal and she should no longer live with this cloud over her head. Our traditional American sense of fair play should compel us to move forward and adopt this resolution. We have diverted much too much of our limited time to this confrontation, and the quicker we are able to put this matter behind us, the better we will be able to move on to other, now more important, issues.

I urge my colleagues to support this resolution.

Mr. HOWARD. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. MATSUI) for debate purposes only.

Mr. MATSUI. I would like to speak, if I may, Mr. Speaker, in opposition to this resolution.

The gentleman speaks that perhaps we should look upon this matter in a bipartisan fashion. In fact, I think all three gentlemen have said this. And I think we should because last December when we voted on this, we voted in a bipartisan fashion by a 403 to 0 vote to hold Mrs. Burford in contempt of Congress.

And I would also mention to the gentleman who just spoke in the well that, yes, Mrs. Burford has resigned. She is without a job and it is a very tragic situation for her.

But I would only say that the same situation occurs with Rita Lavelle. She was fired from her job. She also is without a job. She wanted to comply with the subpena after the contempt citation by the Congress was in fact passed, but we refused to allow her.

But, nevertheless, the U.S. attorney prosecuted her, but the U.S. attorney did not, for some reason, decide to prosecute Mrs. Burford.

And I agree with the gentleman from New Jersey that in fact this does not expunge Mrs. Burford from contempt. But at the same time the statements of fact in the resolution basically exonerate her. And the U.S. attorney has said that he will not prosecute anyway.

And so our act tonight is somewhat meaningless. And so why should we actually vote for this particular resolution except perhaps to show some face-saving way for the U.S. attorney and for the people involved in this particular action.

And let me just tell my colleagues, this is a bipartisan matter because this goes to the very heart of the powers of the U.S. Congress. We have held only two Government officials in contempt in this century. One was exonerated by a jury, mainly because they felt sorry for her because we did not move on Mrs. Burford. And the other one now will probably be exonerated because we decide we want to feel sorry for her.

And to me that makes very little sense, because the Congress of the United States has the power of subpena and once we hold in the Congress that a person is in contempt, we should not at a later time give that person an opportunity to renegotiate.

□ 2130

The opportunity to negotiate should occur only between the time when that subpena was issued and the time when the person served is to appear before the committee.

So I strongly urge the Members of this House to vote no on this resolution. I think we are going to start a very dangerous percedent for no reason at all, and I urge in the strongest way possible a no vote.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. MATSUI) has expired.

Mr. HOWARD. Mr. Speaker, I yield 1 additional minute to the gentleman from California (Mr. MATSUI).

Mr. MATSUI. Mr. Speaker, may I correct the RECORD? I did make a mistake. The Lavelle contempt citation apparently was 403 to 0. The Gorsuch one was 259 to 105. So it was not quite bipartisan. But I think my argument still holds.

Mr. MOLINARI. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, I rise in support of the resolution.

The action of the House on December 16, 1982, finding Mrs. Burford in contempt was not, and should not have been, viewed as a referendum on EPA policies and Mrs. Burford's stewardship of the agency.

The vote reflected instead the right of Congress to obtain documents within the possession and control of the executive branch and to obtain information necessary to carry out its legislative responsibilities as provided to the Congress under Article I of the Constitution.

Under the memorandum of understanding executed on February 18, 1983, by the gentleman from Georgia (Mr. LEVITAS), Fred F. Fielding, Counsel to the President, and Edward Schmults, the Deputy Attorney General of the United States, the action that the House takes today was deemed as an "essential and nonseparable condition" of the agreement under which documents relating to all superfund hazardous waste sites were to be made available to the Investigations and Oversight Subcommittee of the Committee on Public Works and Transportation.

Testimony recently received by the subcommittee chaired by Mr. LEVITAS has demonstrated that the procedures established for production of the documents by the EPA to the committee have been found to be satisfactory and have enabled the committee to go forward with its investigation.

I only regret that this resolution could not have been acted upon by the House at an earlier date. It has been 5 months since this agreement was reached. It is apparent that Mrs. Burford has suffered greatly and unnecessarily as a result of the events leading up to the vote of the House last December and her resignation as Administrator on March 9, 1983.

Those of us who were involved in this dispute between the Congress and the executive branch are well aware that Mrs. Burford was an unwilling participant. She recommended to the Department of Justice and to the President himself that the withheld documents be turned over. She also recognized that her ability and capacity to preside over the affairs of the EPA would be jeopardized by her role as the standard bearer for the President's position on executive privilege, a position which was, unfortunately, wrongly perceived by many to be an attempt to conceal or cover up unethical, illegal, or improper conduct.

The instincts of Mrs. Burford, whom history will show was a fine and able public servant, were remarkably perceptive. A top executive branch official, being subject to possible indictment and conviction for contempt of Congress, cannot muster the requisite degree of good will, trust, and confidence necessary to administer and implement important national programs.

Unfortunately, there were individuals in the executive branch who failed to recognize this fact. That left Mrs. Burford in the unenviable position of defying the express instruction

of the President of the United States that executive privilege be asserted and no doubt being dismissed from her position by the President, or remaining a loyal soldier to the President by following the direction of the President, thus inevitably bringing upon herself the immense public and media pressure which led eventually to her resignation on March 9.

Mr. Speaker, the testimony of nearly 30 witnesses who, in the last 6 months, have come before the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce of which I am ranking minority member, recounting the facts surrounding the administration of the Superfund program, has shown that Mrs. Burford's professional conduct was at all times honorable and proper.

The action the House takes today is the least that we can do to fully restore to Mrs. Burford the dignity and respect to which she is entitled.

Mr. HOWARD. Mr. Speaker, I yield myself 1 minute.

Having listened to the gentleman from North Carolina, who states this action we take tonight is the least we can do for Mrs. Burford, the gentleman may not have read and been aware of the statements concerning the contempt for Congress, if not of Congress, that were made during this time that she was withholding these documents.

Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I agree with the chairman and everything he said on this legislation. I intend to support it. But I also think that the gentleman from California (Mr. MATSUI) has made a point which needs to be recognized, to this extent: Obviously, Mrs. Burford, having lost her job, and the Congress having received the documents, there is no point in proceeding with this contempt citation.

However, I strongly agree with the chairman of the committee that we must change the law so that in the future, when there is what amounts to a criminal contempt of Congress, there is no discretion on the part of the prosecutor but to carry out the contempt citation.

I would like to say one other thing. The Assistant Attorney General, who is also the Counsel to the Justice Department, appeared before the Judiciary Committee in a hearing on this very matter. And if there is anyone who exhibited contempt for the committee and therefore the Congress, it was he. I would say that another reason to relieve Anne Burford of this charge is that the true contempt was committed by the architects of this whole scheme to resist the efforts of the committee to get what it legitimately was entitled to see, and I think that that is where the focus should be and not on Anne Burford.

Mr. MOLINARI. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. I thank the gentleman for yielding.

Mr. Speaker, I want to echo the words of the ranking minority member of the Energy and Commerce Committee. Mrs. Anne Burford appeared before our committee and suggested very clearly that she wished to turn those documents over to us, that it was in fact on orders of the Justice Department that she could not turn those documents over to us. We have those documents now, and I think the motion to relieve any further effort to hold her in contempt or put her in jail now is in order. She has, after all, resigned. She wanted to comply with our subpena. She was told not to by her superiors. I suggest the sentiment of many of us is that someone else above her probably should have been held in contempt of this Congress for giving her that order.

So I join with the gentleman in asking that we vote for this resolution.

Mr. MOLINARI. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. MICHEL), the minority leader.

Mr. MICHEL. Mr. Speaker, I rise in support of House Resolution 180 and strongly urge its adoption by the House.

I am both hopeful and grateful at this point.

I am hopeful that the House will do the honorable thing and approve this resolution which will remove any criminal jeopardy to or stigma against a dedicated public servant, Mrs. Ann Gorsuch Burford.

I am grateful to the gentleman from New Jersey (Mr. HOWARD), the gentleman from Kentucky (Mr. SNYDER), the chairman and ranking member of the committee, the gentleman from Georgia (Mr. LEVITAS), and the gentleman from New York (Mr. MOLINARI), the chairman and ranking member of the subcommittee, as well as the Speaker himself for their patience and diligence in bringing this matter through a laborious and fractious legislative process.

This case has been a most difficult one from the start.

When the original contempt resolution was considered in the House last December, I opposed it.

I opposed it because I thought the original subpena went too far and I thought the process to enforce it was going too fast.

I never quarreled with the power of the House to enforce its subpena; I only quarreled with the process being followed at that time.

Subsequently the Department of Justice filed a surprise civil suit against the House and challenged our power to hold in contempt an executive branch employee claiming executive privilege.

Fortunately that suit was dismissed by the U.S. District Court for the District of Columbia.

Following that decision I encouraged both the committee leadership and the administration's representatives to work out a system of discovery so that the subcommittee would have access to the information it needed to protect the public's health and safety.

Fortunately again the gentleman from Georgia (Mr. LEVITAS) and representatives from the White House and the Justice Department were able to reach a reasonable accommodation and as events flowed, all the congressional committee's involved were given the information they sought.

In the meantime Mrs. Burford resigned as Administrator of EPA.

Now I would like to emphasize at this point the fact that Mrs. Burford never withheld any information or documents on her own. She was ordered to do so by her superiors and she was advised by the Department of Justice to do so.

She was truly a "good soldier" doing her duty under the most difficult circumstances. Since her departure from Government service she alone has had to bear the legal and emotional costs of her defense.

Yes, Mr. Speaker, the public interest has been served by the several committees getting the factual information they sought and needed.

The constitutional power of the House to obtain this information has been affirmed.

What remains now is to do justice for Mrs. Burford and to think ahead as to how we will be able to prevent another confrontation of this nature.

I recently wrote to the gentleman from New Jersey concerning the method by which the House will enforce a subpena in the future if and when an executive branch official lodges an "executive privilege" defense against a House citation for contempt.

I pointed out to the gentleman that I had carefully considered his suggestion that I cosponsor his bill to mandate prosecutions under 2 U.S.C. 194.

I believe we agree that the U.S. Attorney should always proceed expeditiously toward the prosecution of any witness who has been so certified by the Speaker pursuant to a valid vote of the House of Representatives.

I pointed out that the legal experts say that prosecutors must have some reasonable amount of "prosecutorial discretion." That is, they must be able to use some judgment whether to prosecute someone who for example may be terminally ill.

This was the case, I am told, during the House Ethics Committee investigation of our former colleague, Charles

Wilson of California, when a witness was found to have a brain tumor.

Another aspect to consider is that sometimes a witness will recant when he or she faces actual prosecution and will then cooperate with the House committee involved. This gives the committee an access to information which it would otherwise not have if the prosecutor were ironclad and forced to prosecute.

That incidentally was the case some 30 years ago when I served as the administrative assistant to former Congressman Velde of Illinois. He was the chairman of a committee that held one Francis Crowley in contempt. The House agreed but before Crowley was prosecuted he recanted and cooperated with the committee.

He was never prosecuted by the U.S. Attorney.

Having said all this, I pointed out to the gentleman that I fully support the purpose of his legislation when it comes to prosecuting executive branch officials when they interpose an "executive privilege" excuse for failing to comply with a valid subpena.

I would hope we could make some clear legislative history tonight, that in the future the House expects and demands that the U.S. Attorney, acting under 2 U.S.C. 194 will proceed expeditiously to prosecute executive branch officials with the same, not different standards as to "prosecutorial discretion" applicable to any other person.

I am confident that both the gentleman and I feel that the power of the House to acquire the information it needs to do its duty must be upheld, defended and advanced.

Thus, Mr. Speaker, in summary, let us approve this House Resolution 180 tonight and thereby do justice to Anne Burford while setting a legal standard for the future that all can understand.

□ 2140

Mr. MOLINARI. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. MARTIN).

Mr. MARTIN of New York. Mr. Speaker, I will be very brief.

Some time ago I was one of the some 55 members of the minority who my good friend and colleague from New York (Mr. MOLINARI) referred to, who voted for the contempt citation. Now I think back on the things that have occurred and I think of a great American who lived in my district and who I served with on county board in St. Lawrence County who said, "When the pail is full, let go of the pump. You got enough." He is since deceased, the late Charlie Cooke of Gouverneur.

I remember back when I was watching television one morning and the TV cameraman came up to Anne Gorsuch and put the microphone in her face, as we have all had that experience, and said, "How do you feel now? How do you feel now? The Attorney General is no longer going to defend you."

She said, "Thank God. This is a breakthrough. Now I am going to get some competent legal advice."

You recall it. There are a lot of people in this Chamber who are aspirants to live down at the White House. I cannot blame you for that, although I am certainly not one of them, but I want to tell you something. If you are the boss and have the responsibility for running this country, you need employees such as she was, and when you give her directions you know they will be carried out. The counsel that she had, the Attorney General, whether he or his staff is or was competent and capable to give decent advice or not is not the point. In this case I do not think they were, and in many other cases I do not think they were competent or capable. But she followed that advice given to her by her boss and counsel.

I would suggest to you that now, tonight, we have the opportunity to do what is right, because the pail is full; let go of the pump handle. I would suggest to you that the only reasonable vote, unless you are politically inspired, is to vote "aye" on the resolution that will be voted on next.

The SPEAKER pro tempore. The gentleman from New York (Mr. MOLINARI) has 15 minutes remaining, and the gentleman from New Jersey (Mr. HOWARD) has 11 minutes remaining.

Mr. HOWARD. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. LEVITAS), the chairman of our Investigative Subcommittee.

Mr. LEVITAS. I thank the chairman for yielding this time to me.

Mr. Speaker, there is much that could be said by way of background on this matter which I will not address.

I remember the night that this House held a Cabinet-level officer in contempt of Congress for the first time in history. I remember the courageous position taken by the ranking member of the subcommittee and his colleagues on that side who voted with him.

It was not an easy decision for us to make, but we made that decision. The night that we made that decision it was my intention that, because of the criminal contempt, the matter should be prosecuted. I think it is unfortunate that the U.S. attorney and the Attorney General chose not to do so, and I would have hoped that the Committee on the Judiciary, in exercise of its impeachment authority, would have looked into this matter.

But shortly thereafter, as a result of litigation and a court's decision, the court asked the House of Representatives and the administration to see if we could work out an arrangement to avoid further litigation in this matter. Pursuant to that, and acting on the directions of the chairman of my committee and the Speaker of the House, we had meetings with the administration to see if we could work out an arrangement to get the papers.

Those meetings were held in good faith. Part of that arrangement, and in order to get the documents and not have 6 or 8 or 10 months of litigation, which we would still be involved in, but to get the documents, was to adopt a resolution of the sort that is before the House tonight if the administration lived up to its agreement.

I agreed to that. We have received the documents. We have had total access. The House of Representatives won its fight with the executive branch in this matter.

I believe that while Mrs. Gorsuch, Mrs. Burford, was guilty of criminal contempt and should have been prosecuted, we made an agreement for purposes of getting the documents, and we did.

For that reason, I would hope that the Members of this House tonight will vote for House Resolution 180.

I do not accept the argument that Mrs. Burford was a good soldier. That is the Nuremberg defense. She had the right to resign, just as Elliot Richardson resigned, just as Bill Ruckelshaus, her successor, resigned. And she should have resigned when ordered to do something that was unlawful.

But that is not the issue before us tonight. The issue before us tonight is, we have now received the documents, there has been compliance. Benjamin Disraeli once said that just as important as knowing when to seize an opportunity is to know when to forgo an advantage. We do not need to take a pound of flesh or blood from Anne Gorsuch. Tonight is the night to establish not a precedent but a fact that when this House has prevailed, when we have succeeded, when we have accomplished our purposes, we do not need to press an advantage against this individual and we should resolve this matter by adopting House Resolution 180 tonight. I urge my colleagues to vote for it.

Mr. MOLINARI. Mr. Speaker, I will take just 1 short minute to close, and then yield back the balance of my time.

Mr. HOWARD. Mr. Speaker, before the gentleman from New York (Mr. MOLINARI) closes, since he is one of the principals, I yield 2 minutes to the gentleman from New York (Mr. WEISS) as the last person who has asked for time on this side.

Mr. WEISS. I thank my friend and colleague for yielding this time to me.

Mr. Speaker, what we are really being asked to do here is to take a person who has already received a great benefit by having someone not follow the dictates of the law and prosecute her, and on top of that, now, provide an additional advantage by, in

essence, dismissing the resolution altogether.

I think that is a mistake, not because I have anything against Anne Burford. She could, as the distinguished gentleman from Georgia said, have done the same thing that Mr. Richardson and Mr. Ruckelshaus did, and resigned, rather than do a dishonorable thing. If, in fact, we follow through on the adoption of this resolution, you can bet that henceforth every Commissioner, every Secretary, every Administrator, is going to refuse access on the ground that the President said that, in fact, they should.

That is the way for this House, in fact, to become impotent. I hope we do not vote for our impotence. I hope we vote against this resolution.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I would be pleased to yield to the gentleman from New Jersey.

Mr. HOWARD. I thank the gentleman for yielding.

Mr. Speaker, that would not be the case if we will have the Committee on the Judiciary pass either the bill that I introduced or perfecting it as they, as competent attorneys, would do, and make it mandatory that it at least be presented, unless there are some cases, as the minority leader made, which might be called nitpicking, but I will not do that, but we know we are not talking about that case, but that he would have to bring it to the grand jury within a reasonable time. That is all we are asking in that, and that would avoid sending the message which the gentleman states.

□ 2150

Mr. WEISS. One final word, Mr. Speaker. I happen to have the privilege of chairing an investigative subcommittee. I know the royal runaround that I am getting from the agencies we have jurisdiction over as far as access to files and individuals are concerned.

I have spoken to other chairpeople, both full committee chair and subcommittee chair, and they are getting the same runaround.

What we do by adopting this resolution is encourage the disregard for this Congress.

Mr. MOLINARI. Mr. Speaker, I will close, and I only need about a minute.

Mr. Speaker, the idea of a criminal contempt resolution is a weapon that this House can use, unfortunately when we need it, and we still can use the right of purging, and it is a weapon that we should reserve to ourselves as an institution. I think that is what we have done here.

I do not want to get into a legal argument about whether one Congress can purge another Congress; but indeed, we got what we wanted.

I just want to close by complimenting the chairman of the committee, the gentleman from New Jersey (Mr. HOWARD) for bringing the matter before us tonight.

I want to pay particular tribute, Mr. Speaker, to the gentleman from Georgia (Mr. LEVITAS), who worked almost a year. If you respect the man as I do, he made an agreement, speaking for the subcommittee and I think speaking in his heart for the Members of this body.

I ask you to respect him and to vote for the resolution.

Mr. HOWARD. Mr. Speaker, I yield back my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the resolution, as amended.

The question was taken; and the Speaker announced that the ayes appear to have it.

Mr. MATSUI. Mr. Chairman, on that I demand the yeas and nays.

The yeas and nays were refused. So the resolution, as amended, was agreed to.

The SPEAKER. The Clerk will report the amendment to the preamble.

The Clerk read as follows:

Strike out the preamble and insert in lieu thereof the following:

Whereas, on December 16, 1982, the House of Representatives adopted a resolution citing Anne M. (Gorsuch) Burford, Administrator of the Environmental Protection Agency, for contempt of the House for her refusal to comply with a subpena issued by the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation calling for production of certain records; and

Whereas, on December 17, 1982, the Speaker certified the contempt resolution to the United States Attorney for the District of Columbia as required by law; and

Whereas the United States District Court for the District of Columbia dismissed, upon motion by the House, a civil suit commenced by the Department of Justice against the House of Representatives and certain of its officers seeking injunctive and declaratory relief with respect to the aforementioned citation of contempt; and

Whereas upon dismissal of the suit by the court and in order to obtain the most expeditious and timely access to the documents essential to the subcommittee's investigation, representatives of the Subcommittee on Investigations and Oversight, the President of the United States, and the Department of Justice executed an agreement providing for access to and copying of the records previously subpenaed; and

Whereas following satisfactory implementation of said agreement, the chairman of the subcommittee has, in complete fulfillment of the representations undertaken in the agreement, introduced this resolution, including a recital that implementation of the procedures established therein constitutes a purging of the aforesaid resolution of December 16, 1982, certifying that compliance has been effected and that further proceedings concerning the contumacious conduct of the witness are unnecessary; and

Whereas, by the terms of the agreement, as subsequently modified by the parties, access to and copying of the documents for which the subpena was issued has been in substantial part, effected to the satisfaction of the subcommittee; and

Whereas the House of Representatives asserts that the aforesaid agreement and this resolution, relating solely to the subpena issued by the subcommittee, does not constitute a precedent or concession with respect to the rule of law that substantial compliance with a subpena after certification of contempt for failure or refusal to testify or produce documents pursuant to subpena, constitutes compliance therewith, or that any efforts by a witness subsequent to the return date of a subpena precludes proceeding in accordance with section 194 of title 2, United States Code; and

Whereas the House of Representatives reasserts that the statutory means of complusion provided by law for compliance with subpenas is applicable to executive branch officials; and

Whereas the House of Represenatives reasserts that no officer charged with the responsibility to discharge duties required by section 194 of title 2, United States Code, is, or was at any time, relieved of or excused from the duties imposed upon him by such law: Now, therefore, be it

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the amendment to the preamble be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The amendment to the preamble was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the action just taken.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair intends to complete the rule on H.R. 2230, and then we will go into general debate. We hope at the conclusion of the rule that there will be no further rollcalls for the evening, if there is a rollcall on the rule.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3391, TRADE ACT OF 1974 AMENDMENTS

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 98-345) on the resolution (H. Res. 299) providing for the consideration of the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2453, RADIO BROADCASTING TO CUBA ACT

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 98-346) on the resolution (H. Res. 300) providing for the consideration of the bill (H.R. 2453) to amend the Board for International Broadcasting Act of 1973 to provide for radio broadcasting to Cuba, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2655, DOMESTIC VOLUNTEER SERVICE ACT AMENDMENTS OF 1983

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 98-347) on the resolution (H. Res. 301) providing for the consideration of the bill (H.R. 2655) to extend and improve the Domestic Volunteer Service Act of 1973, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1036, COMMUNITY RENEWAL EMPLOYMENT ACT

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 98-348) on the resolution (H. Res. 302) providing for the consideration of the bill (H.R. 1036) to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities and for other purposes, which was referred to the House Calendar and ordered to be printed.

CIVIL RIGHTS COMMISSION ACT OF 1983

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 273 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 273

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2230) to amend the Civil Rights Act of 1957 to extend the life of the Civil Rights Commission, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Missouri (Mr. WHEAT) is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, I yield the customary 30 minutes for the purposes of debate only to the gentleman from Ohio (Mr. LATTA), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 273 is a simple, open rule providing 1 hour of general debate and a motion to recommit H.R. 2230, the Civil Rights Commission Act of 1983.

Mr. Speaker, the Civil Rights Commission is a bipartisan, independent agency which oversees civil rights enforcement in this country. The Commission was established in 1957 under the Civil Rights Act of 1957 and has been reauthorized seven times since enactment of the original legislation. The Commission enjoys bipartisan support and its studies and findings have been applauded by people throughout the country.

H.R. 2230 is legislation which would amend the Civil Rights Act of 1957 to extend the life of the Commission for an additional 15 years. H.R. 2230 also authorizes appropriations for the Commission in fiscal years 1984, 1985, and 1986. Specifically, the bill authorizes $13 million for fiscal year 1984 and it provides open-ended authorizations for fiscal years 1985 and 1986.

Mr. Speaker, without enactment of a reauthorization, the Commission will cease to exist effective September 30, 1983. The work of the Commission is far too important to risk a delay in reauthorization.

Mr. Speaker, I know of no controversy on this rule. Therefore, I urge my colleagues to support and approve the rule so that we may proceed to the consideration of this important piece of legislation.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the unusual feature of this rule is that it waives no points of order and it imposes no restrictions on amendments. It is an open rule providing for 1 hour of general debate.

The rule generated no controversy in the Rules Committee, where it was reported out by a voice vote.

The bill made in order by this rule, the Civil Rights Commission Act of 1983, was reported from the Judiciary Committee by a voice vote.

Only one Member filed supplemental views in the committee report. The views of the gentleman from Wisconsin, Mr. SENSENBRENNER indicate that he intends to offer an amendment, designed primarily to insure a fixed 6-year term for Commission members and a 20-year extension for the life of the Commission. Under this rule, the amendment may be considered by the House.

The administration supports this bill, according to information provided by the Office of Management and Budget at the time of the Rules Committee meeting. However, the administration continues to favor a 20-year extension of the life of the Commission and the establishment of 6-year staggered terms for members of the Commission. This option would be included in the amendment by the gentleman from Wisconsin.

Mr. Speaker, I urge adoption of the rule so that the House may proceed to work its will on the legislation.

Mr. Speaker, I have one request for time.

Mr. Speaker, I yield 6 minutes to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I rise in support of the rule.

Mr. Speaker, tonight, the U.S. House of Representatives begins consideration of H.R. 2230, legislation to extend the life of the Civil Rights Commission for 15 years, with a $13 million price tag for fiscal year 1984. Extension of the Civil Rights Commission is an objective which I strongly support.

The U.S. Commission on Civil Rights, originally created by the Civil Rights Act of 1957, has no enforcement or regulatory authority. It is charged with studying and collecting information about the state of civil rights in the United States and serves as a clearinghouse for information on civil rights issues.

In recent years, however, many have reluctantly come to the view that the Commission has lost sight of its original purpose. The Commission's projects and reports in many instances are duplicative of the work performed by other Federal agencies. The Commission has devoted more and more of its energies and attention to issues that are properly regarded as issues of welfare policy or social policy; to the existence and funding levels and regulations and administrative operations

of a wide variety of transfer programs, social service programs, and welfare programs. Addressing itself to these issues has caused the Commission to become embroiled in debates which undermine its reputation.

Involving itself in issues that are not properly civil rights issues has the negative effect of throwing the noble concept of civil rights into the cauldron of competing interests. The Commission, some observers have noted, seems to have become beholden to a single, narrow-minded constituency. Still others have said that it has been transformed from an agency supported by the people into a public interest group.

This raises the question of the independence of the Commission, a term which has been greatly bandied about lately. On this issue of independence, I will be offering an amendment which will insure the independence of the Civil Rights Commission for the next 20 years. It is a long-term solution to the current debate. My amendment addresses the concerns raised by Ralph Neas of the Leadership Conference on Civil Rights when, in testifying before the subcommittee, he stated: "The one major gap in assuring the independence of the agency is the failure to provide fixed terms of office as it does with regulatory agencies."

Mr. Neas went on to endorse a 15-year extension of the Commission when he testified:

> The Leadership Conference also believes that the proposed 15-year extension would help guarantee the effectiveness and independence of the Commission. It would allow the Commission to plan ahead and provide a needed continuity with respect to its long-range programs.
>
> Perhaps most importantly, such a 15-year extension would send a strong signal to the entire country that Congress recognizes the problems of discrimination that still exist and that it remains totally committed to the Nation's goal of providing equal opportunity for all its citizens.

Mr. Speaker, my amendment addresses the "independence issue" by providing for 6-year fixed terms of office, a suggestion made by the Leadership Conference on Civil Rights. It further insulates the Commission by allowing the President to remove Commissioners for cause. Finally, it extends the life of the Commission for 20 years, 5 years longer than the time frame suggested by the Leadership Conference on Civil Rights and by H.R. 2230.

This amendment is superior to the amendment offered by the gentleman from California (Mr. EDWARDS), which slashes the authorization period from 15 to 5 years. Thus, the Commission will not be able to do long-range projects in 3 or 4 years without having to worry about the length of the authorization.

I urge Members to adopt my amendment when it is offered. It is the best approach for insuring continuity. independence, and lack of interference from political pressure. Adoption of my amendment would insure there is an independent entity, which is infused with new blood every 2 years, and which is available to make a fair assessment of our civil rights policies.

□ 2200

Mr. WHEAT. Mr. Speaker, as the gentleman from Ohio has no further requests for time and I have no further requests for time, I urge adoption of the rule, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 273 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2230.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2230) to amend the Civil Rights Act of 1957 to extend the life of the Civil Rights Commission, and for other purposes, with Mr. UDALL in the Chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. EDWARDS) will be recognized for 30 minutes, and the gentleman from Wisconsin (Mr. SENSENBRENNER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the U.S. Commission on Civil Rights is the only independent, bipartisan Federal agency responsible for monitoring civil rights in this country. The Commission was initially established by Congress under the Civil Rights Act of 1957. Since then its life has been extended seven times; the most recent extension was in 1978 when the Commission received a 5 year continuance through September 30, 1983. Indicative of how Congress views the Commission's work is the fact that over the years it has expanded the class of protected groups under the Commission's jurisdiction.

The Commission has no enforcement authority. Its effectiveness has been the result of its ability, historically, to perform its duties objectively and honestly, without fear of retribution. The preservation of the Commission's influence and importance is dependent upon its maintaining the appearance as well as the reality of its independence.

At the appropriate time I will have an amendment to H.R. 2230 which has bipartisan support and which will underscore the intent of Congress, from the time the Commission was created in 1957, that the Commission be the independent conscience of this country on civil rights issues. H.R. 2230 also would authorize funds for the Commission for fiscal years 1984, 1985, and 1986.

The Commission's life expires on September 30; thus, it is crucial that we approve this legislation before the recess tomorrow.

Mr. Chairman, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I believe that it is ridiculous that we begin a debate on an important piece of civil rights legislation at 10:08 p.m. in the evening when everybody has made a beeline for the door and many of the Members are heading home.

The amendments that will be offered to this piece of legislation are controversial in nature, and I am certain that the controversy that has swirled around the President's nomination of three new members of the Civil Rights Commission will be a central feature of the debate on the amendments which are designed to insure the independence of the Civil Rights Commission.

My friend from California (Mr. EDWARDS), and I have a rather sharp divergence on how to go about doing that. But rather than take the time of the House tonight to debate to an empty chamber, when most of the Members are on their way home, I am urging Members of the minority that wish to discuss this issue to move to strike the last word during the 5-minute rule tomorrow and to speak their piece when we are fresh and there is a bigger audience to listen to what we have to say.

So, with that admonition, I yield back the balance of the minority's time.

Mr. EDWARDS of California. Mr. Chairman, I yield back the balance of my time.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. RATCHFORD) having assumed the chair, Mr. UDALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2230) to amend the Civil Rights Act of 1957 to extend the life of the Civil Rights Commission,

and for other purposes, had come to no resolution thereon.

LATTY AVENUE IN HAZELWOOD, MO.

(Mr. YOUNG of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YOUNG of Missouri. Mr. Speaker, today I am introducing a bill to transfer the title of a 21.7 acre tract of land formerly known as the Atomic Energy Commission Storage Site back to the Secretary of Energy. At present, this site which is located north of St. Louis Airport, which is in my district, is owned by the city of St. Louis. Also, today an identical bill will be introduced in the Senate by Senators EAGLETON and DANFORTH of the State of Missouri.

The transfer of this title is the first step to solving a problem which has plagued my district for over 15 years now. In World War II, work was done at Malinckrodt plant in St. Louis, Mo. which was essential in the development of the atomic bomb. The radioactive materials processed there from 1942 to 1957 have left terrible problems for my district because of surface radiation levels considerably above current Federal regulations.

This waste lies on the 21.7 acre tract of land north of the airport as well as several ditches in the surrounding area. A large portion of this waste lies at a site on Latty Avenue in Hazelwood, Mo., which is a heavily traveled road in north St. Louis County. These ditches on Latty Avenue are easily accessed by local children who live and play in the area. This causes great concern to me and is a very emotional topic in my district which has local parents in a state of legitimate fear.

There is a plan to construct a building at private expense on the site for temporary containment of the contaminated soil. My bill, also, asks for the Secretary of Energy to take title to the contaminated soil at this location and remove the soil to the site north of the St. Louis airport. The bill, then asks the Secretary of Energy to take remedial action to clean up the radioactive materials at the north St. Louis airport site after an environmental impact statement is completed.

Mr. Speaker, radioactive waste is a problem which should not be made more complex by slow legal manipulations. I am asking Congress to adopt this measure so that legal barriers complicating the problem will disappear and the people of north St. Louis County can live without fear of damaging their children's health as well as their own.

Mr. Speaker, I ask that the text of my bill be printed in full for the RECORD. Thank you.

H.R.3776

A bill, to authorize the Secretary of Energy to accept certain lands in St. Louis, Missouri to provide remedial action with respect to radioactive materials

SECTION 1. (a)(1) If the present owner of the former Atomic Energy Commission Storage Site north of the St. Louis Airport in St. Louis, Missouri (comprising approximately 21.7 acres of land and the radioactive materials stored thereon) offers to transfer such site to the United States without cost to the United States, the Secretary of Energy shall (subject to such avigation easements as are required by Federal Aviation Administration regulations) accept transfer of all right, title, and interest in such site and the radioactive materials stored thereon.

(2) If, following transfer described in paragraph (1) but not later than 1 year after the date of the enactment of this Act, the present owner of the radioactive materials stored at the Latty Avenue Site in Hazelwood, Missouri, offers to transfer such materials to the United States, without cost to the United States, the Secretary of Energy is authorized and directed to accept transfer of all right, title, and interest in such materials and to remove such materials to the site described in paragraph (1).

(b) The Secretary of Energy shall undertake such remedial action to protect public health and safety as may be necessary with respect to radioactive materials which are located at the site acquired by the Secretary under subsection (a)(1) and with respect to such radioactive materials as may be removed to that site by the Secretary from the Latty Avenue site described in subsection (a)(2). Removal of radioactive materials from the Latty Avenue Site and remedial action under this subsection may be commenced only after preparation of a final environmental impact statement under the National Environmental Policy Act of 1969 regarding the environmental effects of the removal and remedial action.

RESULTS OF 1983 QUESTIONNAIRE

(Mr. MILLER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, we recently completed tabulating the results of our annual questionnaire mailing which was sent to all of the residents of Ohio's 10th Congressional District.

Our questionnaire dealt with a number of issues of current concern to the Congress. With this in mind, I would like to share them with you.

I found the results quite interesting and view them as an excellent barometer of the thinking of middle America and I trust you will find them to be the same.

CONGRESSMAN CLARENCE MILLER'S 1983 QUESTIONNAIRE RESULTS

1. Would you support replacing the present progressive Federal income tax with a flat percentage rate tax eliminating all or most deductions? Yes, 74 percent; no, 26 percent.

2. Do you favor a mutual nuclear weapons freeze at present levels? Yes, 47 percent; no, 53 percent.

3. Do you support efforts by Congress to create public sector short term jobs which would be funded in total or in part by the Federal Government? Yes, 42 percent; no, 58 percent.

4. Provided that a reliable basing mode can be found, do you favor deployment of an MX missile system? Yes, 69 percent; no, 31 percent.

5. In view of the private sector's general reluctance to go forward with capital intensive synthetic fuel projects, do you believe that the Government should assume the responsibility to spend whatever is necessary to develop an adequate stand-by synthetic fuels industry? Yes, 59 percent; no, 41 percent.

6. Do you support further efforts to reduce the size and cost of federally sponsored social assistance type programs? Yes, 77 percent; no, 23 percent.

7. Do you support the sending of American servicemen to Lebanon to serve as part of that country's multi-nation peacekeeping force? Yes, 45 percent; no, 55 percent.

8. Would you favor a national lottery as a way of helping to pay off our country's $1.2 trillion national debt? Yes, 55 percent; no, 45 percent.

9. Do you believe our Nation's defenses are adequate? Yes, 31 percent; no, 69 percent.

10. Do you feel that the United States should come to the aid of governments that are threatened by external forces if such assistance is requested and is deemed critical to the ultimate security of the free world? Yes, 77 percent; no, 23 percent.

11. Do you feel more optimistic about the future of the economy today than you did a year ago? Yes, 72 percent; no, 28 percent.

12. Do you favor the granting of tuition tax credits to parents for the following levels of private education: Pre-school—yes, 33 percent; no, 67 percent; elementary—yes, 39 percent; no, 61 percent; high school—yes, 41 percent; no, 59 percent; college—yes, 54 percent; no, 46 percent.

PROPOSED LEGISLATION TO ASSIST ELECTRIC UTILITY CONSUMERS

(Mr. PASHAYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PASHAYAN. Mr. Speaker, I am developing legislation that could save California consumers from a potential $100 million increase in their electric utility bills because of some ill-advised action by the Federal Energy Regulatory Commission (FERC) in 1980.

At this point, Mr. Speaker, I include an editorial from the Fresno Bee of July 13, 1983, as follows:

UNFAIR HYDRO DECISION

San Joaquin Valley customers of the Pacific Gas & Electric Co. will be the losers in the recent decision of the U.S. Supreme Court to favor city-owned utilities over private utilities in the relicensing of hydroelectric projects.

The ruling means that PG&E may be forced to sell the Haas powerhouse on the Kings River and three other hydro projects in the state to such applicants as the Sacramento Municipal Utility District and the city of Santa Clara.

The decision is a serious mistake. PG&E has more hydroelectric capacity, serving more people, than any other privately owned utility in the country. If it loses part of that capacity, the company will have to replace it, resulting in higher costs to remaining PG&E customers. Fresno County users alone will be asked to pay $2 million more a year, it is estimated.

In its decision, the Supreme Court upheld an administrative ruling by the Federal Energy Regulatory Commission (FERC), which said that in giving municipalities relicensing preference over private utilities it was only interpreting congressional intent in the Federal Power Act.

If that's the congressional intent, Congress was wrong and the law ought to be changed. It may be logical to give municipalities preference in the original licensing of a new project but not in the relicensing of an existing one which PG&E has operated for 50 years or more. To do that allows the municipalities to take over the most efficient units and so destroy an integrated power system.

The valley's congressional delegation should move quickly to correct this legal inequity.

Mr. Speaker, although the problem I am addressing has an immediate effect upon residents of California and of the district I have the honor to represent, it has implications for consumers throughout the Nation.

The Commission's action has created a situation which has made possible "raids" by electric utilities owned by several cities on investor-owned hydroelectric power generating facilities on California rivers.

Because of the Commission's ruling, several municipalities in California are attempting to obtain at very little cost the cost-efficient hydroelectric power generated by investor-owned plants. And they want this power in order to service their small number of customers at the expense of the vast majority of consumers, not only in California but throughout the Nation.

Mr. Speaker, this issue involves the relicensing of investor-owned and developed hydroelectric powerplants. Under the Federal Power Act, the FERC is authorized to issue licenses for the construction and operation of most non-Federal hydroelectric facilities.

Those licenses are issued for 50 years, and several hydro facilities in California are or will be up for relicensing in the near future.

Prior to the FERC ruling, the plants were relicensed without incident, when the power companies demonstrated to the Commission that they had served the public interest.

Under reclamation law, preference was given to municipally-owned utilities in the development of power facilities. However, in 1980 FERC ruled that preference was to be given to municipally-owned utilities in the relicensing of these facilities.

In addition, the Commission ruled that, in the case of a tie between an investor-owned and a municipally-owned utility, preference was to be given to the city-owned utility—regardless of the effect upon consumers.

Mr. Speaker, it is interesting to note that the Federal Power Commission—FPC—which is now the FERC, addressed this subject in a letter to Speaker John McCormack, who served the State of Massachusetts, this House, and this Nation with honor for 42 years. The pertinent sentence in that letter reads:

In those rare cases when the two applications are equally matched, the FPC believes that the new license should be issued to the original licensee so long as he can meet the standards of the act at least as well as the other applicant.

Mr. Speaker, it is unfortunate indeed that the Commission in 1980 ignored this wise policy established by its predecessors and created a situation whereby, in my State of California, several electric utilities owned by a number of cities, including Santa Clara, Sacramento, and Anaheim, are attempting to obtain licenses held by investor-owned utilities on powerplants that serve some 3.5 million customers.

I should like to point out that, by way of contrast, the city of Santa Clara serves about 40,000 customers, and the other cities involved in this attempted raid upon investor-owned, power-generating facilities only serve about 621,000 customers.

Mr. Speaker, opposition to the effort by these cities to obtain these hydropower facilities includes the California Public Utilities Commission, 25 counties, including the County of Santa Clara, over 106 cities, 20 public utility and water districts, and a large number of businesses, agriculture interests, and community and service organizations throughout the State.

Although the current members of FERC could reverse the Commission's earlier decision, Mr. Speaker, legislation is needed to prevent future FERC Commissioners from again legitimizing this sort of injustice to consumers. I wish to make it perfectly clear in the law that licenses for hydroelectric plants shall never again be subject to raiding and that consumers shall be protected from the unwarranted energy cost increases that can result from such raids. This is why I am developing this legislation.

□ 2210

IN THE MATTER OF DENNIS BRUTUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 60 minutes.

● Mr. FRANK. Mr. Speaker, I have arranged this special order to express my view, and that of other Members, that it is unworthy of our democratic ideals for the Reagan administration to be insisting on deporting Dennis Brutus. The State Department admits that Mr. Brutus, a leading opponent of apartheid, has a "well-grounded claim of persecution" if he is forced to return to South Africa, whose brutal and inhuman racist system he has been opposing. He was arrested in South Africa in 1963 for his opposition to segregation, and to force him to return there—or to Zimbabwe, as the State Department suggests—is to expose him to the terrorist apparatus of the South African Government.

Mr. Brutus has been teaching in America at the college level since 1971. In August 1981, his petition for immigrant status was approved—but he cannot take advantage of this approval because that would require him to leave the country, and he would not, under Reagan administration policy, be readmitted.

In a manner wholly incompatible with our traditions, the administration will not even tell Mr. Brutus why they insist on his deportation, and why he would be excluded if he left the country to apply for a visa. But there does not appear from the record to be any ground other than his active opposition to apartheid in South Africa, for which that government charged him under their "Suppression of Communism Act"—an act which in fact functions as a suppression of the basic liberties of blacks, coloreds, and those whites who oppose South Africa's racism.

America would be enhanced, not threatened, by allowing this determined foe of racism to find refuge here from the vindictive and brutal Government of South Africa. For this reason, I have filed H.R. 3705 to allow Mr. Brutus to take advantage of the successful petition he filed for a third preference immigrant visa. I hope the administration will drop its ill-advised effort to cooperate with South Africa by jeopardizing the safety of this enemy of racism. But if the President continues to force Mr. Brutus to return to the reach of the South Africans, I hope we will act to reaffirm one of our oldest and proudest traditions: America as a haven for fighters for freedom.●

● Mr. LELAND. Mr. Speaker, I commend the gentleman for arranging this special order and introducing private legislation for the relief of Dennis Brutus.

I would like to add to what has already been said not by trying to find my own words of praise for Dennis Brutus' life and work, but instead, by reading to you his own words. The following are from a collection entitled "A Simple Lust," in South Africa, possession of this work is a criminal offense.

The sounds begin again;
the siren in the night

the thunder at the door
the shriek of nerves in pain.
Then the keening crescendo
of faces split by pain
the wordless, endless wail
only the unfree know.
Importunate as rain
the wraiths exhale their woe
over the sirens, knuckles, boots;
my sounds begin again

—

FOR A DEAD AFRICAN

We have no heroes and no wars
only victims of a sickly state
succumbing to the variegated sores
that flower under lashing rains of hate.
We have no battles and no fights
for history to record with trite remark
only capives killed on eyeless nights
and accidental dyings in the dark.
Yet when the roll of those who died
to free our land is called, without surprise
these nameless unarmed ones will stand
beside
the warriors who secured the final prize.

(John Nangoza Jebe: shot by the police in a Good Friday procession in Port Elizabeth 1956.)

—

Today in prison
by tacit agreement
they will sing just one song:
Nkosi Sikekela;
slowly and solemnly
with suppressed passion
and pent up feeling:
the voices strong and steady
but with tears close and sharp
behind the eyes
and the mind ranging
wildly as a strayed bird
seeking some names to settle on
and deeds being done
and those who will do the much
that still needs to be done.

(June 26, 1967, South African Freedom Day.)●

● Mr. CROCKETT. Mr. Speaker, I rise in strong support of H.R. 3705, a private bill for the relief of Prof. Dennis Brutus, a black South African who is now teaching African and English literature at Northwestern University in Illinois.

I would first like to congratulate my friend and colleague on the House Immigration Subcommittee, the gentleman from Massachusetts, BARNEY FRANK, for offering this bill and for moving so quickly not only to protect the life of Professor Brutus, but to demonstrate his concern and commitment to the fight against apartheid.

Others will point out the work of Professor Brutus against the apartheid system in South Africa—how he was jailed by the South African regime, and how he was forced to flee from there to Zimbabwe, then to London and finally to the United States where he has served for several years as a tenured professor.

I rise instead to discuss the error of innocent omission that make this private bill necessary in the first place. According to the account in the New York Times of July 18, 1983:

Exactly why the (U.S.) Government is making such a concerted effort to deport Mr. Brutus remains unclear. His problems began not as a result of any wrong-doing on his part but rather because of a spate of bad luck.

When he made periodic applications for extension of the temporary United States visa, which allowed him to work here, he was using his British passport. But when Rhodesia became independent Zimbabwe in 1980, Mr. Brutus's British passport was revoked. Zimbabwe issued a new one, but he was late in applying for an extension here. Then an immigration office here could not find his file for six months. By continuing to teach at Northwestern, he was placed in violation of a law that forbids employment by an alien with an expired visa.

Professor Brutus' request for political asylum is being heard by an immigration law judge in Chicago. It has been recessed until September 6. As many of you know, our Department of State has advised the court that, although Professor Brutus' life is definitely in danger in South Africa and possibly may be in danger in Zimbabwe, he nevertheless should be denied asylum because he has a "right" to return to London as a "returning resident." But we are told by Professor Brutus' lawyer that they have introduced into evidence a letter from the British Counsel in Chicago stating that although Mr. Brutus at one time may have had such a right, that right has expired due to his absence from the United Kingdom for the past 2 years.

Mr. Speaker, it is ridiculous for our State Department and our Justice Department to oppose the granting of political asylum to Dennis Brutus, a distinguished poet, scholar and freedom fighter, while at the same time welcoming with open arms any ballet dancer, Eastern European Soviet dissident writer or tennis player who wants to come to America to be free to cash in at the altar of free enterprise. Perhaps if this administration was more sensitive to the struggle against apartheid and more committed to moving minorities into policymaking positions in the Department of State's bureaucracy, our Government would not take such a foolish and shortsighted view on Professor Brutus' application for asylum.

Mr. Speaker, we are indeed fortunate that the Congress and our colleague BARNEY FRANK can step in and correct the administration's mistake in this matter. I am proud to say that I wholeheartedly support Mr. FRANK's bill, and urge each of my colleagues to join us.●

● Mr. MITCHELL of Maryland. Mr. Speaker, I want to express my support for the efforts of Congressman BARNEY FRANK in attempting to aid Dennis Brutus, a black poet and critic of South Africa's apartheid policy. Mr. Brutus is subject to deportation because of his outspokenness and the fact that he has been in self-imposed exile from Southern Africa for 10 years.

As Congressman FRANK has pointed out, Mr. Brutus is a professor of African and English literature at Northwestern University. For over a year, he has been fighting deportation since he is fully aware that his return to southern Africa could gravely endanger his life.

It is sad that Mr. Brutus, a dedicated academician and humanitarian, can only fear inadequate protection if he returns to his native land. Moreover, it is distressing that the determination as to why our Government is pressing Mr. Brutus' deportation remains questionable. I would urge my colleagues to examine the circumstances surrounding Dennis Brutus' plight and join Congressman FRANK in a show of support for his efforts on behalf of this fine professor.●

● Mr. OTTINGER. Mr. Speaker, today Dennis Brutus finds himself on the verge of being deported from the United States, at clear risk to his life and security. As a result of a bureaucratic foulup in the winter of 1981, Professor Brutus' application for a temporary visa—a visa which he had been granted for each of the previous 10 years—was rejected. After numerous legal appeals to the Immigration and Naturalization Service, he has been ruled deportable. With no explanation the State Department has denied his request for political asylum.

I ask my colleagues to consider the life and career of Dennis Brutus. Distinguished scholar, poet, and teacher, he has been a tireless opponent of South Africa's inhumane system of apartheid, a fearless activist on behalf of the cause of human freedom.

As a result of Professor Brutus' nearly single-handed efforts, South Africa, a country obsessed with sports, has been almost completely excluded from international athletic competition since the early 1960's. For his antiapartheid activities—open political activities—Professor Brutus was sectenced to 18 months at hard labor in South Africa's notorious Robben Island Prison. What was the incident which provoked this brutal punishment? Professor Brutus, a South African black, attempted to attend a meeting of the all-white South African Olympic Committee.

During this period of incarceration, Professor Brutus began to write the poems which have brought him worldwide renown. Lamenting the bitter oppression and powerlessness of South Africa's black majority, Professor Brutus' poetry, nine volumes of which have been published, sounds an eloquent appeal to all those who value individual dignity and mourn its destruction in South Africa.

After a second arrest, Professor Brutus, in an attempt to escape from South Africa to freedom, was shot in the back by the South African secret

police. Shortly thereafter, he was allowed to leave the country, but only after signing a document which forbade him to return under penalty of imprisonment.

Since 1971, Professor Brutus has taught English and African literature at Northwestern University in Illinois. Tenured at Northwestern in 1973, Professor Brutus has lectured at numerous colleges and universities across the country, including Amherst and the University of Massachusets. In 1975, Professor Brutus founded the African Literature Association. This scholarly organization has since flourished, attracting several hundred members from around the world.

At present, Professor Brutus continues to pursue his academic and poetic careers. He also speaks out frequently against apartheid.

I ask my colleagues to reflect on this short biography of Prof. Dennis Brutus. What element in this admirable life has caused the Reagan adminsitration to deny Professor Brutus, a resident of this country for more than a decade, the political asylum he has requested? Why does the present adminsitration hound Professor Brutus, a man who has devoted his life to cause of freedom, as though he were a criminal? I submit that the only answer lies in the intimate ties the Reagan administration has established with the racist regime in Pretoria. While a man of Dennis Brutus's great courage and constructive achievement must struggle to remain in the United States and South African police and military personnel are welcomed by the President as honored guests.

The treatment of Dennis Brutus by the Reagan administration is a national disgrace. America should be, as it has been historically, a haven for those who flee oppression and particularly for those, like Professor Brutus, who peacefully and valiantly struggle against injustice.●

● Mr. RANGEL. Mr. Speaker, I rise today in support of the special order introduced by my colleague BARNEY FRANK for Dennis Brutus.

Dennis Brutus is a man in exile. He is in exile because of his beliefs, his writings, and because he is black. For more than 10 years he has lived away from his homeland in southern Africa. His brave stand against the terrible system of apartheid in South Africa has made his exile one of self-preservation. If he returns to that region of Africa where no one is really safe from persecution by South Africa, he will be in danger. Frankly, he may be killed for his beliefs.

The Immigration and Naturalization Service intends to sue for Mr. Brutus' deportation based upon classified information. The defendant is not a threat to this country, nor is he a burden on our social services. He is a poet and a professor of African and English literature at Northwestern University. His contribution is a very valuable one, and his presence is a reminder of the harsh reality under apartheid. His deportation is not a necessary measure.

Mr. Speaker, I strongly support Dennis Brutus' application for political asylum, and I strongly urge the INS to reconsider his case.●

● Mr. TOWNS. Mr. Speaker, over the years, our Nation has become a symbol of freedom and opportunity for people around the world. Many have come to our shores seeking to benefit from the inalienable rights and freedoms for which America has become renowned. Others come to begin a new life in the land of opportunity. Still others seek protection from the religious and political harassment to which they are subject in their homelands. But, whatever their reason, we have welcomed them with open arms.

Dennis Brutus, poet and critic of South Africa's apartheid regime, has come to our country. He has come to our country to escape the political persecution and the threat to his life which would be inevitable were he to return to his home in southern Africa.

Some argue that were Mr. Brutus to return to Zimbabwe, his homeland, he would not face such persecution and threats on his life. Those who uphold this argument do so assuming that South African agents would not enter Zimbabwean territory to endanger the life of Mr. Brutus. I maintain that this line of thought is totally unrealistic. We can all bear witness to the fact that South Africa has a long history of territorial invasions. We need only look to Namibia or Angola for proof. To think that South Africa will suddenly give up its past policies, and respect its territorial boundaries, is to give South Africa more credit than it deserves.

My colleagues, I feel that Mr. Brutus is deserving of our protection. I urge you to lend your support to H.R. 3705. We hold the future of Mr. Brutus in our hands. If we allow him to be deported, we shall ultimately be responsible for whatever his fate in southern Africa may be.●

● Mr. OWENS. Mr. Speaker, I urge all of my colleagues to support H.R. 3705, a private bill to grant relief to Dennis Brutus. Professor Brutus is threatened with deportation based on information which the Government has classified. It would be outrageous to deport this poet and professor in any case, but it is more so when the Government seeks to move against an individal based on information which the Government claims to have but does not deign to share.

The situation in South Africa and Zimbabwe, the land of Dennis Brutus' birth, is difficult. Professor Brutus claims to have a fear of persecution in South Africa and our Government agrees that the fear is well founded. The professor then argues that he is fearful of return to Zimbabwe due to the actions of South Africans there. Our Government argues that there is no proof that South Africans have committed assassinations in Zimbabwe. It is reasonable to assume that when South African death squads act in Zimbabwe, they do not leave material evidence or wait around to be tried for their actions.

The reality is that our Government has a tendency to spring to the defense of those who fear death at the hands of Communist governments while victims of rightist merely authoritarian governments are cast aside. When the authoritarian government happens to support apartfeid, an abomination to all decent people, the victim is subjected to the extraordinary pressure of being judged on classified information.

One has to wonder just what the classified case against Professor Brutus consists of. Surely, if the information is relevant and true, he must be aware of his own history. In the alternative, the device of classification is merely a tool to protect falsehood from the light of scrutiny which one normally finds in a democracy.

Many appeals have been made on behalf of Professor Brutus. They seem to be falling on ears that do not choose to hear. I urge each of you to support H.R. 3705 to keep this man—poet, teacher, scholar—among us.●

GENERAL LEAVE

Mr. WISE. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include extraneous material on the special order speech today by the gentleman from Massachusetts (Mr. FRANK).

SAN JUAN BASIN PLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Mexico (Mr. RICHARDSON) is recognized for 10 minutes.

● Mr. RICHARDSON. Mr. Speaker, I am today introducing two pieces of legislation dealing with the future of the San Juan Basin, an area which covers most of the western half of my district in New Mexico. Earlier this year, Secretary Watt and the Bureau of Land Management announced the Department of the Interior's proposed San Juan Basin Action Plan, a comprehensive land use plan for the basin. Under this proposal, most of the strippable coal on Federal lands in the basin would be leased by the end of this year. The proposal by BLM staff also calls for only two of the three wilderness study areas in the basin to be made permanent wilderness by the

Congress. Secretary Watt has endorsed only one of the three WSA's.

The San Juan Basin contains some of the most beautiful and important land in the State of New Mexico. Environmentally, the area is spectacular but fragile. The vistas and washes are among the most scenic in the Southwest.

The basin is also archeologically and paleontologically significant. It is one of the few areas in North America where fossils exist side by side from each of the three major paleontological eras. It also contains the vast ruins of the ancient Anasazi Nation, a portion of which has been reserved at Chaco Canyon. A national historical park located in the middle of the areas scheduled for lease in the December coal lease sale.

Finally, the basin also has been blessed with significant mineral reserves, including a vast quantity of coal. Secretary Watt's coal development policy is needlessly in direct conflict with the environmental, archeological and paleontological resources in the area, as well as with the lifestyles of the hundreds of Navajos living in the area.

Secretary Watt's plans for the San Juan Basin caused quite a stir in New Mexico. The Secretary proposed to lease between 900 million and 1½ billion tons of coal during a time when supplies are plentiful and demand has fallen. Furthermore, the sale comes at a time when the Secretary plans to process pending preference right lease applications for an additional 2.2 billion tons of coal, which would be placed on the market without competitive bid. The magnitude of these actions can only be understood in comparison with Federal coal leasing in New Mexico until now. To date, 457 million tons of coal have been leased on Federal lands in my State. Of that amount more than two-thirds of the acreage remains undeveloped. Thus, Secretary Watt wants to lease in 1 day between two and three times as much coal as has been leased during the past 30 years. And he wants to do so in a manner that ignores the legitimate rights of the Navajo families living in the area and in a manner that would harm the environmental, archeological, and paleontological resources we all cherish.

I was deeply troubled by Secretary Watt's proposed San Juan Basin Action Plan. Therefore, I invited the House Interior Subcommittee on Mines and the Subcommittee on Public Lands to come to Santa Fe for a hearing on the coal leasing and wilderness questions this plan raised. Because it is New Mexicans' coal, water, air, wilderness lands, and archeological and paleontological resources which are at stake, I thought it was only fair that they have strong input in the decisionmaking process.

My good friend from Oregon, JIM WEAVER, came to Santa Fe in late May with me to chair this hearing. More than 500 New Mexicans attended. At the hearing, testimony was received from environmentalists, coal company executives, the Governor and senior officials in his cabinet, a representative of the Navajo Nation, archeologists, paleontologists, as well as prodevelopment groups.

I received two messages at that hearing from my constituents. And I heard these two messages loud and clear. The first message was that New Mexicans find Secretary Watt's decision to support only one out of the three wilderness areas inadequate and legislation introduced by several other Members of our delegation designating only one of the three areas is totally unacceptable. The second message was that New Mexicans do not want the San Juan Basin to become the next Powder River Basin. Power River was the last Federal coal sale held in April of last year. The sale was very controversial due to its unprecedented size of 1 billion tons and its timing, since the sale occurred during the same glutted coal market we are experiencing today. As a result of this sale, the General Accounting Office has concluded that the coal at Powder River was leased fully $100 million below fair market value. New Mexicans do not want to see their coal sold cheap or their State shortchanged through depressed bonus bids on the leases.

As a result of these twin messages that I received in Santa Fe a couple of months ago, I am today introducing two bills to address the concerns of the people of New Mexico.

The first bill, H.R. , the San Juan Wilderness Protection Act of 1983, would designate all three wilderness study areas—Bisti, De-na-zin, and Ah-shi-sle-pah—as wilderness. It also directs the Bureau of Land Management to manage a small area in the basin known as the fossil forest in a manner to protect and enhance its unique natural paleontological and other scientific values. This legislation will also be introduced in the other body by my distinguished colleague and friend, Senator JEFF BINGAMAN.

This is a modest proposal, Mr. Speaker. In all only 35,000 acres would be set aside as wilderness. These small areas contain less than one-half of 1 percent of the coal reserves in the San Juan Basin. The San Juan Basin is developing at a steady pace, we must act now to insure that some of the pristine and irreplacable wilderness areas are preserved from development.

Mr. Speaker, I am introducing this bill today in advance of final wilderness recommendations by the Department of the Interior for these areas in order to make certain that the wilderness study areas are not eliminated by any other conflicting land use decision in the region. The BLM State Office in New Mexico has been instructed to process all pending preference right lease applications prior to the coal lease sale scheduled for December. Wilderness decisions must be made prior to those decisions which would preclude wilderness from being an option for the region's land use plans.

Mr. Speaker, the three wilderness areas in my bill deserve early consideration by the Congress because they are being needlessly jeopardized by Secretary Watt's policies. Despite the overwhelming public support for designating these three wilderness areas, Secretary Watt only supports wilderness designation for the 4,000-acre Bisti Wilderness. Secretary Watt is contradicting the recommendations of the professional land managers who also recommended wilderness designation for De-na-zin.

In fact, Mr. Speaker, this is another clear indicator of the token nature of Watt's support for the Bisti Wilderness. Many of us remember Secretary Watt's infamous "midnight raid" on the BLM Wilderness study areas on December 30, 1982. Shortly after the Congress recessed for the Christmas holidays, Secretary Watt summarily ordered the immediate elimination of over 800,000 acres of BLM WSA's. This action demonstrated a contempt for Congress because prior to the Secretary's actions the chairman of the Public Lands Subcommittee specifically requested that Congress be notified before any such decisions on the BLM WSA's were made.

The Bisti was one of the WSA's eliminated by Watt on December 30, 1982. The rationale for his decision was the same as for the other areas: BLM had no authority to consider these areas as WSA's; and he was forced to eliminate them in order to bring BLM into compliance with the law. The Secretary's reasoning was disingenuous at best. In my opinion, the Secretary's elimination of the WSA's is in violation of both FLPMA and NEPA.

Mr. Speaker, an interesting thing happened on January 27, 1983. A Federal Register notice appeared announcing that the Bisti—but only the Bisti—was reinstated as a WSA. Suddenly, Secretary Watt apparently changed his mind and decided BLM indeed had acted properly in originally designating the Bisti as a WSA.

On February 10, 1983, the House Interior Committee unanimously adopted a resolution calling on Secretary Watt to restore all 800,000 acres of WSA's he eliminated in December. The resolution further urged him to leave the remaining WSA's alone. The stage was set for Secretary Watt to demonstrate whether he was indeed committed to wilderness protection.

Indeed, Mr. Speaker, he provided a clear answer. Since adoption of the committee resolution, Secretary Watt has proceeded to eliminate from WSA status a net total of over 1 million acres. At the same time, he reinstated as WSA's a token amount of approximately 130,000 acres that were eliminated in December.

In New Mexico alone, Secretary Watt has now eliminated almost 215,000 acres from WSA status, while only restoring 5,500 acres, including the Bisti, that has been eliminated in December. The WSA's he has eliminated include some of the most outstanding wildlands in New Mexico. And by eliminating them from WSA status, Secretary Watt has jeopardized their wilderness values, because there is no authority under the law to fully protect the wilderness values unless the land is designated as a wilderness study area. Let me briefly illustrate the type of irreplaceable and unique wildlands that Secretary Watt has jeopardized.

Big Hatchet Mountains WSA: this area is well known as a scenic area and critical desert bighorn sheep habitat.

Ignacio Chavez/Chamisa WSA: an area of immense scientific, scenic, historic, and wildlife value.

El Malpais: one of the most outstanding examples of volcanic landscape in the continental United States with significant historic and prehistoric archeological values.

Rimrock, Little Rimrock, Pinon, and Sand Canyon WSA's: wildland ecosystems containing extensive prehistoric puebloan communities which deserve consideration for National Register of Historic Places.

One more example deserves special mention. In the De-na-zin Wilderness which would be designated by this bill, Secretary Watt has eliminated 1,368 acres from WSA status. The acreage is now without any special protections to preserve its wilderness values. Secretary Watt justified this action on the basis that part of the eliminated acreage was "split estate," wherein the State of New Mexico owned the subsurface rights while the surface was owned by BLM. This is clearly another of Secretary Watt's antiwilderness actions. The State of New Mexico had declared its desire to exchange their rights so that these lands could indeed be designated as wilderness. Yet, Secretary Watt has ignored the State's interest in exchange and to this date, has done nothing to expeditiously exchange the lands with the State so the De-na-zin Wilderness study area could be permanently protected. Accordingly, with the State's full support, the bill I introduce today contains a provision designed to require Secretary Watt to responsibly and expeditiously effect an exchange with the State. The language sets specific timeframes, and procedures to insure the exchanges are carried our expeditiously.

Mr. Speaker, there is an inholding of approximately 900 acres of Indian allotment lands within De-na-zin. This acreage will become wilderness only if a land exchange which is agreeable with the individual allottees can be arranged. My bill also provides rights of historic access to all occupants of the Navajo trust lands.

Mr. Speaker, portions of the De-na-zin and Ah-shi-sle-pah WSA's have been selected by the Navajo Nation, under the authority contained in the Navajo-Hopi Settlement Act. These selections create a potential conflict with the wilderness designation for those two WSA's. However, I have been assured by Chairman Peterson Zah and other Navajo leaders that they are also committed toward protecting the wilderness values of these lands. I am quite confident that as this bill is considered in the Congress, we can find a solution that will insure lasting wilderness protection for these two areas and at the same time meet the needs of the Navajo Nation. It is clearly not my intention to leave these areas unprotected during the period in which the Navajo settlement is being finalized, nor do I wish to in any way prejudice the outcome of the Navajo relocation process. It is for this reason that I have included language to insure that this bill will in no way amend or affect the Navajo-Hopi Settlement Act of 1976 or the congressional amendments to the act, which were passed in 1980. In the months ahead, I am committed to working closely with Chairman Zah and other interested parties to reach an acceptable and workable solution.

The second bill I am introducing today, H.R. the Federal Coal Leasing Reform Act, would provide for a 10-month cooling off period until May 1, 1984. During this 10-month period no Federal coal lease sale would occur. I have decided to call for this legislative cooling-off period for three reasons.

First, I noticed at the field hearing in Santa Fe that the Department of the Interior's coal leasing program was in a state of disarray. Decisions were being made without proper consultation and input with all of the parties involved. The Navajo Nation, for example, did not have a voting member on the regional coal team, even though the proposed coal lease sales cover acreage around Indian allottee lands and acreage near the Navajo Reservation. Draft environmental impact statements were so hastily and poorly prepared that entire portions of the San Juan Basin action plan were left out. For example, the Department of the Interior wants to process 2.2 billion tons of preference right lease application coal as part of the plan, yet the Department failed to prepare a draft EIS on the PRLA's despite their obvious significant impact on the environment of the region. The 10-month cooling off period authorized by this bill will give the Department the time it needs to go back and allow all parties input in the decisionmaking process and properly prepare its draft environmental impact statements.

Second, I noticed at the hearings that those groups who want to preserve the environmental values of the basin and those who want to develop its resources were attacking each other rather than trying to work together. It is possible to achieve a balance. We can develop a plan for a rational development of the basin's coal reserves in a manner which protects the many other virtues of that area. But to do so there must be a constructive dialog. The Department of the Interior and Secretary Watt cannot take a position of every acre of strippable coal on Federal lands is going to be developed or else. And those who advocate preservation must understand that jobs are also a concern for the district. The 10-month cooling off period will give us an opportunity to lay the groundwork for a more reasonable and moderate development plan by allowing all sides to reflect on their positions and hopefully come together to work for the common good.

The third and final reason for this bill stems from the events at Powder River last year. The San Juan Coal sale would be one of the next major Federal sales after Powder River. As I mentioned earlier, the GAO concluded those leases were sold $100 million below fair market value. That is of deep concern for me because any State receives 50 percent of the bonus bids paid for Federal leases within its borders. At the hearing State officials, including the Governor, testified that if the San Juan sale goes ahead as scheduled with no changes in the Department's regulations, the State of New Mexico would lose $80 million. I cannot support any sale that will allow New Mexico coal to be sold cheap or for our citizens to be shortchanged. My State is poor, Mr. Speaker, and we desperately need the revenues that responsible coal leasing will yield.

Therefore, the 10-month cooling off period will also give the Department of Interior time to rework its regulation to incorporate each of the recommendations the GAO says should be made before any further Federal coal lease sales occur in order to protect the public purse and make certain that fair market value is obtained. Ten months is plenty of time for the Department to carry these changes out and if they are not completed by May, the Department, not Congress, will be to blame for any further delays in the coal-leasing schedule.

Mr. Speaker, I want to conclude by stating my appreciation to my colleague, Senator JEFF BINGAMAN, Gov. Toney Anaya, Commissioner of Public Lands Jim Baca, Chairman Peterson Zah and all of those who have worked with me on these two important pieces of legislation. I look forward to early hearings this fall in the Interior Committee on both bills and hope we move them to the floor for early and speedy approval by this body.●

TIME TO SOW THE SEEDS OF OUR ECONOMIC FUTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. CORCORAN] is recognized for 10 minutes.

● Mr. CORCORAN. Mr. Speaker, I am introducing two bills today to facilitate the economic recovery that our Nation is, fortunately, experiencing. I firmly believe that we can attribute the unexpectedly rapid recovery of our economy to the twin forces of reduced inflation and economic stimulation from the Economic Recovery Tax Act of 1981. As proven under President Kennedy and again under President Reagan, reducing the tax burden stimulates saving, spending, and investment by businesses and individuals. This, in turn, stimulates business growth and increases employment.

The Capital Growth Act of 1983 increases the deduction for net capital gains for taxpayers from 60 to 75 percent over 3 years, at a rate of 5 percent each year. In addition to encouraging the investment of private income in America's businesses, which will encourage growth and job formation, this tactic will increase reported capital gains and capital gains tax revenues, if history is a reliable indicator.

In 1978, Congress increased the capital gains tax exclusion from 50 to 60 percent, with comparable adjustments to the maximum and minimum tax. A recent analysis of capital gains by the Council of Economic Advisers showed that the amount of capital gains reported on tax returns greatly increased in 1979, the year after the tax rate on capital gains was reduced. Reported net long-term gains were up 111 percent from 1977, the year before the tax change. Nineteen-eighty data show that the level of realized capital gains remained high, and the sharp rise in reported capital gains meant that the Treasury collected more money in taxes than it would have if the tax rate and reported gains had remained at the 1977 level. The increase in reported capital gains cannot be explained by a corresponding rise in stock prices as these actually remained almost level from 1977 to 1979. Clearly, there is a powerful effect from reducing the capital gains tax, and I would encourage Congress to learn from this unusually positive experience.

The second bill which I am introducing today, the Business Opportunity Act of 1983, is geared toward business investment. It would amend the Internal Revenue Code to reduce the maximum rate of corporate income tax from 46 to 36 percent over 5 years, at a rate of 2 percent a year. We can most efficiently encourage investment and economic growth by leaving more money in the private sector. Capital is essential to investment, modernization, research and development, hiring—in short, to growth and to jobs. By reducing the tax on corporate income, we will increase the funds available for labor and capital business expenditures.

It is popular today to claim that corporations do not share equally in the tax burdens of America, but it is apparent that businesses in America have been hard hit by recent recessions and have not rebounded as they did in the past. Abysmal corporate profits are the explanation for reduced corporate tax revenues.

The decline in corporate tax receipts as a proportion of total Federal tax receipts reflects the long-term reduction of corporate profits as a share of our national income and the incredible growth of payroll tax burdens on employers and workers. In less than 25 years, payroll tax receipts have increased from 18 percent of total receipts to over 33 percent.

That businesses have not been able to absorb the disastrous effects of three recessions in just 8 years is evident from a study of key indicators of corporate financial strength. According to the New York Stock Exchange Office of Economic Research, corporate profits were $40-billion less in the second quarter of 1982 than in the peak year of 1979. As a percent of national income, corporate profits were down to 6.6 percent in the first three quarters of 1982, from an average of almost 10 percent in the seventies and almost 13 percent in the 1964 to 1969 period, reflecting a steady and sharp decline. Short-term debt is up, requiring constant repayment or debt rollover, and the interest coverage ratio (the ratio of interest liabilities to corporate profits) reached all time lows in 1980, 1981, and again in the first three quarters of 1982. This means that interest payments relative to corporate profits have greatly increased, placing a strain on businesses' ability to finance debt obligations. In short, corporations are more in debt with less ability to handle that debt. Debt-equity ratios have also deteriorated, making it difficult to find additional financing. The story state of corporate finances is most painfully reflected in the levels of business failure in 1981 and 1982, the highest rates in half a century.

There are many sources for this financial strain—the recessions, burgeoning Federal budget growth and accompanying crowding out of private investment, tax biases toward debt financing, inflation and deflation, high and volatile interest rates—you name it. The solutions are more difficult to locate, but a key element must be to ease the pressure toward debt by returning money to the businesses. This will improve cash flow, alleviate the need for borrowing, reduce the pressure of continuing high interest rates, and increase ability to finance existing debt.

In the short term, a reduction in corporate tax rates will doubtless lead to some revenue loss to the Treasury, but the long-term increase in economic growth will provide a more stable and profitable source of revenue growth than does a policy that continues to encourage business failure, with attendant job and revenue losses.

The first budget resolution for fiscal year 1984 calls for tax increases, which I believe represents the height of foolhardiness when we are finally beginning to recoup the losses of many years of overspending and overtaxing. Such increases would be short-sighted revenue raisers that would choke the economy. I am introducing this legislation today in the hope that Congress will reconsider its unconventional wisdom and return to the path that is leading us to recovery—a path that creates a healthy private economy and relies on the growth therein to create jobs and revenues as needed. These bills will make the Federal tax system much more responsive to the economic forces that power the engines of economic and employment growth.

These bills are only two in a series of bills that I have begun to introduce that, taken together, will provide further growth in the long term, and I urge my colleagues to consider them favorably. The language of these two bills follows:

H.R. 3756

A bill to amend the Internal Revenue Code of 1954 to increase in three steps the deduction for net capital gains for individuals from 60 percent to 75 percent

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as "The Capital Growth Act of 1983".

SEC. 2. INCREASE IN DEDUCTION FOR NET CAPITAL GAINS FOR INDIVIDUALS FROM 60 PERCENT TO 75 PERCENT.

(a) IN GENERAL.—Subsection (a) of section 1202 of the Internal Revenue Code of 1954 (relating to deduction for capital gains) is amended by striking out "60 percent" and inserting in lieu thereof "the applicable percentage".

(b) INCREASE IN DEDUCTION IN THREE STEPS.—Subsection (c) of such section 1202 of such Code is amended to read as follows:

"(c) APPLICABLE PERCENTAGE DEFINED.—For purposes of subsection (a), the term 'applicable percentage' means—

"(1) in the case of taxable years beginning in 1984, 65 percent;

"(2) in the case of taxable years beginning in 1985, 70 percent; and

"(3) in the case of taxable years beginning after December 31, 1985, 75 percent."

(c) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of subsection (a) of section 55 of such Code (relating to alternative minimum tax for taxpayers other than corporations) is amended by striking out "20 percent" and inserting in lieu thereof "the applicable percentage".

(2) Subsection (f) of such section 55 of such Code is amended by adding at the end thereof the following new paragraph:

"(3) APPLICABLE PERCENTAGE.—The term 'applicable percentage' means—

"(A) in the case of taxable years beginning in 1984, 17.5 percent;

"(B) in the case of taxable years beginning in 1985, 15 percent; and

"(C) in the case of taxable years beginning after December 31, 1985, 12.5 percent."

(3) Paragraph (1) of section 170(e) of such Code (relating to certain contributions of ordinary income and capital gain property) is amended by striking out "40 percent" and inserting in lieu thereof "100 percent minus the applicable percentage determined under section 1202(c)".

(d) EFFECTIVE DATES.—The amendments made by this section shall apply to taxable years beginning after December 31, 1983.

H.R.

A bill to amend the Internal Revenue Code of 1954 to reduce in 5 steps the maximum rate of income tax on corporations from 46 percent to 36 percent

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE

This Act may be cited at the "Business Opportunity Act of 1983".

SEC. 2. MAXIMUM RATE OF INCOME TAX IMPOSED ON CORPORATIONS REDUCED TO 36 PERCENT IN 5 STEPS.

(a) IN GENERAL.—Subsection (b) of section 11 of the Internal Revenue Code of 1954 (relating to amount of income tax imposed on corporations) is amended by striking out paragraphs (4) and (5) and inserting in lieu thereof the following new paragraph:

"(4) 36 percent of so much of the taxable income as exceeds $75,000."

(b) PHASE-IN OF REDUCTION IN MAXIMUM RATES.—Such section 11 of such Code is amended by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection:

"(c) PHASE-IN OF REDUCTION IN MAXIMUM RATES.—

"(1) IN GENERAL.—In the case of taxable years beginning before January 1, 1988, there shall be substituted for paragraph (4) of subsection (b) the paragraphs determined under this subsection.

"(2) FOR 1984.—In the case of taxable years beginning in 1984, the substitution under this subsection shall be as follows:

'(4) 40 percent of so much of the taxable income as exceeds $75,000 but does not exceed $100,000; plus

'(5) 44 percent of so much of the taxable income as exceeds $100,000.'

"(3) FOR 1985.—In the case of taxable years beginning in 1985, the substitution under this subsection shall be as follows:

'(4) 40 percent of so much of the taxable income as exceeds $75,000 but does not exceed $100,000; plus

'(5) 42 percent of so much of the taxable income as exceeds $100,000.'

"(4) FOR 1986.—In the case of taxable years beginning in 1986, the substitution under this subsection shall be as follows:

'(4) 40 percent of so much of the taxable income as exceeds $75,000.'

"(5) FOR 1987.—In the case of taxable years beginning in 1987, the substitution under this subsection shall be as follows:

'(4) 38 percent of so much of the taxable income as exceeds $75,000."

(c) CONFORMING AMENDMENT.—Paragraph (3) of subsection (b) of such section 11 of such Code is amended by inserting "plus" after the semicolon at the end thereof.

(d) EFFECTIVE DATES.—

(1) The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1983.

(2) The amendments made by subsection (c) shall apply to taxable years beginning after December 31, 1985.●

SPECIAL TRADE REPRESENTATIVE, BILL BROCK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. BEREUTER) is recognized for 5 minutes.

● Mr. BEREUTER. Mr. Speaker, I rise to commend our Special Trade Representative, Bill Brock, for his supreme efforts in recent weeks in negotiations in the area of foreign agricultural trade. The office of the Special Trade Representative, working in conjunction with the Foreign Agriculture Service, USDA, recently completed negotiations which will result in a new long-term grain agreement with the Soviet Union. The terms of the agreement are far more favorable than most agricultural trade experts had expected. Under the terms of the agreement reached last week, the Soviets will be obligated to purchase a minimum of 9 million metric tons of wheat and feed grains, with the option to purchase an additional 3 million metric tons. The Soviets will have the option to substitute purchases of 500,000 metric tons of soybeans or bean meal for 1 million metric tons of the required 9-million-ton minimum purchase.

Mr. Speaker, these sales will further assist in efforts to reduce the current inventories of wheat and feed grains which are keeping market prices at depressed levels. In addition, the inclusion of soybeans marks the first time that that commodity has been a part of any long-term agreement with the Soviets. Overall, this accomplishment is probably the best news that the American farmer has received in some time, and could not have been possible without the persistent efforts of our Trade Representative.

In addition, the Government of Egypt today is announcing the purchase of 28,000 tons of surplus U.S. dairy products, a sale arranged with the assistance of Mr. Brock's office. This sale totals approximately $44 million, and will help to put a dent in the huge dairy surplus inventories which cost the U.S. taxpayer millions of dollars in storage fees alone.

Finally, Mr. Speaker, it appears that the United States is nearing an agreement with the People's Republic of China over the importation of Chinese textiles into the United States. As my colleagues are aware, the Chinese earlier this year suspended all purchases of U.S. wheat until an agreement could be reached on the importation of Chinese textiles into this country. Under the terms of the agreement which has been tentatively approved by both governments, textile imports will be allowed to increase by 2–4 percent annually for the life of the agreement. The Chinese have indicated their satisfaction with the tentative agreement, and indications are that they will immediately resume imports of U.S. wheat once the agreement has been finalized.

Mr. Speaker, these remarkable successes attest to the effectiveness of our current Trade Representative in sensitive international trade negotiations. I commend him and his staff, along with Agriculture Secretary John Block, for their efforts on behalf of the American farmer and American taxpayers. It is this kind of effort which will result in the long-term expansion of export markets for American agricultural products, a course which we all agree will have great benefits for all Americans in the future.●

HUNGER KNOWS NO POLITICS

The SPEAKER pro tempore (Mr. MATSUI). Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 10 minutes.

● Mr. JEFFORDS. Mr. Speaker, I rise in full knowledge that the hour is late. My colleagues and I are weary from a long day of debate. I beg your and their indulgence, however, as I feel compelled to speak on the issue of hunger.

As my colleagues know, I am not a newcomer to this issue. As a former member of the nutrition subcommittee, as the principal cosponsor of Mr. PANETTA's "preventing hunger at home resolution" as a member of the two committees with jurisdiction over this issue, and as a long-time participant in the issues of hunger, I don't come to this issue casually. It was with some dismay, then, that I listened to the words of my colleagues from the other side of the aisle this morning as they sought to portray the terrible problem of hunger as one that was created by the current administration.

As my colleagues know, I have had my differences with this administra-

tion on nutrition and several other issues. I disagreed with many of the changes the administration proposed and secured in nutrition legislation. I object to many of its current suggestions for reform.

However, at all times, I have sought to keep the issue of hunger from being polarized between two parties seeking political gain.

As I have said, there are many points of policy on which I differ with the administration. But I do think that before we erroneously heap the blame for hunger at its doorstep, we should take a brief, if uncomfortable, look at the facts. I say uncomfortable because I am not sure that the facts necessarily square with some Members' preconceptions and political purposes.

As Assistant Secretary Mary Jaratt noted in testimony before Chairman PANETTA's subcommittee on nutrition, the Federal Government will spend 34 percent on Federal food assistance this year than it did in 1980. Even after factoring in inflation, this is a significant increase. Likewise, funding for the food stamp program has grown by 45 percent since 1980, from about $8.3 to about $12 billion this year. (Much of this growth is due to the recession.)

Funding for the women, infants, and children program, commonly called WIC, has grown from $712 million in 1980 to $1.6 billion in 1983, a more than 60—percent increase. Other programs, such as those serving older Americans, and the commodity supplemental food program, augment the needs unmet by food stamps and WIC.

Finally, let me discuss the commodity distribution program. As I said last Monday, during consideration of the "Presenting Hunger at Home" resolution, the enthusiasm of this administration has been convincingly demonstrated by its active distribtution of surplus food commodities to those in need. This effort should not go unnoticed. In case it did, let me remind you.

In 1981, other Members and I added amendments to the 1981 farm bill to increase the distribution of surplus dairy products. To be honest, I was a bit skeptical about how well this amendment would be implemented. While commodity distribution was nothing new, and was in fact an older concept than the food stamp program, such distribution has been relatively limited and had been directed to such traditional outlets as schools, prisons, camps, and military bases.

I was wrong, however, to have been skeptical. Secretary Block has pushed this program hard and the numbers show it. This year USDA will distribute 2.1 billion pounds of food valued at more than $1.7 billion. That is not, my friends, an inconsequential amount. Every food that USDA holds in uncommitted inventories—cheese, butter, nonfat day milk, rice, cornmeal, and honey—is being distributed.

Let me, however, concentrate on the commodities that have been the most widely distributed and, quite frankly, the most widely scrutinized.

Over the past two marketing years, distribution of cheese has grown from 165 million pounds to 325 pounds. For the 3 years preceding this administration's tenure, cheese distribution averaged under 90 million pounds. Clearly, cheese is being shipped from the caves in far greater quantities than ever before, and in greater quantities than I ever expected.

For dairy products in general, the record is even more impressive. Prior to this administration, the Federal Government had distributed an average of only 3.5 billion pounds, milk equivalent, of dairy products in its foreign and domestic food programs. In fiscal 1983, distribution of dairy products will reach 13.5 billion pounds, a fourfold increase. The level of distribution is expected to be in the double-digit range for the next 2 years.

These figures reveal an impressive record. This administration has indeed answered the compelling call to assist the hungry. But this administration has also recognized that if programs such as the commodity distribution effort are to enjoy the general public's continued support, they must be run properly.

There are problems with this program, as there are with any new, emergency program deliberately designed to be free of all but the most basic regulation. Capacity to handle the commodities has proven limited; the supply chain has proven imperfect; some States have had difficulty working with the Federal Government.

The news has also carried accounts of waste and fraud. We must not dismiss these accounts as simply the price that we must pay if we are to have such programs. That is simply not good enough. Similar problems have caused many Americans to question the food stamp program. We must act responsibly to protect the commodity distribution program from a similar loss of respect.

It was news accounts that heightened my concern about hunger in America. For me to now dismiss stories unfavorable to commodity distribution would be two-faced.

The commodity distribution program is also dogged by another problem, and that is commercial displacement.

As with waste and fraud, blind support of commodity distribution could lead one to scoff at the notion of commercial displacement as callous cowing to corporate interests. This is foolish. If fraud can sink this program, so too can displacement. Sensible support dictates that we deal with each and every problem as it comes before us. Displacement is a problem.

The real question is, how big a problem? If it is small, I will quite happily go back to the dairy co-ops and farmers in my State and say "I'm sorry, it's a burden you will have to bear." And I don't think the farmers of Vermont will mind. They are not venal or uncaring. But they don't want Government stocks, no matter how well-intentioned the program, used to knock them out of business, especially if a substantial amount of the displacement is caused by people abusing the distribution program.

However, if displacement is as large as the industry claims, then this is exactly what is going to happen.

I cannot say that I am comfortable with the industry's figures any more than I can say I am comfortable with the notion that there is no displacement whatsoever. Commercial displacement, like so many other issues in this debate, is not well documented, nor is the abuse. But it should not be ignored.

On Monday, Secretary Block announced an expanded commodity distribution program. This program's success will also be predicated on these two factors: The amount of abuse and the amount of displacement. Both will be monitored by the Department and others. I hope that neither becomes a serious problem.

I greet Secretary Block's announcement as a reasonable approach, and have faith that he will consider these issues responsibly.

Throughout the debate on the commodity distribution program, we should bear in mind that it is but a temporary measure. It will be imperfect, but its imperfections will hopefully be compensated for by the basic nutrition programs.

These programs deserve our attention as much, and arguably more, than the commodity distribution program. They feed far more people, are far more efficient, and are far better targeted. Even as we acknowledge the growth and importance of the commodity distribution program, I hope we can redouble our efforts to improve the basic nutrition programs to see that they fulfil their statutory goals.

Finally, Mr. Speaker, let me once again urge my colleagues to keep the rhetoric down and their support for these programs high. For the poor are not well-served by our wrangling.

We learned today that one in seven Americans lived in poverty last year. It is a sobering and humbling statistic. But it is a tragedy not of any one individual or administration's making. The responsiblity is all of ours to bear. Only the work of the coming months will show how well we bear it.

Thank you and good night.●

FDIC APPROACH TO FINANCIAL SERVICES LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, today, Mr. WYLIE and I introduced legislation requested by Chairman Bill Isaac of the Federal Deposit Insurance Corporation. The reason for this request and a statement of the Corporation's approach to financial services legislative issues are contained in a letter from Chairman Isaac which I place in the RECORD at this point:

FEDERAL DEPOSIT INSURANCE CORPORATION,
Washington, D.C., July 25, 1983.

Hon. FERNAND J. ST GERMAIN,
Chairman, Committee on Banking, Finance and Urban Affairs,
Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the FDIC has for years been advocate of expanded authorities for financial-services firms. We are convinced that a number of restrictions on competition and the regulatory and insurance systems put in place over 50 years ago have been rendered obsolete or ineffective by advances in technology and marketplace initiatives.

Inequities abound in the current statutory framework. For example, securities firms, such as Shearson/American Express, are permitted to acquire insured banks while member banks are precluded from underwriting securities. Nonmember banks can affiliate with securities underwriters while member banks cannot. A major insurance company, Prudential, has acquired both an investment banking firm and an FDIC-insured bank. Retailers, such as McMahan Furniture, have acquired FDIC-insured banks and others, such as Sears, own insured savings and loan associations with their recently broadened banking powers.

At the same time, the deposit insurance system is in need of significant reforms. The FDIC and FSLIC recently submitted reports to the Congress calling for modifications in the insurance system to instill a greater degree or marketplace discipline. We simply cannot maintain order and stability in the financial system in a deregulated environment if we continue to provide a *de facto* federal guarantee of all deposits at banks and savings and loan associations.

The regulatory system is in a state of disarray. Five different regulatory agencies plus the SEC and the Antitrust Division of the Department of Justice are responsible for regulating the affairs of insured depository institutions at the federal level alone. To cite but two examples, Citicorp is currently regulated by the Federal Reserve, its lead bank by the Comptroller of the Currency, and its California savings and loan by the Federal Home Loan Bank Board. It proposes to acquire a bank in South Dakota (presumably to engage in the insurance business, among other things), which apparently will be regulated by the FDIC. In addition, numerous state agencies, the Justice Department and the SEC play various roles. The Butcher organization also illustrates the problems inherent in the current regulatory scheme. In that case, some 40 affiliated banks, savings and loan associations and an industrial bank were regulated by seven different state and federal agencies, making accurate identification and assessement of the problems extraordinarily difficult.

The Treasury has recently submitted a bill which attempts to rationalize the permissible-activities issue for financial-services firms. While we have substantial concerns about the particulars of that proposal, it represents an attempt to move in the right direction.

The FDIC will soon submit to the Congress statutory language to implement some of the deposit insurance reforms recommended in our study. The Bush Task Group will shortly offer its recommedations for reforms to the regulatory system.

We feel strongly that all three of these initiatives should be considered by the Congress this fall as a package. In our judgment, it would not be responsible to proceed further with bank and thrift deregulation without making concomitant reforms in the deposit insurance and regulatory systems.

We recognize that these issues are difficult and that it may mot be possible to forge a consensus behind comprehensive legislation until 1984. If necessary, we can live with this timeframe for final action on the package; however, if it appears that comprehensive reform cannot be accomplished by the summer of 1984, we would recommend that the enclosed bill be enacted at that time.

Briefly, the bill redefines the term "bank" as used in the Bank Holding Company Act to close down the "nonbank bank" exception, includes nonmember banks and savings and loan associations in the Glass-Steagall Act prohibitions and subjects unitary savings and loan holding companies to the affiliation rules applicable to multiple savings and loan holding companies. The bill does not permit grandfathering and requires divestiture of nonconforming activities within two years under the provisions of the Glass-Steagall and Bank Holding Company Acts and five years under the Savings and Loan Holding Company Act.

Although the bill does not address the issue, we would have no objection if language were inserted granting an exception to the affiliation rules (but not from any of the Glass-Steagall prohibitions) for unitary savings and loan holding companies where the association is and continues to be almost exclusively engaged in the provision of residential mortgage lending services. Moreover, we would not object to a provision barring any state from authorizing its banks to engage in activities outside the borders of its state that are prohibited to banks inside the state.

I want to take this opportunity to reiterate our strong opposition to a moratorium. In our judgment, a moratorium would only serve to perpetuate the current inequities, reward those who have exploited the weaknesses of the existing statutory framework and further delay attempts to come to grips with urgently needed reforms. The enclosed bill would, in our judgment, be far superior to a moratorium should our efforts to enact comprehensive legislation fail.

In the past you have shown great courage in resisting piecemeal, quick-fix financial legislation. As a result, the Garn-St Germain Act is now law. We believe similar strength and vision is needed now more than ever.

Sincerely,

WILLIAM M. ISAAC,
Chairman.●

HOPE IN SOUTH CHARLESTON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. WISE) is recognized for 60 minutes.

Mr. WISE. Mr. Speaker, I would title this talk "Hope in South Charleston" because I would like to talk for a few minutes about an experience in a plant, a major chemical facility, in my district.

And the reason I take the floor tonight to do this is because I hope that it in turn may be an inspiration to other areas, and indeed not only in my district but to other areas.

And I think it would be helpful in these hard economic times if we share these experiences with each other because perhaps we can all learn.

Two years ago West Virginia was ranked as 48th among the States in labor climate by a known national ranking survey. Last year, it was ranked 39th.

Without arguing the validity of the rankings, I feel obligated to comment on an outstanding example of labor-management progress in manufacturing in my State of West Virginia. A fine working relationship turnaround occurred at a major manufacturing plant in less than 2 years. Today, the particular manufacturing operation is recognized and pointed out as an example of good management labor relations by Gov. John D. Rockefeller IV; the West Virginia Chamber of Commerce; the United Steelworkers of America; the West Virginia Manufacturing Association; and the president of West Virginia AFL–CIO, Mr. Joseph Powell; and others who are aware of the situation.

The substance of my address is that certain successful actions were taken by management and labor that are deserving of modeling and duplication to improve the competitive business climate in this country. I personally sat in on a quarterly negotiations meeting which is a unique, interim negotiations meeting, process and I will describe this later.

The name of the company is FMC Corp., South Charleston, W. Va. The name of the union, the United Steelworkers of America, Local 12625. The plant manufactures chlorine, caustic soda, chlorinated dry bleach, and hydrogen peroxide.

I commented earlier on the "labor climate" ranking West Virginia. Rankings are influenced by reputations and perceptions. FMC's South Charleston plant had an image at one time, like that of the State, which left the impression with many that it was wild and unmanageable. It is not a true current image of the plant, it is not a true current image of West Virginia.

This chemical plant is an older industrial complex containing many units and equipment that in some

areas is more than 50 years old, now modernized. Like many of our heavy industrial plants and complexes in the late seventies, the plant aged and developed inefficiencies, both in equipment and practices.

These inefficiencies developed over many years. During economically good times, management and labor did not want to quibble over details of the operation of the complex. It was too easy to let it go. Profits and employment levels were then relatively strong and efficiency was more honored as a catch phrase than an operating fact. Even in good times a labor-management relationship of progress for problem solving was not built and did not develop. Grievance levels remained high, equipment in the plant was improperly maintained, arguments between management and union personnel were frequent and often bitter. It was only a strong market that kept the facility operating and economically prosperous. Unfortunately, that market contracted in the late seventies—and there was no reservoir or resolve to work together to solve issues and achieve the necessary objectives to succeed in what had become a difficult business environment. The plant lost money, product lines, and jobs. Management and labor continued to respond as they had in the past—in blind self-interest, each without a perspective from the other side to recognize the significance and impact of their actions on each other. To say that a little labor relations progress was accomplished would be an understatement. The relationships of management and labor stayed in their status quo, neither giving.

These problems culminated in an attempt by management in 1980 to reopen the contract and negotiate a midterm change in work rules and practices. This was accompanied by a series of educational meetings for plant employees to inform them of the need for those changes to allow plant chemical manufacturing operations to become competitive with other plants producing the same product.

The underlying reality was both obvious and bitter to the employees who heard this message—there would be less jobs at the South Charleston plant and it was suspected that the remaining positions would be speeded up, more difficult, and a very significant fear—much less safe. Management had the sincerity of fact and figures to back their arguments—as a union member in South Charleston told me—"they had everything on paper," but they did not have it in the hearts and minds of their proud West Virginia people. They had been misled, they felt, in the good times without explanations of what was needed then, and without management's ear when they asked for what they felt they needed to help maintain and operate their plant.

When a final tally was taken on the proposed contract changes, hourly employees voted—by a 7-to-1 margin—to reject them. Each side's credibility with the other was at a disappointing low. Both management and labor representatives candidly tell me that many of those grievances were filed, many of them without merit.

In the summer of 1981, both the management of South Charleston and the local and international branches of the United Steelworkers seemed weary of this unending argument without victory. An employee survey of the entire plant work force confirmed the pervasive mistrust that the different classifications of hourly and salaried workers had for each other and even among themselves. The survey also showed plantwide employees' concern over apparent waste of materials and equipment in the plant, poor communication, lack of clear plant objectives and goals, management indifference, and inconsistent administration of plant rules and discipline.

□ 2230

But there were bright spots, too. In general, employees felt that FMC was a good place to work and that their immediate supervisors treated them fairly. Over 78 percent of the employees responding wanted to work in the South Charleston plant "until retirement." With what looked like a very rough contract negotiation less than 1 year away, the survey opened some eyes.

Immediate but tentative steps were initially taken to try to change some of the practices that had long since become impediments to success in the plant. Communications programs were implemented, including the publication of minutes of management-staff meetings. A daily telephone message that reported on plant-wide operating conditions was installed. Information on plant needs and objectives were stressed * * * but still the years of mistrust on both sides could not be erased in a few short months. Contract negotiations began on April 21, 1982, between the Steelworkers, Local 12625, and FMC's South Charleston plant, with many persons expecting a work stoppage. But that work stoppage never came.

Management negotiators approached the bargaining table with a corporate mandate to try and achieve the types of efficiencies that had been discussed and defeated 2 years earlier. Further, they were told that the economic future of the plant squarely rested on what was or was not achievable at the bargaining table that year. The watershed was now. I am told that something amazing happened in the 21 meetings that took place that spring. One union negotiator proudly called it a miracle. I was not there, so I do not really know what happened at the negotiation table, but I am willing to accept the description I heard from Larry Ratliff, subdistrict director, and the Steelworkers chief spokesman in the negotiations. Larry said:

> It was strange, neither management nor the union lost their will to do what they felt had to be done, but rather than arguing about positions across the negotiating table, we found ourselves discussing problems and looking for alternatives—ways to resolve the problem without damaging the integrity of the opponent. One byproduct of that process was that we lost our ability to take positions and argue for show. Our positions were usually stated simply, and the reasons for them were explicit. We just lost the ability to scream at each other, or at least to be effective at it.

And I might add, as a second thought, that that might be an effective lesson for Congress at times, also.

Whatever the root cause of this change in attitude and approach, these meetings formed the base of what has turned into a uniquely nontraditional problem-solving relationship between the Steelworkers at this plant and FMC's management. Throughout the 1982 negotiations, union members at the bargaining table expressed a fear that proposed work rule changes would be misinterpreted or frankly abused in implementation, and that the existing contractural remedies would not work quickly enough or effectively enough to prevent the damage. To meet this need, the parties designed what they called an implementation review board to monitor the administration of contract changes and to insure that the actual operating effects of the language changes were as actually intended in the negotiations. This committee was very nontraditional in that it mandated a direct weekly communications process between the local union president and the highest ranking local official of the company. The objective was clear—to keep the communications process, started in negotiation of the contract, flowing through the process of administering the contract.

Besides the weekly meeting of top management and union persons, an uncommon but effective procedure for handling grievances was contracted between the parties. A strong need existed in the plant for supervisors and the hourly force to resolve differences at their level. The new procedure, designated as form 13—an easily remembered number—called for a simple statement of facts of the grievance problem and required each party to write what they could have done to prevent that problem and to avoid the grievance. This was a required step toward resolution prior to the traditional grievance steps. As can be surmised, changes of this type called for

further improved communications and concerted interest in the form's success, that is, form 13. Is it working? The plant moved to a position where for the first time in over 3½ years there was no step 3—that is the grievance procedure meeting process backlog.

Nor was this communications process limited to union membership and management personnel who work daily at the South Charleston location. In reviewing past policies and practices, both local management and the union had come to independent realizations that they were imprisoned by what they had been doing habitually in the past. Their "ways of thinking" and actions were constantly influenced by what had happened last month, or even years ago. Recognizing this before negotiation, both union and management determined to place a unique reliance on their "outside consultants" from both corporate offices and the district International Steelworkers offices. This decision was not an abdication of responsibility, it was an enlightened understanding that a real need for fresh ideas existed—but it was not easy to implement. The corporate management representative at the bargaining table, T. E. "Gene" Brunk, recalled some of the problems in recent conversation. And I quote Mr. Brunk:

The big problem that we had, Larry (the Steelworkers International Representative) and I, was that the South Charleston Plant's contract administration is radically different from anything either of us had ever seen before. I sat in one of the first meetings with the Union discussing a demand. While I was doing that, I also was leafing through the contract looking for other language to make my point. Suddenly, I found myself face to face with language in the contract that was virtually the same as what we were asking for. I must have looked shocked, because Larry took one look at my face and said something like "Hey, Gene, you might just as well forget that language; you know what the book says, and so do I, but it doesn't mean anything like that." As it turned out, he was absolutely right, but none of the local people on either side could recognize it that way. Our fresh perspective let us see it, but it left the two of us with a big gap that only the local people could fill. We weren't straightjacketed with old ideas, but neither of us know the operation, so we couldn't tell what would or wouldn't work.

A unique sharing of talents developed—fresh ideas from the outside, knowledge and understanding from within.

Neither negotiation team wanted to lose that problem-solving advantage of this supportive and complementary relationship simply because the contract negotiations would end. So what did they do? They simply decided not to stop. A letter was placed in the back of the contract agreement which simply said:

The Company and Union Negotiation Committee(s) will meet quarterly during the life of the agreement, for the purpose of general discussion and resolution of the problems.

One of those quarterly meetings, in January 1983, shortly after my election to Congress, served as my introduction to the people at the FMC plant who were involved in this process. I was proud to be invited to sit in on one of these meetings. Now, this may sound a bit strange, but it is a privilege to be able to say that after the introductions at the meeting, I was virtually ignored. That is something hard for a politician to say. But I was pleased, because business went on as it should have gone on.

I cannot honestly say that I understood the details or nuances of the problems that were discussed, but I easily discerned the earnest effort that was being made to examine, comprehend, and solve problems. There was an exchange of ideas and positions and, very clearly, an emotional commitment to do what was best for the people and the plant. That takes give and take on both sides.

I saw this again through an effective, well-prepared, thoroughly documented and clearly concerned presentation by the local union president. That presentation dealt with unnecessary waste of plant materials and equipment that in the past has been typically considered only a management concern. But now we have the local union making those suggestions to make the entire plant function better.

This commitment does not stay simply at the negotiation table either. Plant management and the local union leadership headed by E. W. "Woody" Wayland, the plant manager, and C. Preston Ryan, the local union president, have gone to great lengths to move this committed relationship all the way through the plant to the shop floor.

To continue, personalizing and reorienting the problem-solving and communications efforts I mentioned earlier, management reorganized the industrial relations function to permit the industrial relations professional staff to spend more time in the physical plant. These trained specialists were assigned specific plant areas so that they would be familiar with the people and problems of the unit, and so that problems could be picked up early and solved. The development of these relationships built on mutual problem-solving has led to some unique and unexpected projects, projects which have ultimately benefited West Virginians who have little or nothing to do with either the Steelworkers or FMC.

I am sure that some of you are familiar with the West Virginia Food Operation. It's work has been mentioned in the Washington Post. The United Food Operation was a response to unemployment that peaked above 30 percent in several counties of my home State. One man, Donald E. Withrow, a maintenance employee at FMC Corp., came up with a simple idea—give those in need food. That idea was supported by many of my constituents who volunteered to help the project. But it was the spirit of the relationship between people at FMC in South Charleston that actually breathed life into the project. On one Saturday morning, I saw plant and industrial relations managers, maintenance persons, janitors, operators, computer programers, and many of their wives and children pitching in with a strong sense of common purpose. I caught a little of the spirit that day. It felt like new fresh life was breathed into me as I worked with them and rode the National Guard or the Army Reserve truck to distant counties to deliver food. It renewed my faith. The program today has helped feed over 12,000 people and is continuing.

This sense of common commitment may well come from an understanding of the shared needs and interdependence of all management and hourly personnel at the South Charleston facility. As I said earlier, this plant faced—and frankly, I understand, continues to face—a very difficult business environment. Union and management share this concern and routinely exchange information that may affect the competitive position of the plant. And this shared concern is translated to action where necessary. Management and union officials did see some potential problems in a utility rate reform bill that appeared in the State legislature this year. Their concern manifested itself as strong joint action to inform State legislators of potential problems with the legislation. They did not block reform, they expressed concerns. I am proud to say that progressive legislation was passed that benefits the very needy; however, by acting jointly, they helped assure that imbalances in the legislation, that would have impaired the plant's competitive market position, were examined and satisfactorily resolved in the best traditions of legislative democracy.

□ 2240

Within the plant, this cooperation has expressed itself in programs and commitments for the welfare of FMC people and their plant. Small group information exchange programs have been started that share shop floor and management knowledge in ways that permit maximum use of everyone's brain power to solve problems. In some cases, this has brought problems to people's attention that have gone neglected for years—and they have been quickly solved.

A joint employee assistance program was implemented to help employees with off-the-job personal problems that affect performance, such as alcoholism, and get professional help that will permit them to become and remain productive members of the work force. When a critical product line changeover necessitated very high levels of overtime in a previously troubled area of the plant, a temporary moratorium on nonsafety-related grievance activity was negotiated.

Also, both contract negotiation sessions during the past 2 years commenced with prayer for understanding and resolve. The prayers were led for management and labor by Mr. Larry Owen in 1982 and West Virginia State Delegate Leonard Underwood in 1983.

Mr. Speaker, I could go on about the labor relations accomplishments of this union and management for hours—I have barely touched the surface of what has been accomplished in South Charleston in the past 2 years. The most significant statement, however, has come from the membership of Steelworkers Local 12625. The contract negotiations of 1982 that I described as a watershed was the beginning point of a process of change. It was not possible for that membership to recognize it immediately. Also, as I said, much of the change was distasteful and feared. That 1-year contract passed the membership vote by a slim margin of 285 to 260. But as the parties renegotiated their labor agreement this year, the unique process that has come into use at the FMC plant was much better, and much more widely, understood. This time the local union membership gave their union and mangement a vote of almost 3 to 1 in favor of the agreement.

Mr. Speaker, I know that I have spent a significant amount of time discussing this example today. I think that it was valuable and necessary, however. When any group of people, be it a legislative body such as this Congress, or a private group such as the Chamber of Commerce, or even a labor union, places a label such as bad labor climate or a bad business climate on a State or city, they do a disservice. The mistake that they make is a form of sublime, but very real prejudice. It is a failure to see people as individuals and to appreciate how they can respond to a situation with the talents and potentials they alone possess. Those past problems of bad labor-management relationships were a barrier to progress: however, the people of the South Charleston plant recognized them as a challenge to be overcome.

There are many people whom I could acknowledge and refer to who have been at the bargaining table and have worked in this 2-year process to establish and nurture the improvements.

I include their names at this point:

E. Woody Wayland, Plant Manager.

T. Eugene Brunk, Chief Outside Negotiator, FMC Corp.

Larry Ratliff, Chief Outside Negotiator, United Steelworkers of America.

Dave Dick, Industrial Relations Manager (1983) Negotiator.

Preston Ryan, President, Local 12625, Negotiator.

Leo Cavender, Industrial Relations Manager (1982) (now retired).

Joe Martucci, Employee Relations Supervisor.

Lori Paletta, Industrial Relations Representative.

George Vorholt, East Plant Superintendent.

Rondis Cavender, CDB Superintendent.

Tom Sikora, Peroxide Superintendent.

Dale Roush, Local 12625 Vice President.

Bob Carroll, 12625 Negotiating Team, 1982-83.

Hal Turley, 12625 Committeeman, Negotiating Team 1982-83.

C. F. "Dink" Brua, 12625 Committeeman, Negotiating Team 1983.

Ronald Kidd, 12625 Negotiating Team 1983.

Larry Kidd, 12625 Committeeman, Negotiating Team 1983.

Tom Richardson, 12625 Committeeman, Negotiating Team 1982-83.

Larry Owen, 12625 Committeeman, Negotiating Team 1982.

Herb Robertson, 12625 Negotiating Team, 1982.

These people, all of them, plant management, local union leadership, recognized their shared interest and incentive in meeting the need to change for the prosperity of all. Their example is one that the union and management people of West Virginia and this whole country can look to with pride—it is a victory for all of us, and it is an inspiration and an example for all of us because, as I said when I first began, I bring this here not only to commemorate, not only to celebrate what has happened at the FMC plant in my district, but also in the hope that perhaps there are some seeds for other parts of the country that in turn, as you plant a seed, trees may grow, and just as labor and management have worked out their differences in the FMC plant, just as that plant has become a very productive member of our industrial community, so may that be true in many other areas as we work to grapple with the challenges today.

Mr. Speaker, I thank you very much for the opportunity to recognize the men and women of the FMC plant in Charleston, W. Va.

AMBASSADOR JEANE KIRKPATRICK'S ADDRESS TO THE CAPTIVE NATIONS CONFERENCE, JULY 18, 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 30 minutes.

● Mr. STRATTON. Mr. Speaker, some 2 weeks ago U.N. Ambassador Jeane Kirkpatrick addressed the Captive Nations Conference in Washington, D.C. Ambassador Kirkpatrick was the main speaker at the congressional luncheon on July 18 in the Cannon caucus room, which had one of the largest turnouts for this luncheon that I have seen in 25 years of commemoration of Captive Nations Week by the Congress.

Ambassador Kirkpatrick did an outstanding job of going through the litany of aggression by the Soviet Union from the time of its inception in 1917. The audience was greatly impressed by her strong and cogent discussion of the persistence of the Soviet threat to peace and freedom in the world.

While the Ambassador had no written text of the speech, we were very fortunate in obtaining a recording of her remarks and to have it transcribed by the staff at the U.S. Mission to the United Nations, for which I am most grateful. I thank them for their efforts.

I, under unanimous consent, extend my remarks and include the text of the Kirkpatrick speech in the RECORD at this point, and heartily recommend this fine speech to my colleagues:

ADDRESS BY AMBASSADOR JEANE J. KIRKPATRICK

I want to focus today on what I believe to be the most important question in our time. It is how to preserve peace with the freedom, independence and self-government that makes peace and, indeed life, worthwhile. The principal obstacle in this pursuit of peace with self-government in a contemporary world is the relentless habit of the Soviet Union and the Soviet empire of growing and ruling by force. That habit is difficult for us bear in mind even for most of us here. Almost everyone is from time to time bemused by Soviet rhetoric and confused by the audacity of Soviet claims and Soviet lies. Therefore it is important from time to time to step back and review briefly the essential elements of that empire.

The Bolshevik Revolution inherited an empire that Lenin once referred to as a "prisonhouse of peoples," a territory that had already expanded from some 15,000 square miles in 1462 to 8,600,000 square miles in 1914. Russia, at the time of the Bolshevik Revolution, had expanded at a rate of more than 50 square miles a day over a period of some 450 years. Since Lenin had criticized this "prisonhouse of peoples" it was assumed that the Bolsheviks might dismantle the empire. But as everyone knows, Lenin and his successors have expanded it and have imposed upon its subjects the ruthless force of modern totalitarianism. You know the dismal record; I know it.

The people who have been absorbed into the Soviet empire differ: their languages differ, their cultures and religions differ, but the process of expansion, that has extended the Soviet empire from the Ukraine to Managua, has all essential elements in common. All nations which currently form part of the Soviet empire, the Soviet bloc as we call it in the United Nations, have been conquered by force—not by moral force, not by persuasion, certainly not by the tides of history. All the nations of all the people absorbed in the Soviet empire have fallen to

the conquest of arms, weapons, violence. And all the Communist regimes ruling them rely ultimately on force—on heavy weapons like the tanks that crushed the revolt of Hungary in 1956 and of Czechoslovakia in 1968, heavy weapons that bomb and burn the villages of Afghanistan, heavy weapons that burn the villages and the churches of the Indians of Nicaragua's Atlantic Cost.

Since we have so much trouble absorbing and remembering these facts it is important from time to time to review them. Perhaps we should begin where the Soviet empire began, with the Ukraine. In 1961 my predecessor at the United Nations, Adlai Stevenson, traced the growth of the Soviet Empire after the Bolshevik Revolution in a speech to the United Nations. "We are told," said Stevenson, "that the peoples of the Soviet Union enjoy the right of self-determination . . . How did this 'right' work out in practice?" Stevenson went on:

"An independent Ukranian Republic was recognized by the Bolsheviks in 1917, but in 1917 they established a rival Republic in Kharkov. In July 1923, with the help of the Red Army, a Ukranian Soviet Socialist Republic was established and incorporated into the USSR. In 1920, the independent Republic of Azerbaidzhan was invaded by the Red army and a Soviet Socialist Republic was proclaimed. In the same year, the Khanate of Khiva was invaded by the Red army and a puppet Soviet People's Republic of Khorezm was established. With the conquest of Khiva, the approaches to its neighbor, the Emirate of Bokhara, were opened to the Soviet forces which invaded it in September 1920. In 1918, Armenia declared its independence from Russia. In 1920, the Soviet army invaded, and Armenian independence, so long awaited, was snuffed out. In 1921, the Red army came to the aid of Communists rebelling against the independent State of Georgia and installed a Soviet regime.

"This process inexorably continued. Characteristically, the Soviets took advantage of the turmoil and upheaval of the Second World War to continue the process of colonial subjugation at the expense of its neighbors. The Soviets' territorial aggrandizement included the Karelian province and other parts of Finland and the Eastern provinces of Poland, the Romanian provinces of Bessarabia and Bukovina, the independent States of Estonia, Latvia, and Lithuania, the Koenigsberg area, slices of Czechoslovakia, South Sakhalin, the Kurile Islands, and Tanna Tuva . . ."

Let me pause for a moment over this first tragic conquest of the Soviets following World War II, the incorporation of Eastern Europe. Terrible controversies continue to rage about the responsibility of the Allies, in their various negotiations and conferences, for the tragedy that Eastern Europe underwent, that Eastern Europe continues to undergo today. Especially, of course, the controversy rages about the responsibility of our leaders at Yalta for this tragedy. The current Encounter magazine has a fascinating exchange on the Yalta Conference which I recommend to all of you. It provides new insights and raises some new questions. Like all historical controversies, this one is not likely to be settled definitively in the foreseeable future. But there are certain basic facts about the incorporation of Eastern Europe concerning which there is no controversy at all.

First, we know who made the first contribution. It was Adolph Hitler, of course. It was Adolph Hitler who met Joseph Stalin's exacting demands: the Baltic States, half of Poland, Bessarabia, and an agreed sphere of expansion south and east. The much-vaunted "Non-Aggression Pact" between Hitler and Stalin was, of course, an aggression pact which provided for the incorporation of those states of Europe and the destruction and partition of the Polish state. The distinguished scholar, Robert Conquest, has said that perhaps the best description of the attitude of Hitler and Stalin toward the destruction of Poland was found in Molotov's speech to the Supreme Soviet in October, 1939 after that combined invasion of Poland when he (Molotov) said: "One blow from the German army and another from the Soviet army put an end to this ugly product of Versailles." So who struck the first blow? It was Adolph Hitler and Joseph Stalin acting in concert through the Hitler-Stalin pact.

The second fact, about which there is no controversy, is that the quality of Soviet rule in Eastern Europe was clearly foreshadowed by the Katyn massacres, in which 15,000 officers of the Polish army were, on a beautiful spring day, systematically slaughtered. As the author of the Encounter articles suggests, Katyn presented itself as a startling prism through which the nature of Soviet rule and the chances of cooperation with Stalin could be assessed, not just by the Polish government-in-exile in London but also by Churchill and Roosevelt. The Katyn massacres were known to all the participants at Yalta at the time of the meetings. This systematic decapitation of the Polish nation provided chilling evidence, to anyone willing to see, of what conquest by the Soviets would mean in the heart of Europe: it would mean what it had meant to be overcome by the Bolsheviks inside the Soviet Union itself.

Stalin was a great believer in destroying groups and classes which stood in the way of consolidating power. He was interested, above all, in removing those persons who stood in his way or whom he thought might stand in his way. Stalin understood the social dynamics of control as well as Plato had when, in The Republic, he described the role of elites in political change: as elites change, regimes change. So Stalin set about destroying the elite which he thought could be an obstacle to his power in Poland. Churchill wrote that though they knew about the Katyn massacres when they met at Yalta, "it was decided that the issue should be avoided."

We may be shocked that such a decision would be made but, in fact, we should not be because a great many other people have made parallel decisions concerning the Soviet Union in almost every decade which has followed. Still the cynicism with which the men who met at Yalta discussed the future of Eastern Europe has the power to shock. Let us again turn to the recollections of Churchill, about the conversation around the table at Yalta. Concerning the division of influence in Eastern Europe, Churchill wrote:

"The moment was apt for business, so I said: 'Let us settle about our affairs in the Balkans. Your armies are in Bulgaria and Rumania. We have interests, missions and agents there. Don't let us get at cross purposes in small ways. So far as Britain and Russia are concerned, how would it do for you to have ninety percent predominance in Rumania, for us to have ninety percent of the say in Greece, and go fifty-fifty about Yugoslavia?' "

While his words were being put into Russian, Churchill wrote down these percentages on a piece of paper, adding a 50–50 division for Hungary and giving the Kremlin a 75–25 predominance in Bulgaria. Stalin agreed. But more important than the cynicism of the participants was that Stalin declined to keep his cynical promises. He wanted 100 percent predominance in all those countries and he got it in all those countries in which the Red army was already present.

The third fact, which is not the least bit controversial, is that the Soviet army guaranteed the conquest of the states of Eastern Europe. Whatever role Yalta may have played in the legitimization of that conquest—and I myself think that role has probably been overstated—the fact is that the conquest took place not by way of agreements signed at Yalta, but by way of the hard fact of conquest and the continued presence of the Soviet army.

All the other extensions of Soviet power since World War II have taken place in essentially the same fashion. In all extensions of Soviet power, force, violence, arms, weapons, murder have played the crucial role. In Czechoslovakia it was a violent coup. In Cuba it was a civ, those familiar combinations of terrorism, guerrilla war, and imported force.

Rousseau told us that might cannot endure unless it is transformed into right. The fact is, of course, that, if exercised brutally enough, might can endure longer than any of us care to imagine. Legitimization helps, but there is not a scintilla of evidence that the peoples of any of the nations governed today in the shadow of the Red army or any of their imperial armies accept the legitimacy of that rule.

From time to time, crises in Soviet rule and Soviet predominance occur inside the Soviet empire. And when those crises occur, the skeleton of Soviet power is laid bare. Let me just mention a few of those crises. Because the lies which surround them are so multiple and repeated so incessantly and the deception is so smothering, both in intention and effect, it is important from time to time just to remind ourselves of these basic patterns.

Following the annexation of the Baltics, the Soviets embarked on a policy of ruthless Sovietization in those countries, which encountered universal opposition. Then, on a single "night of terror"—June 14, 1941—the Soviets deported almost the entire Baltic intelligentsia to Siberia where most of them perished. The Baltic nations were decapitated, very much as the Polish nation was decapitated at Katyn. When the Germans invaded the Soviet Union a week later, massive, spontaneous uprisings occurred in all three Baltic states and a large part of their territory was liberated from the Soviets before it was subsequently occupied by the Nazis. But the Red army eventually recaptured the Baltics, precipitating an exodus of some 200,000 people who feared the return of Soviet rule—perhaps some of you or some of your relatives. The Soviets reconsolidated their control in the Baltics with killings, repression, and mass deportations. Between 1944 and 1949, we estimate that some 600,000 Balts out of a population of just a little over four million were deported to Siberia. Guerrilla resistance to the Soviet occupation continued until 1952, eight years after the re-entry of the Red army. Since then, of course, the Soviets have continued a conscious policy of cultural russification, but there is not, until this day, a scintilla of evidence either that they have succeeded in russifying the peoples of the Baltic nations

or in persuading them of the legitimacy of their rule.

We've had ample opportunities to observe the skeleton of Soviet power. We had the opportunity when the brave Hungarian peoples confronted the Soviet tanks with their bare hands. It is interesting to recall the words with which the Soviet rulers justified their suppression of that revolt. Nikita Khrushchev, commenting on Budapest Radio, April 1958, noted: "We knew that the imperialists would shout wildly that we interfered in the Hungarian people's affairs. But we also knew that within a short time, the Hungarian working class, working peasantry, and intelligentsia would realize and understand that there was only one correct road." There is no evidence to this day that the Hungarian working class, the working peasantry, or the intelligentsia has understood that there was only one correct road and that that road was the road of Soviet conquest. They only bowed before superior force. They did not acquiesce.

Neither did the Czech people. When the Czechs rose up in 1968 in that marvelous Prague spring, they, too, were crushed by the exercise of force in its purest form. Once again Soviet leaders justified the suppression of people who asked only to be permitted to govern themselves. Pravda commented as late as 1978 about the events of 1968 saying: "World reactionaries cannot accept either the victory of the Czechoslovak Socialist Republic working class in February 1948, or their own defeat in August 1968."

That's interesting. The Czechs that sought their freedom in 1968 had become "world reactionaries."

As a result of World War II the Soviets gained Eastern Europe. But they were not satisfied. Expansion continued. No clearer case of conquest by force—brute, unadorned and unobfuscated—than that of Afghanistan. Today the Soviet Union occupies Afghanistan against the will of the Afghan population. Approximately 3 million Afghans, about one-fifth of the Afghan population, have fled into Pakistan to escape the carnage wreaked by Soviet occupation. Another 2 million have remained outside the country. Those remaining inside Afghanistan still control some 75 percent of the country, despite the fact that they are poorly armed and trained, despite the fact that the Soviet Union has used against them the most sophisticated weapons in its arsenal, ranging from heavily armed helicopter gunships to supersonic aircraft.

Within the Kabul government, Soviet personnel direct virtually all aspects of administration, including the Ministries of Foreign Affairs, Defense, Interior, Information and Culture, Justice and Economic Planning. Since 1979, Soviet personnel have also commanded the Afghan army down to the brigade level and sometimes down to the company level, and still they cannot guarantee the loyalty or performance of that Afghan army. Nothing more clearly reflects the lack of public support for the Soviet occupation of Afghanistan than the collapse of the Afghan army. The puppet regime in Kabul has resorted to desperate measures to recruit that army. Young men, some only 12 or 13 years old are seized in bazaars, loaded into ground or air transport, shipped to another section of the country where they are shoved into uniform. Only those who escape—some of whom have been interviewed by the international press—are heard from again. The others simply disappear and the families do not know where. Recent call-ups of men who have already completed military service have been met with riots and protests, which are in turn met with violence. Protestors are gunned down and still the Soviet occupiers cannot put together an army on which they can rely. They must rely on their own. And so their army in Afghanistan has grown while they talk about negotiations to stop the resistance.

It is interesting to read the official Soviet comments on their invasion and occupation of Afghanistan. Moscow News commented in 1980, "We knew that the decision to bring troops into Afghanistan would not be popular in the modern world . . . Noninterference is a good thing, but the principles of international law do not exist in a vacuum . . . history and politics cannot always be fitted into legal formulas." And Communist Party General Secretary Yuri Andropov commented after his appointment to the Secretariat of the Central Committee, "Our response to events in Afghanistan was a lofty act of loyalty to the principle of proletarian internationalism, which was necessary to defend the interests of our Motherland." What kind of a threat did the people of Afghanistan constitute to the government of the Soviet Union? The threat of simply being there? The last independent Afghan government was not like the government of Nicaragua today. It was not importing tons of arms; it was not importing thousands of advisors and troops from hostile foreign nations. The Afghan people were simply trying to live their own lives in their own way. The consequence was the invasion.

This is the most brutal century, probably, in all of human history, and the Afghan occupation stands out even in this brutal century.

Then we come to Poland, where it also has been easy to observe the infrastructure of Soviet imperialism. With the rise of Solidarity and the stubborn insistence of the Polish people on expressing themselves in ways not wholly acceptable to their Soviet overseers, the Soviet-controlled government responded by declaring martial law on December 13, 1981. This repression was justified in the familiar way, namely, the need to secure the "fundamental interests of the state and its citizens," to secure "conditions for the effective protection of peace and public order" and to restore "social discipline." Virtually all free activities by the Polish people were prohibited; holding gatherings, marches, demonstrations of any kind, sporting, artistic, or entertainment activities. It was forbidden to disseminate information or distribute publications in any manner. The right of employees to organize and hold strikes or protests was forbidden. The organization of free trade unions was forbidden. Sweeping censorship was imposed on top of the sweeping censorship that already existed.

A few months later, on March 15, 1982, martial law was introduced by the Government of Nicaragua. Again, the familiar justifications. Junta coordinator Daniel Ortega announced a general law of national emergency which suspended all political rights and guarantees that had been provided in August, 1979 just after the Sandinista regime had come into power. The junta suspended all non-Sandinista news programs, suspended all programs of political content, suspended all rights of association and political activity, and imposed new sweeping censorship rules on top of already existing sweeping censorship rules.

Given the facts I have been reciting, why do so many have so much trouble facing the fact that to "fall to be flexible" in one's opposition to Communism is nothing, more or less, than to stand firmly in support of human freedom? Why does the notion persist that the Soviets are in some way morally superior to other elites who have used amoral means to gain power and impose repressive, minority, military dictatorship? The sources of this confusion are, I think several.

First is the deliberate semantic confusion fostered by the Soviets themselves through their systematically perverse use of language. By calling "autonomous" that which is powerless, "federated" that which is unitary, "democratic" that which is autocratic, "united" that which is schismatic, "popular" that which is imposed by terror, "peaceful" that which incites war—in brief, by systematically corrupting language to obscure reality—the Soviets and their various friends make inroads into our sense of political reality. Language is, after all, the medium in which we think. And it is exceedingly difficult for us, or anyone, to eliminate all the traditional connotations of words like, "for a lasting peace and a people's democracy," and remember that they had nothing to do with either peace or popular movements or democracy.

A related form of semantic subversion, practiced by Communist parties everywhere, is the effort to capture prestigious symbols, slogans, and traditions. Communist parties in the under-developed world attempt to identify themselves with the slogans of nationalism and anticolonialism at the same time that they affiliate with the only active colonialism in the contemporary world. Communists in France, for example, identify themselves with the symbols of the Resistance, communists in the United States stake claim to Tom Paine and Abraham Lincoln, and in Nicaragua they claim Sandino, a Nicaraguan nationalist and patriot, and in no sense a Communist or an international revolutionary.

Aleksandr Solzhenitsyn goes, as he so often does, to the heart of the matter when he points to the relationship between violence and the lie. The Soviets expand their power and they maintain it through the use of violence—systematic, deliberate, uninhibited—and through the use of the lie. "Let us not forget," he said in his Nobel address, "that violence does not and cannot exist by itself: it is invariably intertwined with the lie. They are linked in the most intimate, most organic, and most profound fashion: violence cannot conceal itself behind anything except lies, and lies have nothing to maintain them except violence. Anyone who has once proclaimed violence as his method, must inexorably choose the lie as his principle."

Since they require lies, we require truths. And the importance of meetings like this today, is that it brings together people to speak the truth.●

RUNWAY UTILIZATION PROGRAM AT BURBANK-GLENDALE-PASADENA AIRPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BERMAN) is recognized for 5 minutes.

● Mr. BERMAN. Mr. Speaker, the House and Senate Transportation Appropriation Committee reports contain conflicting language relating to the

Burbank-Glendale-Pasadena Airport. Recent action by the local jurisdiction has resolved the problems that originally led me to request the inclusion of this language in the House report.

The impact of an urban airport on surrounding homeowners is not a new issue in my district. I believe that all residents of surrounding communities who benefit from airport services should also share the noise burden associated with the facility. For years several of the communities that I represent have borne a disproportionate amount of the noise level resulting from daily operations at the airport. Furthermore, these residents have been unrepresented on the Burbank-Glendale-Pasadena Airport Authority which manages the airport.

During full committee consideration of the Transportation appropriations bill, Congressman DIXON introduced on my behalf report language that directed the Federal Aviation Administration to withhold airport improvement funds for the purposes of building a new terminal at the Burbank Airport until the airport developed a noise compatability program and adopted a master plan.

At the time of the floor debate on the bill, Congressmen ROYBAL, MOORHEAD and myself agreed in a colloquoy that efforts at the local level should begin immediately to resolve these longstanding problems. Since that time, airport officials, representatives of the homeowners' groups, and the Congressmen involved, have spent considerable time in drawing up a plan that would make significant progress toward equalizing runway use and therefore dispersing the noise more fairly.

Yesterday, the Commission of the Burbank-Glendale-Pasadena Airport Authority adopted a resolution regarding the development and implementation of such a runway utilization program. Based on numerous conversations, I am confident that the authority intends to do everything in its power to implement the policy set forth in this resolution.

Congressmen DIXON, ROYBAL, MOORHEAD, and I all agree that given the actions of the Burbank-Glendale-Pasadena Airport Authority and their commitment to implementing this resolution that the FAA should disregard the House appropriations report language relating to this subject. The authority's acceptance of the goal of equalizing runway use is a major step toward balancing the transportation needs of the traveling public and the quality of life local residents have been striving for years to obtain.●

THE COMPUTER LITERACY ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, today I am introducing, along with Mr. PERKINS, Mr. MILLER of California, Mr. KOGOVSEK, Mr. DOWNEY and 36 other Members, H.R. 3750, the Computer Literacy Act of 1983, designed to address a growing problem in this country: technical illiteracy.

Much has already been said in this Chamber about an American work force that is increasingly illiterate; of students unable to draw inferences from written material; or solve mathematical problems involving several steps.

Only recently, though, have we begun to recognize that we will continue to lose ground to our international competitors if our work force is incapable of mastering the language of the multitude of microcomputers that is being developed today. By 1990, 30 million jobs will be computer related. Yet, as the National Commission on Excellence in Education reported, we are raising a generation of Americans that is scientifically and technologically illiterate. There are only 200,000 computers in use in schools today to train a student population of 39 million. The future of our economy depends on our schools being able to produce a highly trained and computer-literate work force.

In order to prepare this generation to compete, and cope, in the information age, I am introducing the Computer Literacy Act of 1983. The bill addresses several problems that have not been sufficiently addressed by the Congress. Previous efforts on computer literacy have used a tax-incentive approach to get computer hardware into the schools. I believe we must move beyond this approach. First, computer literacy is not limited to simply getting computers into the schools. Any comprehensive computer literacy effort must include teacher training as well as address the software problems schools are facing. Second, this approach leaves the schools with little control over the type and quality of equipment they can receive. Finally, there are no assurances that the computers will be spread equitably among the poorer and rural schools as well as the wealthier schools. Our purpose in introducing this legislation is to address these flaws in a more comprehensive, carefully structured effort to promote computer literacy.

First, a key feature of the bill is that it uses a direct grant approach, instead of relying on tax incentives, to provide schools with the funds to purchase computer hardware. This will enable schools to choose and purchase the equipment most useful to them.

This will also insure universal access to every student in the country. Today, for example, 72.6 percent of the "rich" schools have instructional computers while only 45.5 percent of their poorer counterparts have any computer capacity at all.

Second, the bill will establish teacher training institutes modeled after the successful institutes created by the National Defense Education Act. Numerous horror stories exist of school systems with computers and teachers who do not know how to use them, much less how to teach others to use them.

In response to a concern often expressed to me by teachers, the bill will call upon the National Institute of Education and the National Science Foundation to provide grants and contracts to organizations to evaluate existing hardware and software, and to disseminate this information to the Nation's schools. This is necessary because too often teachers have no place to turn in order to determine what type of hardware and software they should be buying for the maximum benefit of the students.

Finally, this bill will include an adult component, setting up demonstration-adult training projects in the schools to teach computer literacy to adults. This will be done during the afternoons when the computers are not in use by children. Children learn best from their parents, and this provision of the bill will not only allow adults to learn new skills, but will augment the schools' teaching efforts.

Mr. Speaker, I would like to have the text of the bill printed in the RECORD:

H.R. 3750

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "Computer Literacy Act of 1983"

TITLE I—ACQUISITION OF COMPUTER HARDWARE

PURPOSES

SEC. 101. It is the purpose of this title to authorize assistance to local educational agencies for the acquisition of computer hardware for use in school classrooms in order to promote student competence in the operation and use of new technologies, and thereby to improve students' academic performance in both technical and other fields.

DEFINITIONS

SEC. 102. For purposes of this title—

(1) the term "Secretary" means the Secretary of Education;

(2) the term "local educational agency" has the meaning provided in section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(3) the term "State educational agency" has the meaning provided in section 198(a)(17) of such Act;

(4) the term "average daily attendance" has the meaning provided in section 198(a)(1) of such Act;

(5) the term "computer hardware" means—

(A) a data processor which—

(i) can be programed in at least 3 standard computer languages;

(ii) has a random access memory capacity of at least 16,000 bytes; and

(iii) is or can be connected with a screen for visual display;

(B) in connection with such a data processor (i) a display screen, and (ii) one or more disk or tape drives; and

(C) any equipment necessary for the installation of equipment described in subparagraphs (A) and (B); and

(6) the term "State" means each of the 50 States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ALLOCATION OF FUNDS

SEC. 103. (a)(1) From 5 percent of the amount appropriated pursuant to section 107 for any fiscal year the Secretary shall allocate to each State educational agency an amount for monitoring and enforcement which bears the same ratio to such 5 percent as the amount allocated to the local educational agencies in that State under paragraph (2) for such fiscal year bears to the sum of the amount allocated to local educational agencies in all the States under such paragraph for such fiscal year.

(2) From the remainder of the amount appropriated pursuant to section 107 for any fiscal year the Secretary shall allocate to each eligible local educational agency an amount which bears the same ratio to such remainder as the number of children in average daily attendance in the schools of such local educational agency bears to the sum of such children in the schools of all local educational agencies.

(b) Notwithstanding subsection (a)(2), the allocation of any local educational agency shall be reduced to the extent that assistance under this title has been or would be in excess of the amount necessary for such agency to acquire one unit of computer hardware for each 30 children in average daily attendance in the schools of such agency.

LOCAL APPLICATION FOR FUNDS

SEC. 104. (a)(1) A local educational agency shall be eligible for an allocation under section 103 if it has on file with the State educational agency a current application, approved by the State educational agency, describing the computer hardware procurement program to be conducted with assistance provided under this title. Such application shall contain—

(A) assurances that the local educational agency will allocate funds among the school within its district so that—

(i) funds are provided first to those schools with the least computer hardware per student;

(ii) funds are not provided to any school after such school has the equivalent of one unit of computer hardware for each 30 children in average daily attendance at such school;

(B) an identification of the computer hardware which are already available in the schools of such agency, a specification of the computer hardware to be acquired with funds provided under this title during the next funding period, and assurances that the acquisition cost of such hardware will be reasonable and in accordance with such guidelines as may be prescribed by the Secretary by regulation; and

(C) describe the programs and procedures which the local educational agency has developed to ensure the participation of parents in the establishment of its computer hardware acquisition program and in the development and implementation of a curriculum for the use of such hardware.

(2) Such an application may be amended at any time to describe changes in or additions to the activities originally set forth in the application.

(b) An application or amendment thereto shall be approved by the State educational agency unless such agency determines that the application does not provide for the use of such funds in a manner which meets the requirements of this title or is inconsistent with such requirements as the Secretary may prescribe by regulation. No such determination shall be made except after notice and opportunity for a hearing is given to the applicant.

STATE RESPONSIBILITIES

SEC. 105. (a) Each State which desires to have its local educational agencies qualify for assistance under this title shall have on file with the Secretary an application submitted by its State educational agency. Each such application shall contain (1) satisfactory assurances that the State educational agency will comply with the requirements of this section; and (2) such information as the Secretary considers necessary to determine whether such assurances will be carried out.

(b) A State educational agency shall not finally disapprove, in whole or in part, the application of any local educational agency under section 104 without first affording such agency reasonable notice and opportunity for a hearing.

(c) Each State educational agency shall—

(1) adopt standards, consistent with minimum standards prescribed by the Secretary, for monitoring, with the funds provided under section 103(a)(1), the effectiveness of computer hardware procurement programs assisted under this title;

(2) adopt written procedures for receiving complaints regarding such programs;

(3) establish procedures for notifying the Secretary of any failure by a local educational agency to comply with this title, regulations prescribed thereunder, or any provision in its application; and

(4) make provision for audits of expenditures of funds received under this title to determine, at a minimum, the fiscal integrity of grant and subgrant financial transactions and reports, and compliance with applicable statutes, regulations, and terms and conditions of the grant or subgrant.

(d) Each State educational agency shall submit, at such times and in such detail as the Secretary may require, such reports as may be necessary to enable the Secretary to carry out this title, and shall keep such records and afford such access thereto, as the Secretary may require.

PARTICIPATION OF CHILDREN FROM PRIVATE SCHOOLS

SEC. 106. (a) To the extent consistent with the number of children in the school district of the local educational agency who are enrolled in private elementary and secondary schools, such agency shall, after consultation with appropriate private school representatives, make provision for including special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) in which such children can participate and which meet the requirements of this title. Expenditures for educational services and arrangements pursuant to this subsection for children in private schools shall be equal (taking into account the number of children to be served and the needs of such children) to expenditures for children enrolled in the public schools of such agency.

(b) If by reason of any provision of law a local educational agency is prohibited from providing for the participation of children from private schools as required by subsection (a), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for such participation on an equitable basis, the Secretary shall waive such requirements and shall arrange for the provision of services to such children, which shall be subject to the requirements of this section. Such waivers shall be subject to consultation, withholding, notice, and judicial review in accordance with section 557(b) (3) and (4) of the Education Consolidation and Improvement Act of 1981.

AUTHORIZATION OF APPROPRIATIONS

SEC. 107. There are authorized to be appropriated to carry out this title $300,000,000 for each of the fiscal years 1984 through 1993.

TITLE II—TEACHER TRAINING INSTITUTES

NATIONAL SCIENCE FOUNDATION PROGRAM

SEC. 201. (a) From the amount appropriated pursuant to section 203 for any fiscal year, the National Science Foundation shall arrange, through grants and contracts with nonprofit professional scientific or engineering organizations, science museums, regional science education centers, State educational agencies, and institutions of higher education (including community colleges), for the development and operation by such entities of short-term or regular session institutes for advanced study to improve the qualifications of individuals who are engaged in or preparing to engage in the teaching, or supervising or training of teachers, of the operation and use of new technologies.

(b) In making grants and contracts under subsection (a), the National Science Foundation shall give special consideration to institutes training teachers, or supervisors or trainers of teachers, serving or preparing to serve in elementary and secondary schools enrolling substantial numbers of culturally, economically, socially, and educationally handicapped youth or in programs for children of limited English language proficiency.

STIPENDS

SEC. 202. Each individual who attends an institute operated under the provisions of this title shall be eligible (after application therefor) to receive a stipend at the rate of $275 per week for the period of attendance at such institute.

AUTHORIZATION OF APPROPRIATIONS

SEC. 203. There are authorized to be appropriated to carry out this title $20,000,000 for each of the fiscal years 1984 through 1993.

TITLE III—INFORMATION DISSEMINATION AND EVALUATION

NATIONAL INSTITUTE OF EDUCATION

SEC. 301. (a) For the purpose of providing advice and technical assistance to State and local educational agencies on the expenditure of funds under title I of this Act and on the acquisition of suitable computer software, the National Institute of Education and the National Science Foundation, in accordance with an interagency agreement between such Institute and such Foundation, shall—

(1) evaluate available computer hardware and software, in terms of its usefulness in the classroom;

(2) disseminate the results of such evaluation; and

(3) develop model computer educational software, and make such model software (and its design premises) available to computer software producers and distributors, teachers, and school administrators.

(b) The Institute and the Foundation shall carry out the functions described in paragraphs (1), (2), and (3) of subsection (a) under grants or contracts made with funds appropriated under subsection (c).

(c) There are authorized to be appropriated to carry out this section such sums as may be necessary for each of the fiscal years 1984 through 1993.

PRIVATE EVALUATION AND DISSEMINATION CENTERS

SEC. 302. (a) The National Science Foundation shall, through grants to or contracts with nonprofit professional scientific or engineering organizations, science museums, regional science education centers, public television, State educational agencies, and institutions of higher education (including community colleges), conduct, assist, and foster research and experimentation on, and dissemination of, models of instruction in the operation and use of computers. In selecting such entities for such grants or contracts, the Foundation shall give priority to those proposals—

(1) prepared with the active and broad community involvement of such groups as parents, teachers, school boards and administrators, and local business; or

(2) which propose the establishment of model training programs for adults.

(b) Funds available under a grant or contract pursuant to this section may be used for the acquisition of computer hardware and software.

(c) The Director of the National Science Foundation shall report to the Congress annually on the results of research and experimentation performed with funds made available under this section. The Director, in conjunction with the National Institute of Education, shall take such steps as may be necessary to disseminate information concerning such results to local educational agencies.

(d) There are authorized to be appropriated to carry out this section such sums as may be necessary for each of the fiscal years 1984 through 1993.●

EDUCATION POLICY AS A RESPONSE TO INDUSTRIAL CHANGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, the Subcommittee on Economic Stabilization, which I chair, has been conducting a series of hearings on industrial policy. This morning the subcommittee's hearing focused on education policies and programs, which affect not only our Nation's economic stability and growth, but also our defense capability and national security. I would like to submit for the RECORD the statement of Dr. Reatha Clark King, who is chairperson of the American Council on Education, president of Metropolitan State University of St. Paul, Minn., and a member of the Business-Higher Education Forum, on whose behalf she appeared.

No strategy for economic revitalization will be complete without a coherent national education policy. We must consider ways in which a more coordinated industrial policy might integrate education and manpower programs with other Federal measures to stabilize declining industries and promote new ones.

If the United States is to maintain its international competitiveness, it must prepare its students for demanding work and it must help its workers to adapt to rapid industrial change.

Dr. King's statement makes it clear that education is an integral component of economic development and productivity improvement. The text follows:

STATEMENT OF DR. REATHA CLARK KING

The Business-Higher Education Forum Task Force Report has identified two principal purposes. First, as a nation, we must elevate the competitive challenge to the top of the national agenda. There is no more pressing challenge—not only for industry and workers, but for educators, government officials and the average American citizen as well. The extended hearings your Subcommittee has conducted on the issue have helped immensely in this regard.

Second, we must recognize that the problems of American competitiveness are interrelated, involving issues ranging from capital investment to education and training, from technological innovation to effective trade policies. If we invest millions of dollars in new technologically sophisticated plant and equipment without simultaneously making an investment in the education and training of our current and future work force, we will have accomplished little. At the same time, it serves no useful purpose to say: "That's business' problem" or "That's the fault of the grade schools or colleges." The finger-pointing and adversarial relationships that have helped contribute to the relative decline of America's competitive position in the past decade must yield to productive dialogue among and coordinated actions by all sectors. Again, your Subcommittee has made a valuable contribution on both counts.

It is within the broad context of the two points addressed above that I turn to the issues affecting us in the higher education community.

PROBLEMS

Basically, colleges and universities have two major responsibilities relating to the improvement of productivity, and hence to the development of a thriving, competitive economy: first, to educate and train current and future workers; and second, to conduct much of the basic research on which America's technological innovations depend. In both areas, the challenges ahead are immense.

Turning first to the development of a well-trained work force, among the challenges of the next decade identified by the Forum Task Force are:

To assist the nation's 100 million employed workers in sharpening their skills so they can keep abreast of changing job needs caused by advancing technology;

To assist workers who may be displaced in this decade with retraining;

To assist the 1.5 million workers who will be entering the work force each year with the education, skills and counseling that are appropriate to the fast-changing needs of the economy;

To assist the more than 23 million functionally illiterate Americans in acquiring even the basic skills needed to participate in entry-level training;

To upgrade the educational opportunities for women and minorities so that they can become fuller participants in the changing economy;

To develop special programs to anticipate, identify and fill critical skills shortages; and

To prepare every student with a basic foundation in math, science and technology so the general public will have at least a basic familiarity with these increasingly important fields.

While the responsibility for achieving such goals will be divided between educators and industry, and among grade schools, high schools and post-secondary institutions, it is apparent that the challenges must be addressed if the United States is to reverse its declining competitiveness.

Perhaps the most striking of the Task Force's findings is the wide gap between the skills required in the modern workplace and the skills taught in the modern classroom. The gap between the nation's needs and the capabilities of its work force is most evident in the growing shortage of skilled workers, particularly engineers, scientists and technicians. The Forum estimates that about 100,000 new engineers will be needed each year for the foreseeable future; today, the United States is producing only about 60 percent of that amount.

The shortages are creating bidding wars between industry and education for those adequately educated and trained. The faculty vacancy rate in engineering colleges, for example, is about 10 percent. For assistance professors in fields such as computers and electronics, the vacancy rate is 25 percent. A related problem, shared by industry and academia, is the absence of reliable information on present and anticipated job vacancies, their location, the education and training required for those jobs, and the likely size of the gap between the available jobs and available workers in the coming years.

Next, the challenges of conducting basic research are no less severe. American colleges and universities account for almost 60 percent of the nation's basic research—the type that leads to pioneering breakthroughs, which subsequently can be commercialized and marketed by U.S. firms. Today, however, researchers are being asked to do their work in outdated facilities with obsolete equipment, the result of many years of accumulated underinvestment estimated to be between $1-4 billion. Reductions in government funding have been a major contributor to the current budget crunch confronting higher education institutions.

University basic research contributes to economic growth only when it is successfully transferred to industry for commercial development. Unfortunately, the Forum found that technology transfers between universities and industry are weak. Although significant business-university R&D partnerships have developed recently—and the Business-Higher Education Forum is a dramatic demonstration of the cooperative relationship that is possible between the

two sectors—far more must be done in this area.

SUGGESTIONS

While the challenges are great, so too are the opportunities. The Forum identified a number of areas where improvements can be made in both the public and private sectors.

At the top of the list was the suggestion that the President form a private-sector National Commission on Industrial Competitiveness composed of representatives from business, higher education and labor. We are encouraged by President Reagan's appointment last month of the chairman of the new panel, are equally pleased to learn that the commission indeed will include academic members, and eagerly await the announcement of the remainder of the panel, expected this week.

The commission clearly will not be a panacea, but instead will provide a much-needed mechanism to encourage consensus-building among the various sectors and to communicate those views to the government. In that sense, we would hope that the panel is only one of many such partnerships that will be developed—not only within the private sector but between the private and public (government) sectors as well.

For instance, existing government funding programs to stimulate university-industry cooperation have been successful, but the programs—funded by the National Science Foundation and the Department of Energy—have been targeted at science and technology fields where university-industry cooperation was likely to occur anyway. It would be useful to expand such efforts to encourage participation in cooperative research by companies and colleges that have not been substantially involved to date.

One of the higher education's most immediate needs is sufficent funding to rebuild and upgrade our research and teaching facilities. While the proposed 10 percent increase for basic research in President Reagan's FY1984 budget is welcome, the one-time funding increase must be supplemented by an ongoing program to maintain, replace and add to equipment.

Another helpful public policy step would be to clarify that the tax deductions permitted industry for donations of equipment to universities under the Economic Recovery Tax Act of 1981 apply to computers as well as to other scientific equipment. Such a clarification could significantly expand this important incentive to upgrade higher education's research facilities for the demands of the technology-driven age.

While industry recently has increased its financial contributions to higher education, the private sector increases have not come close to matching the reductions in public sector funding. The Forum is preparing a report on the need for increased corporate support of colleges and universities. Significantly, the study outlines a number of initiatives that do not involve direct financial contributions or the indirect underwriting of student aid that have been the traditional means of corporate support. Among the new approaches being developed are proposed increases in the number of joint research agreements, in the pooling of instrument and equipment use, and in the donation of corporate personnel to supplement faculties.

In the area of human resources, steps clearly are needed to reduce the critical shortage of engineering school faculty—a shortage that hampers our ability to maintain an adequate supply of well-trained U.S. engineers. One incentive-based approach recommended by the Forum would be to provide special loans to U.S. graduate engineering students in return for a commitment to teach. The loans could be forgiven by a specified amount for each teaching year—20 percent, for instance.

The renewal of American economic vitality, innovation and competitiveness will depend not just on the contributions of government and industry, but on our own initiatives within the higher education community. Just as industry and the government have a responsibility to assist colleges and universities, so do we have a responsibility to contribute to their efforts. The relationship is—or should be—a two-way street.

The academic members of the Forum recognize and accept that reality. Along those lines, the Forum Task Force report outlined a number of initiatives that universities should undertake to help meet the competitive challenge.

We must increase our emphasis on teaching and research in areas such as: the extent and impact of trade barriers on U.S. competitiveness; foreign management practices compared to those of the United States; and expanded programs and curriculum requirements in the fields of foreign language, culture and sociopolitical institutions.

We must make more of an effort to educate the faculty of the future in needed fields, and collaborate with industry to ensure that this "seed corn" is not prematurely lured away from the campus by the business sector.

Business schools should expand their teaching and research on the elements of management that are fundamental to effective industrial R&D, technological innovation, high productivity and high product quality. Graduate centers for international study should strengthen programs and databases in the areas of industrial, commercial, legal and financial practices and institutions. And engineering schools should reemphasize manufacturing engineering.

On the administrative side, we can help to alleviate equipment shortages through such means as specialization by institution and by sharing facilities with local industry. We can adjust academic schedules to accommodate mid-career science and engineering students, and can help industry meet its own requirements for on-the-job training and retraining. We can help make engineering salaries more competitive with market salaries by establishing independent wage scales higher than the campus-wide standard. We can provide greater access for industry to our on-campus resources-libraries, conference centers and the like. And along with industry, we in the higher education sector can work with the government to develop better data on trends in technological change and international competitive conditions. These are just some of the many initiatives that must be integrated into a coherent, comprehensive response to the nation's competitive challenge.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, on Monday, July 29, 1983, I inadvertently missed three recorded votes. Had I been present, I would have voted for final passage of H.R. 1646, the Railroad Retirement Solvency Act. I would have voted with the majority to postpone consideration of House Resolution 256, disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania. And, Mr. Speaker, I would have voted to permit conference committee meetings between the House and the Senate on S. 675, Department of Defense Authorization Act for fiscal year 1984, to be closed to the public at such time as classified national security information is under consideration.●

MARTIN LUTHER KING'S VALUES AND BELIEFS

(Mr. AUCOIN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. AUCOIN Mr. Speaker, I rise in strong support of the resolution to establish a national day of recognition for Martin Luther King and the beliefs he held—a resolution I have supported every time it has been brought before this body. It is not simply the memory of a great man we are commemorating here, but the memory and the knowledge of the important values he stood for.

As we consider this important resolution, I would like to bring to the attention of my colleagues a letter Dr. King wrote in April of 1963, while confined to the Birmingham City Jail. I believe this letter exemplifies all that Martin Luther King stood for and that it would behoove us, 20 years after the authorship of this letter, to freshen our memories of his dream with his own words.

Again, I strongly support the passage of this resolution—a resolution that I believe is long overdue. And I can think of nothing that better expresses Martin Luther King's values and beliefs than this letter.

LETTER FROM BIRMINGHAM CITY JAIL

(By Martin Luther King, Jr.)

MY DEAR FELLOW CLERGYMEN: While confined here in the Birmingham City Jail, I came across your recent statement calling our present activities "unwise and untimely." Seldom, if ever, do I pause to answer criticism of my work and ideas. If I sought to answer all of the criticisms that cross my desk, my secretaries would be engaged in little else in the course of the day and I would have no time for constructive work. But since I feel that you are men of genuine good will and your criticisms are sincerely set forth, I would like to answer your statement in what I hope will be patient and reasonable terms.

I think I should give the reason for my being in Birmingham, since you have been influenced by the argument of "outsiders coming in." I have the honor of serving as president of the Southern Christian Leadership Conference, an organization operating in every Southern state with headquarters in Atlanta, Georgia. We have some 85 affiliate organizations all across the South—one

being the Alabama Christian Movement for Human Rights. Whenever necessary and possible we share staff, educational, and financial resources with our affiliates. Several months ago our local affiliate here in Birmingham invited us to be on call to engage in a nonviolent direct action program if such were deemed necessary. We readily consented and when the hour came we lived up to our promises. So I am here, along with several members of my staff, because we were invited here. I am here because I have basic organizational ties here. Beyond this, I am in Birmingham because injustice is here. Just as the 8th century prophets left their little villages and carried their "thus saith the Lord" far beyond the boundaries of their home town, and just as the Apostle Paul left his little village of Tarsus and carried the gospel of Jesus Christ to practically every hamlet and city of the Graeco-Roman world, I too am compelled to carry the gospel of freedom beyond my particular home town. Like Paul, I must constantly repond to the Macedonian call for aid.

Moreover, I am cognizant of the interrelatedness of all communities and states. I cannot sit idly by in Atlanta and not be concerned about what happens in Birmingham. Injustice anywhere is a threat to justice everywhere. We are caught in an inescapable network of mutuality tied in a single garment of destiny. Whatever affects one directly affects all indirectly. Never again can we afford to live with the narrow, provincial "outside agitator" idea. Anyone who lives inside the United States can never be considered an outsider anywhere in this country.

You deplore the demonstrations that are presently taking place in Birmingham. But I am sorry that your statement did not express a similar concern for the conditions that brought the demonstrations into being. I am sure that each of you would want to go beyond the superficial social analyst who looks merely at effects, and does not grapple with underlying causes. I would not hesitate to say that it is unfortunate that so-called demonstrations are taking place in Birmingham at this time, but I would say in more emphatic terms that it is even more unfortunate that the white power structure of this city left the Negro community with no other alternative.

In any nonviolent campaign there are four basic steps: (1) collection of the facts to determine whether injustices are alive; (2) negotiation; (3) self-purification; and (4) direct action. We have gone through all of these steps in Birmingham. There can be no gainsaying of the fact that racial injustice engulfs this community. Birmingham is probably the most thoroughly segregated city in the United States. Its ugly record of police brutality is known in every section of this country. Its unjust treatment of Negroes in the courts is a notorious reality. There have been more unsolved bombings of Negro homes and churches in Birmingham than any city in this nation. There are the hard, brutal, and unbelievable facts. On the basis of these conditions Negro leaders sought to negotiate with the city fathers. But the political leaders consistently refused to engage in good faith negotiation.

Then came the opportunity last September to talk with some of the leaders of the economic community. In these negotiating sessions certain promises were made by the merchants—such as the promise to remove the humiliating racial signs from the stores. On the basis of these promises Reverend Shuttlesworth and the leaders of the Alabama Christian Movement for Human Rights agreed to call a moratorium on any type of demonstration. As the weeks and months unfolded we realized that we were the victims of a broken promise. The signs remained. As in so many experiences of the past, we were confronted with blasted hopes, and the dark shadow of a deep disappointment settled upon us. So we had no alternative except that of preparing for direct action, whereby we would present our very bodies as a means of laying our case before the conscience of the local and national community. We were not unmindful of the difficulties involved. So we decided to go through a process of self-purification. We started having workshops on non-violence and repeatedly asked ourselves the questions, "Are you able to accept blows without retaliating?" "Are you able to endure the ordeals of jail?"

We decided to set our direct action program around the Easter season, realizing that, with the exception of Christmas, this was the largest shopping period of the year. Knowing that a strong economic withdrawal program would be the by-product of direct action, we felt that this was the best time to bring pressure on the merchants for the needed changes. Then it occurred to us that the March election was ahead, and so we speedily decided to postpone action until after election day. When we discovered that Mr. (Eugene "Bull") Connor was in the run-off, we decided again to postpone action so that the demonstrations could not be used to cloud the issues. At this time we agreed to begin our nonviolent witness the day after the run-off.

This reveals that we did not move irresponsibly into direct action. We too wanted to see Mr. Connor defeated; so we went through postponement after postponement to aid in this community need. After this we felt that direct action could be delayed no longer.

You may well ask, "Why direct action? Why sit-ins, marches, etc.? Isn't negotiation a better path?" You are exactly right in your call for negotiation. Indeed, this is the purpose of direct action. Nonviolent direct action seeks to create such a crisis and establish such creative tension that a community that has constantly refused to negotiate is forced to confront the issue. It seeks so to dramatize the issue that it can no longer be ignored.

I just referred to the creation of tension as part of the work of the nonviolent resister. This may sound rather shocking. But I must confess that I am not afraid of the word tension. I have earnestly worked and preached against violent tension, but there is a type of constructive nonviolent tension that is necessary for growth. Just as Socrates felt that it was necessary to create a tension in the mind so that individuals could rise from the bondage of myths and half-truths to the unfettered realm of creative analysis and objective appraisal, we must see the need of having non-violent gadflies to create the kind of tension in society that will help men rise from the dark depths of prejudice and racism to the majestic heights of understanding and brotherhood. So the purpose of the direct action is to create a situation so crisis-packed that it will inevitably open the door to negotiation. We, therefore, concur with you in your call for negotiation. Too long has our beloved Southland been bogged down in the tragic attempt to live in monologue rather than dialogue.

One of the basic points in your statement is that our acts are untimely. Some have asked, "Why didn't you give the new administration time to act?" The only answer that I can give to this inquiry is that the new administration must be prodded about as much as the outgoing one before it acts. We will be sadly mistaken if we feel that the election of Mr. (Albert) Boutwell will bring the millennium to Birmingham. While Mr. Boutwell is much more articulate and gentle than Mr. Connor, they are both segregationists dedicated to the task of maintaining the status quo. The hope I see in Mr. Boutwell is that he will be reasonable enough to see the futility of massive resistance to desegregation. But he will not see this without pressure from the devotees of civil rights.

My friends, I must say to you that we have not made a single gain in civil rights without determined legal and nonviolent pressure. History is the long and tragic story of the fact that privileged groups seldom give up their privileges voluntarily. Individuals may see the moral light and voluntarily give up their unjust posture; but as Reinhold Niebuhr has reminded us, groups are more immoral than individuals.

We know through painful experience that freedom is never voluntarily given by the oppressor; it must be demanded by the oppressed. Frankly I have never yet engaged in a direct action movement that was "well timed," according to the timetable of those who have not suffered unduly from the disease of segregation. For years now I have heard the word "Wait!" It rings in the ear of every Negro with a piercing familiarity. This "wait" has almost always meant "never." It has been a tranquilizing Thalidomide, relieving the emotional stress for a moment, only to give birth to an ill-formed infant of frustration. We must come to see with the distinguished jurist of yesterday that "justice too long delayed is justice denied." We have waited for more than 340 years for our constitutional and God-given rights. The nations of Asia and Africa are moving with jet-like speed toward the goal of political independence, and we still creep at horse and buggy pace toward the gaining of a cup of coffee at a lunch counter.

* * * * *

I had also hoped that the white moderate would reject the myth of time. I received a letter this morning from a white brother in Texas which said: "All Christians know that the colored people will receive equal rights eventually, but is it possible that you are in too great of a religious hurry? It has taken Christianity almost 2,000 years to accomplish what it has. The teachings of Christ take time to come to earth." All that is said here grows out of a tragic misconception of time. It is the strangely irrational notion that there is something in the very flow of time that will inevitably cure all ills. Actually time is neutral. It can be used either destructively or constructively. I am coming to feel that the people of ill will have used time much more effectively than the people of good will.

We will have to repent in this generation not merely for the vitriolic words and actions of the bad people, but for the appalling silence of the good people. We must come to see that human progress never rolls in on wheels of inevitability. It comes through the tireless efforts and persistent work of men willing to be co-workers with God, and without this hard work time itself becomes an ally of the forces of social stagnation.

We must use time creatively, and forever realize that the time is always ripe to do

right. Now is the time to make real the promise of democracy, and transform our pending national elegy into a creative psalm of brotherhood. Now is the time to lift our national policy from the quicksand of racial injustice to the solid rock of human dignity.

You spoke of our activity in Birmingham as extreme. At first I was rather disappointed that fellow clergymen would see my nonviolent efforts as those of the extremist. I started thinking about the fact that I stand in the middle of two opposing forces in the Negro community. One is a force of complacency made up of Negroes who as a result of long years of oppression, have been so completely drained of self-respect and a sense of "somebodiness" that they have adjusted to segregation, and of a few negroes in the middle class who, because of a degree of academic and economic security, and because at points they profit by segregation, have unconsciously become insensitive to the problems of the masses. The other force is one of bitterness and hatred and comes perilously close to advocating violence. It is expressed in the various black nationalist groups that are springing up over the nation, the largest and best known being Elijah Muhammad's Muslim movement. This movement is nourished by the contemporary frustration over the continued existence of racial discrimination. It is made up of people who have lost faith in America, who have absolutely repudiated Christianity, and who have concluded that the white man is an incurable "devil."

I have tried to stand between these two forces saying that we need not follow the "do-nothingism" of the complacent or the hatred and despair of the black nationalist. There is the more excellent way of love and nonviolent protest. I'm grateful to God that, through the Negro church, the dimension of nonviolence entered our struggle. If this philosophy had not emerged I am convinced that by now many streets of the South would be flowing with floods of blood. And I am further convinced that if our white brothers dismiss us as "rabble rousers" and "outside agitators"—those of us who are working through the channels of nonviolent direct action—and refuse to support our nonviolent efforts, millions of Negroes, out of frustration and despair, will seek solace and security in black nationalist ideologies, a development that will lead inevitably to a frightening racial nightmare.

Oppressed people cannot remain oppressed forever. The urge for freedom will eventually come. This is what has happened to the American Negro. Something within has reminded him of his birthright of freedom; something without has reminded him that he can gain it. Consciously and unconsciously, he has been swept in by what the Germans call the Zeitgeist, and with his black brothers of Africa, and his brown and yellow brothers of Asia, South America, and the Caribbean, he is moving with a sense of cosmic urgency toward the promised land of racial justice. Recognizing this vital urge that has engulfed the Negro community, one should readily understand public demonstrations.

The Negro has many pent-up resentments and latent frustrations. He has to get them out. So let him march sometime; let him have his prayer pilgrimages to the city hall; understand why he must have sit-ins and freedom rides. If his repressed emotions do not come out in these nonviolent ways, they will come out in ominous expressions of violence. This is not a threat; it is a fact of history. So I have not said to my people, "Get rid of your discontent." But I have tried to say that this normal and healthy discontent can be channeled through the creative outlet of nonviolent direct action. Now this approach is being dismissed as extremist. I must admit that I was initially disappointed in being so categorized.

But as I continued to think about the matter I gradually gained a bit of satisfaction from being considered an extremist. Was not Jesus an extremist in love? "Love your enemies, bless them that curse you, pray for them that despitefully use you." Was not Amos an extremist for justice—"Let justice roll down like waters and righteousness like a mighty stream." Was not Paul an extremist for the gospel of Jesus Christ—"I bear in my body the marks of the Lord Jesus." Was not Martin Luther an extremist—"Here I stand; I can do none other so help me God." Was not John Bunyan an extremist—"I will stay in jail to the end of my days before I make a butchery of my conscience." Was not Abraham Lincoln an extremist—"This nation cannot survive half slave and half free." Was not Thomas Jefferson an extremist—"We hold these truths to be self evident that all men are created equal."

So the question is not whether we will be extremist but what kind of extremist will we be. Will we be extremists for hate or will we be extremists for love? Will we be extremists for the preservation of injustice—or will we be extremists for the cause of justice? In that dramatic scene on Calvary's hill three men were crucified. We must never forget that all three were crucified for the same crime—the crime of extremism. Two were extremists for immorality, and thus fell below their environment. The other, Jesus Christ, was an extremist for love, truth, and goodness, and thereby rose above His environment. So, after all, maybe the South, the nation, and the world are in dire need of creative extremists.

I had hoped that the white moderate would see this. Maybe I was too optimistic. Maybe I expected too much. I guess I should have realized that few members of a race that has oppressed another race can understand or appreciate the deep groans and passionate yearnings of those that have been oppressed, and still fewer have the vision to see the injustice must be rooted out by strong, persistent, and determined action. I am thankful, however, that some of our white brothers have grasped the meaning of this social revolution and committed themselves to it. They are still all too small in quantity, but they are big in quality. Some like Ralph McGill, Lillian Smith, Harry Golden, and James Dabbs have written about our struggle in eloquent, prophetic, and understanding terms. Others have marched with us down nameless streets of the South. They have languished in filthy, roach-infested jails, suffering the abuse and brutality of angry policemen who see them as "dirty nigger lovers." They, unlike so many of their moderate brothers and sisters, have recognized the urgency of the moment and sensed the need for powerful "action" antidotes to combat the disease of segregation.

Let me rush on to mention my other disappointment. I have been so greatly disappointed with the white Church and its leadership. Of course there are some notable exceptions. I am not unmindful of the fact that each of you have taken some significant stands on this issue. I commend you, Rev. Stallings, for your Christian stand on this past Sunday, in welcoming Negroes to your worship service on a non-segregated basis. I commend the Catholic leaders of this state for integrating Springhill College several years ago.

But despite these notable exceptions I must honestly reiterate that I have been disappointed with the Church. I do not say that as one of those negative critics who can always find something wrong with the Church. I say it as a minister of the gospel, who loves the Church; who was nurtured in its bosom; who has been sustained by its spiritual blessings and who will remain true to it as long as the cord of life shall lengthen.

I had the strange feeling when I was suddenly catapulted into the leadership of the bus protest in Montgomery several years ago that we would have the support the white Church. I felt that the white ministers, priests, and rabbis of the South would be some of our strongest allies. Instead, some have been outright opponents, refusing to understand the freedom movement and misrepresenting its leaders; all to many others have been more cautious than courageous and have remained silent behind the anesthetizing security of stained glass windows.

In spite of my shattered dreams of the past, I came to Birmingham with the hope that the white religious leadership of this community would see the justice of our cause and, with deep moral concern, serve as the channel through which our just grievances could get to the power structure. I had hoped that each of you would understand. But again I have been disappointed.

I have heard numerous religious leaders of the South call upon their worshippers to comply with a desegregation decision because it is the law, but I have longed to hear white ministers say follow this decree because integration is morally right and the Negro is your brother. In the midst of blatant injustices inflicted upon the Negro, I have watched white churches stand on the sideline and merely mouth pious irrelevancies and sanctimonious trivialities. In the midst of a mighty struggle to rid our nation of racial and economic injustice. I have heard so many ministers say, "Those are social issues with which the Gospel has no real concern," and I have watched so many churches commit themselves to a completely, other-worldly religion which made a strange distinction between body and soul, the sacred and the secular.

So here we are moving toward the exit of the 20th century with a religious community largely adjusted to the *status quo*, standing as a tail light behind other community agencies rather than a headlight leading men to higher levels of justice.

I have traveled the length and breadth of Alabama, the Mississippi, and all the other Southern states. On sweltering summer days and crisp autumn mornings I have looked at her beautiful churches with their spires pointing heavenward. I have beheld the impressive outlay of her massive religious education buildings. Over and over again I have found myself asking: "Who worships here? Who is their God? Where were their voices when the lips of Governor Barnett dripped with words of interposition and nullification? Where were they when Governor Wallace gave the clarion call for defiance and hatred? Where were their voices of support when tired, bruised, and weary Negro men and women decided to rise from the dark dungeons of complacency to the bright hills of creative protest?"

Yes, these questions are still in my mind. in deep disappointment, I have wept over the laxity of the Church. But be assured that my tears have been tears of love. There can be no deep disappointment where there is not deep love. Yes, I love the Church; I love her sacred walls. How could I do otherwise? I am in the rather unique position of being the son, the grandson, and the great grandson of preachers. Yes, I see the Church as the body of Christ. But, oh! How we have blemished and scarred that body through social neglect and fear of being nonconformist.

There was a time when the Church was very powerful. It was during that period when the early Christians rejoiced when they were deemed worthy to suffer for what they believed. In those days the Church was not merely a thermometer that recorded the ideas and principles of popular opinion; it was a thermostat that transformed the mores of society. Wherever the early Christians entered a town the power structure got disturbed and immediately sought to convict them for being "disturbers of the peace" and "outside agitators." But they went on with the conviction that they were a "colony of heaven" and had to obey God rather than man. They were small in number but big in commitment. They were too God-intoxicated to be "astronomically intimidated." They brought an end to such ancient evils as infanticide and gladiatorial contest.

Things are different now. The contemporary Church is so often a weak, ineffectual voice with an uncertain sound. It is so often the arch-supporter of the status quo. Far from being disturbed by the presence of the Church, the power structure of the average community is consoled by the Church's silent and often vocal sanction of things as they are.

But the judgment of God is upon the Church as never before. If the Church of today does not recapture the sacrificial spirit of the early Church, it will lose its authentic ring, forfeit the loyalty of millions, and be dismissed as an irrelevant social club with no meaning for the 20th century. I am meeting young people every day whose disappointment with the Church has risen to outright disgust.

Maybe again I have been too optimistic. Is organized religion too inextricably bound to the status quo to save our nation and the world? Maybe I must turn my faith to the inner spiritual Church, the church within the Church, as the true ecclesia and the hope of the world. But again I am thankful to God that some noble souls from the ranks of organized religion have broken loose from the paralyzing chains of conformity and joined us as active partners in the struggle for freedom.

They have left their secure congregations and walked the streets of Albany, Georgia, with us. They have gone through the highways of the South on torturous rides for freedom. Yes, they have gone to jail with us. Some have been kicked out of their churches and lost the support of their bishops and fellow ministers. But they have gone with the faith that right defeated is stronger than evil triumphant. These men have been the leaven in the lump of the race. Their witness has been the spiritual salt that has preserved the true meaning of the Gospel in these troubled times. They have carved a tunnel of hope through the dark mountain of disappointment.

I hope the Church as a whole will meet the challenge of this decisive hour. But even if the Church does not come to the aid of justice, I have no despair about the future. I have no fear about the outcome of our struggle in Birmingham, even if our motives are presently misunderstood. We will reach the goal of freedom in Birmingham and all over the nation, because the goal of America is freedom. Abused and scorned though we may be, our destiny is tied up with the destiny of America.

Before the pilgrims landed at Plymouth, we were here. Before the pen of Jefferson etched across the pages of history the majestic words of the Declaration of Independence, we were here. For more than two centuries our foreparents labored in this country without wages; they made cotton "king"; and they built the homes of their masters in the midst of brutal injustice and shameful humiliation—and yet out of a bottomless vitality they continued to thrive and develop. If the inexpressible cruelties of slavery could not stop us, the opposition we now face will surely fail. We will win our freedom because the sacred heritage of our nation and the eternal will of God are embodied in our echoing demands.

I must close now. But before closing I am impelled to mention one other point in your statement that troubled me profoundly. You warmly commended the Birmingham police force for keeping "order" and "preventing violence." I don't believe you would have so warmly commended the police force if you had seen its angry violent dogs literally biting six unarmed, nonviolent Negroes. I don't believe you would have so quickly commended the policemen if you had observed their ugly and inhuman treatment of Negroes here in the city jail; if you had watched them push and curse old Negro women and young Negro girls; if you had seen them slap and kick old Negro men and young Negro boys; if you had observed them, as they did on two occasions, refuse to give us food because we wanted to sing our grace together. I'm sorry that I can't join you in your praise for the police department.

It is true that they have been rather disciplined in their public handling of the demonstrators. In this sense they have been rather publicly "nonviolent." But for what purpose? To preserve the evil system of segregation. Over the last few years I have consistently preached that nonviolence demands that the means we use must be as pure as the ends we seek. So I have tried to make it clear that it is wrong to use immoral means to attain moral ends. But now I must affirm that it is just as wrong, or even more so, to use moral means to preserve immoral ends. Maybe Mr. Connor and his policemen have been rather publicly nonviolent, as Chief Prichett was in Albany, Georgia, but they have used the moral means of nonviolence to maintain the immoral end of flagrant racial injustice. T. S. Eliot has said that there is no greater treason than to do the right deed for the wrong reason.

I wish you had commended the Negro sitinners and demonstrators of Birmingham for their sublime courage, their willingness to suffer, and their amazing discipline in the midst of the most inhuman provocation. One day the South will recognize its real heroes. They will be the James Merediths, courageously and with a majestic sense of purpose, facing jeering and hostile mobs and the agonizing loneliness that characterizes the life of the pioneer. They will be old, oppressed, battered Negro women, symbolized in a 72-year-old woman of Montgomery, Alabama, who rose up with a sense of dignity and with her people decided not to ride the segregated buses, and responded to one who inquired about her tiredness with ungrammatical profundity: "My feets is tired, but my soul is rested." They will be young high school and college students, young ministers of the Gospel and a host of the elders, courageously and nonviolently sitting in at lunch counters and willingly going to jail for conscience's sake. One day the South will know that when these disinherited children of God sat down at lunch counters they were in reality standing up for the best in the American dream and the most sacred values in our Judeo-Christian heritage, and thus carrying our whole nation back to great wells of democracy which were dug deep by the founding fathers in the formulation of the Constitution and the Declaration of Independence.

Never before have I written a letter this long (or should I say a book?). I'm afraid that it is much too long to take your precious time. I can assure you that it would have been much shorter if I had been writing from a comfortable desk, but what else is there to do when you are alone for days in the dull monotony of a narrow jail cell other than write long letters, think strange thoughts, and pray long prayers?

If I have said anything in this letter that is an overstatement of the truth and is indicative of an unreasonable impatience, I beg you to forgive me. If I have said anything in this letter that is an understatement of the truth and is indicative of my having a patience that makes me patient with anything less than brotherhood, I beg God to forgive me.

I hope this letter finds you strong in the faith. I also hope that circumstances will soon make it possible for me to meet each of you, not as an integrationist or a civil rights leader, but as a fellow clergyman and a Christian brother. Let us all hope that the dark clouds of racial prejudice will soon pass away, that the deep fog of misunderstanding will be lifted from our fear-drenched communities, and that in some not too distant tomorrow the radiant stars of love and brotherhood will shine over our great nation with all of their scintillating beauty.●

REPORT TO THE SPEAKER OF THE HOUSE FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE 1983 CONGRESSIONAL BUDGET

(Mr. JONES of Oklahoma asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. JONES of Oklahoma. Mr. Speaker, pursuant to section 311(b) of the Congressional Budget Act I hereby submit for inclusion in the RECORD the current level of outlays, budget authority and revenues for fiscal year 1983:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, D.C., August 1, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section

311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. Pursuant to Committee rule 10, I am herewith transmitting the status report under H. Con. Res. 91, the First Concurrent Resolution on the Budget for Fiscal Year 1984. This report reflects the adjusted resolution of July 26, 1983, and the current CBO estimates of budget authority, outlays, and revenues based on all completed action on spending and revenue measures as of the close of legislative business July 29, 1983.

With best wishes,

Sincerely,

JAMES R. JONES,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1983 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 91—REFLECTING COMPLETED ACTION AS OF JULY 29, 1983

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	877,896	807,781	604,300
Current level	869,094	806,928	604,294
Amount under ceilings	8,802	853	6

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $8,802 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 91 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $853 million in outlays for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 91 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 91.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., August 1, 1983.

Hon. JAMES R. JONES,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1983 budget (H. Con. Res. 91). This report for fiscal year 1983 is tabulated as of close of business July 29, 1983, and is based on our estimates of budget authority, outlays, and revenues using the assumptions and estimates consistent with H. Con. Res. 91.

Since my last report, Congress has completed action on H.R. 2973 to repeal interest and dividends tax withholding, and H.R. 3069, making 1983 Supplemental Appropriations. The budget resolution used in this comparison reflects the July 26, 1983 committee action making allocations of reserves under Section 2 of the budget resolution, H. Con. Res. 91.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	864,291	804,511	604,400
2. Entitlement authority and other mandatory items requiring further appropriation action			
3. Continuing resolution authority			
4. Conference agreements ratified by both Houses	4,802	2,418	−106
Current level	869,094	806,928	604,294

[In millions of dollars]

	Budget authority	Outlays	Revenues
Second budget resolution, revised, H. Con. Res. 91	877,896	807,781	604,300
Current level is:			
Over resolution by	—	—	—
Under resolution by	8,802	853	6

Sincerely,

NANCY M. GORDON
(For Alice M. Rivlin, Director).

PARLIAMENTARIAN STATUS REPORT SUPPORTING DETAIL, FISCAL YEAR 1983 AS OF CLOSE OF BUSINESS JULY 29, 1983

[In millions of dollars]

	Budget authority	Outlays
I. Enacted:		
Permanent appropriations and trust funds	476,500	469,041
Enacted previous session	484,011	465,953
Offsetting receipts	−133,407	−133,407
Enacted this session:		
Economic Development Administration Deferral disapproval, H. Res. 74		5
DOE strategic petroleum reserve deferral disapproval, H. Res. 80		6
1983 supplemental jobs bill, Public Law 98–8	15,736	7,336
Offsetting receipts	−5,159	−5,159
Social Security Act Amendments of 1983, Public Law 98–21	26,610	731
MX missile approval, S. Con. Res. 26		50
Freeze tobacco support level, Public Law 98–59		−46
Total, enacted	864,291	804,511
II. Entitlement authority and other mandatory items requiring further appropriation action		
III. Continuing resolution authority		
IV. Conference agreements ratified by both Houses:		
1983 supplemental appropriations, H.R. 3069	7,065	4,681
Offsetting receipts	−2,263	−2,263
Total	4,802	2,418
Total, current level as of July 29, 1983	869,094	806,928
Second budget resolution H. Con. Res. 91	877,896	807,781
Amount remaining:		
Over ceiling		
Under ceiling	8,802	853

Note: Detail may not add due to rounding.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. STOKES (at the request of Mr. WRIGHT), for today, on account of a necessary absence.

SPECIAL ORDERED GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BARTLETT) to revise and extend their remarks and include extraneous material:)

Mr. CORCORAN, for 10 minutes, today.

Mr. BEREUTER, for 5 minutes, today.

Mr. BEREUTER, for 5 minutes, on August 4.

Mr. JEFFORDS, for 10 minutes, today.

(The following Members (at the request of Mr. WISE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. WISE, for 60 minutes, today.

Mr. STRATTON, for 30 minutes, today.

Mr. BERMAN, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. ERLENBORN, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $5,554.50.

Mr. AUCOIN, and to include therein extraneous material, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,328.

Mr. FORD of Michigan, during consideration of Senate amendments to H.R. 3394.

Mrs. JOHNSON, to revise and extend in the body of the RECORD and include extraneous material immediately following the vote on motion to recommit by Mr. TAUKE.

Mr. KEMP, to revise and extend on the amendment concerning protection of the Republic of China within the Asian Development Bank immediately after the remarks of the gentleman from California (Mr. PATTERSON).

(The following Members (at the request of Mr. BARTLETT) and to include extraneous matter:)

Mr. GINGRICH.

Mr. MADIGAN.

Mr. DAUB.

Mr. LUJAN.

Mr. RITTER.

Mr. COURTER in three instances.

Mr. GREEN.

Mr. HILLIS in two instances.

Mr. MCCANDLESS.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 727. An act to authorized the Secretary of the Interior to set aside certain judgment funds of the Three Affiliated Tribes of Fort Berthold Reservation in North Dakota, and for other purposes.

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title which was thereupon signed by the Speaker:

H.R. 2973. An act to promote economic revitalization and facilities expansion of economic opportunities in the Caribbean Basin region, to provide for backup withholding of tax from interest and dividends, and for other purpose.

ADJOURNMENT

Mr. WISE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to: accordingly (at 10 o'clock and 45 minutes p.m.), the House adjourned until tomorrow, Thursday, August 4, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1658. A letter from the Comptroller General of the United States, transmitting his review of the proposed rescissions and deferrals contained in the message from the President dated July 7, 1983, (H. Doc. No. 98-80), pursuant to sections 1014 (b) and (c) of Public Law 93-344 (H. Doc. No. 98-92); to the Committee on Appropriations and ordered to be printed.

1659. A letter from the Principal Deputy Secretary of the Army (Installations, Logistics, and Financial Management), transmitting notice of the decision to convert to contractor performance the laundry services at Fort Polk, La., pursuant to section 502(b) of the Public Law 96-342; to the Committee on Armed Services.

1660. A letter from the Principal Deputy Secretary of the Army (Installations, Logistics, and Financial Management), transmitting notice of the decision to convert to contractor performance the food service activity at Fort Sheridan, Ill., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1661. A letter from the Principal Deputy Secretary of the Army (Installations, Logistics, and Financial Management), transmitting notice of the decision to convert to contractor performance the electronic and communication equipment maintenance and repair activity at Fort Sam Houston, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1662. A letter from the District of Columbia Auditor, transmitting a report issued by his office entitled "Gross Revenue Taxes Relative to the Cable Television Communications Act of 1981," pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia.

1663. A letter from the District of Columbia Auditor, transmitting a report issued by his office entitled "Revenue Report for June 1983," pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia.

1664. A letter from the Secretary of Education, transmitting proposed final regulations regarding notice of final annual funding priority and geographical regions—centers and services for deaf-blind children, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1665. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting copies of the agreement relating to cooperation in electrical energy between the American Institute in Taiwan and the Coordination Council for North American Affairs, pursuant to section 12(a) of Public Law 96-8; to the Committee on Foreign Affairs.

1666. A letter from the Inspector General, Department of Agriculture, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1667. A letter from the Acting Director, Minerals Management Service, Department of the Interior, transmitting notice of proposed refund of excess royalty payments totaling $49,619 to the Arco Oil & Gas Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

1668. A letter from the Acting Director, Minerals Management Service, Department of the Interior, transmitting notice of the proposed refund of excess royalty payments totaling $59,096.53 to the Shell Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

1669. A letter from the Acting Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Mississippi and Lake Superior Bands of Chippewa Indians in dockets Nos. 18-C and 18-T, pursuant to section 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1670. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Kenaitze Indian Tribe in docket No. 595-77 by the U.S. Court of Claims, pursuant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1671. A letter from the Counsel, National Council on Radiation Protection and Measurements, transmitting a financial audit including verification of assets and liabilities, surplus or deficit analysis, and income and expenses, pursuant to section 14(b) of Public Law 88-376; to the Committee on the Judiciary.

1672. A letter from the Secretary of Energy, transmitting the alternative funding plan for completing the Clinch River breeder reactor plant project recommended by the administration for consideration and action by Congress, pursuant to the conference report (97-980) accompanying the Further Continuing Appropriations Act for Fiscal Year 1983 (Public Law 97-377); jointly, to the Committees on Appropriations and Science and Technology.

1673. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to withdraw and reserve for the Department of the Air Force certain public lands within the Nellis Air Force range, within Clark, Nye, and Lincoln Counties, Nev., for use as a training and

weapons testing area, and for other purposes; jointly, to the Committees on Armed Services and Interior and Insular Affairs.

1674. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to withdraw and reserve for the Department of the Army certain public lands within the McGregor range, Otero County, N. Mex., for use as a training and weapons testing area and for other purposes; jointly, to the Committees on Armed Services and Interior and Insular Affairs.

1675. A letter from the Secretary of Health and Human Services, transmitting the annual report for fiscal year 1982 on actions taken to recruit and train Indians to quality for positions subject to preference under Indian preference laws, and on actions taken to place non-Indian employees of the Indian Health Service in other Federal positions, pursuant to section 2(d) and (e)(2) respectively of Public Law 96-135; jointly, to the Committees on Interior and Insular Affairs and Post Office and Civil Service.

1676. A letter from the Secretary of Health and Human Services, transmitting the Department's report on the physician exchange visitor program, pursuant to section 5(e) of Public Law 97-116; jointly, to the Committees on the Judiciary, Energy and Commerce, and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Resolution providing for the consideration of H.R. 2992, a bill to authorize appropriations for the fiscal years 1984 and 1985 for international security and development assistance and for the Peace Corps, and for other purposes. (Rept. No. 98-341). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 297. Resolution providing for the consideration of H.R. 3231, a bill to amend the authorities contained in the Export Administration Act of 1979, and for other purposes. (Rept. No. 98-342). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. House Resolution 298. Resolution providing for the consideration of H.R. 2379, a bill to provide for the protection and management of the national park system, and for other purposes. (Rept. No. 98-343). Referred to the House Calendar.

Mr. FUQUA: Committee on Science and Technology. "The Consequences of Nuclear War on The global Environment." (Rept. No. 98-344). Referred to the Committee of the Whole House on the State of the Union.

Mr. LONG of Louisiana: Committee on Rules. House Resolution 299. Resolution providing for the consideration of H.R. 3391, a bill to improve worker training under the Trade Act of 1974, and for other purposes. (Rept. No. 98-345). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 300. Resolution providing for the consideration of H.R. 2453, a bill to amend the Board for International Broadcasting Act of 1973 to provide for radio broadcasting to Cuba. (Rept. No. 98-346). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 301. Resolution providing for the consideration of H.R. 2655, a bill to extend and improve the Domestic Volunteer Service Act of 1973. (Rept. No. 98-347). Referred to the House Calendar.

Mr. WHEAT: Committee on Rules. House Resolution 302. Resolution providing for the consideration of H.R. 1036, a bill to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes. (Rept. No. 98-348). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL:

H.R. 3749. A bill to provide for revision of the military retired or retainer pay of certain retired members of the Armed Forces who were called or ordered to active duty between October 1, 1963, and October 1, 1971; to the Committee on Armed Services.

By Mr. WIRTH (for himself, Mr. PERKINS, Mr. MILLER of California, Mr. DOWNEY of New York, Mr. GEPHARDT, Mr. KOGOVSEK, Mr. WALGREN, Mr. COELHO, Mr. DELLUMS, Mrs. BOGGS, Mr. FLORIO, Mr. MOAKLEY, Mr. SIMON, Mr. MINETA, Mr. FROST, Mr. FOLEY, Mr. MITCHELL, Mr. WILLIAMS of Montana, Mrs. HALL of Indiana, Mr. TORRICELLI, Mr. MATSUI, Mr. LELAND, Mr. MURTHA, Mr. EDWARDS of California, Mr. FRANK, Mr. BERMAN, Mr. FLIPPO, Mr. PATTERSON, Mr. STARK, Mr. NEAL, Mrs. SCHROEDER, Mr. SCHEUER, Mr. SHANNON, Mr. HOYER, Mr. MCHUGH, Mr. MARKEY, Mr. KILDEE, Mr. SEIBERLING, Mr. LEVIN of Michigan, Mr. PEPPER, and Mr. RATCHFORD):

H.R. 3750. A bill to provide assistance to local educational agencies and institutions of higher education to promote computer literacy among elementary and secondary school students and their teachers, and for other purposes; jointly, to the Committees on Education and Labor and Science and Technology.

By Mr. ERLENBORN:

H.R. 3751. A bill to provide for a limitation on cost-of-living increases in primary cash benefits under Federal pension, annuity, retirement, disability, workers' compensation, and similar plans which exceed in the aggregate a specified annual amount for each recipient; to the Committee on Government Operations.

H.R. 3752. A bill to improve the benefit structure, comparability, and financial soundness of the retirement and disability programs for the civilian employees of the Federal Government by requiring full actuarial funding of the civil service retirement and disability system, by establishing a more equitable and portable retirement structure for post-83 employees under a new Federal thrift plan with matching employer contributions and a revised set of defined benefits under the civil service retirement and disability system, taking into account benefits otherwise provided under the old-age, survivors, and disability insurance program under title II of the Social Security Act, and by providing a more defensible benefit structure as it relates to early retirement, cost-of-living adjustments, and deferred benefits for separated employees; jointly, to the Committees on Post Office and Civil Service, Education and Labor, and Ways and Means.

H.R. 3753. A bill to amend chapter 11 of subtitle II of title 31, United States Code, to provide for a general limitation, relating to wage increases received by workers in the national workforce, on the total increase which may occur in budgets submitted by the President annually in periodic cash benefits provided under Federal pension, annuity, retirement, disability, workers' compensation, and similar plans covering individuals in either the public or private sector, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. CONTE:

H.R. 3754. A bill to amend the Impoundment Control Act of 1974 to provide for the disapproval, by law, of deferrals, and to amend the Rules of the House of Representatives with respect to the jurisdiction of the Committee on Appropriations; jointly, to the Committees on Rules and Government Operations.

By Mr. PICKLE:

H.R. 3755. A bill to amend title II of the Social Security Act to provide for reform in the disability determination process; to the Committee on Ways and Means.

By Mr. CORCORAN:

H.R. 3756. A bill to amend the Internal Revenue Code of 1954 to increase in three steps the deduction for net capital gains for individuals from 60 to 75 percent; to the Committee on Ways and Means.

H.R. 3757. A bill to amend the Internal Revenue Code of 1954 to reduce in five steps the maximum rate of income tax on corporations from 46 percent to 36 percent; to the Committee on Ways and Means.

By Mr. CORRADA:

H.R. 3758. A bill to provide land-grant status for the College of Agriculture and Mechanic Arts of the University of Puerto Rico, and for other purposes; to the Committee on Agriculture.

By Mr. HANCE:

H.R. 3759. A bill to amend the Internal Revenue Code of 1954 to allow an additional 10-percent investment tax credit for new, more efficient irrigation equipment; to the Committee on Ways and Means.

By Mr. KAZEN:

H.R. 3760. A bill to require that at least 20 percent of enterprise zones designated under any Federal law be areas that are adversely affected by the devaluation of the Mexican peso; to the Committee on Ways and Means.

By Mr. LUJAN:

H.R. 3761. A bill to reduce public safety hazards on federally built canals, laterals, and drains, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MADIGAN (by request):

H.R. 3762. A bill to repeal the mandatory honey price-support program, and for other purposes; to the Committee on Agriculture.

By Mr. MAVROULES:

H.R. 3763. A bill to amend title 10, United States Code, to provide economic adjustment assistance in cases in which major defense contracts are terminated or reduced, and for other purposes; jointly, to the Committees on Armed Services and Education and Labor.

By Mr. PETRI:

H.R. 3764. A bill to amend the Internal Revenue Code of 1954 to encourage the pro-

duction of alcohol for fuel use by repealing the occupational tax on manufacturers of stills and condensers; to the Committee on Ways and Means.

By Mr. REID (for himself and Mrs. VUCANOVICH):

H.R. 3765. A bill to declare that the United States holds certain lands in trust for the Las Vegas Paiute Tribe; to the Committee on Interior and Insular Affairs.

By Mr. RICHARDSON:

H.R. 3766. A bill entitled: "The San Juan Basin Wilderness Protection Act of 1983"; to the Committee on Interior and Insular Affairs.

By Mr. RICHARDSON:

H.R. 3767. A bill to prohibit the Secretary of the Interior from issuing Federal coal leases prior to May 1, 1984, unless certain requirements are satisfied, to encourage certain exchanges of lands containing coal deposits, and to provide preconditions for the San Juan Basin lease sale, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ST GERMAIN (for himself and Mr. WYLIE) (by request):

H.R. 3768. A bill to redefine "bank" for purposes of application of the Bank Holding Company Act of 1956, to equate unitary savings and loan holding company and multiple savings and loan holding company activities, and to apply the provisions of the Glass-Steagall Act equally to insured depository institutions; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SKELTON:

H.R. 3769. A bill to amend title 18 of the United States Code to provide a criminal penalty for robbery of a controlled substance, and for other purposes; to the Committee on the Judiciary.

H.R. 3770. A bill to amend section 924(c) of title 18, United States Code, to strengthen existing mandatory penalties for using or carrying a firearm in the commission of a felony, and for other purposes; to the Committee on the Judiciary.

H.R. 3771. A bill to amend title 18 of the United States Code to reform the insanity defense, to establish a sentence of guilty but mentally ill, and for other purposes; to the Committee on the Judiciary.

H.R. 3772. A bill to establish constitutional procedures for the imposition of the sentence of death, and for other purposes; to the Committee on the Judiciary.

H.R. 3773. A bill to amend the Bail Reform Act of 1966 to authorize consideration of danger to the community in setting pretrial release conditions, to eliminate surety bond, to permit pretrial detention of certain offenders, and for other purposes; to the Committee on the Judiciary.

By Mr. SNYDER:

H.R. 3774. A bill providing for an orderly phase in of the coastwise laws with respect to the passenger trade between the United States and the Virgin Islands of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. TORRICELLI:

H.R. 3775. A bill to recognize the organization known as the Jewish War Veterans of the United States of America, Inc.; to the Committee on the Judiciary.

By Mr. YOUNG of Missouri:

H.R. 3776. A bill to authorize the Secretary of Energy to accept certain lands in St. Louis, Mo., to provide remedial action with respect to radioactive materials; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

By Mr. DERRICK (for himself, Mr. BENNETT, Mr. BOUCHER, Mr. BRITT, Mr. CAMPBELL, Mr. CLARKE, Mr. FASCELL, Mr. HARTNETT, Mr. HATCHER, Mr. HEFNER, Mr. JONES of North Carolina, Mrs. LLOYD, Mr. MACKAY, Mr. MONTGOMERY, Mr. NEAL, Mr. SPENCE, Mr. SPRATT, Mr. TALLON, Mr. VALENTINE, and Mr. WHITLEY):

H.R. 3777. A bill to grant the consent of the Congress to the Southeast interstate low-level radioactive waste management compact; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. MARKEY (for himself, Mr. HORTON, Mr. COELHO, Mrs. SCHROEDER, Mr. MCKINNEY, Mr. MOAKLEY, Mr. UDALL, Mr. ST GERMAIN, Mr. HARKIN, Mr. BEDELL, and Mrs. BOXER):

H.R. 3778. A bill to require congressional consent before the introduction of U.S. combat forces into Central America; to the Committee on Foreign Affairs.

By Mr. RINALDO:

H.R. 3779. A bill to amend the Internal Revenue Code of 1954 to allow home equity conversions through sale-leaseback transactions; to the Committee on Ways and Means.

By Ms. OAKAR (for herself, Mr. CONTE, Mr. FEIGHAN, Mr. BERMAN, and Mr. RATCHFORD):

H. Res. 303. Resolution relating to justice in the case of the slain American churchwomen in El Salvador; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

238. By the SPEAKER: Memorial of the Legislature of the State of California, relative to a national public safety telecommunications policy; to the Committee on Energy and Commerce.

239. Also, memorial of the Senate of the State of Massachusetts, relative to members of the Baha'i faith; to the Committee on Foreign Affairs.

240. Also, memorial of the Legislature of the State of California, relative to the Santa Margarita project; to the Committee on Interior and Insular Affairs.

241. Also, memorial of the Senate of the State of Massachusetts, relative to political asylum for Dennis Brutus of South Africa; to the Committee on the Judiciary.

242. Also, memorial of the Senate of the State of Massachusetts, relative to a comprehensive catastrophic illness medical service plan; jointly, to the Committees on Ways and Means and Energy and Commerce.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

184. By the SPEAKER: Petition of the city council, Ypsilanti, Mich., relative to the Cable Telecommunications Act of 1983; to the Committee on Energy and Commerce.

185. Also, petition of the National Apostolate of Maronites, San Antonio, Tex., relative to peace in Lebanon; to the Committee on Foreign Affairs.

186. Also, petition of the Republican Hispanic Assembly of California, Los Angeles, Calif., relative to peace and freedom in Central America; to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2867

By Mr. TAUZIN:

—SEC. 21. Section 3004 is amended by inserting the following at the end thereof:

"(k) MINIMUM REQUIREMENTS FOR CERTAIN FACILITIES.—

"(1)(A) Except as provided in Subparagraph (B), each landfill or surface impoundment for which an application for a permit under Section 3005(c) is received by the Administrator after the date of the enactment of the Hazardous Waste Control Enforcement Act of 1983, shall be required (as a condition of receiving such permit) to be double lined and to monitor ground water.

"(B) With respect to each landfill or surface impoundment containing those solid wastes subject to the study required under section 8002 (f), (n), or (p) and which landfill or surface impoundment becomes subject to regulation under this subchapter, standards promulgated under subsection (A) for such facility shall require the monitoring of groundwater and such other standards as the Administrator may determine are necessary to assure the protection of human health and the environment; and".

By Mr. TORRES:

—Page 28, after line 22, insert:

(e) HEALTH EFFECTS STUDIES.— Section 3005 is amended by adding the following new subsection after subsection (g):

"(h) HEALTH EFFECTS STUDIES.—(1) Each landfill which is operating pursuant to a permit under this section (or for which a permit is treated as having been issued

under subsection (e)) shall be required by the Administrator (or the State in the case of an authorized State program under section 3006) to conduct a health risk study for the affected community of the hazardous waste associated with such landfill (including hazardous waste transported to or released from the landfill). The study shall include a statistical analysis of the present and future health risks for individuals residing or working in the affected community. Such study shall include an analysis of health risks associated with all pollutant pathways through which hazardous waste may reach individuals in the affected community. Not later than one year after the date of the enactment of this subsection (or after the commencement of operations of the landfill, if later), the results of each such study shall be made available to the public and shall be submitted to the Administrator and to the appropriate State authorities for the State in which the landfill is located. The study shall be periodically updated as determined by the Administrator.

"(2) For purposes of the study under this subsection, the affected community shall consist of individuals residing or working within such distance of the landfill as the Administrator determines to be appropriate based on a site specific analysis, except that in all cases, the surrounding community shall be treated as including at least those individuals residing or working within a 2.5 mile radius of the landfill. The Administrator shall specify the surrounding communty for each landfill refererd to in paragraph (1) as promptly as practicable after the date of the enactment of this Act.".

EXTENSIONS OF REMARKS

THE KGB: THE REAL ENEMY—PART THREE

HON. ROBERT H. MICHEL
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MICHEL. Mr. Speaker, today I am inserting in the RECORD the final part of a New York times series on the KGB. This part deals with KGB manipulation and exploitation of various "peace" groups in Europe. The Times states that while Western counterintelligence experts do not say these movements are creations of the KGB, they do say that the peace movement itself is "seen as an unusual target of opportunity for a full range of Soviet influence, extending beyond the KGB."

At this point, I wish to insert in the RECORD part three of "Tracking the KGB." This part is titled, "KGB Officers Try To Infiltrate Antiwar Groups" by John Vinocur, the New York Times, Tuesday, July 26, 1983.

The article follows:

[From the New York Times, July 26, 1983]

K.G.B. OFFICERS TRY TO INFILTRATE ANTIWAR GROUPS

(By John Vinocur)

COPENHAGEN.—Over the last two years, the Danish and Swiss governments have exposed attempts by ostensible Soviet diplomats, actually K.G.B. officers, to influence or buy their way into groups trying to block deployment of new medium-range missiles in Western Europe.

The cases are the best evidence offered by Western counterintelligence officers who believe that the Soviet espionage agency's highest priorities in Western Europe include attempts to exploit the disarmament movement.

The counterintelligence experts are quick to acknowledge that there are hundreds of thousands of people who oppose nuclear weapons and are not dupes of the K.G.B., of the local Communist Party or of the Soviet Union in any way.

Nowhere is the antinuclear movement regarded as a creation of Soviet policy. Rather, it is seen as an unusual target of opportunity for a full range of Soviet influence, extending beyond the K.G.B.

But in trying to demonstrate the Soviet efforts convincingly, Western officials run into problems. One is a reluctance to prosecute citizens involved in the antinuclear movement—where the K.G.B. has been conspicuously present—because of risks of domestic political backlash.

In 1981, when the Danish Government ousted a Soviet diplomat, identified as a major in the K.G.B., for trying to buy a place in the debate on nuclear weapons here, a Dane was arrested in the case but not prosecuted.

Danish disarmament groups described the whole affair as an attempt to defame them.

Something similar happened in Switzerland this spring. The Government closed the Bern bureau of Novosti, the Soviet press-feature agency, threw out its local chief and forced withdrawal of a Soviet diplomat it said was the K.G. B. officer responsible for overseeing Novosti's local operations.

The Swiss explanation for the action was that the Novosti staff had grossly interfered in Swiss affairs, notably the antinuclear movement.

However, two Swiss citizens were not charged although they were named in Federal Attorney's documents as having assisted Novosti.

EXCESSIVE REACTION CHARGED

The complaints in Switzerland, which is neutral, were the same as those in Denmark, which is a member of the Atlantic alliance. Critics said that the Government had overreacted, that its case was thin and that thousands of decent and loyal citizens had been tainted only because they were active in disarmament activity.

Beyond domestic political sensitivities, another problem acknowledged by counterespionage officials is the fuzziness of Soviet involvement in what the K.G.B. calls "active measures"—operations to create a political effect abroad, as opposed to collection of information on weapons, politics and technology.

Last year in Congressional testimony, the United States Central Intelligence Agency acknowledged its difficulties and echoed those of other Western intelligence services.

"Political influence operations are the most important but least understood of Soviet active measures," it said. "They are difficult to trace and to deal with because they fall into the gray areas between a legitimate exchange of ideas and an active measures operation."

Last March, the Federal Bureau of Investigation said in a report to a Congressional committee:

"We do not believe the Soviets have achieved a dominant role in the U.S. peace and nuclear freeze movements or that they directly control or manipulate the movement."

The F.B.I. added: "It is extremely difficult to determine the extent to which various peace organizations and coalitions are being influenced or manipulated by the Soviet Union."

KEY ROLE FOR LOCAL COMMUNISTS

In Western Europe, a number of counterintelligence officials say that the attempts to exert influence are handled for the most part by the local Communist Party.

Soviet influence on the movements does exist, they say, but it is often—in a juridical sense—entirely legal. There is no reason for K.G.B. agents to tread where local Communist Party agents can carry out instructions of the International Department of the Soviet Communist Party's Central Committee—the body in Moscow that also coordinates the K.G.B.'s tasks and priorities.

An internal briefing paper prepared in June by the West German Interior Ministry sought to evaluate Soviet intelligence involvement with the disarmament groups.

"In the Federal Republic," it said, "the Soviet Union has at its disposal for the advancement of its goals the German Communist Party (D.K.P.) and the linked organizations ready to serve it. The D.K.P. acts either in its own name, or in those of its related or influenced organizations, to bring the interests and directives of the Soviet Union into the planning and content of the actions of the peace movement in the Federal Republic."

The Bonn briefing paper went on:

"They have this opportunity because they have been allowed into the coordination and planning organizations of the 'peace movement' and have been able to create an audience and consideration. All experience shows that they are able to expressly hinder the acceptance or dissemination of positions that do not fit the political conception of the Soviet Union. As a result of the availability of the D.K.P. for the advancement of Soviet goals in relation to the 'peace movement,' there is no necessity for the direct intervention of the intelligence apparatus."

SENSITIVE TOPICS MANIPULATED

There are examples of the West German Interior Ministry's contention that the West German Communists are able to block discussion of matters uncomfortable to Soviet Union.

In April last year, members of the Green Party attending the final organizational meeting for a large demonstration against President Reagan and NATO during a summit meeting in Bonn, accused the West German Communist Party and its friends of dominating the proceedings.

United States policy around the world was condemned by the Germans and motions against Soviet interference in Poland and Afghanistan were rejected.

The positions—those to be officially supported at the demonstration—were so unbalanced that some members of the Green Party said they were considering staying away from the rally.

They did attend but with their own banners and orders of the day.

The security agency of the Netherlands, in a confidential paper prepared for a meeting of NATO security officials late in 1981, linked the International Department of the Soviet Communist Party and the Communist Party of the Netherlands in a coordinated effort to influence the nuclear attitudes of Dutch church groups.

'INSTRUCTIONS FROM MOSCOW'

Directly dealing with the K.G.B., it said, "It is known that K.G.B. officers in the Netherlands have received instructions from Moscow to promote protests against the neutron bomb, but it is difficult to ascertain how they have put these instructions into practice."

The Dutch security agency, however, documented a K.G.B. forgery, sent to activists, newspapers and politicians that purported to be a U.S. military paper revealing that the United States Pershing 2 and cruise missiles were part of a strategy aimed at

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

making a limited nuclear war in Europe possible.

According to an American intelligence specialist, the decisive point for the Soviet effort to block deployment will come in the fall, when West European countries expect violent confrontations with demonstrators.

"The question then," he said, "will be how hard the K.G.B. pushes. We know it has catalogues of shouters, marchers, street fighters, bomb throwers and killers it could turn loose. They can pick one from Column A, another from Column B. They could arrange a provocation, have a demonstrator shot with a stolen U.S. Army .45, or any number of things. Those are K.G.B. jobs and serious business. The only question for them is evaluating the margin of risk of a potential backfire and the possibility of satisfactory yield."

'AGENTS OF INFLUENCE' IN THE WEST

Stanislav Levchenko, a K.G.B officer who defected to the United States in 1979, goes along with the view that the Soviet Union does exert influence in the West through Western Communist parties. But he also offers the view that it would be totally out of character for the K.G.B. to fail to concentrate on running "agents of influence"—often people willing to defend Soviet positions without formal recruitment—who can guide public positions of groups opposed to nuclear weapons.

"I think that 99.9 percent of the people active in the peace organizations are honest," Mr. Levchenko said in an interview, adding in regard to aspirations of the Soviet officials: "But they want a leader or two. They want somebody who stays late to write out the platform when they go home to bed. Those people stay busy. Sometimes it's just a slogan. But the degree of Soviet success so far has been great. The buildup of criticism on nuclear weapons by these groups has gone basically in only one direction—against NATO."

Mr. Levchenko's emphasis on a single slogan relates to what a Soviet defector has told Western intelligence officers about the K.G.B.'s efforts to turn the phrase "Neutron Carter" into a refrain in Western editorials. This was during the Soviet campaign in the late 1970's as the United States discussed developing and deploying neutron weapons as a shield against Soviet tanks.

In the same manner, there is some speculation, based on circumstantial evidence, that the phrase "No New Missiles in Europe" has been pushed in the same kind of campaign. The slogan tacitly accepts the presence of Soviet SS-22 medium-range missiles while condemning United States Pershing 2 and cruise missiles counterweapons, still to be deployed.

Experts said the slogan was first seen in 1981 on placards distributed by Communist front organizations in West Germany. It has reappeared since then, most recently in May on a banner in the German language—presumably for West German television audiences—at a demonstration in Williamsburg, Va., during a summit meeting of industrial nations.

The slogan appeared in Paris in June when Charles Fiterman, a Communist who is Minister of State for Transportation, spoke at a pacifist rally of 100,000 people.

Mr. Levchenko used the figure $200 million in describing Soviet outlays in the campaign against the neutron weapon. That campaign was regarded by the K.G.B. as a remarkable success. The weapon was not deployed.

Questions are frequently posed in West European parliaments about the financing of the present antinuclear movements. But the clearest figure advanced, like the one offered by Mr. Levchenko, is short on documentation.

The C.I.A. has described the World Peace Council, a Soviet front, as receiving over half the $63 million it estimates Moscow provided in 1980 to "its 13 major international fronts."

EVIDENCE OF SOVIET INVOLVEMENT

There are detailed examples of the Soviet intelligence agency's direct involvement in trying to manipulate the antinuclear movement.

In 1981, Denmark expelled Vladimir Merkulov, a second secretary of the Soviet Embassy who was identified as a K.G.B. major and head of Line PR, or the field section conducting active measures in Copenhagen operation. The action centered on a Dane, Arne Herlov Petersen, described as an "agent of influence" for Moscow.

According to Danish counterintelligence sources, Mr. Petersen, a journalist and writer, was recruited by Mr. Merkulov's predecessors and turned into an informant. He reported on the Danish left-wing movement and what the Justice Ministry described as "so-called progressive journalists."

Mr. Petersen was told not to join the Communist Party. Over the years he kept a diary detailing clandestine meetings with Soviet contacts. He had at least 23 encounters with Mr. Merkulov, the sources said, and was photographed on several such occasions.

Among Mr. Petersen's undertakings, according to the Justice Ministry, were publication of a pamphlet—based on a Soviet text and printed by the Joe Hill Press at the embassy's expense—attacking Prime Minister Margaret Thatcher of Britain as a threat to peace.

Mr. Merkulov also offered to pay for publication in Danish newspapers of advertisements in which influential Danish writers and artists expressed backing for a Nordic nuclear-free zone, a proposal supported by Moscow.

DANE SERVED AS A GO-BETWEEN

Mr. Petersen served as go-between in collecting the signatures—the artists and writers were not told of Soviet participation—and kept Mr. Merkulov informed on the campaign. Mr. Petersen was also said to have served as a conduit for documents believed to have been forged by the K.G.B.

In return, Mr. Petersen was said to have received money, liquor, trips to the Soviet Union and also what the Justice Ministry reported as a promise that he would be evacuated to the Soviet Union "in the case of imminent war."

Mr. Merkulov, according to the counterespionage sources, maintained contact with members of the Cooperation Committee, an umbrella organization grouping more than 50 Danish antinuclear and disarmament associations.

The sources said there was a "certain coordination" between Mr. Petersen, Mr. Merkulov, and an unnamed member of the committee, which had its offices for nine years in a building housing a Denmark-Soviet friendship association. The committee is now in premises owned by the Danish Communist Party's student organization.

The Danish authorities did not prosecute Mr. Petersen, but the then Minister of Justice, Ole Espersen, said in a television statement last year that he was challenging Mr. Petersen to sue the Government for slander if he felt he was wrongfully accused. He even proposed to pay Mr. Petersen's legal fees so the case could be aired in public. The offer has not been accepted.

The case in Switzerland had the uncommon aspect that the Government ordered closure of the Bern bureau of Novosti, accusing it of functioning as a purveyor of disinformation and organizer of demonstrations, petitions and other activities.

The bureau chief, Aleksei Dumov, was expelled, Leonid Ovchinnikov, an embassy first secretary and press attaché, identified as a K.G.B. officer with responsibility for Novosti, left under Swiss pressure.

In a 25-page confidential document prepared for the Cabinet before the expulsions, the office of the Federal Attorney, which oversees counterespionage activities, listed a series of influence operations involving Novosti journalists, including the bureau's two Swiss employees.

There was an anti-American demonstration condemning policy in the Caribbean, a demonstration over El Salvador in which one of the Swiss staffers served as "responsible leader" and a demonstration inside the chambers of the Swiss Parliament in which the Novosti office, the report said, "went so far as to allow its employees to lead and watch over the operation."

Groups from the West German Communist Party, attending a peace demonstration in Bern in December 1981, "reported in to the Novosti bureau."

COORDINATOR OF PROTEST ACTIVITY

Last year, the report continued, the bureau advised people about transportation and costs for a peace demonstration in Bonn while President Reagan attended the Atlantic alliance meeting. After the Israeli invasion of Lebanon in June 1982 the Novosti office "operated as coordination point and starting area" for protest activities.

A declaration called the Swiss Peace Appeal, focusing on the United States and NATO as the causes of world tensions and initiated at meetings between Swiss groups and the World Peace Council in Moscow and Berlin, also had links to Novosti, the report stated.

"In the conclusive phase," it said, "Novosti-Bern journalists accomplished a large part of the development of the text of the appeal and coordination of the gathering of signatures."

The report concluded that the Swiss journalists working for Novosti had provided the agency with unusual access to Swiss life. "The Soviet secret services," it said, "could manage to remain in the background and slowly pull the strings."

SWISS JOURNALISTS NOT TRIED

As was the case with Mr. Petersen in Denmark, neither of the Swiss journalists was brought to trial. The Federal Attorney's confidential report, leaked to the Swiss press, was criticized as containing presumptions and blanket statements, but little proof.

Leftists saw the operation as an attempt by the Minister of Justice and Police Affairs, Rudolf Friedrich, to put the antinuclear movement in disrepute.

Mr. Friedrich said in Parliament that evidence in the case was enormous but that disclosure would not be in the interest of Switzerland's security.

He let it be understood that discretion about security "means and methods" was an overriding concern.

Mr. Friedrich, who ordered the expulsion of three Russians for espionage in January, was accused of seeing "Red under the bed."

The debate lasted through June.

The Minister of Justice and Police had the final word. On the last day of June, he sent another Soviet "diplomat" home, this time a vice consul in Geneva who was accused of spying over several years.●

RAYMOND ROEBUCK

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. RODINO. Mr. Speaker, I commend the gentleman from California for arranging this special order so that those of us who have known Raymond Roebuck for two decades can pay special tribute to him.

If Ray simply provided warm nourishment at outrageous hours—through Vietnam, through Watergate, through the long grueling sessions of this past week—it would be reason enough to thank him.

If Ray were just one of the best storytellers and trivia experts in this town, it would be reason enough to thank him.

If Ray Roebuck were no more than caring and paternal toward the junior Members of this body, it would be reason enough to thank him.

If Ray were simply a decent employee of this House, if he were simply a faithful worshipper, if he were only an exemplary citizen and a man who loves his job, it would be reason for each of us to quietly thank him on our own.

But, Mr. Speaker, Raymond Roebuck is all these things—and more.

He is a rock of stability, and for 20 years, a joyous, inspiring presence for us all—and that is why Ray Roebuck deserves more than our private thanks. That is why he deserves our special order on this day.●

EDUCATION IN THE UNITED STATES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. SIMON. Mr. Speaker, the other day I received a letter from a teacher enclosing a statement about education in the United States from her perspective.

Her name is Mary Ellen Dillard, and she lives in Carbondale, Ill.

Her statement is one that everyone will not agree with in every respect, but is something all of us ought to reflect upon as we talk about really striving to achieve quality and excellence in education.

I urge my colleagues in the House and Senate to read her statement.

The statement follows:

Education in the United States has evolved from a system whose goals were simply the teaching of reading and religion to a multi-faceted system that includes teaching the talented, providing for the special needs of the physcially and mentally handicapped, training today's youth for adult citizenship in the future, and preparing young people to live successfully in a rapidly changing world. American education has accepted its role of developing its youth intellectually, socially, and emotionally. Through many crises, schools have endured the onslaught of criticism and have turned out a product that has helped to create one of the greatest nations in the world. We can take a great deal of pride in those accomplishments, but we have much improving we must do if we are to resolve the social, environmental, and technological problems facing our country and the world.

If Americans truly place a high priority on education, schools would be aesthetically eye-pleasing, comfort-controlled, and equipped with modern technological equipment as televisions, tape players, video taping equipment, stereo sets, up-to-date audiovisual films, slides, film strips, and rooms should be modern with carpeting, adequate lighting, flexible furniture that can be arranged in many ways, and textbooks should be up to date, in good condition, and relevent to the student's ability and experiences.

If American education is to be able to build on the American ideals of the equality of man, its citizens must accept busing as the only recognized way to insure a quality education to each child regardless of his race, economic standing, or social position.

If our schools are to become the most effective force in a child's life, they will combine the expertise of experts in a given field, university personnel, and elementary and secondary teachers to provide the most interesting and worthwhile educational programs available. They will cooperate in using the most comprehensive teaching strategies in the field, and they will develop meaningful in-service training to acquaint teachers with the most innovative and up-to-date research in the field of education.

If American schools are to become what they should be, we must recruit the finest teachers our universities can produce; we must convince them that teaching is a noble profession; and we must be selective in the hiring process. We must be willing to remove the incompetents by using fair and objective evaluation administered by competent administrators trained in teacher supervision. We must be willing to pay for excellence in education by paying salaries comparable to engineers and scientists if we hope to attract and keep outstanding teachers. We must rededicate ourselves to the profession of our choice, and we must work toward the goals and objectives we set.

If education in the United States is to become what it should be, we must relate to the children being educated the relationship between their learning and the real world of their community, their country, and the world. We must move our classrooms out into the community by opening up new vistas to students and showing how the facts they are learning are applied to solve real problems in the community. We must involve people from the outside to be mentors to help give young people new insights into unknown fields of work. We must make young people a vital part of the place they live by involving them in service projects which develop pride and a sense of belonging in them. We must pay more attention to future needs because these young people are being trained and educated to live and adapt to a highly technological society. We must instill in them the problem-solving skills needed and the desire to use those skills to help to resolve the complex problems of today's society.

Lastly, if American education is to become the ultimate, then we all must work to that end, supporting the worthwhile, eliminating the known nonproductive, negative aspects, and actively opposing those whose special interest wish to destroy its aims. It is truly an awesome task, and to succeed it will require the best that is within us in human understanding, tolerance, intellectual talents, and sincere dedication to the democratic ideals on which America was founded.●

TRIBUTE TO JOHN MERCER LANGSTON

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. PEASE. Mr. Speaker, I would like to draw attention to the outstanding achievements of John Mercer Langston. John Mercer Langston was an outstanding American who managed to overcome racial discrimination during a difficult period in our Nation's history. In tribute to this great citizen, the newly renovated Middle School in Oberlin, Ohio, bears his name. It is my honor to reprint here the dedication speech of Oberlin School Board member, Mr. W. Dan Wolfe, given on July 3, 1983.

JOHN MERCER LANGSTON

(By W. Dean Wolfe)

Distinguished guests; alumni of the Oberlin Schools; citizens of the Oberlin School District; students, teachers, and staff; fellow members of the board of education—What a day! What a school building! What a community! What a man, John Mercer Langston!

History has recorded it, though society has largely ignored it, that John Mercer Langston was truly one of the most remarkable persos ever to make his home in Oberlin; he was in fact a man great in his time! It is both an honor and a privilege for me to have the task of sharing with you at this time some of the very impressive and challenging things that I have learned about John Langston. Before I do that, however, I must express my deep appreciation to Oberlin College archivist William Bigglestone and research associate Marlene Merrill for their able assistance and for their encouragement as I have researched and attempted to advance the Langston story. Many, many thanks to you both!

Sitting on this fine new stage today is a great mix of persons, many of whom are well known to each other and to many of you, but some of whom find themselves in the midst of total strangers. Nonetheless, there is a common bond which we all share. By virtue of positions now held or held in

the past, or by association with an institution or an organization, or by some action performed, we all connect in one way or another with the substance of John Langston's life. And I trust that those connections will become obvious to you over the next several minutes as I sketch a few glimpses of that life lived so long ago.

So, who was John Langston? And why do we give his name to this school? The youngest of four children born to a white plantation owner father and an emancipated black mother on a plantation in Virginia on December 14, 1829, John Langston demonstrated early on something of the character and intellect which were to power him to extraordinary achievements. Both of his parents, advanced in years, died when he was only four years old. Thus orphaned, he became the ward of his father's long-time friend Col. William Gooch of Chillicothe, Ohio. Young Langston's first schooling was provided by Gooch's daughters, who tutored him off and on for the better part of three years. At about age eight, he was enrolled in the Chillicothe public schools, where he was known as Johnny Gooch and apparently accepted as white. When the Gooch family decided to move to Missouri two years later, John stayed behind in order to be near his older brothers who had found homes in Chillicothe. So it was that he came to live his next six years in a series of foster homes, some black, some white, in Chillicothe and Cincinnati.

No longer accepted in the public schools because of his mixed race, his schooling was continued in private black schools in Chillicothe and Cincinnati. It was in such a school that he was taught by and came under the influence of George B. Vashon and William Cuthburt Whitehorn, both students at Oberlin College. (The long college recess in those days was during the winter months, and it was common for students to earn money for college expenses by teaching school during the vacation. Vashon later became the first black graduate of Oberlin College and Whitehorn was the second.) With substantial encouragement from Vashon and Whitehorn and supported by funds from his father's estate, Langston come north to Oberlin in 1844 and enrolled in the preparatory department of Oberlin College. Having done well at the end of the term, he was recruited to teach in a one-room black school in Hicks Settlement near Chillicothe in the winter of 1845. His salary for the three-month term was $30; he was barely sixteen years old. Encouraged to continue his education at Oberlin by Vashon and Whitehorn and by his brothers Charles and Gideon, Langston matriculated into the regular curriculum in 1846 and proceeded to excel in his studies. He was awarded the B.A. degree in 1849.

Wanting to be a lawyer, he applied to all the better law schools, but none would accept him because of his color. In an interview with Langston, one law dean did offer to admit him if he would claim that he was Cuban! Insensed by this, Langston refused and returned to Oberlin and commenced theological studies in the seminary. In doing so, he achieved the first of many firsts that were to be his in the years ahead—he thus became the first black American admitted to the formal study of theology. Still longing for a career in law, he discussed his plight with the well-known abolitionist Philamon Bliss, then a district judge in nearby Elyria, and Bliss offered to tutor him in law. So, for the better of the next three years he studied law and theology concurrently. He was awarded the M.A. degree in 1852 and was graduated from the Seminary in 1853. On September 13, 1854 Langston was admitted to the Ohio Bar thus becoming the first black lawyer not only in Ohio but in America!

Because his health had failed during the rigors of this dual professional studies, a doctor friend advised him to seek the health-producing benefits, of rural living and farming. So it was that Langston took his new wife, the former Carolina Wall, an Oberlin College student whom he had courted for several years, to a farm that he obtained in rural Brownhelm Township some eight miles north and west of Oberlin. And there it was that his health did return, and there it was that their first child was born, and there it was that his public life began in earnest.

While well accepted in Brownhelm, John Langston's law practice took him to many other Ohio communities and his reception was not always a cordial one. It was not uncommon in those days for him to be taunted with comments such as "here comes the nigger lawyer" and other racial epithets. Before long, however, his fierce pride in his blackness and in his citizenship, and his personal sense of worth combined with his effectiveness in the practice of law to make his a formidable presence—and many of his detractors were won over or at least quieted.

He had been active in the Anti-Slavery Society since 1849, was a leader of it in Ohio, and was prominent at several national conventions of the society in the years leading up to the Civil War. He became active in politics and ran for township clerk in Brownhelm, winning election in 1855. This was a remarkable feat. He could not vote, nor could any woman. Nonetheless, he was elected, and by an all white and male electorate at that! Moreover, in doing so he became the first black American elected to public office!

Because of his continuing interest in education and his growing interest in politics, and because of his thriving law practice, Langston decided that he should return to Oberlin and make his home here. In the Spring of 1856 he bought a fine new house on East College Street in what was then considered the posh neighborhood of Oberlin and proceeded to establish his home. He set up his law office on North Main Street near the site now occupied by Hall Auditorium. Barely settled in, he entered into the life of Oberlin with a fervor! In 1857 he was elected to the Russia Township Board of Trustees, subsequently serving as clerk, legal counsel, and school visitor. Russia Township at that time operated its own school system, and as school visitor Langston was in practice superintendent of schools. He served on the Oberlin City Council in 1857 and 1858. When it was chartered by the State of Ohio in 1860, he became a charter member of the Oberlin Board of Education, a position he held for eleven years, six of them as its clerk. During these years he was a member of First Church, as he had been during his student days here. Of these pre-Civil War years in Oberlin, Langston wrote these words in his autobiography:

"The treatment accorded colored people in Oberlin socially was most remarkable; in keeping, however, with the professions religiously, politically, and educationally made by the founders of the community. Every Sunday colored people could be seen seated in conspicuous places in the only church in town, worshipping after the manner of those in whose midst they lived, and no one molested or disturbed them. Such persons were made welcome as equals in the best families, as they were in every part of the College, and thus were given the best social, as they were the highest educational advantages. Such was the recognition and the consideration accorded the colored American, whether student or resident in Oberlin, in the early years of its history."

A relentless abolitionist, Langston was totally sympathetic to John Brown's agitations for an end to slavery; however, he declined John Brown's invitation to accompany him on the fateful Harper's Ferry Raid on the grounds that he believed that he could be most helpful to the cause by working within the law. He was out of town at the time of the famed Oberlin-Wellington Rescue, but his brother Charles was one of the rescuers, and both he and Charles were eloquent spokesmen on behalf of those incarcerated in the Cleveland jail in the aftermath of that celebrated event. Incidentally, his brother Charles later became the grandfather of poet Langston Hughes.

When the Civil War broke out Langston worked tirelessly as a recruiter of black soldiers for the Union Army, extending his efforts throughout Ohio, Indiana, and Illinois. Since Ohio's governor did not at once approve of black military units, Langston first recruited for the 54th Massachusetts Regiment and sent hundreds into its ranks, twenty-one of whom were from Oberlin! When finally authorized by the governor in 1863, Langston almost single-handedly put together the first black regiment from Ohio.

Following the war he served as Inspector General of the Freedmen's Bureau and travelled throughout the South visiting and helping to set up schools for recently freed slaves. In 1869 he was called by Howard University to set up its new law department. Accepting the appointment, but maintaining his home in Oberlin until 1871, Langston served continuously as professor of law at Howard and successively as dean of law, vice president, and acting president. (Records show that in the 1900 there were 728 black lawyers in America, practically all of them trained at Howard University. And it is fascinating to reflect on the extent to which Langston's hand was involved, either directly or indirectly, in their education.) During his more than seven years at Howard, Langston also served on the District of Columbia Board of Health, was a trustee of the Freedmen's Savings and Trust Bank, and became the first black lawyer admitted to practice in the United States Supreme Court. He left Howard in 1876 and joined the foreign service, for which he served until 1885 in the Caribbean, the bulk of the time as Ambassador to Haiti.

Upon his return to private life in 1885, he was called to the presidency of the Virginia Normal and Collegiate Institute, now known as Virginia State University. Disgusted and disheartened by the almost constant interference of white politicans in the running of Virginia State, a black institution, Langston resigned after just two years in office and became actively involved in Virginia and national politics. He played a prominent role in the 1888 Republican Convention and he made a presidential nominating speech for then Senator John Sherman of Ohio. Subsequent to that he was nominated to run for Congress on the Republican ticket in the 4th Congressional District of Virginia. Considerable forces, both Democratic and Republican, were arrayed against him, and the resulting campaign was as dirty as they

come. But Langston and his supporters prevailed and he was elected, and to this day he stands as the only black congressmen ever from Virginia.

He did not run for a second term, citing the best interest of the party as his reason. He retired to a limited law practice, to touring as a much sought after speaker, and to the task of writing his autobiography. He died quietly in Washington, D.C. on November 15, 1897.

While he rose to national and international acclaim in his post Oberlin years, John Langston never forgot his only true home town, and he often visited his many friends here. He was a loyal alumnus of the College and a ceaseless booster of the town and its people. In his memoris he wrote fondly of Oberlin:

"To the Oberlin community belongs the distinguishing honor of being the first one on the face of the earth to realize in its teachings, its practices and its manners towards every human being, the high Christian sentiment—That whatsoever ye would that men should do to you, do ye even so to them."

As we now salute this great Oberlinian some 85 years after his death, and as we give his name to this school, we not only celebrate his splendid life, but we also honor this town, his town, the Oberlin of the 1840s, the 1850s and the 1860s. The people of Oberlin cared for each other in extraordinary ways in those days, and they cared for those in the wider human community as well. Oberlin nurtured John Langston, and he responded with a life devoted to education and to public service. If one were to write a belated epitaph for him today, it could read simply, "John Mercer Langston, tireless public servant, but never in servitude."

The Langston name on this school should be a source of pride for all boys and girls who will attend here, and it should serve as a reminder to all of us in this community that a high standard was set for us by those early Oberlinians. May we begin anew this day, in all that we do and in all that we say, to be worthy of our citizenship here.●

IS CONSUMERISM ALIVE IN THE HEALTH CARE INDUSTRY?

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. GEPHARDT. Mr. Speaker, we all have become aware of the crisis in our health care system. Present mechanisms for health care delivery and financing inevitably will undergo drastic changes in the very near future as medical care costs continue to soar out of control.

Congress took an important first step toward controlling runaway health care costs with the inclusion in the recently passed social security reform package strict cost control measures for hospitals that serve medicare patients.

The problems of our health care system—which range from its lack of accountability to consumers to the Reagan administration's weakening of Government's role in assuring access for all Americans to affordable, high quality health care—were discussed by National Consumers League Executive Director Barbara Warden in a recent speech to the ABA's Forum Committee on Health Law. In her speech, Ms. Warden raised a number of key issues in the health care debate. It is a particularly thoughtful piece that I would like to share with my colleagues as we continue our efforts to reach an equitable resolution to this crisis.

Is Consumerism Alive in the Health Care Industry?

A resounding YES! Americans are buying billions of dollars worth of health care each year.

The health care system is the third largest industry in the United States. In 1982, the country spent $276 billion on health services, more than 10 percent of the gross national product.

Health care in the U.S. is not just men and women dressed in white coats carrying little black bags ministering to the sick in their community. Health care is big business, buying and selling commodities and services in the marketplace with the entrepreneurial provider cast in the role of medical shopkeeper responding to customers: there are 300,000 private doctors; 6,000 independent hospitals; 27,000 private nursing homes; and 6 million persons (about 6 percent of the labor force) employed in the health care business. In fiscal year 1978, there were 38 million hospital admissions; 162 million Americans visited a physician at least once (with the average person making 4.8 visits annually); more than a billion and a half prescriptions were filled; and 5 billion laboratory tests were ordered.

There is nothing inherently good or bad about this country directing billions of national dollars towards health care for its citizens if these dollars support better and more effective health measures. But by some standards, the U.S. does not get much good care for its dollars. There is duplication and waste. In 1978, there were 130,000 excess hospital beds going unused; there are duplicative CAT scanners and intensive care units; in neighboring hospitals there are too many health specialists and too few primary care physicians. In 1977, there were two million unnecessary operations costing $4 billion.

These are costly manifestations of a health system gone hayware.

IS CONSUMERISM ALIVE IN THE HEALTH CARE INDUSTRY?

If on another level, consumerism refers to rationalizing a health care system and controlling costs, we have a long way to go, and the answer is a resounding NO!

The American health care business is a system of monopolized medicine. This complex and peculiar service industry of diverse providers—private practititoners, hospital-based or free standing medical groups, hospital-based outpatient clinics and emergency rooms, community health centers, and health maintenance organizations, radiologists and other technicians and nursing homes—is a piecemeal system almost totally immune to the influence of the normal economic supply and demand forces. "Demand" is set largely by the suppliers.

The present suppliers of health care services are largely unrestrained by the traditional marketplace characteristics of quality comparisons, truth in labeling information, price competition, information disclosure and informed consumer consent. Normally, it is the buyer who decides what service or commodity to purchase, from a haircut to a motorcycle. In medicine, decisions are made mostly by the seller, which places the physician, for example, in a uniquely powerful role. Doctors not only supply the services, but actually create 80 percent of the demand for health services—including their own:

The doctor decides what laboratory tests need to be performed;

The doctor prescribes drugs;

The doctor leaves instructions with the house staff or nurse;

The doctor decides whether a patient goes to a hospital or receives much less expensive treatment on an outpatient basis;

The doctor decides when to transfer a patient to an extended care facility;

The doctor decides the frequency of follow-up office treatment and how many hospital visits the doctor needs to make.

Not many of us would have the nerve to challenge a doctor's orders; we lack the medical knowledge and the confidence. The time when a patient is in distress is not the most likely moment to bargain for treatment and cost of care. Unfortunately, the physician often makes decisions without regard to cost. In fact, it is in the doctor's financial interests to prescribe high cost rather than low cost treatment.

There is little incentive for consumers to be cost conscious either because the current fee-for-service reimbursement system relies on a third party to pay medical bills. In the case of Medicare and Medicaid, the Federal Government pays; for the rest of the population lucky enough to have private health protection, the insurance company pays. Federal, state, and local government—directly or indirectly—pay more than 40 percent of the national health bill and about 92 percent of all hospital charges are reimbursed by that unobtrusive third party payer.

When the government enacted Medicare health insurance for the elderly in 1965, 20 million senior citizens breathed a sigh of relief that affordable health care was available and accessible to them. It was a short-lived sense of security because once again, the supply/demand control rests with the doctors whose allies are both the hospitals which compete for patients and high tech health care and the insurance companies that have created a confusing array of profitable and wasteful supplemental insurance policies.

Medicare drives the inflationary aspects of the health care system because hospital costs exceed the annual rate of inflation and physicians are not required to accept "assignment." Under the assignment system, a doctor voluntarily accepts Medicare's customary, reasonable and prevailing charge as payment in full (minus the annual deductible and coinsurance payments paid by the Medicare patient). A doctor can refuse assignment, and instead of billing Medicare, can bill the Medicare patient directly. In that case, three problems arise. First, the burden of being reimbursed by Medicare falls on the patient. Second, the doctor is not constrained to limit charges to a "reasonable" rate. Third, the portion of the bill in excess of the reasonable charge not only comes out of the patient's pocket, but the reason that Medicare does not reimburse the full amount of the bill is left unexplained. The elderly are left in the dark as to whether they are paying unusually

high physician rates or for uncovered services.

"Medigap" exists because of the steadily declining ability of Medicare to meet the increasing high costs of health care for the elderly. But no single Medigap policy completely fills the gap. Almost 25 percent of policy holders have multiple policies which duplicate coverage to a greater or lesser extent.

In 1978, "Medigap" policies accounted for over a million dollars in private premium payments by older people. For most of them, Medigap is a "bad buy" because of the high incidence of fraud and abuse, but lack of coverage is a risk that most people cannot afford to take—bad buy or not.

In America, the health care system knows no boundaries when it comes to the price charged for a service rendered. With a complex and cumbersome system of fees, services, providers, service delivery mechanisms, and billing procedures, it is difficult to know where and how to wedge in a barrier that restrains costs and requires medical accountability.

Two obvious places to start are with doctors and the hospitals. According to a health subcommittee in the U.S. House of Representatives, while physicians' fees account for 20 percent of the nation's medical bills, and hospital costs account for another 40 percent of that health bill, physicians control 80 percent of the way health dollars get spent. Physicians are going to have to be held more accountable for the way they practice medicine.

Change is possible without compromising the quality of health care. In Worcester, Massachusetts, for example, the Fallon Community Health Plan offers health coverage to more than 40,000 persons, and includes a successful Medicare program that pays almost 100 percent of subscribers' health care costs. The Fallon senior plan has reduced hospitalization of the elderly by 60 percent. With the exception of a $2 charge for prescriptions, there are no out-of-pocket costs to the elderly patients. There are no deductibles. Everything is paid for including new eyeglasses every two years. The incentive is to lower health costs, reduce costly hospital care and not compromise the quality of care. In a recent survey of Fallon's elderly patients, 100 percent said they would re-enroll immediately if they had the opportunity.

The Fallon Clinic is one model of a health maintenance organization (HMO). The HMO model is a multi-disciplinary approach to provide health services in a single out-patient setting using health care doctors, nurse practitioners, and physician assistants. The emphasis is on health promotion and health maintenance.

Community-oriented primary care (COPC) is another model of medical care that is an amalgamation of primary clinical care for individuals and families, combined with an awareness and periodic assessment of the community's status and needs. There is heavy emphasis on community involvement in planning, implementation, and evaluation of community health programs. Outreach to the community and patient education are major components in COPC.

However, the current health care system in America does not encourage disease prevention and health promotion. For most American's encounters with the medical system are episodic and take place when treatment is needed for acute conditions. Planned efforts to reduce health risks are not undertaken because organized medicine does not support such efforts. There is little status, high tech drama, or money in health maintenance or health promotion. In the absence of planned care, according to Jack Geiger, community medicine professor at City College of New York, "salvage" inevitably takes the priority over health maintenance. Hospital-based salvage is favored over less expensive, simpler care of less advanced diseases. Nevertheless, HMO and COPC are models of change in delivering health services and they are building an impressive record in reducing health inflation.

In addition, the reimbursement structure of fee-for-service emphasizes that responsibility for health care should be left in the hands of individual physicians and not to a multi-disciplinary team of health care professionals and paraprofessionals. With the enactment of the 1982 tax amendments, HMO Medicare services are now reimbursable. The team approach will require, however, a reorientation of all health providers as well as of the patient or consumer of health services.

IS CONSUMERISM ALIVE IN THE HEALTH CARE INDUSTRY?

There is a dichotomy. On one level, as I mentioned earlier, the purchase of health care services costs billions of dollars annually and profits a powerful industry. On another level, the health care system is not sufficiently accountable to the consumers who purchase its services. That lack of accountability, combined with the Reagan administration's weakening of the role of government to assure health quality controls, standards of care, local planning efforts, and peer review means that the country has slipped backwards in providing access to decent, affordable health care. In addition, there must be a stronger, organized involvement of consumers who can challenge the current medical structure to respond and work cooperatively to alleviate a deepening health care crisis in America.●

PARLIAMENTARIANS FOR WORLD ORDER

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. SIMON. Mr. Speaker, there is a group that has been formed called Parliamentarians for World Order which our colleague, THOMAS J. DOWNEY of New York, is one of the leaders.

The Secretary General of this group, Nicholas Dunlop, recently reported on the efforts of the group to promote a freeze resolution in the various parliamentary bodies.

Because it represents a group that may have growing influence on an issue of concern to those of us in Congress, I thought my colleagues would like to see it. I am inserting it in the RECORD at this point:

LEGISLATORS FOR THE FREEZE

(By Nick Dunlop)

Efforts have begun to build global support for the freeze through national parliaments. This initiative has been undertaken by Parliamentarians for World Order, a new international network of legislators. What follows is a brief report on progress so far, and on plans for 1983.

Parliamentarians for World Order began three years ago by linking up members of Parliament in five countries who shared a commitment to the abolition of the war system. We have now built up a network spanning five continents, with more than 600 members in 30 countries. A year ago, we took up the proposal for an immediate nuclear-weapons freeze, coupled with a call for negotiations on a treaty for comprehensive disarmament under reliable security institutions.

As a first step, in May 1982, we organized a delegation of five prominent political figures, one from each continent, which travelled to Moscow and Washington to present our case to the two superpower governments. The members of the delegation were: John Silkin, MP, Defense and Disarmament Spokesman and Leader of the House for the British Labour party; Luis Echeverria-Alvarez, former President of Mexico; N.K.P. Salve, MP, Deputy Parliamentary Leader of the governing party in India; Idris Ibrahim, Deputy Speaker of the Nigerian House of Representatives; and Douglas Roche, MP, of Canada, PWO's International Chairman.

In the Soviet union, we met with Vasilii Kuznetsov—now acting President of the USSR—and a number of other senior officials. This was the first time that the freeze proposal had been presented at Politburo level in Moscow, and the first time that the Soviets gave official indications that they would be prepared to negotiate towards a comprehensive freeze (a position which they have more or less confirmed by voting for the Mexican-Swedish resolution at the UN). Of course, these statements from the Russian leadership need to be taken with a healthy dose of skepticism, but they do help the freeze movement by putting the ball squarely in the American court. Not surprisingly, our discussions with the Reagan administration yielded nothing new.

Following a meeting which we held at the UN on the eve of the Special Session on Disarmament, we have been introducing the freeze proposal and our proposals on comprehensive disarmament into a number of legislatures around the world in the form of a parliamentary resolution. On its first introduction, our resolution received the support of more than a third of the European Parliament, made up of directly-elected representatives of the whole European Community. It is now being debated in the Jamaican House of Representatives, where it is expected to pass unanimously. Within a few months, it will have been introduced in the parliaments of Australia, Canada, Iceland, India, Italy, Kenya, New Zealand, Nigeria, the United Kingdom and the United States.[1] This is the first time that legislators have stood up simultaneously around the globe to introduce concrete proposals for peace.

As a second way to demonstrate worldwide political support for the freeze, we are circulating a Call for Global Survival to every one of the world's 31,000 members of Parliament. The Call, containing the same proposals that we presented in Moscow and

[1] Introducing PWO's resolution in the US House in July, Congressman Tom Downey emphasized that it was in no way meant to duplicate the Kennedy-Hatfield resolution, of which he was an early co-sponsor. While reiterating the demand for a nuclear freeze, the PWO resolution went on to call for negotiations on a treaty for general disarmament under a reliable world security system.

Washington, is being signed by parliamentarians on behalf of their constitutents on the grounds that an individual legislator has a mandate to speak for his or her own constituency as strong as the mandate of any national government. It has already been signed by 850 politicians on behalf of more than 100 million constituents.

In addition, a great deal can be done through an informal network of parliamentary contacts. The absentions of two NATO countries, Iceland and Denmark, in the vote on the UN freeze resolution, was entirely the work of parliamentarians. In Iceland, the government's absention was triggered by the intervention of Ólafur Ragnar Grimsson, an influential member of Parliament and a key member of PWO. In the case of Denmark, the government strongly opposed the freeze resolution, but was prevented from casting a "no" vote when legislators made it very clear that such a vote would be rejected by a majority in Parliament. This happened only when Danish parliamentarians attending the UN General Assembly sidestepped official channels, picked up the phone and alerted their colleagues at home to the upcoming vote. This rejection by NATO countries of the Reagan line on the freeze has caused what one foreign minister privately describes as "a crisis in the alliance."

In Holland, too, the freeze became a national issue after Relus Ter Beek, Chairman of the Parliamentary Committee on Foreign Affairs, returned from a PWO meeting in New York brandishing a copy of the UN resolution. The question of how the government should vote was debated not only in Parliament, but in newspapers, radio and television.

For 1983, we are presently planning two initiatives which bear on the freeze. The first is a conference of key legislators to examine military-industrial opposition to disarmament, and to consider how that opposition can be reduced. The second is an attempt to persuade a handful of heads of government from middle-range powers to take a dramatic initiative for disarmament, perhaps coming forward with draft treaties for a nuclear freeze and for comprehensive disarmament, then taking on a high-level mediating role to try and break the deadlock between the superpowers. This latter project will hardly be easy. Yet Parliamentarians for World Order, with its ready access to the top levels of government, and with the ability to coordinate its efforts globally, is uniquely placed to act as the catalyst for such an initiative.

Stopping a global arms race isn't easy. Today there is a glimmer of hope because outraged citizens are linking up across whole continents.

Through Parliamentarians for World Order, a similar link-up is taking place between the handful of men and women in each national parliament—conservatives, centrists and socialists—who are willing to take a radical stand for human survival. If the movement for peace can keep growing, and keep strengthening the links between countries, between citizens and politicians, perhaps it is not inconceivable that in our lifetimes we can build an international system where peace is guaranteed, and where world war is a thing of the past.●

WOMEN AS ABORTION VICTIMS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. FIELDS. Mr. Speaker, we have heard much debate in the Congress and across the Nation in the last decade concerning abortion-on-demand. We have, on rare occasion, even heard a little bit of the reality that surrounds the deaths of more than 15 million unborn infants.

However, until most recently, we have heard little about the other victims of abortion—the women themselves.

Victims? Yes, Mr. Speaker, the women are victims. All along the radicals in the NOW leadership have been boastful of the "rights" and "benefits" of abortion which they have "won" for America's women. But suddenly we hear from the women themselves—those who have had abortions—that someone besides the children are being victimized and hurt. Many women who have had abortions have been hurt psychologically, physically, emotionally, and spiritually.

Mr. Speaker, it is time we hear from those who have partaken of the "right" of abortion-on-demand. I insert into the RECORD an interview with Nancyjo Mann, founder and president of Women Exploited By Abortion (WEBA). I urge every Member of this body to read it, and take some time to feel and think about what Mrs. Mann and hundreds of thousands of other women are trying to tell us.

Mr. Speaker, it never ceases to astound me that so many who openly boast of their liberalism, their caring and compassionate natures, are the same ones who inflict the suffering and inhumanity upon the children and women of America.

The interview from today's Washington Times follows:

[From the Washington Times, Aug. 3, 1983]

WOMEN FORM WEBA TO FIGHT ABORTION

(Every year for the past 10 years, 1.5 million women have had an abortion. For many, according to Nancyjo Mann, founder and president of Women Exploited By Abortion (WEBA), having an abortion only began their problem. Mann was interviewed by Washington Times staff writer and columnist Tom Diaz.)

Question. Tell us about your experience with abortion and its consequences.

Answer. My experience goes back to 1974, the month of October, 30th day—the day that I killed my baby girl. It was a second trimester abortion. I was 5½ months pregnant.

I went to the doctor because family members had pressured me, had encouraged me. There was no "Nancy maybe you should reconsider," because it was not my idea in the first place, it was theirs.

My husband had walked out the door and deserted us. The responsibility of three children was just to much for him. I went to my mother and my brother and asked, "What am I going to do?" And my mother said "It's obvious, Nancy, no man's going to want you with three children, let along the two you already have. You're probably not going to amount to a hill of beans and you're probably going to be on welfare the rest of your life."

And following those three positive, uplifting statements, she said "You're going to have to have an abortion." Then she called one of the leading ob/gyns in the Midwest, and he said, "Absolutely, no problem. Bring her on in."

Question. Did he know at the time how far you were along?

Answer. Absolutely. He does all kinds of second trimesters, no problem.

I went in and I asked, "What are you going to do to me?" All he did was look at my stomach and say, "I'm going to take a little fluid out, put a little fluid in, you'll have severe cramps and expel the fetus."

I said, "Is that all?" He said, "That's all."

It didn't sound too bad. But what that doctor described to me was not the truth.

I went to the hospital and 60 ccs of amniotic fluid were drawn out, and a saline solution injected. Immediately the needle went through the abdomen. I hated Nancyjo, I hated myself. With every ounce of my being I wanted to scream out "Please, stop, don't do this to me." But I couldn't get it out.

Once they put in the saline there's no way to reverse it. And for the next hour and a half I felt my daughter thrash around violently while she was being choked, poisoned, burned and suffocated to death. I didn't know any of that was going to happen. And I remember talking to her and I remember telling her I didn't want to do this, I wished she could live. And yet she was dying and I remember her very last kick on her left side. She had no strength left.

I've tried to imagine us dying that kind of death, a pillow put over us, suffocating. In four minutes we'd pass out. We'd have that gift of passing out and then dying. But it took her an hour and a half just to die.

Then I was given an intravenuous injection to help stimulate labor and I went into hard labor for 12 hours. And at 5:30 a.m. on the 31st of October I delivered my daughter whose name is now Charmine Marie. She was 14 inches long. She weighed over a pound and a half. She had a head of hair and her eyes were opening.

I got to hold her because the nurses didn't make it to the room in time. I delivered my girl myself. They grabbed her out of my hands and threw her, threw her, into a bedpan. After they finished and took her away in the bedpan, they brought a lady in to finish her last hour of labor lying next to me. She had a healthy baby boy.

That was tough.

I liked Nancyjo, I liked me, prior to the abortion. But shame and remorse and guilt set in—I mean, when you get a hold of your own daughter and you see what you did. She was not a "fetus." She was not a "product of conception." She was not a "tissue adhering to the uterine wall." She was my daughter and I got to hold her, at only 5½ months, 22 weeks. So those are cheap, inhuman words to use around me.

I chose to be sterilized because I couldn't cope with the idea that I could possibly kill again. It was too devastating. It was not something you go around telling people, that you just killed your baby, no problem. I was ashamed, totally ashamed.

Question. But some people would say that although this experience obviously had a great impact on you, it is not characteristic of most other women who have abortions. Is your case unusual?

Answer. No, my case is not unusual at all. People want to say "Oh, but Nancy, yourre the extreme." That's not true. In fact there are so many more of us than there are the other. The emotional hurt is so deep. You do not discuss your abortion, the suction machines and the needles and everything else, over a cup of tea and a cookie. Women just don't do this. The pain is just too deep and too great.

I'm sure there are women out there who are never fazed, never, by their abortion. But I would say that 98, 99 percent of them are fazed, whether it's for a small period of time or for the rest of their life, whether they suffer only a small degree or die from their abortions.

Question. How did WEBA—Women Exploited By Abortion—get started?

Answer. About one year ago I was talking to another recording artist who was pro-life. I asked what pro-life meant and he said he was antiabortion. I said "Hank, I had an abortion in 1974. I was 5½ months pregnant. It hurt so bad for so long."

He just about drove the car off the road. And he said, "Nancy, you've got to tell the story." So, a year ago I went public, founded WEBA.

Question. How many members do you have?

Answer. I'm a 10-month-old corporation and in 10 months I've gone from being two people, my vice president and myself, in two states, Virginia and Iowa, to now having 34 states with approximately 10,000 women in my group.

Question. What are some of the effects of abortion on women?

Answer. I have women who cannot vacuum their carpets. They have to have the neighbor or their husbands do it while they're at the grocery store, because of the suction sound. You see, the suction machine (used in many abortions) makes that sucking sound—it's 29 times more powerful than the vacuum we use in our home. The majority of the women aren't put to sleep. It's done without being put to sleep. It's heartbreaking to me that they can't run a vacuum cleaner—that's a deep wound.

One psychological effect we see almost all the time is guilt. Others are suicidal impulses, a sense of loss, of unfulfillment Mourning, regret and remorse. Withdrawal, loss of confidence in decision-making capabilities. They feel that maybe they've made a wrong decision, maybe they can't make another decision right in their life. Lowering of self esteem. Preoccupation with death. Hostilities, self-destructive behavior, anger and rage. You can lose your temper quickly. A despair, helplessness, desire to remember the death date which is really weird but you do that. You remember these dates very strongly. A preoccupation with the would-be due date or due month. My daughter was due in early March, so in early March it's there.

An intent interest in babies but a thwarted maternal instinct. Women really are interested in babies, but I have many members who can't hold children. A hatred for anyone connected with abortion. Lack of desire to enter into a relationship with a partner, loss of interest in sex, an inability to forgive self, feeling of dehumanization, nightmares, seizures and tremors, frustrations, feelings of being exploited. And child abuse. We see a lot of child abuse.

I want you to understand that I do not come from any right to life organization. We are connected with no one. We remain neutral. But we are the ones they are all arguing about and discussing and debating. We are the voice of experience.

I told Congressman (Henry A.) Waxman, D-Cal., at a recent hearing, "Have you ever had your cervix dilated and the womb ripped open? Have you ever had tubes stuck inside of you and everything sucked out? Have you ever had needles stuck through your abdomen? Have you ever felt your baby thrash around and die? Have you ever had hard labor, delivered and held your baby? Because if you haven't, sir, you can't intelligently talk to me about this. We are the voice of experience. We've all had this done to us."

And that's a fact. So we hold our own ground, our own turf, our own territory.

Question. What is it that your organization does as a voice of experience?

Answer. We are a support group for those women who hurt—physically, emotionally, mentally and spiritually—from their abortions. We are there when the phone rings at 3 in the morning and someone is suicidal because maybe it was four years ago on that day and they still can't cope with it. We cry with them and talk with them. We are a support group. We also are a political group. I am classified as that, and I guess the strongest thing of what I intend to do—I intend to shut the abortion industry down. I intend to shut the abortion-on-demand industry down.

We also have rape victims and incest victims among our members—the other 3 percent (not abortion-on-demand). And every one of them is getting ready to go public, to speak very publicly—their full names, ages, everything. They're not ashamed. They know what happened to their lives. They became victims of an industry that is making lots of money, that was supposed to be a quick answer.

And now they're under psychiatric care, psychological care. Because of the abortion, not the rape and incest. They overcame the rape and the incest. Sure they needed help, but they overcame that. But they have had a very difficult time overcoming killing that innocent baby.

They heard of WEBA and they contacted us. And two of them were so brutally beaten they couldn't make it to the hospital in time. Pure rapes, I'm not talking about just a strong sexual aggressiveness. I'm talking about women who were brutally beaten, true rape victims.

Question. You talked about political activity. What's been your experience here in the Congress?

Answer. I testified two weeks ago before Rep. Waxman, Barbara Mikulski and a few other congressmen. It was a stacked hearing—14 to 1 doesn't sound very balanced to me. But I went in very open and honest with them, they sat very intently and very amazed at the story I had to tell about my organization, myself and my constituency, WEBA.

Barbara Mikulski said "I've never heard this side." I said, "No, Pandora's box got opened up 10 years ago and now you're just starting to see it." I predict that in five years we will see an epidemic of mental and nervous breakdowns among the women of this country. People are not going to know why and I'm going to be able to tell you why: because they've had an abortion that's why.

It's a quick solution. Abortion is not an ending of problems, it's the down payment for a whole new set of problems. That's what it is. It doesn't get rid of them.

Question. Have congressmen been exposed to your view, the voice of experience?

Answer. No. I hear time and time again, "I've never heard this side before." "Are there many more like you?" they ask. And my answer is this. Take the 15 million of us who have, by legal abortion-on-demand, killed our babies. I will give 2 million or 3 million to Planned Parenthood, NOW or whoever they want. I will give another 2 million or 3 million who have two or three abortions without open remorse.

And justification to oneself is important here, by the way. I don't know how many women I told to go have abortions. Justification. It's like, if you can have a few more, go do what you did and kind of justify it, it makes it better. It makes it not quite so bad.

That still leaves 9 million of us who've been hurt in one way, shape or form or the other—psychlogically, physically, emotionally or spiritually.

Question. So you believe that there are—by conservative estimate—perhaps 10 million women who suffered as you did?

Answer. I believe by very conservative there's 8 million who have been hurt.

Question. Where can they write or call? Or what can they do if they need somebody, such as your organization?

Answer. They can call or they can write. The address is WEBA, 1553 24th St., Des Moines, Iowa 50311. Or they can reach me at 515-255-0552, my business phone. If they hurt, if they're at a certain State, I may have a State representative where a girl can be with them and talk with them. I get so many women who have written me to say, "Thank God, there is somebody that I can now finally pour the whole thing out to."

And I'm thankful that I am a Christian because I couldn't carry that load. If you could read my mail . . . It started off where I'd get two and three letters a day and now they're wrapping it in bundles to bring to me. And I get mail from all over the world.

Question. Within 10 months this has happened?

Answer. In 10 months. There is such a need. No one thought 10 years ago of the aftermath. We're the aftermath.●

INDEPENDENT WEAPONS TESTING H.R. 2969

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. COURTER. Mr. Speaker, during debate on H.R. 2969, the Defense authoriztion bill, the gentleman from Arkansas (Mr. BETHUNE) submitted written remarks for the record which took issue with several aspects of my amendment creating an Office of Operational Test Review and Evaluation. I would like to comment on the concerns the gentleman from Arkansas raised.

The gentleman's first objection concerns the provision in my amendment making it possible for a military Deputy Director of this Office to serve in an acting capacity in the Director's absence. In my view, this does not

compromise the authority of the Office's civilian Director, and simply allows the Office to have leadership in the Director's absence, if the Deputy is indeed a military officer. The amendment does stipulate that the Director be a civilian. The only potential problem involved here would arise if a nomination were not made for a long period of time, and a military officer were to perform the duties of a Director intended to be a civilian. Failure to nominate an individual for Director would be, in my opinion, an act of bad faith by the Pentagon, because the amendment clearly indicates the congressional intent that the Office have civilian leadership.

The gentleman's second concern, that my amendment does not create an office whose Director performs "all duties" relating to operational testing, is similarly without substance. The central purpose of my amendment is not to have testing performed by different personnel in different parts of the Defense establishment; rather, it is to set high standards of realism for operational testing, and have all tests examined against that standard. If my intent had been to create an office to perform all testing, the "all duties" clause would have been necessary. The clause is clearly not needed, because it goes beyond the scope of my intent in creating an office to review operational tests.

The next objection, that the Courter amendment leaves the Director "out of the administrative oversight for military departments for planning and conducting operational testing and evaluation, and eliminates the requirements for the Director to monitor, review, and provide guidance for all operational testing and evaluation unless the Secretary of Defense and the service Secretaries request that guidance," is unfounded as well. This is demonstrated by the following provisions of my amendment which refute the gentleman's objection:

First, the Director would be required to approve all test plans in writing in advance—without his written approval, the tests could not proceed, and

Second, the Director may send whatever observers he deems necessary to test sites, and is guaranteed access to all information on all testing, and

Third, the Director has an affirmative obligation to issue reports on the adequacy and results of testing in each major weapons program—unless this report is issued, the decision to enter full-scale production may not be made.

My amendment does include language directing the Director to provide testing guidance "upon request." If this were the Director's sole obligation, his power would be weak indeed. In light of the Director's other powers and duties, however, this provision merely tells the Pentagon that in addition to being a reviewer of tests and test plans, the Director may be seen as a consultant and adviser who can assist in the planning and conduct of good, realistic operational tests.

Finally, the gentleman inquires in a cryptic fashion as to the "penalties for not reporting problems or failures that show up from these tests." If the gentleman would be willing to suggest exactly what he means by "penalties," against whom the penalties would be levied, by whom the violations and penalties would be assessed and enforced, I would be happy to comment on his suggestions. My amendment contains no criminal penalties.

Mr. Speaker, I welcome the opportunity to respond to the criticisms of my amendment as voiced by the gentleman from Arkansas. I am confident that once he understands the full amendment and all its parts in context, that he will agree that it is a strong legislative effort to make improvements in a critical area of the weapons development process.●

THE REAGAN ADMINISTRATION'S SUBVERSION OF THE NUCLEAR NON-PROLIFERATION ACT IN INDIA

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. OTTINGER. Mr. Speaker, recently, Secretary of State George P. Shultz announced the Reagan administration's latest act of appeasement in its nuclear relations with India. In spite of growing evidence that India, a nation that has already detonated a peaceful nuclear device made from civil nuclear technology, is preparing for another nuclear test at the same Rajasthan desert site of its 1974 blast, Secretary Shultz assured Prime Minister Indira Gandhi that the United States would provide parts and components for India's two Tarapur nuclear reactors.

Such a promise is extraordinary because American nonproliferation law is clear where the misuse of nuclear technology is involved. The President must terminate all nuclear exports to any country found to be engaging in activities having direct significance for the manufacture or acquisition of nuclear explosive devices. But instead of terminating nuclear trade and demanding that India cease its nuclear weapons activities, the Shultz statement indicates the President will seek a waiver of the cutoff provision to provide India with parts, if the United States cannot find a third party such as Italy or West Germany to supply those parts instead—itself a deplorable end run around the Non-Proliferation Act.

This latest proposal is part of a clear Reagan administration pattern of subordinating U.S. nonproliferation policy without seeking even minimal nonproliferation assurances in return for concessions which are made.

Almost exactly a year ago the administration, by Executive decision, relieved India of an important requirement in our bilateral agreement regarding the supply of nuclear fuel. The administration allowed France to provide enriched uranium fuel for the Tarapur plants even though shipment of this fuel by the United States is currently prohibited because India will not agree to international safeguards inspections of all its civil nuclear facilities. In relieving the Indians of this requirement, the administration neither sought nor received any assurances from India concerning safeguards on the French-supplied fuel. Nor is it now seeking, as it should, India's agreement to continue safeguards on spent fuel from the Tarapur reactors, which contains enough plutonium to make over 100 nuclear weapons.

Unfortunately, another ominous development may be taking place. Since Mr. Shultz' June 30 announcement, India has taken another provocative step. On July 9, Mr. Homi N. Sethna, the chairman of India's Atomic Energy Commission stated that India may reprocess spent fuel from Tarapur to extract the plutonium and recycle it in the Tarapur reactors. Such actions by India would be in direct violation of the bilateral agreement and would also result in a termination of nuclear relations under U.S. law.

Mr. Speaker, the administration must stop making a mockery of U.S. nonproliferation law, and start setting a strong example for the world by enforcing the provisions of the Nuclear Non-Proliferation Act as the Congress intended. To continue to do otherwise will severely undermine our ability to deal seriously with our allies on nuclear proliferation matters. An early casualty could well be the President's own proposal that full scope safeguards should be reqired by all the world's nuclear supplier countries as a prerequisite for supply of nuclear materials or equipment.

Recently, India's actions were the subject of articles in two diverse and respected American newspapers. Commissioner Victor Gilinsky of the U.S. Nuclear Regulatory Commission, wrote with considerable insight in the Wall Street Journal on India's behavior and our self-deception about India's intentions.

A recent New York Times editorial also provides an excellent understanding of the effect of the administration's Indian proposal and advice on what should be done instead.

I commend both of these articles to my colleagues.

[From the Wall Street Journal, July 5, 1983]

WHY KEEP HELPING INDIA MAKE THE BOMB?

(By Victor Gilinsky)

Another American appeasement of India's appetite for nuclear-explosive plutonium is in the works. Secretary of State Shultz has promised Prime Minister Gandhi the replacement parts she wants to keep the old General Electric reactors at Tarapur running, despite India's dispute of our control over the plutonium that's generated.

The State Department, which last year arranged for France to replace us as India's enriched-uranium supplier to get around the Nuclear Nonproliferation Act, has up to now had cold feet about recommending the parts export to the Nuclear Regulatory Commission. State was worried about the Atomic Energy Act's ban on nuclear exports to countries that have engaged in activities directly related to bomb-making or that have violated safeguards agreements. The excitement of a trip to New Delhi seems to have resolved the secretary's doubts.

The announcement in New Delhi did not spell out how the parts would be supplied. It may be possible to get used parts by cannibalizing a couple of shutdown GE reactors in Europe, but this is unlikely to produce all the equipment the Indians want. Several proposals have been discussed for getting new parts, which are obtainable only from the U.S.

SHOULD LAW BE AMENDED

One is to have the president make a finding that, notwithstanding whatever difficulties the State Department may have, the exports would be in the interest of "the common defense and security of the United States." Another proposal, which has been tried out on various congressmen, is to amend the law to loosen the export controls for "safety-related" equipment on humanitarian grounds. This suggestion has been accompanied by claims that Indian workers at Tarapur are getting excessive radiation doses in trying to keep the wornout reactors operating.

The "safety-related" label is just dust in the eyes. Practically everything in a reactor is "safety-related" and the object of getting the parts is to keep the plants operating rather than to meet safety standards. No one seems to ask why the Indians prefer to operate the reactors in unsafe conditions instead of reaching agreement with the U.S. over control of the explosive byproducts. The real issue is: Should we help the Indians run the Tarapur reactors and make more nuclear explosive plutonium over which control is disputed? We are talking about a spent fuel stockpile currently containing a couple of hundred bombs' worth of plutonium with which the Indians have been blackmailing us for years.

Once the spent fuel is reprocessed, the extracted plutonium can be used either for fuel or explosives. The key point is that, once separted, the plutonium cannot be protected reliably from misuses by means of international inspection.

The Indians dispute the U.S. position that India cannot reprocess the fuel without our consent and that we have never given that consent. Even more disturbing is the Indian view of what happens after 1993, when the 30-year Tarapur Agreement runs out. India's foreign minister told his parliament in 1982, after Mrs. Gandhi's visit to the U.S., that ". . . after 1993 nothing remains . . . The whole agreement just lapses and, therefore, the obligations, the duties or whatever is envisaged in the agreement would lapse automatically."

He was saying, in effect, that after 1993, the Indians can do anything they want with the plutonium derived from fuel we supplied, including using it for bombs.

Nothing stands out so much in the history of U.S.-Indian nuclear relations as India's consistency of approach and purpose and America's short-term outlook and selfdeception about Indian intentions. From the start of its nuclear program, India has been obsessed with plutonium as the key to nuclear independence and nuclear explosives. From the first, India has been deeply hostile to international safeguards and the Nonproliferation Treaty.

India has lawyered the U.S.-Indian agreements to free itself of the restrictions it detests. The most striking instance involved the use of U.S.-supplied heavy water in a research reactor to produce plutominum for India's 1974 nuclear explosion in violation of a contract with the U.S. to limit the heavy water to "peacful uses." This revelation, more than anything else, led to the Nuclear Nonproliferation Act.

To bolster its demands for fuel and spare parts, the Indians have threatened to reprocess, or worse, if we do not abide by their interpretation of our agreement. At the same time, Indian has played the injured party, particularly with regard to the nonproliferation act's "full-scope" safe-guards requirement on the further supply of U.S. fuel, a role supported by some highly placed, naive U.S. officials.

The fact is that the 1971 U.S.-India fuel contract allows us to impose such changes. India agreed to comply with "all application laws, regulations and ordinances of the United States." Moreover, the Indians can hardly argue we have been unfair. We have, in fact, been enormously generous. The Tarapus loan terms were practically a steal: a 40-year loan, at 0.75% interest, and with an initial 10-year deferral of repayment of principal. India has so far paid only about $20 million for reactors whose replacement value is hundreds of millions. Most important for India—for it was never interested in pursuing technology that would tie it to the U.S.—was that the agreement gave it entry to the Atoms for Peace program. India was the second largest participant with over 1,000 scientists, the core of its nuclear staff, being trained in the U.S.

NO LEGAL OR MORAL OBLIGATION

What should we be doing? India is threatening to blame us for further leaks or accidents at Tarapur. Let us make it very clear to everyone that we are under no legal or moral obligation to keep an unsafe bomb factory going. If there is indeed a genuine health danger at Tarapur, let us help stop radiation leaks, but we should make our assistance for further plant operation contingent on resolving the plutonium control issues. We should have done this before agreeing to allow France to supply fuel to Tarapur, but the spare-parts issue provides another opportunity. The Reagan administration is letting this one go, too. Now it will be up to Congress, though its role is somewhat clouded by the recent Supreme Court ruling on legislative vetoes.

What if the Indians threaten to reprocess, or drop safeguards? The best way to avoid this is for the U.S. to be firm. Whatever we do, the right answer to blackmail cannot be to increase the amount of plutonium at risk.

[Mr. Gilinsky is a member of the Nuclear Regulatory Commission.]

[From the New York Times, July 15, 1983]

APPEASING INDIA'S NUCLEAR BLACKMAIL

On his recent visit to India, Secretary of State George Shultz brought a gift, a guarantee of parts to repair the radiation-leaking nuclear reactors at Tarapur. It was not only a gift but a giveaway: it undid the United States' main leverage over a country that has already exploded one atomic device by flouting nuclear safeguards and apparently intends to do it again.

India violated a contract governing American-supplied heavy water to produce the materials for its atomic explosion in 1974. The fruit of that folly was to precipitate a costly nuclear competition with Pakistan. Whether or not to maintain a lead over its rival, India seems headed for a second underground test, as judged by satellite photos that show a large shaft being dug in the Rajasthan desert.

India's two General Electric reactors at Tarapur are subject to inspection, but other of its facilities are not. A 1963 agreement stipulates that spent fuel from these reactors shall be repocessed—a step that lets the genie out of the bottle by yeilding weapon-usable plutonium—only with American consent. Nonetheless, the Indians now contend they can do what they like with the fuel after the agreement expires in 1993.

The 200 tons of spent fuel that have accumulated at Tarapur have proved wonderfully effective for blackmailing the United States. For fear of giving India a pretext for breaking the 1963 agreement, President Carter agreed in 1980 to supply more uranium. A second load was promised if India would agree to open all its facilities to inspection. The Indians ate the carrot and spurned the stick.

The Reagan Administration pursued the policy of nuclear appeasement with new intensity. When India needed a second load of uranium, the Administration arranged to have France be the supplier, rather than seek a waiver from Congress to have the United States provide it.

Spare parts to fix the leak in the Tarapur reactors should have been conditioned on India's agreeing to full-scope inspection. Instead, the Administration plans to provide the parts without strings, either from shutdown reactors in Europe or directly. That's triple folly.

First, the Tarapur reactors could not now be licensed to operate in the United States. On safety grounds alone the Indians should be helped to shut them down, not keep them running.

Second, running Tarapur allows India to accumulate more spent fuel and *increase* its leverage.

Third, for the United States so to reward a violator of contracts would puncture the hope of holding the line against other countries eager to acquire nuclear weaponry.

The Administration vows to prevent the proliferation of nuclear weapons, but its malleability only encourages the pressures to which it has just yielded. Mr. Shultz's appeasement has bought not gratitude but a new flurry of contemptuous threats. The chairman of India's Atomic Energy Commission last week announced he might have to start reprocessing the spent fuel because the reactors' storage pools are full.

Unswerving efforts to make India accept fullscope inspection would at least command respect. At best, they would help save

India and Pakistan from a mad pursuit, and the world from its perils.●

PROTECTION FOR THE THREE SISTERS WILDERNESS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. AuCOIN. Mr. Speaker, I am pleased to report that the long controversy over pumice mining in Oregon's Three Sisters Wilderness Area has come to an end. For over 20 years, mining claims have been held in the Rock Mesa area of the magnificent Three Sisters Wilderness. Legislation was introduced 12 years ago to resolve this issue—unfortunately, without success.

In September of 1981, 670 acres of the existing 1,460 acres of claims were declared valid by an administrative law judge. This decision meant that pumice mining could take place in the heart of one of this Nation's most beautiful wilderness areas.

I have known this magnificent wild area since my boyhood in central Oregon and I love it as all Oregonians do who love our great wildlands. But Rock Mesa is special. Covering more than 2 square miles, it is a geologic rarity, a pile of barren molten rock in the midst of Oregon's Cascade Range. The area surrounding Rock Mesa is the home for deer, elk, cougar, bobcat, coyote, and other wildlife.

When the House Appropriations Subcommittee on Interior met to write the Interior appropriations bill for the current fiscal year, I proposed that $2 million be set aside for the acquisition of these mining claims that threatened the core of the Three Sisters Wilderness. Two earlier appraisals had found that the claims were worth between $4.5 million and $6.5 million. The subcommittee agreed with me that the Three Sisters Wilderness was too precious for any mining to be allowed. And they agreed with me that the cost, at least $2 million less than a previous appraisal, was well within acceptable spending limits. The committee agreed to my request, the bill was passed by Congress and now the final steps have been taken to preserve the sanctity of Rock Mesa.

To have allowed the mining of Rock Mesa to take place would have resulted in the degradation of the Three Sisters Wilderness and would have violated the spirit, if not the letter, of the 1964 Wilderness Act.

All parties involved in resolving this two decade-old conflict deserve credit for saving this remarkable and unique area, and I am pleased to have been able to assist.

Holly Jones, vice chairman of the Oregon chapter of the Sierra club, said it best when he remarked that the action taken "culminates 20 years of persistence and dedication by concerned conservationists to have final protection for the Three Sisters Wilderness."●

CENTRAL ORGAN DONOR CLEARINGHOUSE

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MARRIOTT. Mr. Speaker, during oversight hearings by the Energy and Commerce Committee on Friday, July 29, I testified on the need for the establishment of a central organ donor clearinghouse.

My recommendation is prompted by the increasing difficulty of thousand of persons needing, yet unable to find, organs to sustain their lives.

An effective system needs to be established to better facilitate people in need. I believe that a partnership must be formed between Government and hospitals to get a central organ donor center established. Once it is established, the responsibility of its operation should be transferred to the private sector.

As I know that many of my colleagues share my concern in this area, I would like to submit my testimony in the CONGRESSIONAL RECORD and recommend it to those who believe we must find a suitable organ donation referral system to keep pace with our advancing medical technologies and our ability now to save lives that would have, years ago, been lost.

TESTIMONY OF HON. DAN MARRIOTT

Mr. CHAIRMAN: Thank you for the opportunity to appear before the committee today to testify on behalf of the thousands of persons seeking organ donations in order that they may lead fruitful, productive lives. It is on their behalf that I thank you for holding these hearings today.

In particular, I wanted to appear on behalf of young Clayton Conger, of Rock Springs, Wyo., A 4-year-old hospitalized last week at the University of Utah Medical Center. Fortunately, Clayton is one of the lucky ones. He is the recipient of a liver donation and is now recovering from his operation performed just Wednesday, July 27. I know that everyone in this room today, those of us who really care, and the millions of Americans pulling for Clayton and the other liver transplant patients, wish them a speedy recovery.

But this week made it even more evident that it is still time that we focus our attention on the plight of those still waiting for organ donations.

The bottom line Mr. Chairman, is that our system of organ transplant is growing—growing every day. As medical technology advances, the remarkable organ transplant operations are becoming very successful and more numerous.

But while the medical and scientific communities have developed their techniques, it is apparent that the systematic organization of a "donor bank" is trailing far behind technologies.

Waiting for organ donations are thousands of individuals, who, without the access to media publicity, do not have easy access to available organs for donation.

There are several problems confronting these patients today, and I would like to touch upon each one briefly.

First, as I am sure you know, the donor awarness program is very poor. Even medical technicians working in hospital emergency rooms across the United States are not pushing the need for vital organ donations. I am pleased that Representative MORRISON of Washington has initiated "Organ Donor Awarness Week" and feel that this is a vital step toward the availability of organs for transplant. It is essential that the medical community make each and every American aware of the life he can save when he or one of his loved ones meets an untimely death. No one individual, in his period of grief, remembers that his relative may spare the death of another living being in a State geographically apart from his. I clearly remember seeing one television documentary of a mother whose daughter was killed in a motorcycle accident, and who agreed to have her daughter's kidney transplanted to save a critically ill individual. She visited that individual not too long after the death of her daughter, and felt a sense of relief knowing that in dying, her daughter was able to give something of herself to another life. This publicity must be fostered. It is not that people don't want to donate; they aren't aware of the need, nor are they tactfully reminded of the need at the time of an accident and/or death. This is the responsibility of the medical community. They must, perhaps with our assistance, get an "on-line" awareness program, not unlike the National Red Cross blood banks. In this regard, I look forward to the enactment of Organ Donor Awareness Week. Unless organs are available, successful medical technologies are worthless.

The second problem facing individuals in need of transplants are the costs of these operations. We have witnessed many heart-rendering stories of communities that have held rallies to raise the funds for upcoming operations. I applaud their efforts. But, as technologies advance and these transplants become more numerous, something has to be done. Otherwise, it will be those who can afford the organ transplant operations, who will be the ones who can afford to live. Mr. Chairman, this is not democracy.

The cost of a heart-lung transplant at Stanford University Medical Center is an estimated $150,000. I understand that $80,000 of that must be "paid in advance." This is a critical question, Mr. Chairman—"who pays?"

The third problem facing individuals in need of transplants is the lack of coordination between donors and recipients. It is basically a frightful mess. Management has certainly not kept up with technology.

What we have, Mr. Chairman, is a hit-or-miss program based on luck. Without media publicity, a transplant patient must wait for his local transplant center to notify him of an available donation. In turn, the transplant center must compete with other facilities throughout the United States to secure that necessary and vital organ donation.

This is indeed an inequitable situation—one that can be remedied.

There are some 30,000 Americans whose sight has been severely impaired by corneal disease or injury. That sight can be restored

by means of a corneal transplant operation—an operation that can only be done following the donation at death of a human cornea. In addition to these number of people who could have their sight restored by donor tissue, tremendous contribution can be made in the field of research.

There is an Eye Bank Association of America in Houston, Tex. It is in the process of setting up a computerized system for eye donation referrals at Emory University in Atlanta. I applaud their efforts. There are currently 23 eye banks in the country. There is one at the University of Utah in Salt Lake City. But these banks do not have the dollars to hook up to the system.

At the University of Utah, alone, there are now 50 people awaiting corneas, and the only way of securing one is to call the other 22 eye banks and hope for a hit-or-miss opportunity.

This is the closest central clearinghouse system that has been developed in the United States for donated organs. The rest of the story goes downhill.

There are many organ transplant centers. The University of Utah is the site of the Intermountain Transplant Center for Kidneys. While officials there hope to expand and can foresee transplants in the future of heart/lungs, livers, pancreas, etc., persons in this region must rely on one of the other transplant centers for these types of organs.

There is another organ transplant network started in Richmond, Va. This is called the United Network for Organ Sharing. But right now, they are established only for kidney referrals.

There are no other central clearinghouses for any other organs!

Yes, there are three liver transplant centers—in Pennsylvania, Nashville, and at the University of Minnesota. These centers are the ones that compete for organ donations. As more and more hospitals throughout the country become efficient in liver transplant operations, more and more institutions will be competing for the limited number of organ donations. As technology advances, the demand will only increase.

The solution?

Mr. Chairman, we must build a central referral center. We must have a professional system of evaluating how organs can best be utilized. It must be computerized and every transplant center and hospital in the United States must be able to plug into it. As the system will already have on file a list of organ needs, when a donation is made, the institute can immediately contact the system and non-bias referrals can be made, based on a qualified match between donor and recipient. This referral center, or clearinghouse, not the transplant centers, will become the means for determining the supply/demand question.

This is the solution, Mr. Chairman, and it should be a high priority for the U.S. Congress to address.

What I advocate is that there should be a partnership between Government and hospitals to get the central organ donor center established. Once it is established, the responsibility of its operation should be transferred to the private sector.

I will work with you, Mr. Chairman, and the members of your committee and the members of the Science and Technology Committee, Chairman Albert Gore, and the Surgeon General of the United States, Dr. Koop. We all realize the need for prompt action.

Today is a first step. But, Mr. Chairman, it is a great step and a vital one in meeting the needs of our expanding medical technology and a giant step in saving lives.

Thank you, Mr. Chairman.●

BELLEVUE CELEBRATES ITS SESQUICENTENNIAL

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. WOLPE. Mr. Speaker, I rise to pay special tribute to the Bellevue area of Eaton County, Mich., at the time of the sesquicentennial of its settlement. The territory's name evolved from descriptions in early history of the area which consistently referred to the heavy timberland as a "beautiful view." The name, Bellevue, remains an apt description of this beautiful rural area.

Since 1833, when it was the first territory settled in Eaton County by Captain Reuben and Judith Fitzgerald, Bellevue has been honored with several important county firsts. The first Eaton County school was built in Bellevue in 1833; Bellevue was the first Eaton County seat; Bellevue was the site of the county's first organized church service; and it was in Bellevue that the first circuit court term was held.

Mr. Speaker, my colleagues would be inspired by the courage demonstrated repeatedly by the residents of Bellevue, in their response to disasters that have beset the town—whether it be the two cyclones that swept the area in the early 1880's or the numerous fires that destroyed large portions of the business district, in subsequent years. In every instance, Bellevue residents have come to the assistance of neighbors, family, and friends in time of need. Even today, Bellevue is a place whose residents have retained their sense of community and their concern for others. The people of Bellevue know that they live in a very special place. I am honored to represent the Bellevue area and to work with constituents who use the celebration of their history as a means of committing themselves to the future of their community.●

INTRODUCTION OF CANAL SAFETY BILL

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. LUJAN. Mr. Speaker, the tragic drowning of 4-year-old Michael Chavez recently in an irrigation canal in Albuquerque has grimly highlighted for us once again the need for action. This is a federally built canal that is a menace to both children and adults; and there are federally built canals in each of the 17 reclamation States that are claiming an ever-increasing number of lives each year.

Since 1967 there have been about 950 drowning deaths in these canals. Every summer brings new tragedies, and virtually every Member from those 17 Western States is under pressure to "do something" to prevent further drownings.

The bill I am introducing today creates a long-needed mechanism for making safe the most hazardous stretches of these canals and for preventing other stretches from becoming hazardous.

The problem does not lie with the canals themselves. They are no more unsafe than they were when they were built. The problem lies with their location. When they were built, they were in farming country, and farm kids are taught to avoid the canals. But whole cities have grown up around the canals over the past few decades as urban sprawl moved from East to West. Former farm lands, annexed to municipal jurisdictions, have been zoned residential, developed with housing, and are now crowded with families whose kids see the canals as an attractive place to play, swim and fish. Through no fault of the Bureau of Reclamation or the farmers, the formerly harmless water channels become potential death traps for the urban unwary.

Obviously, the urbanized portions of the canals need to be: First, fenced; second, converted from open ditch to buried pipeline, or third abandoned and filled.

Well, one might ask, if the dangers are recognized and the solutions are known, what is the problem? Why do we need a bill? The answer to that question can best be made by explaining how the bill has developed over the past 10 or 12 years.

Shortly after I came to the House in 1969, a summer drowning in the Albuquerque Canal brought a call for some kind of action. I asked the Bureau of Reclamation for a full report and for their recommendations.

In August of 1970, Secretary of the Interior Walter Hickel presented me with an inch-thick document prepared by the Bureau of Reclamation which described the entire 1,000-mile network of canals, laterals, and drains in the Middle Rio Grande Conservancy District, the number of deaths that had occurred in each section of the district, the proposed safety features and their costs, and a number of recommendations and conclusions.

It was a very thorough, professionally done piece of work, and it had only one fatal flaw: The recommended construction work carried a 1969 price tag of $16.5 million and the Middle Rio Grande Conservancy District had already asked for a deferment of its reg-

ular payments to the Federal Government so it could correct a serious sediment problem. There was no way it could come up with $16.5 million.

Neither the city of Albuquerque nor Bernalillo County was willing at that time to assume financial responsibility for modifying or fencing canals which it did not own. The State of New Mexico said it was a local problem, and the Bureau of Reclamation, of course, could expend no funds without congressional authorization.

As time went by, I and other members of the New Mexico delegation met with city, county, and State officials and with officers of the conservancy district, trying to achieve a consensus as to how we could all cooperate to get something done.

We finally achieved an agreement between city, State, and county officials that they would support 50 percent payment of the costs by local entities if the Federal Government, which at that time operated the canals, would pay the other half.

Responding to this agreement, the New Mexico delegation decided on a 50-50 cost-sharing bill which was introduced in 1972 by the late Senator Clinton P. Anderson. That bill (S. 3472) called for the fencing or conversion to underground conduit of any hazardous open canal or drain where the local entities were willing to pay half the cost. The bill was opposed by the Nixon administration and went nowhere after a single hearing.

Shortly thereafter, in 1975, the Government turned the operation of the canal system over to the conservancy district, thus weakening the local argument that the Government, as builder-operator of the system, shared responsibility for its public safety.

Drownings continued, and by 1978 there was again strong local sentiment for action, but this time supported with money. The State board of finance authorized a grant of $100,000 to the city and county, provided the city and county match it with a like sum. The idea was to provide a sizable local matching fund as an inducement for Federal cost sharing.

With that demonstration of support from home, I introduced a bill in June of 1978 calling for a reduced (20 percent) Federal share of the cost. But when that bill was referred to the Interior Committee I was informed that the Carter administration strongly opposed it, and the bill was not reported.

The tragedy is that while public officials at all levels of government have argued over the share of costs, the drowning deaths have continued at a higher pace, year by year.

The bill I am introducing today takes the initiative for action by recognizing that the only entities who should pay for safety work on the canals are those who receive benefits from the canals, and that once those entities are identified they should pay the same proportion of the costs that they share in benefits. This includes the Federal Government, so there would be no Federal share of the cost unless there is a recognized, definable Federal benefit that justifies it.

Briefly, the bill authorizes the Secretary of the Interior to make studies, at the request of a local community, to determine how best to eliminate or reduce the safety hazards of canals. The study would identify the beneficiaries of the project and would assign benefit percentages to each beneficiary, including the Federal Government where applicable. The costs would be apportioned in the same percentages and the local beneficiaries would then decide if they want to proceed with the project.

If they decide to go ahead, the bill authorizes the Secretary to enter into contracts with the principle beneficiaries to repay their share of the construction charges, with interest, over a period not to exceed 30 years.

Another requirement on the local sponsors is that the city and county within which the canals are located must have enacted ordinances requiring fencing or undergrounding of the canals to have been accomplished as a condition precedent to the granting of residential zoning on adjacent land. They must also require new subdivisions in irrigated areas to place open ditches in pipe or install fencing.

I want to stress, Mr. Speaker, that this bill addresses a problem that is not unique to New Mexico. It is common to all Western States. In fact, of the 950 deaths over the past 16 years, California leads with more than 300, Arizona is next with about 150, followed by New Mexico, Texas, Washington and all other reclamation States except Kansas and North Dakota.

It is a problem we must take care of now, and this bill is the fair and proper way to get the job done. Thank you.

H.R. 3761

A bill to reduce public safety hazards on federally-built canals, laterals and drains, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) At the request of an operating water-user entity, municipality, county or state, the Secretary of the Interior is authorized to perform studies of hazardous canals, laterals or drains to determine methods and costs of eliminating or significantly reducing the hazards: *Provided,* That the installation to be studied is a part of a federal reclamation project.

(b) Such studies shall identify the public and private beneficiaries of the installation and shall apportion to each beneficiary the percentage of benefits found by the Secretary to be appropriate.

SEC. 2. The Secretary is authorized to construct whatever modifications or additions are found to be needed and feasible to eliminate or significantly reduce the safety hazard. Such construction may include, but is not limited to, the conversion of open channels to closed conduits or the installation of safety fencing: *Provided,* That no federal funds shall be expended for construction until all of the following conditions shall have been met:

(a) The canal, lateral or drain must be a part of a federal reclamation project;

(b) The Secretary has negotiated a contract with the principle beneficiaries providing for payment of all reimburseable costs of construction. Such costs shall be allocated to the beneficiaries by the Secretary in reasonable conformity with the allocation of benefits. Costs allocated to the United States shall be nonreimburseable.

(c) Municipal and county governments within whose jurisdiction the hazardous canal, lateral or drain is located shall have enacted ordinances requiring:

(1) The conversion to underground conduit or the installation of safety fencing or abandonment of the canal, lateral or drain as a condition precedent to any form of residential zoning or residential rezoning of land adjacent to the channel; and

(2) In the case of such land that had been zoned residential prior to the passage of such ordinance, construction of safety fencing by subdividers on their property prior to the completion of the initial segment of their developments where that property abuts the channel.

SEC. 3. Repayment contracts negotiated under authority of the above Section 2(b) shall include interest accruing from the date of completion of construction and calculated as the rate equal to the annual yields on interst-bearing marketable securities of the longest term sold by the United States at the time the repayment contract is entered into. The term of such contracts shall be for a period not to exceed thirty years.

SEC. 4. There are hereby authorized to be appropriated not to exceed $1 million to carry out the purposes of Section 1 of this Act, and not to exceed $100 million to carry out the purposes of Section 2.●

U.S. FOREIGN POLICY

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. VENTO. Mr. Speaker, recently this body devoted considerable attention to a review of the administration's Central American policy. After lengthy debate, the House properly rejected covert aid against Nicaragua as shortsighted and contrary to long-term U.S. interests.

The administration's Central American policy underlines an intrinsic problem in our foreign policy. All too often, our government, whether Democratic or Republican, has followed a short-term policy without recognizing long-term implications. Our blind support for today's friendly dictatorships has often led to confrontation with successor governments. Whether it is the Shah in Iran or Somoza in Nicaragua, our policy deter-

minations have been blinded. We have looked at immediate gains while ignoring legitimate complaints and voices for change.

As we review our current Central American policy, it is important to look beyond today and to develop a policy that considers all relevant interests.

At this time I would like to bring to my colleagues' attention an article which appeared in the Christian Science Monitor. This article, written by the director of the University of Minnesota's Hubert H. Humphrey Institute of Public Affairs, Harlan Cleveland, provides an excellent analysis of our foreign policy shortcomings as well as positive steps which Congress and the administration can take.

[From the Christian Science Monitor, July 27, 1983]

GETTING ALONG WITH THE "NEXT GOVERNMENT"

(By Harlan Cleveland)

All peoples, however well or badly governed, are presently or potentially our friends. But no government can expect to be our overriding friend. It is as true now as when Talleyrand said it that nations do not have permanent friends, they just have permanent interests.

Our judgment, in each particular case, should be heavily weighted in favor of the long-run relationship between the American people and the peoples of the other country or countries involved. That purpose is seldom served by the effusive nonsense which so often characterizes the personalized diplomacy of summit meetings. This is not a partisan comment: It applies as well to President Carter's short-lived prediction of the Shah's longevity as to Vice-President Bush's euphoric toast to President Marcos: "We love your adherence to democratic principles and to the democratic process."

Everywhere, the status quo is on the way out. In a volatile and turbulent world, half a hundred governments are likely to change next year, and the year after that—sometimes by constitutional but more often by extraconstitutional process. Diplomacy is mostly the art of getting along with the sitting government. But in so dynamic a political environment, the American people have at least an equal interest in getting along with the next government, and the one after that.

What our government says and does, how and when we compromise our stated principles (human rights, free enterprise, basic human needs, opposition to communism or apartheid or trade barriers), should be said and done with an eye to the effect on those future relationships. If, to select an example not wholly at random, we encourage a sitting government to drag its feet on land reform, we can hardly expect cooperation on strategic issues from the land reformers who may take over next.

We have not been skillful at masterminding or even forecasting political transition in other societies. But the United States government can at least position itself so as not to make the unseating of each sitting government a defeat for the American people.

In reaching out to "next governments" around the world, the U.S. has the enormous advantage of its credible pluralism. With marginal exceptions U.S. business people, trade union leaders, farmers, scientists, engineers, professors, journalists, and especially students and other young people, can travel the world without being taken for agents of their government, whatever its political complexion.

By the same token, we welcome here each year many thousands of key people—leaders and leaders-to-be—from nearly every country on earth. Many of them spend some time most of their time getting to know Americans from every walk of life, every sector of society, every shade of opinion.

This "getting to know you" experience should be considered a major part of U.S. foreign policy. It does not guarantee political support by our visitors, or those we visit, of whatever a U.S. government may temporarily emit as "policy." But a healthy flow of Americans overseas, and a comparable flow to the U.S. of leaders and potential leaders from other countries, guarantees that "next governments" around the world will contain some people who understand that American governance may be messy but is not really messianic, and that democratic pluralism and nonviolent transitions of power are practical propositions even in a continental society.

It may be that the votes our senators and representatives cast each year on educational exchange programs are the most important—and the most cost-effective—policy they are privileged to make about international peace.●

THE FEMINIZATION OF POVERTY

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. FLORIO. Mr. Speaker, the administration's economic policies continue to impose hardship on millions of Americans. Most of the road to full economic health still lies ahead. Unemployment has edged down only grudgingly, and still stands at a full 10 percent nationwide. Millions of Americans continue to want for work.

American working women confront additional adversity from discriminatory wage and employment policies. For every dollar a man earns, a woman earns only 59 cents, 5 cents less than a generation ago. "Women continue to face significant employment barriers, including occupational segregation, wage inequities, and discriminatory exclusion from high-wage jobs," says U.S. Civil Rights Commissioner Mary Frances Berry. The absence of an Equal Rights Amendment to the Constitution means that women will continue to face economic discrimination from many fronts left untouched by weak or nonexistent statutory laws.

Gender discrimination on the job, in pension rights, property settlements, and other areas is depriving an increasing number of women of any economic security. Straight-line projections of current trends suggest that, by the year 2000, almost all the U.S. poor will be female—primarily single mothers and elderly widows. Administration cutbacks in benefits going to poor women, including reductions in AFDC, child care support, and medicaid, further aggravates the poverty that characterizes the lives of so many women today.

An article in the RECORD, from Bergen, N.J., further examines the special burdens the administration's economic policies are imposing on New Jersey's low-income women. Mr. Speaker, I submit the following article for my colleagues' review.

The article follows:

[From the Record, July 26, 1983]

WOMEN IN NEED: THE FEMININE SIDE OF POVERTY

(By Elaine D'Aurizio)

Women have finally arrived. The headlines keep affirming it. Women are winning seats in the cabinet and on the Supreme Court, soaring into outer space, and bounding up the corporate ladder.

Or consider the image of today's woman in TV commercials. Instead of battling ring around the collar, she's showing off her new sports car or singing the praises of her new charge card. Impervious to aging, she looks terrific as she manages a challenging career and raises model children—all the while adored by a proud and supportive husband.

Try telling Louise Adler that's the way it is. The Garfield resident is struggling to raise a 13-year-old son and an 8-year-old daughter on $9,932 a year—her take home pay as a legal secretary.

"What hurts most is not being able to give my son a few dollars for a movie," says the 34-year-old divorced mother. "It's so hard to watch my daughter struggling to zip up pants she has outgrown, and to know I can't afford new ones."

Louise Adler (her name has been changed at her request) is not a role model who inspires other women to reach for the brass ring. She represents, perhaps, more of a reality—a female head of a household fighting for survival.

She is also one local example of a growing trend in America: what sociologist Diana Pearce calls "the feminization of poverty."

Between 1969 and 1978, the number of poor families has changed little, but their composition has shifted dramatically. According to the Bureau of Labor Statistics, today more than half—3.3 million—of all poor families in America are maintained by women, compared with 36 percent in 1969. Two of three poor adults in this country are women, says the National Advisory Council on Economic Opportunity.

What constitutes poor? U.S. Department of Labor criteria vary from locale to locale, but according to May 1983 figures, a typical ceiling was $9,900 for an urban family of four, exclusive of noncash benefits such as medical care and food stamps.

A swelling divorce rate, job and wage discrimination, and the lack of affordable child care and housing: All help perpetuate poverty among women who raise families alone, according to a recent study by the U.S. Commission on Civil Rights.

Eighty percent of divorced women get custody of children, and authorities say they shoulder most of the financial burdens. A national survey in 1975 showed that only 25 percent of women eligible for child support actually received it—and a majority of those received less than $1,500 a year.

LEFT WITH THE BILLS

Technically, Louise Adler may fall above the poverty line, but try convincing her of that. Her financial situation has been rough since 1977, when her husband told her he had found someone else, leaving her with bills totaling $2,400. Other than the children, all that remains of her eight-year marriage is a television, a sewing machine, a washing machine, a lamp, and a framed photo of her ex-husband in his Navy blues.

Mrs. Adler and her children live in a cramped, three-room, $275-a-month attic apartment. "This apartment was all I could afford, and no other landlord wanted my kids," explains Mrs. Adler, scooping rice onto dinner plates.

Watching her put dinner together on the tiniest of counters is like observing a juggler in a telephone booth. Everything in the apartment is fighting for space—small appliances, dishes, books, furniture, shoes. The frayed turquoise chair (a secondhand steal at $65) in the living room converts into a bed for Mrs. Adler. Her daughter and son share a tiny bedroom. Most of the furniture is family hand-me-downs.

Brand-name food is only possible when bought on sale. "Fruit and vegetables are out of the question," says Mrs. Adler. "My son loves salad but with the price of lettuce and tomatoes, I just can't afford it." Even the family favorite—pastina—has moved onto the treat list.

She has been nursing a recurring ear infection for five months because she can't afford a doctor's visit. She keeps her fingers crossed that her children stay healthy.

The last six years have toughened her. With no money coming in from her husband she was forced to enter the job market unprepared. "Society is very unfair to women. After a divorce, they're put through the mill," she says. "My husband was very macho and wouldn't hear of me working. I used to sneak baby-sitting jobs in for extra money."

Trying to restore the personal confidence destroyed when her husband left, Mrs. Adler was dealt another blow by potential employers. "At first, you feel lost. I was really down on myself. I felt the divorce was my fault, that I really wasn't qualified to do anything.

A homemaker since she was 18, Mrs. Adler says she felt condescended to at job interviews: "Especially men treat you like cattle, someone who can't do anything—even though you've balanced a budget, handled all the bills, kept the house running, and raised two children."

She says her one break came in October 1977, when Bergen County Legal Services hired her on a partial CETA program for on-the-job training as a legal secretary. Meanwhile, she hounded the probation department until it tracked down her husband in Indiana and ordered him to pay $40 a week for child care. "But I'd only get a check about every three weeks, sometimes months," she remembers. She adds that she hasn't received money in years, and out-of-state officials have turned a deaf ear, despite a New Jersey court order requiring him to provide support.

Mrs. Adler smiles as she reflects on her recent past. "I used to think if I'd remarry, I would want someone to lean on," she says. "Now I long to just have an adult to talk to when things go wrong, to let off steam with. The loneliness is worst at night after you've done a crossword puzzle, after you've read a book. You find yourself staring at the ceiling and you cry."

The poverty rate is even more startling for minority women and their families. More than half of all black families headed by women live below the poverty line. In the last decade, poor households headed by black makes decreased—from 630,000 to 410,000—while poor families headed by black women rose from 740,000 to 1.2 million.

That includes Jona Anderson of Teaneck and her five children.

"If I can work out a way to keep the house, I can handle anything else," Mrs. Anderson says, unruffled by the slamming of doors as youngsters parade in and out of her seven-room home. Somebody wants iced tea, another needs her shoelace tied. Mrs. Anderson obliges matter-of-factly, cooking and talking at the same time.

"My usual state is exhaustion," she says, having just finished a full day as an accounts receivable clerk.

Holding onto the house will take some doing. The mortgage is $713 a month. Mrs. Anderson earns $200 a week. Her estranged husband sends her $300 a month, but $100 of that goes for day care. The welfare board kicks in $142 a month in food stamps, but "my kids drink that much in milk."

If this doesn't seem hard enough, add $8,400 in mortgage arrears. Mrs. Anderson says she kept sending in whatever money she could after her husband left 1½ years ago, but it didn't satisfy the mortgage company, which started foreclosure proceedings last September.

"I've saved about $5,000 [toward the mortgage debt], but it isn't enough," Mrs. Anderson says.

Going back to school for a higher paying job is out of the question. "I need to work close to home for the kids, and I just don't have the time to learn a new job," she says.

Why not just sell the house? "I'm a black woman with five kids," she says. "Mostly white people live in places I see fit. I've looked for a decent place to live before—to a point where I wanted to put feathers on the kids and pass them off as birds.

"In Englewood, I had to put the roaches to bed with the kids," she recalls. That's why she and her husband pooled their salaries to buy the house. But their domestic problems were growing worse, including knockdown fights. Her husband a security guard, threatened her repeatedly with his revolver. After therapy failed, Mrs. Anderson finally told him to leave.

These days, she takes vacation days for emergencies, such as a recent chicken pox epidemic in her house. Clothes are secondhand donations. The worn linoleum floor and frayed furniture will have to wait. So will her dream of building a rock garden in the backyard.

She would like higher pay, though. "I've asked for a raise, knowing that a man would be making more money for the work I put in," she says.

Sometimes I get mad as hell [thinking about racial and sexual discrimination]. But I just don't have time to be angry. I have to keep things going from day to day."

Unmarried elderly women compose a third major segment of the poor. Nearly 2 million elderly widowed or divorced homemakers and single women (two thirds of them over 72) were below poverty level in 1981.

Marie Allers says she never planned on a day like this. But that day is here and here she is, 63 years old, living alone in a three-room flat in Clifton on $357 a month while she recuperates from open-heart surgery.

Mrs. Allers says she is grateful for the $26 a month she gets in food stamps and that her rent-controlled apartment is only $103 a month. What really concerns her, though, is more than $3,000 in medical bills—the ones Medicaid didn't cover. "I'll do my best to pay what I can," she says. "But I can't give what I don't have."

Timid and frail, her legs swollen and her body trembling, she smiles without resentment, speaking softly of the years that led her here.

If there is one word that best describes those years, it would be servitude. Yanked out of school in eighth grade, Mrs. Allers had to help raise her 12 siblings. "I was Mama's best helper," she says.

In spite of poor eyesight and the rheumatic heart disease that left permanent damage, she took a factory job at Botany Mills—and continued to help out at home.

At 28, she married. Six years later, in 1954, when she was temporarily laid off, her husband left. "I was collecting unemployment, anyway," says Mrs. Allers, "but he was always going from one job to another himself and I guess he couldn't take my not working, so he walked out."

Later that year Botany Mills closed down, and she began working a series of jobs as a waitress and cleaning woman in hospitals and stores. She was always paid minimum wage.

Through it all, a pattern of giving was there—helping out at the Salvation Army, making coffee for church groups, visiting her ailing mother in Philadelphia on weekends.

The, when she was 54, the last place she worked for closed down and she was placed on disability.

However small and basic her living quarters, the apartment is clean. And touches of a resilient spirit—potholders embroidered with smiling faces, a music box, post cards of places where other people have traveled—are part of the decor.

There is occasional loneliness, but "I like doing for myself," she says.

The only time Marie Allers got a little extra money was when she won $50 in a church bingo game. That day, she returned home to find her apartment burglarized and $50 worth of medication gone.

"I'm a positive person," she says. "God was watching over me, I figure. I could have been home when they broke in."●

STATEMENT ON H.R. 2697

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Ms. MIKULSKI. Mr. Speaker, yesterday I testified before the Senate Subcommittee on Taxation and Debt Management in support of S. 1579, a bill to provide relief to our volunteer labor force by reimbursing individuals 20 cents per mile when they use their private automobiles for a charitable purpose. We already provide this tax credit for businesses; we should provide the same financial relief to those who give their time and money so selflessly.

S. 1579 is identical to my volunteer mileage bill, H.R. 2697. I hope hearings will be held on that bill in the House this fall. Mr. Speaker, I insert

my testimony on behalf of S. 1579 in the RECORD and I urge my colleagues to join me in supporting this important legislation:

TESTIMONY BEFORE THE SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT RE: S. 1579/H.R. 2697

Mr. Chairman, I appreciate being given the chance to testify in support of Senator ARMSTRONG'S bill, S. 1579, which is identical to my Volunteer Mileage bill, H.R. 2697.

Volunteers are a major labor force in the United States. Together they contribute some $11 billion to this Nation measured in time and services. They are the candy-stripers, the scout leaders, the civil rights activists, the veterans, the chamber of commerce members, the Kiwanis Club, the Blue-Chip-In participants, the meals on wheels bringers, the donaters and the telethoners.

But the volunteers' contribution cannot be measured, and should not be measured, in time and money alone. We must also measure it in terms of the value system it represents—a sense of caring, and a heartfelt motivation to make the world just a little bit better. Our volunteers are working at full capacity, selflessly and effectively. It is time that we return something to these tireless individuals.

With the tremendous losses in Federal social programs there is a new call to our volunteer community to step forward and fill the vacuum. Volunteers have been asked to substitute for the drug rehabilitation programs, the aid to the handicapped, the loss of CETA, and a host of other needed social programs. It is a tall order and the volunteers are going to need help.

We all seem to assume that volunteers are somehow immune to the societal pressures that affect businesses. There are tax credits for oil companies and expense accounts for executives, but volunteers are somehow expected to be an endless reservoir of resources, money and energy.

Inflation has affected the non-profit world in the same way that it has affected government and profit-making organizations. Those ladies who work the auxiliary at the hospital are under pressure to contribute additional income to the family. That boy scout troop leader may be looking for a second job, or may have been laid off from our steel, housing, or auto industry. That meals on wheels volunteer may have to help out grandma because her Medicare costs have increased. In fact, many volunteers are on fixed incomes themselves. Times are just as tough for the volunteer as for the mega-corporation, and yet we blithely expect the volunteers to give more and more.

Everyone has become more conscious of out-of-pocket expenses. Many volunteers have to travel miles and miles to do the good work they do—driving to meetings, to youth centers, to visit the housebound. Three million of our volunteers are giving their resources to the federal government, working in parks, for the Veterans Administration, the Coast Guard Auxiliary. In turn, the Federal Government says, "Do more."

I can honestly say that I am not asking for special treatment for a privileged few, or a new loophole for some would-be tax evaders. I submit this testimony on behalf of the "good guys" of our society—men and women—who are out there every day helping their neighbors and ours. They have never asked for a reward; but now they are asking for relief. If it costs 20 cents a mile to operate a car for government purposes, it costs just as much to use it as a volunteer. And it is time that we recognize that economic reality of life.

All over the United States right now, volunteers using their own cars are providing essential services to their fellow citizens. In my own community of Baltimore in 1980, Meals on Wheels of central Maryland served 2,050 meals every day—driving 150,000 miles a week. Life Support Project volunteers visit elderly nursing home patients who would otherwise have no visitors. In 1980, they made over 6,500 visits to people in nursing homes. I know of two patients in cancer clinics who were driven to treatment 40 times for a total of 2,894 miles.

These are just some of the examples of the work done every day by volunteers, without salary, without payment—and too often without recognition of any kind, but now these programs are in trouble. The cost of gasoline is a serious threat to the kind of neighbor-helping society we as Americans are so proud of. Every day, we learn of more programs which have had to cut back, to retrench, to deny services to needy clients—because they do not have enough drivers.

I do not want to lose the volunteer programs that are the bonding fabric in our society. I do not think we can afford to have this kind of work done by salaried employees. We cannot afford it financially—and we cannot afford it spiritually.

Finally, I am deepy concerned because the American people are now suffering under one of the largest cutbacks in government programs in our nation's history. Thousands of government programs providing essential services to millions of Americans have been eliminated. The need of charitable organizations and volunteers to fill this void is enormous. It is imperative that our government adjust its tax policy to encourage citizens to perform charitable works. I urge this Committee to take action to keep volunteers in the programs and on the roads—pass S. 1579. Thank you.●

WILLIAM R. ROBERTS ON THE AMERICAN POLITICAL PROCESS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mrs. SCHROEDER. Mr. Speaker, I would like to share with my colleagues the eloquent comments of Denver city council member William R. Roberts.

Mr. Roberts letter, from the July 29, 1983, Colorado Statesman, was in response to a statement made by a city council colleague lamenting the mayorality election results in Denver, Philadelphia, Chicago, and Los Angeles.

DEAR COUNCILMAN SWALM, Your comments about former Mayor McNichols in the July 8th issue of the Colorado Statesman were fascinating. They were also saddening and infuriating in part.

I refer to the frame of reference in which you remarked upon the end of the McNichols era. You were quoted as saying, "Apparently, there's sort of a trend. Chicago has their minority mayor, Philadelphia just elected one, and of course Detroit's had one for several years as had Los Angeles. Now Denver. I don't like the trend personally. We're doing away with some of the real valuable things that have made this country. This is just another symptom of our system going down the tubes."

I assume that you were quoted correctly and that I have repeated the quotation correctly.

It would be hard for anyone who deeply cherishes the American ideals of equality and democracy to react rationally and calmly to such statements, but I will try.

Each of the elections that you mentioned, including the Denver election, was freely conducted, and for the most part in cities where the majority of the population are anglos. Each of the minority mayors represented the true choice of the majority of those who voted.

It could be said that each of these elections became a celebration of the American ideals of fairness and color-blindness. In each instance, most of the people, whether black or hispanic or anglo, voted for the person they considered to be the best man, whether he was black, hispanic or anglo.

How could such advances beyond the bigotry of hopefully bygone days be considered a loss of values or a symptom of decline? If the ideals towards which Americans are trying to progress mean anything, then just the opposite is true.

Each of these minority mayors, including Mayor Peña, is an individual entrusted to protect and enhance a great heritage. Each, including Mayor Peña, must meet that responsibility in his own way, with varying degrees of success. Not one of these men can or should be judged by the actions of any or all of the others. Each must stand alone in the context of the history of his own city. The fact that each mayor may not share the ethnic or racial background of his constituents is interesting, but essentially irrelevant.

Somewhere among the predecessors in office of each of these mayors were other men who broke a local mold, because they were Irish or Italian or Catholic or Jewish or atheist, and their constituents were not. Were American values lost, or did our system go down the tubes when these forerunners broke through the intolerance of their times?

Must our country be restored to some sort of make-believe racial or ethnic purity in order to retain its values or to uphold the benefits of its system? Such a restoration itself could destroy the values and the system that you and I both look up to.

If anything can be said for your comments, they were honest and open. You cannot be accused of hidden bigotry or bashful backwardness.

Isn't it wonderful that we live in a country where men are free to say such things?

Very truly yours,

WILLIAM R. ROBERTS,
Councilman, District 11.●

ENVOY SAYS RUSSIA IS NATURAL FOE

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. HILLIS. Mr. Speaker, Arthur Hartman, the U.S. Ambassador to the Soviet Union, was in my district last Friday, visiting Wabash, Ind., where he attended his wife's family reunion.

While there, he was interviewed by Alec Dobson, a reporter for the Wabash Plain Dealer, and I found his remarks very enlightening. I would like to take the opportunity to share this article with my colleagues. I believe we can all benefit from Mr. Hartman's insight.

The article follows:

[From the Wabash (Ind.) Plain Dealer]

RUSSIA NATURAL FOE: ENVOY

(By Alec Dobson)

Don't expect relations between Washington and Moscow to warm up soon—the two diametrically opposed political systems won't allow it, the U.S. ambassador to the Soviet Union said.

Arthur Hartman, the man who represents American interests to Soviet leaders in the Kremlin, was in Wabash Friday for a reunion of the family of his wife, Donna (Ford) Hartman.

"We're going to have a long period of time when relations are never going to be very good with the Soviets, because our systems are totally different," Hartman said at his room at the Best Western Wabash Inn. Dressed in jeans, tennis shoes and a T-shirt, he was reclining his long frame on the bed.

"They've been pretty cool, really, since Afghanistan." The Soviet Union invaded that bordering country in 1979 to install a friendly regime, and has since become bogged down in a war against Afghan guerrillas.

In response the Carter Administration imposed an embargo on U.S. grain exports to the Soviet Union and led a boycott of the 1980 Moscow Olympics.

Hartman said the Soviets cannot achieve a military victory in Afghanistan. "They insist on putting a regime in that the Afghans don't like.

"The thing that's been hardest for them to accept is that there could be a country on their border that would have a sysem different from their own."

At home, the Soviet Union is troubled by a poor economy. The state-controlled system has failed to provide a good standard of living, as scarce resources are spent developing military might, Hartman said.

"They can produce good missiles, but they don't produce very good civilian economies. I don't think it works well economically, because they try to run everything from the top."

To stimulate growth, Soviet leaders are experimenting with incentives for production. While that may help, Soviet leaders worry whether they can stop such a trend before it leads to a free-market economy, thereby limiting the control of the Communist Party.

"That the Soviets don't want," Hartman said. Such economic reforms were considered in the 1920s and 1950s, he said, but "each time they cut it short because it looked like it was cutting into the power of the Communist Party."

Hartman pointed out the greater efficiencies of the free-market system in an annual four-minute July 4 television address to the Soviet people. He said large U.S. agricultural harvests are produced by less than 4 percent of the working American population, while about 25 percent of working Soviets reap a much smaller crop.

That July 4 address is the only direct access the American ambassador has to the Soviet people. The Soviet press, like the economy, is strictly controlled by the state.

The ambassador must submit the text of his address for prior approval; he is not allowed to attack the regime. "I talk about the U.S. and let them draw their own conclusions," Hartman said.

Try as it might, the state cannot exercise absolute control over what its people read and hear. Radio broadcasts from nearby countries is one source of outside information.

Hartman said the official Soviet press is not accepted as gospel. "The average citizen has a way of sifting through their own propaganda to get something like the truth."

Propaganda is not confined within the nation's borders: The European peace movement is another big target of Soviet efforts toward persuasion, Hartman said.

That leads to problems in arms negotiations, as the Soviets tell one thing to the public and something else to their U.S. counterparts at the bargaining table, Hartman said.

"They try to operate on public opinion through propaganda at the same time they're negotiating at Geneva. Their proposals are designed to appeal to the public and not to the negotiators."

The Soviets have deployed a new generation of SS20 missiles, but argue that U.S. intermediate-range missiles planned for deployment in Europe constitute an aggressive escalation of the arms race.

"There's a big peace movement in Europe, but they're beginning to see the Soviet position is pretty outlandish," Hartman said.

Hartman sees a chance for agreement between the two superpowers on a U.S. recommendation to shift production away from large multiple-warhead missiles to more numerous and smaller singlewarhead weapons.

If each side had a large number of singlewarhead missiles, theoretically, neither country would be able to wipe out the other's arsenal in a pre-emptive first strike. As long as the other side can retaliate, nuclear thinkers say, no one will launch a nuclear attack.

Such a major change in weapons production and strategy could not occur overnight, but Hartman was optimistic about the long-term possibility of an agreement.

Agreement over events in Central America is another matter, though. The U.S. has called on the Soviet Union to refrain from shipping arms through Cuba to the Marxist Sandinista government and to leftist rebels in El Salvador.

The Soviets disclaim any responsibility for Cuban arms shipments, Hartman said. "They keep saying they're not really doing anything down there. We think that Cuba couldn't do anything in Central America if it didn't have Soviet backing to do it. They (the Soviets) have certainly shipped arms into the area.

Hartman said the U.S. has the right to involve itself in another country's internal problems, when asked to do so. "If we didn't do it, it just means leaving it to them to implement their system.

"They think that we're out to destroy their system. The fact is, we don't like their system and we don't want them to impose it on other people."

Hartman, a career Foreign Service diplomat, was appointed by President Reagan to his Moscow post in 1981. Former President Carter appointed him ambassador to France in 1977. He has also served in Vietnam, before American military involvement, and London.

Hartman's other positions include assistant secretary of state for European affairs, head of a State Department committee for interdepartmental planning and operations, representative to the European Common Market and administrator of the Marshall Plan.

Serving in Moscow, Hartman said, "I can have more influence on what the policy is in Washington, because people tend to listen to you when you're on the spot."

Mrs. Hartman is the former Donna Ford, daughter of the late Richard Ford of Wabash. They met while she was a student at Wheaton College, in Massachusetts, and he studied at Harvard University, in Cambridge.

A New York City native, Hartman became interested in diplomacy as he was exposed to foreign cultures while serving as a radio operator on air transport runs between India and China in the waning days of World War II.●

MANDATORY HONEY PRICE SUPPORT PROGRAM

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MADIGAN. Mr. Speaker, I have this date introduced (by request) a bill to repeal the mandatory honey price support program. A similar bill (S. 1257) was introduced in the other body.

In a letter addressed to the Speaker accompanying this draft legislation, the Secretary of Agriculture commented as noted in pertinent part below:

The proposed bill would also provide a technical amendment to the 1949 Act to delete references to a mandatory price support program for tung nuts which was authorized only through the 1976 crop.

Section 201 of the Agricultural Act of 1949 requires that the price of honey be supported by means of loans, purchases, or other operations at not less than 60 percent nor more than 90 percent of the parity price therefor. While the level of support for honey has not been increased above the minimum level of 60 percent since 1973, the parity price has increased rapidly in recent years. This has resulted in the level of support for the 1981 and 1982 crops of honey being established above the market price for such crops and has increased the quantities of honey being purchased by the Commodity Credit Corporation (CCC).

In 1980, honey was acquired by CCC under the price support program for the first time since 1969. Six million pounds of 1980 crop honey were acquired by the Corporation compared with 3 million pounds of 1969 crop honey. In addition, CCC has acquired 38.7 million pounds of 1981 crop honey under the price support program. As of the end of calendar year 1982, CCC had 80 million pounds of 1982 crop honey under loan. It is anticipated that about 60 million pounds of 1982 crop honey will be acquired by CCC.

Furthermore, honey imports have increased substantially in recent years. Initially, the increase in imports of honey was due to a deficit in the domestic supply of honey as the result of declining domestic production. Now, however, because the minimum level of price support is above the market price and the domestic production is being acquired by CCC, honey imports are further

replacing the domestic production in the marketplace. This has resulted in increases in costs to the American taxpayer. Without a change in legislation, the continued escalation of the level of price support under the present formula will continue to increase costs to the American taxpayer. It will also further encourage the supplantation of imported honey for that which is domestically produced.

Enactment of this proposed legislation would permit the Secretary to support the price of honey by means of loans, purchases, or other operations using discretionary authority in accordance with section 301 of the Agricultural Act of 1949, as amended. This would allow the price of honey to be supported in a responsible manner, taking into consideration the needs of beekeepers as well as the potential cost to consumers.●

DIOXIN CAN CAUSE CANCER IN HUMANS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. FLORIO. Mr. Speaker, in recent months events such as the sale of Times Beach in Missouri have increased public awareness of the dangers associated with a chemical known as dioxin. In my own State of New Jersey, people have been forced to leave their homes because of dioxin contamination. Quite clearly, its presence is not isolated.

Research has proven that this chemical, considered to be one of the most toxic known to man, causes cancer in animals. Yet, the effects of dioxin on humans, and its link to cancer, have been a constant source of controversy among our Nation's medical professionals. A few days ago, Dr. Philip Landrigan, chief of surveillance for the National Institute for Occupational Safety and Health (NIOSH), announced that a rare form of cancer contracted by herbicide manufacturing workers strongly suggests that dioxin can cause cancer in humans.

I would like to take this opportunity to share with my colleagues the Washington Post article which further elaborates on Dr. Landrigan's remarks and the possible link between dioxin and cancer in humans.

The article follows:

[From the Washington Post, July 28, 1983]

EVIDENCE CALLED STRONG—DIOXIN TIED TO CHEMICAL WORKERS' CANCER

(By Victor Cohn and Felicity Barringer)

A rare form of cancer contracted by seven herbicide manufacturing workers "strongly suggests" that dioxin can cause cancer in humans, according to the chief of surveillance for the National Institute for Occupational Safety and Health (NIOSH).

If diagnoses by the victims' doctors are confirmed by the Armed Forces Institute of Pathology, the cases will become evidence that the controversial chemical—highly carcinogenic in animals—can cause cancer in humans.

The seven rare cancers, called soft tissue sarcomas because they attack muscle, fat, nerves or connective fibers, were discovered in studies of between 3,000 and 4,000 workers exposed to dioxin. Soft tissue sarcomas normally appears once in 50,000 persons in the general population, suggesting that the incidence in the chemical workers may be related to dioxin exposure.

Dioxin, an unwanted contaminant of the manufacture of herbicides and related chemicals, is one of the substances most toxic to animals.

Dioxin was contained in an oil compound that was sprayed on roads to keep down dust in dozens of Missouri communities, and has been recently discovered in other sites across the country. The Environmental Protection Agency evacuated and bought the entire town of Times Beach, Mo., after dioxin washed through the community during a flood this spring.

Chemical companies' officials, however, have said that there is no proof that dioxin causes anything more serious in human than a sometimes severe skin disease, called chloracne.

Dr. Philip Landrigan, chief of surveillance, evaluation and field studies for NIOSH, cautioned that samples of the suspected cancers are being studied at the Armed Forces lab for final confirmation of diagnoses.

"To be absolutely certain there's a cause-and-effect relationship" between dioxin exposure and cancer, "we want this confirmation" and "we need to investigate more cases," Landrigan said.

"But to me," he added, "the evidence is very strongly suggestive that occupational exposure to dioxin can cause cancer."

Although workers for other companies were included in the studies, the seven cancers were found in workers at the Dow Chemical Co. and the Monsanto Co.

Dow and Monsanto doctors have said the findings on dioxin's role as a long-time hazard are inconclusive. "If you force me to say is it or is it not, I'd have to say no. I want to see some further research," said Dr. Ralph Cook, director of epidemiology for Dow.

Dr. William Gaffey, who holds the same position at Monsanto, said, "I don't think we can say until we have an opportunity for a longer look."

Four of the workers, all now dead, were involved in the manufacture of 2,4,5-T and related herbicides or their chemical components, compounds commonly contaminated by dioxin, Landrigan said.

The other three, he said, may have been exposed because they worked in plants where such products were made. One of the three is still alive.

Officials at the Environmental Protection Agency's Health Effects Research Laboratory in Cincinnati are examining independently a set of EPA reports saying that this and other evidence show that dioxin "probably" can cause human cancers, an EPA spokesman said.

The Dow and Monsanto cases were disclosed in medical journals two years ago. But their significance was debated at the time, because of varying results in different studies.

It is unclear, too, whether these studies show major hazards from lower-level exposures, the kind that might be more applicable to the general population. Most of the chemical workers were either exposed for several years, had massive shorter-term exposures or both.

The Dow and Monsanto experiences "don't tell us whether or not" low-level exposure is harmful but do dictate caution, Landrigan said.

Chemical industry officials say that industrial exposure to dioxin has caused many cases of chloracne, a skin disorder that can sometimes escalate into serious liver, blood or nerve problems. But both industry and government officials have repeatedly said that there is no proof that dioxin has caused even worse effects, like cancer.

Swedish scientists first reported five years ago that lumberjacks and other laborers exposed to dioxin suffered five to six times the expected number of soft tissue sarcomas.

Dow and Monsanto independently studied four groups of their workers at plants in Midland, Mich., and Nitro, W.Va. None of these studies seemed to show a statistically abnormal number of the rare tumors.

But NIOSH epidemiologists added up these populations and added possible cases reported by other doctors. This produced the seven cases under investigation, two among Dow workers, five among Monsanto's.

Information on the length and intensity of the workers' exposures is incomplete. Dow's Cook said that one of the Dow workers was first exposed to suspect substances in 1964 and died in 1975. The other was first exposed in 1951 and died this year. Both were part of a group inadvertently over-exposed for three to nine months in 1963-64 when a manufacturing change released unexpectedly large quantities of chemicals.

At least two of the seven victims being studied by NIOSH were heavy smokers, Cook said. Scientists know cancer may sometimes be caused by smoking in combination with a chemical exposure.

Gaffey said three of the Monsanto victims worked at the Nitro plant where a 1949 explosion may have spread chemicals. He said two of the three might have been involved in the cleanup after the accident. The third, a clerk, had "minimal opportunity" for exposure, he said.

The final Monsanto cases involved a father and son who worked at an East St. Louis, Ill., plant. Gaffey said that the father was a maintenance worker exposed to unknown amounts of dioxin and that the son, a clerk, was diagnosed as having a soft tissue sarcoma two years after he went to work. The son is dead; the father is alive.●

BROTHERHOOD RAILWAY CARMEN 95TH ANNIVERSARY

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MORRISON of Connecticut. I take great pleasure in congratulating the Brotherhood Railway Carmen upon reaching their 95th anniversary. For nearly a century, the Brotherhood has been an advocate of those Americans who toil at the construction, repair, and servicing of our Nation's railcar fleet.

I am a firm believer in railroads and a committed supporter of organized labor; both play a vital part in the life of the Third Congressional District of Connecticut, and this year I have been

involved in several areas of concern to the rail workers of our district.

Earlier this year a 42-day strike occurred on the Metro-North Commuter Railroad owing to a labor dispute with the United Transportation Union. While not on strike themselves, the other unionized Metro-North workers observed the picket lines of the UTU and were denied unemployment benefits under the Railroad Unemployment Insurance Act by the Railroad Retirement Board. I interceded on behalf of the idled workers and saw to it that the board paid them the benefits they were entitled to under RUIA.

At the time I took office, Amtrak, taking advantage of the vague wording of section 1165 of the NERSA law of 1981, eliminated the firemen from their locomotive-hauled passenger trains. I consider this action dangerous because it ignores safety measures solely to save money. I am considering the introduction of remedial legislation.

On August 1, the House passed H.R. 1646, a bill to save the foundering railroad retirement system. The final bill included an important amendment to cushion the impact of changes in the 60-30 provision. The bill as passed will prevent deep cuts in the tier II benefits scheduled for October 1. To allow the system to fail would have been an unforgiveable breach of trust.

This year Conrail announced plans to move an office facility out of the Third District, thus destroying 100 more area rail jobs. I am currently seeking from Conrail a detailed cost analysis of this ill-advised move in an attempt to embarrass them into reconsidering this matter.

In closing, I again applaud the Brotherhood for their long service to railway car workers. A free trade union movement is a vital element in a true democracy, and I look forward to working with unions such as the Brotherhood in preserving real democracy in America.●

RAOUL WALLENBERG

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. GREEN. Mr. Speaker, this morning the House Foreign Affairs Subcommittee on Human Rights held a well-attended hearing on Raoul Wallenberg. The purpose of this hearing was to continue to ask questions which have yet to be answered on the fate of Raoul Wallenberg. I would like to commend the subcommittee for undertaking this worthwhile and necessary task.

As I am sure my distinguished colleagues know, Raoul Wallenberg was a Swedish diplomat during World War II who went to Budapest and singlehandedly saved 100,000 Hungarian Jews from Nazi extermination. Unfortunately, Wallenberg's heroic deeds were barely done when the Russians advanced and captured this righteous gentile. His fate after that is unclear. The Soviets claim that he died in 1947 but many others—including today's hearing witnesses—insist that there is evidence that he is still alive.

Thursday, August 4, 1983 is the 71st anniversary of Wallenberg's birth. The Raoul Wallenberg Committee of the United States, which is headquartered in my district in Manhattan and which is affiliated with the Anti-Defamation League of B'nai B'rith, will be hosting a celebration in his honor.

The president of this committee, Mrs. Rachel Oestreicher Haspel, gave eloquent testimony at this morning's subcommittee hearing, which I would like to enter here into the RECORD.

The testimony follows:

RAOUL WALLENBERG

Gentleman, my name is Rachel Oestreicher Haspel. I am extremely pleased to be here today as the spokesperson for the Raoul Wallenberg Committee of the United States in affiliation with the Anti-Defamation League of B'nai B'rith. This is a committee of volunteer members who care deeply about both the heroic actions of Mr. Wallenberg in 1944 and 1945 in Hungary and about his subsequent incarceration in the Soviet Union. We join with all of those here in seeking his freedom. We who are involved in this work, feel that Mr. Wallenberg's imprisonment and present condition is a Human Rights Issue of the highest magnitude.

I am most appreciative that the Foreign Affairs Committee's Sub-Committee on Human rights and International Organizations is allowing me to appear before it on behalf of our committee. For all of us who care so deeply about the fate of Raoul Wallenberg, an Honorary Citizen of the United States since October 5, 1981, I should particularly like to thank the chairman, Congressman Gus Yatron, for convening this sub-committee. I should also like to single out a member of this sub-committee, Congressman Tom Lantos, for his selfless early efforts on behalf of Raoul Wallenberg and his continued vigilance on this issue.

The Raoul Wallenberg Committee of the United States has two goals:

(1) To free Raoul Wallenberg and allow him to return to his home and family in Sweden.

(2) To make his extraordinary deeds in Hungary known, so that the name Raoul Wallenberg will become synonymous with heroism and humanitarianism throughout the world.

As to freeing Raoul Wallenberg from prison in the Soviet Gulag, let me say here and now that I do absolutely believe that there is indeed a strong possibility that Raoul Wallenberg is still alive. Based on very concrete information, it is my opinion that Mr. Wallenberg has been given preferential treatment by his Soviet jailers. Never in all the thousands of pages of testimony released by the Swedish government has hard labor ever been mentioned. More significant, however, is the testimony of a now elderly Swedish doctor, Professor Nana Svartz.

Professor Svartz was told on January 27, 1961 by a Russian physician, Professor Aleksandr Miashnikov, that he had examined Raoul Wallenberg at a prison hospital in Moscow and even offered, at the time, to allow Dr. Svartz to see him.

This in itself is not the remarkable thing; what is staggering is that Professor Miashnikov was the personal physician of Nikita Khrushchev. How often, in any country, does the personal physician of a President or of a Prime Minister examine an ordinary prisoner? Unfortunately, Professor Miashnikov later denied having told Dr. Svartz about Raoul Wallenberg and then died rather suddenly in 1965, but I offer this testimony as a means of establishing a point-of-view about Mr. Wallenberg, as compared with the ordinary prisoner in the Soviet Gulag.

Because we believe he is alive, and to help ascertain his whereabouts in the Soviet Union, we have run ads in Russian language newspapers to see if recent Soviet immigrants might help shed new light on Raoul Wallenberg. As I need not explain, this is very expensive and almost impossible for a non-profit group to maintain, particularly on the day-to-day basis that might make it successful. To aid all of us in this effort, I would like to suggest that the following actions be considered:

(1) That the feasibility of a question pertaining to Raoul Wallenberg and his whereabouts be asked of all immigrants from the Soviet Union applying for residence.

(2) That the use of the enormous Russian language resources of both Radio Free Europe and the Voice of America be used on a daily basis to aid in locating Mr. Wallenberg.

(3) That all branches of the government, when communicating with the Soviets, on official matters, automatically bring up the fate and case of Raoul Wallenberg as a part of any dialogue.

We commend Secretary Shultz and the Department of State for what they have done thus far both on a bilateral basis and at international forums, such as the CSCE Review Conference in Madrid and the United Nations Human Rights Commission in Geneva. We ask only that the effort be more constant, as every day that passes is one day more of freedom lost to this extraordinary man.

It will perhaps be of interest to this panel to know that in April 1983, I wrote to the Prime Minister of Sweden, Mr. Olaf Palme, urging that Sweden take a stronger position on behalf of Mr. Wallenberg. I received a letter sometime after that from Ambassador Lennart Eckerberg, Under-Secretary for Political Affairs in the Swedish Ministry for Foreign Affairs. I am submitting a copy of that letter to the Sub-Committee. I would like to quote briefly from that letter:

". . . in addition to many previous contacts on high level, Raoul Wallenberg's case was taken up by Sweden's Minister for Foreign Affairs during his visit to Moscow in 1980, by Sweden's Minister of Justice also during a visit to Moscow in 1981 and also by the Under-Secretary of State at the Swedish Ministry for Foreign Affairs in September 1981 and January 1983."

It is particularly heartening to see that the last date given was as recent as January of this year, and does, in fact, indicate that the government of Sweden will also continue to pursue the case of this most heroic Swede under Mr. Olaf Palme's leadership.

As I mentioned before, the Raoul Wallenberg Committee of the United States has

two goals. In a very personal way, I feel strongly that the second goal: "To make Raoul Wallenberg's extraordinary deeds in Hungary known, so that his name becomes synonymous with heroism and humanitarianism throughout the world," is of equal importance with the first.

I ask your indulgence; I should like to be personal for a moment. I appear before you today as the President of a national organization, but I originally became interested in Raoul Wallenberg because I am the mother of two young children who are growing up in what today appears to be a very hostile world. When I first heard Raoul Wallenberg's story, I was staggered by the enormity of his deeds. Many persons in this century have takens far too many precious lives, but I can think of no other human being who has saved one hundred thousand lives by his directed action and intervention. Mr. Wallenberg is not a media hero (though he should be); he is flesh and blood like each of us here. Our children have few heroes not created by script writers; if they are going to survive, they must all know that they and others carry within themselves the same possibility for kindness, selflessness, and courage that Raoul Wallenberg showed. Only because he is a flesh and blood hero—and because of his flesh, vulnerable like all of us—will our children know they, too, are capable of facing evil and danger with courage. We all need Raoul Wallenberg as a role model for these trying times.

Let me illustrate this with another true story that I also consider extraordinary. About a year ago I spoke to eight hundred students at West Rowan High School in Mount Ulla, North Carolina. I had been asked to speak there by two gifted teachers, Miss Libby Edmondson and Mrs. Joyce Sloop. This is a public school located in a rural section of North Carolina and its students come from families whose incomes are earned primarily from farming or mill work in either the textile or furniture factories in the area. I can assure you that extra dollars are few and far between in the majority of homes that these wonderful students come from.

I was the first Jew that most of these eight hundred boys and girls had ever met, but the response to the story of this hero who risked his own life in order to save Jews, and as we know saved so many tens of thousands, was overwhelming. The students responded to this story with voluntary contributions to the Wallenberg effort. Quoting from a letter of Miss Edmondson and Mrs. Sloop, "They wanted to be a part of bringing recognition and perhaps freedom to this noble man and decided that the only worthy means was to donate money obtained from personal effort and sacrifice."

"Although most of the students sacrificed money from their allowances, there are two contributions of special merit. Two Advanced Placement English students, Tommy Steele and Tim Webb, attempted what amounted to a Herculean effort for them. With a total absence of experience, they located a tree deep within a forest, cut it down after many attempts, sawed it into firewood, transported it by armloads, because a truck was unable to reach the wood, and finally sold the load for forty dollars. Dee McDaniel, a student who sells firewood to supplement the family income, cut a special load for twenty dollars as his contribution. We are proud of their drive and ingenuity.

"The effect Mrs. Haspel had on our students cannot be measured by the four hundred dollars they contributed; there may be no tangible means to assess the impact made by this exposure to Wallenberg's idealistic concept of man and his courage to act upon it. They have perceived the good in man and have honored it. For this elevation of consciousness we shall always be indebted . . ."

I am submitting the full text of Mrs. Sloop and Miss Edmondson's letter along with an article about the students by Rose Post, a writer for the Salisbury Evening Post of Salisbury, North Carolina. The article, written on April 3, 1982, is entitled, "West Students Learn Valuable Lesson from World War II Hero," and it further elucidates the impact that Raoul Wallenberg's story has on these students.

In the face of this overwhelming response and commitment by our young people to the heroic ideal that Raoul Wallenberg represents, how can we not respond in turn? We are requesting that all State governments enact the following legislation:

(1) We urge the states to include Raoul Wallenberg's story in their school curriculum. He is, after all, our only living honorary citizen.

(2) We are also asking that all fifty (50) states designate October 5th as a day honoring Raoul Wallenberg as his honorary citizenship is a uniquely American Tribute.

On a national basis we suggest two actions:

(1) The issuance of a United States Stamp to honor our only living Honorary Citizen; a uniquely fitting tribute to Raoul Wallenberg. I have been told that stamps are issued only to honor persons no longer living. Perhaps for this exceptional hero an exception can be made.

(2) Finally, I would like to express the hope that the United States Holocaust Memorial Council will consider naming a wing of the new Holocaust Memorial Museum now being planned, in honor of Raoul Wallenberg, our only living Honorary American Citizen.

He was the one shining light in all that darkness. How different our world might have been today had there been a few more heroes like Raoul Wallenberg.

It has taken the world more than thirty-five years to truly recognize the greatness of Raoul Wallenberg—a man who acted while the rest of the world watched. The survivors of the Holocaust have a slogan "Never Again." Let us take these words and apply them further. Never again will we allow the name Raoul Wallenberg or the deeds that this name stands for to be overlooked. Never again will we allow the horrors of the Gulag to totally engulf him. Never again will we remain silent until the true reasons for his imprisonment and his actual whereabouts are made known to his family and to the world.●

THE ARTS IN GREATER BUFFALO

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. LaFALCE. Mr. Speaker, Tolstoy said, "Art is a human activity, whose purpose is the transmission of the highest and best feelings to which men have attained." (What is Art? VIII.)

Tolstoy's definition of art is alive in western New York, as noted in detail by art critic William Glackin in a Sacramento, Calif., newspaper. Glackin pays particular note to Artpark, in Lewiston, N.Y. He shares Clive Barnes' views. Barnes, an eminent writer and dance critic for the New York Times, describes Artpark as "a festival of international significance unlike any other in the world—Artpark stands alone among festivals in its sheer plentitude of aspirations * * *. It works as a celebration of the arts and the people with an unaffected joyousness."

Joyousness is certainly a feeling one attains when participating in the activities of this publicly funded State park dedicated to all aspects of the arts. The location is dramatic—200 acres of parkland along the Niagara River Gorge. The performances are exemplary. Some of this season's highlights includes "Hello Dolly," " Carousel," "Rigoletto," "Elektra," the Hubbard Street Dance Company, the National Ballet of Canada, the Martha Graham Dance Company, the Ballet Hispanics, and the Preservation Hall Jazz Band. The workshops provide a creative educational experience for all ages and in a variety of art modes.

We in western New York are proud of our art offerings. I call my colleagues' attention to those events that cause us to celebrate, as described in "Art Offerings Help Buffalo Beat Bad Rap."

ART OFFERINGS HELP BUFFALO BEAT BAD RAP

NIAGARA-ON-THE-LAKE, Ontario.—There's a joke in "A Chorus Line" that never fails: "You can't commit suicide in Buffalo, because that would be redundant." Well, if you'll let me stretch the Buffalo area up to this town on the Canadian side of the Niagara River and almost as far up the American side, to Lewiston, I'd like to say a word for Buffalo.

In fact, thinking back over the journey just finished, which included some truly memorable experiences in New York City and at Canada's remarkable Shaw Festival, I realized that one day that particularly stands out was spent in neither place.

It began one Friday morning in a rented car driving down the Niagara Parkway along the Canadian side of the river, and right there you've got the first word in favor of the Buffalo area. A good two-lane road with green lawn to the right and green lawn to the left, neat houses with farmland behind them on one side, the great river sometimes only a few feet away on the other—it is an unusually pleasant place to drive a car.

And pretty soon you come to Niagara Falls, and that's the second reason for going to Buffalo.

I don't know what I can tell you about the falls. Or rather, I don't know how to tell you. All the glib vocabulary of the reviewer falls flat before them. Awesome? Grand? Magnificent? I'd be embarassed to use them. This fact of nature puts in proper perspective the vaunted human ability to use language. I'll just say that if you've heard that the Canadian side is the best place to view the falls, that's probably right. Drive past

and upstream a few hundred yards, and walk back along the bank. When you reach the falls and stand at the stone balustrade above them, the western end of the great horseshoe-shaped torrent pouring over the edge is only about 20 feet below. It is a sight to put you in your place.

On to Buffalo itself, which is about 50 miles south of Niagara-on-the-Lake, down the Parkway. The main reason I was driving to Buffalo was to visit the Albright-Knox Art Gallery, which I knew to have a great reputation for modern art.

Architecturally, it is a strange partnership—a grand Greek-revival temple built at the turn of the century alongside a recent one-story long box of black glass in the most severe modern manner. But it's the insides that count, and they're wonderful. The main modern collection is in the long box, a handsome interior broken up into corridors and rooms which surround a sculpture garden. The collection is particularly strong in modern Americans and has some notable contemporary work, including a marvelous "Mirrored Room" by Lucas Samaras, a box constructed entirely of mirror panels, about 10 by 8 feet by 8, with a table and a chair (also made of mirrors) inside. You take your shoes off to walk inside and it's better than the Fun House.

In the upstairs part of the Greek temple there were some huge paintings by the likes of De Kooning and Pollock, a room of Gainsborough, Hogarth, Romney and Reynolds; antiquities; great Americans like Eakins and Homer and the primitive "Peaceable Kingdom" of Edward Hicks (the museum is full of paintings you've seen in books) and most unusual of all, a big retrospective of the paintings of the late Milton Avery, a major American painter who died almost 20 years ago and whose reputation with the general public is not nearly so large as he deserves. The tremendous outpouring of his last years—paintings of a radical, stunning, beautiful simplicity of form and color, landscapes and seascapes and figures of seated women conversing—are a kind of lesson in how a form of art can be concentrated into its esentials.

Back in the car I headed north to another place I had heard about: Artpark, on the edge of Lewiston, which sits on a bluff overlooking the Niagara gorge where the falls used to be 12,000 years ago, seven miles downstream from where they are now. Artpark turned out to be the biggest surprise of all.

It may, in fact, be unique. Created by the New York legislature 10 years ago, it sits on 200 acres above the river. It is designed to be a place where art and the public may interact, and in the seven hours I spent there, I came to think it is succeeding remarkably at doing just that.

The lower part of the park contains a handsome theater and concert hall, solid brick with a rear wall that is pulled up for the benefit of people who sit on the lawn in back. There are 2,400 seats inside. It's a classy place, and the entertainment covers a remarkable range: professional shows produced by the park (this summer, "Hello, Dolly," "Carousel," "Rigoletto," "Elektra"); visiting dance companies, the Buffalo Philharmonic (I heard Julius Rudel conduct a program of Brahms and Wagner); stars of folk, rock, jazz and country music.

There is a charge for these shows ($8 top). The rest of the park is free. And it's the rest of the park that is probably unique in America.

Every summer Artpark pays a large number of artists $150 a week to come here and work. They have a free hand to create what they want and afterward it belongs to them, although some of the art, like the big steel flying platform that Owen Morrel put up over the edge of the gorge in 1980 and called "Omega"—I climbed the stairs and stood on its ultimate grid, but I hung onto the railing pretty tightly—are left in place in the park.

This year, 51 artists from across the United States and Canada have been invited to work here during the nine weeks the park is open. Opening week, the first group was busy with all sorts of projects—glass blowing and metal sculpture, fabric and ceramics, oil painting and, most interesting of all, a 91-foot-long wooden "house," with 14 modular rooms that Brooklyn artist Vito Acconci is building in a long trench on the upper plateau; its retractable Astroturf roof sections will be at ground level.

Artpark is for kids, too: mimes and jugglers and acrobats; the chance to make "line sculptures" from colorful pipe cleaners, to talk to the artists; I saw one boy with a brush, helping with a painting. There are storytelling sessions down in the green wood in little natural amphitheaters. There's even a place to fish.

Last summer, 500,000 people came.

"We're a blue-collar area," said Jeanne Gunby, the friendly, helpful staff member who took me in a golf cart to some of the farther places, this hot, windy day. "A lot of people who might not go to the Albright-Knox will come here. We have had some who thought it was a theme park—looking around for the rides, you know? But it's a place where everybody can have fun, ask questions, see art being made. We don't do any explaining; the artists have to handle the questions. Most of them do all right at that, even if it slows them down a little, compared to working in a studio."

I drove back to my hotel across the river feeling that Buffalo had been vindicated.●

HE LIKED PEOPLE, AND THEY LIKED HIM

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. COELHO. Mr. Speaker, the people of the State of California, and particularly those in the San Joaquin Valley, have lost a great friend with the passing of John E. Thurman, Jr. Although John will probably be best remembered for his work on agricultural issues, there is no question that he will be remembered by people in all walks of life. Senior citizens will remember him for his unfaltering fight for them, and students will remember him for his work on educational issues. In fact, John Thurman had a positive impact on many people.

John Thurman loved life and lived it to the fullest. And, as the following article by Dick LeGrand of the Modesto Bee states, "He liked people, and they liked him". John will be missed, but I know that all who knew John, including his political foes, will have fond memories of him. I am pleased to be able to count myself among one of John's friends, and I offer my condolences to his wife, Julie, and their children.

HE LIKED PEOPLE AND THEY LIKED HIM

[Editor's note: As political writer for the Bee for 12 years before assuming his present position, Dick LeGrand dealt frequently with John Thurman.]

(By Dick LeGrand)

A lot of us are going to miss John Thurman.

He was somebody special and in one way or another he touched most of our lives.

He helped people and made them happy, not only as a school board member, supervisor and legislator, but in his private life as well.

Even if it is a time for tears, it's not a time to forget how he carried hope and laughter wherever he went.

He liked people and just about everybody who met him liked him too.

Even when he wasn't campaigning he tried to round up people out of habit.

"Whenever I'm driving along and see more than three cars parked in front of a place I go in and ask why I wasn't invited," he used to crack.

He seemed to know everybody, and once he met someone he seldom forgot the person's name.

In 1970, shortly after being elected to the Stanislaus County Board of Supervisors, he walked into a restaurant for a night meeting of a government association and said hello by name to all of the kitchen staff and waitresses, each of the four couples in the dining room and all of the people in the bar, including two truck drivers from Oregon who were in the cattle hauling business.

And he knew every city council representative from the towns around Modesto when he got into the meeting room.

After a couple of years in the Assembly, his reputation for knowing voters in his district grew into a legend.

When a Democratic campaign worker in 1978 warned that the Republicans had a chance of beating Thurman, another Democrat responded, "You know John, he'll slog through every barnyard and kick in every door to get to people."

Thurman never was an elegant speaker, but he never had any trouble communicating. The people knew what he was saying, even when reporters weren't so sure.

He knew how to get publicity as a politician, like the time he fought for Lupe Pulido's right to serve her home-canned hot peppers at the former Able and Lupe's restaurant on 9th Street.

The peppers were scorchers and the health department said her home canning didn't meet specifications. Thurman, who liked to eat at the restaurant, saw a chance to help a constituent and get a mention in the story. So he headed for the restaurant, TV crews trailing in his wake.

"You just wait for the little red light on the camera to come on, do whatever you're going to do and when the light goes off it's all over." Thurman said later. "The light went on, I popped a pepper in my mouth and started to chew. The damned light didn't go out and the inside of my mouth was frying. I had to keep smiling and when they finally turned the camera off I thought my teeth had melted."

Former Gov. Jerry Brown, no slouch at publicity himself, thought it was worth it. "John Thurman can get more publicity with hot peppers than I can get from tax reform," he said.

Thurman got more mileage out of a smile than most people, too, because his smile came from the heart.

It's a smile we're going to miss.●

JOB TRAINING

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, August 3, 1983 into the CONGRESSIONAL RECORD:

JOB TRAINING

What kind of job training does one give a fifty year old steel worker who has lost his job yet does not want to move his family out of the steel town? How about a twenty-one year old high school drop-out who has never held a job? As record unemployment rates continue, so does the debate about the best way to retrain workers.

Even after the economy has recovered from the recession, disadvantaged workers and dislocated workers are still likely to have trouble finding jobs. Disadvantaged workers include low-income individuals with little work experience. Dislocated workers are skilled workers who were previously employed but have been thrown out of work by structural economic change.

The Job Training and Partnership Act of 1982 (JTPA), scheduled to take effect October 1, 1983, sets up a major new employment and training system. The act provides for state and locally administered job training, and assistance for job search and job relocation for both disadvantaged and dislocated workers. The JTPA also authorizes federally administered aid for severely disadvantaged youth. In addition to the JTPA, the Targeted Jobs Tax Credit provides wage subsidies in the form of tax credits, to employers hiring disadvantaged workers.

Disadvantaged workers have usually relied on job search assistance, wage subsidies, and training.

Evidence from past programs suggests that job search assistance, while the least costly to provide, is only helpful to people with at least minimally marketable skills. The success of wage subsidies also depends on workers' being at least minimally attractive to employers. Training, though considerably more expensive, is necessary for most disadvantaged workers. The most successful federal training program is the Jobs Corps, an intensive residential program involving both remedial and vocational education. Because the participants are severely disadvantaged, however, the cost per participant of $30,000 is significantly more than the cost of other programs.

Built into the 1982 law was a completely new program directed at dislocated workers. Unlike disadvantaged workers, dislocated workers are on the unemployment rolls because their jobs have disappeared, not because they never had the qualifications to obtain employment. A recent study estimates that in January 1983, this group comprised about 20% of all the unemployed.

Assistance with relocation and job search are the cheapest forms of help for dislocated workers. Yet, many of the workers who receive this assistance have specific skills which are not readily transferrable, and they must receive training to acquire new skills that are in demand. As in the case of disadvantaged people, dislocated workers have found training programs to be the most helpful in getting them jobs.

A major problem in designing any training program is selecting the skills to be taught. It is hard to ensure that skills taught match skills needed in the labor market. Furthermore, there may simply be no jobs available in a particular town no matter what skills the job seeker has, and relocation is often undesirable for workers with families. The JTPA strictly limits the funds that can be used for non-training expenses. This addresses the major criticism of the previous job training program, that workers were simply receiving unemployment benefits, not genuine training. On the other hand, the JTPA limit has raised questions about how you put a person on a training program when he's out of work and has nothing to live on.

Job training is also difficult because projections of future trends in employment are still based on assumptions, not fact. One reason for this is that the United States is the last major industrial country in the world to have no compulsory reporting of job vacancies. We literally do not know how many jobs are now open and how many will be open in the next year or two. West Germany, Belgium, and France all have compulsory reporting systems, and so they know what jobs need filling and what training needs to be undertaken. These countries use federal funds to train and retrain about 2 percent of their labor force annually. In contrast, all the retraining programs in the United States have never helped more than 0.1 percent to 0.5 percent of our labor force in any single year.

There are a number of new ideas on ways to improve our job training programs. For dislocated workers in particular, state unemployment insurance laws should be modified to encourage training and education, while avoiding measures that penalize people who are unable to work. Another idea that is gaining in popularity is the Individual Training Account. This account would be similar to the Individual Retirement Account in concept, but it would take contributions from the worker and his employer together. Contributions would accumulate while the worker was on the job. The dislocated worker could then draw on his account, receiving a voucher to pay for education, retaining, or relocation. His account could be linked to the unemployment insurance system by a requirement that he draw on the funds after collecting unemployment benefits for a certain time.

The United States Employment Service serves as a labor exchange for people seeking work and for employers with job openings. The JTPA funded the Service, but concentrated greater resources upon the need of hard-to-place job seekers. This was a good first step, but greater effort should be made to expand use of the Service by job seekers and employers alike.

Unemployment remains a major challenge facing the country today. The recovery will be sustained only if productivity increases, and productivity will increase only if we are successful in expanding job training. Only by insuring that every person has the opportunity to work, will we maximize our country's great economic potential.●

FEDERAL ANNUITY AND INVESTMENT REFORM—THE FAIR PROGRAM

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. ERLENBORN. Mr. Speaker, today I am introducing a comprehensive legislative package to provide the framework for a national debate on needed adjustments in the various Federal retirement-related entitlement and pension programs.

Over the past few years numerous reports dealing with post-retirement cost-of-living adjustments (COLA's) and Federal pensions generally have been issued by several Presidential commissions, the Congressional Budget Office, the General Accounting Office, the Congressional Research Service, and other study and research organizations outside Government. A repeated theme in these reports is the need to take a long-term comprehensive view—that is, the need for a rational and financially sound national retirement income policy. One of the key elements in bringing about such a policy is the extension of social security coverage to Federal workers. The cornerstone of this policy is now in place as a result of Congress having adopted via the omnibus social security legislation (H.R. 1900) the recommendations of the National Commission on Social Security Reform to place all new Federal workers under the protection of the Nation's basic retirement system.

In addition to universal social security coverage, the various studies have focused on retirement income goals and benefit adequacy, retirement ages, equity—as between high- and low-wage workers, long- and short-service workers, men and women, Federal and non-Federal workers, and different occupational classes, disparities in disability programs, inflation and cost-of-living adjustments, strengthening individual retirement savings efforts, and the adequacy and affordability of program financing, for example, the policies needed to avoid imposing insecurity on future retirees and impossible funding burdens on future working generations.

Those who have studied the Nation's retirement systems stress that new policies should be set not by taking narrow, shortsighted approaches to retirement issues but by fully recognizing the impact that retirement decisions have on the economy as a whole and the implications that today's retirement decisions will have for the decades ahead. Retirement policies should not create financial burdens which will become unacceptable and unsupportable by future workers, but

instead should encourage, savings, investment, and productivity in a fiscally sound manner. This is necessary if our Nation is to achieve noninflationary economic growth and stability with respect to the various segments of the economy and their related institutions.

My three-bill legislative package builds on the themes of the above-mentioned studies by taking a long-term and across-the-board approach in establishing a "FAIR" retirement income policy in connection with all Federal retirement programs. The FAIR acronym stands for my Federal annuity and investment reform program. The FAIR program sets forth the necessary blueprint for building on the strengths and correcting the weaknesses of the present system of providing retirement income.

The first bill (H.R. 3751) would bring about greater equity and defensibility in the level of Federal employee pensions by limiting future annual postretirement COLA's to 60 percent of the plan COLA increase for those benefits which exceed the maximum retirement benefits payable to new retirees under social security—about $10,000 per year in 1984—when an employee's benefits under all federally sponsored retirement and disability systems are combined.

The second bill (H.R. 3752) in the FAIR program, first, establishes a defined benefit and thrift plan arrangement comparable to those found in the private sector to provide supplementary benefits for those Federal employees newly covered under social security; second, conforms the provisions of the present civil service retirement system in a manner so as to minimize future contribution and benefit differences for present employees as compared with those employees newly covered under social security; third, extends the accrued benefit protection applicable to qualified private plans to the benefits under the civil service retirement system (CSRS) and conforms the provisions of the CSRS and the new Federal thrift plan to the standards required under the Employee Retirement Income Security Act of 1974 (ERISA); fourth, extends the full protections and standards of the Employee Retirement Income Security Act of 1974 (ERISA) to the pension plan or plans established by the U.S. Postal Service for those employees newly covered under social security and excluded from coverage under the civil service retirement system; and fifth, provides for social security coverage for current civil service employees who elect coverage under both social security and the revised provisions of the civil service retirement and disability system applicable to new employees.

The so-called windfall reduction under social security would be made inapplicable to employees electing such coverage in cases in which post-1983 service is 10 years or more.

The third bill (H.R. 3753) would bring greater long-term stability to the financing of all Federal retirement plans, including social security, by providing a mechanism for limiting future annual postretirement benefit increases (COLA's) to the lesser of the increase in national wages or the increase in the consumer price index (or other automatic COLA mechanism currently applicable in the plan.

EXPLANATION OF FAIR

H.R. 3751—COLA EQUITY

The patchwork structure of Federal pension programs has come under more intense scrutiny in the last decade as the growing costs of these programs have become amplified as a result of high and, at times, double-digit inflation. Both civilian and military pensions have been broadly criticized as being overgenerous and unaffordable. A recent Washington Post editorial, "Facts About Federal Pensions," summarizes that "Federal pensions cost so much because they have two features unmatched in the private sector—retirement at age 55 and full inflation protection."

This bill is intended to bring about greater equity and defensibility in the level of Federal employee pensions by limiting post-1983 retirement cost-of-living adjustments (COLA's) to 60 percent of the COLA increase for those benefits exceeding the level of the maximum retirement benefits payable to a new retiree under social security—about $10,000 per year in 1984—when an employee's benefits under all federally sponsored retirement and disability systems are combined.

The criticisms of Federal military and civilian pensions—and, therefore, of Federal employees generally—will continue until the faults in the basic design of the present system are corrected. The COLA equity bill takes a major step in making the necessary corrections at least with respect to retirement COLA's. Other provisions in my FAIR legislative package will help correct other inequities related to early retirement, and short-service penalties which at present particularly disadvantage low-paid workers and women.

The fact that retirees under present law can draw combined military and civilian retirement income of $25,000, $35,000, $45,000, $55,000—even in rare cases over $60,000—and still receive full COLA's equal to 100 percent of the Consumer Price Index (CPI) is as much an affront to just plain good sense as it is to the already overburdened Federal taxpayer. The uncapped COLA has created an embarrassment of riches to the minority of Federal retirees who have become well heeled as a result of the present inequity.

It is clear that the current structure is in need of change when retirees can ultimately draw more in retirement than their on-the-job replacements will earn while working. The present COLA formulation leading to this result has also dramatically increased the spread in the dollar amount of pensions which employees retiring at different pay levels initially receive. This built-in "rich get richer" principle can be illustrated—when considering past double-digit rates of inflation—by comparing first, the $100 per month increase accruing to the typical retiree with, second, the $6,000 per year increase—equal to one-half of the total pension of the average retiree—going to the fortunate few drawing $60,000 Federal pensions.

If the provisions of H.R. 3751 had been in effect in the past, the spread between high- and moderate-income retirees would have been kept more in check and the retirement income of Federal employees retiring with long service and above average wages would not have spurted ahead of the earned income of their counterparts in the active work force. The provisions of the bill are prospective in application, would reduce no retiree's pension, but would serve to moderate future benefit increases for those persons retiring at above average wage levels.

The Christian Science Monitor in its editorial "Rethink Federal Pensions" states that "retirement inequities between the public and private sectors should no longer be tolerated." The provisions of H.R. 3751 would bring the COLA's under the current Federal systems more in line with leading private pension fund practices. The present cost-of-living adjustments—equivalent to the 100-percent CPI adjustment found under social security—on combined pensions under the social security maximum retirement benefit level are maintained. To do otherwise would place Federal retirees in a less advantageous position than persons receiving social security alone. However, pensions above the social security maximum retirement benefit level would be adjusted at 60 percent of their former rate. This is only fair inasmuch as the average cost-of-living wage increase agreed upon in private sector collective bargaining has averaged about 60 percent of the increase in the CPI. Many private and State and local government retirement systems which do have automatic postretirement COLA's cap such increases at 3 to 60 percent is the percentage benefits would increase under such plans if a long-term inflation rate of 5 percent is assumed.

In addition to restoring a measure of equity in the pensions of Federal workers as compared with non-Federal workers, the 60 percent COLA provision would aid greatly in controlling

the rapidly escalating unfunded liabilities among the various Federal pension systems. As a result of legislation which I authored (Public Law 95-595) a more realistic actuarial assessment of all Federal retirement systems is now possible. The ERISA-like annual financial reports required of all Federal plans show that their combined unfunded liabilities (exclusive of social security) exceeds $1 trillion, a debt which will have to be paid but which is in addition to the already recorded trillion-dollar-plus national debt. Over $100 billion of this pension debt has been created in just the past few years under the civil service retirement system alone. Introducing the 60 percent COLA escalator factor will help in controlling the level of future unfunded liabilities and help restore the public support that is required if the taxes necessary to fund future benefits are to be supplied in sufficient quantity to meet full expectations.

The Christian Science Monitor summarizes the issue well:

> In calling for federal pension reform, we are not suggesting that federal (employees) be in any way disadvantaged or financially penalized. What is paramount, rather, is that public employment not be made the vehicle for special advantages denied Americans as a whole and thus be regarded as a source of easy income because the American taxpayer pays for it.

My proposal to limit future COLA increases on benefit levels above the social security retirement maximum takes a necessary step in removing the above mentioned unfair advantages of Federal versus non-Federal workers and would help restore a new measure of financial health to the major Federal civilian and military retirement systems.

H.R. 3752—THE FEDERAL ANNUITY AND INVESTMENT REFORM ACT (FAIR)

The reports of the Presidential commissions, and other groups that have studied pension and retirement issues over the past few years have suggested major changes in Federal retirement policies. With the inclusion of new Federal workers under social security beginning in 1984, it is now time to move forward with legislation to bring about a more rational and defensible retirement structure for all Federal workers, both new and old.

As a leading supporter of the private pension system and ERISA standards, I believe much can be learned from the private system in constructing a reasonable and financially sound Federal retirement structure. It is from this background that I have developed a comprehensive legislative program, the Federal Annuity and Investment Reform Act (or FAIR).

In brief the FAIR program, first, establishes a defined benefit and thrift plan arrangement comparable to those found in the private sector to provide supplementary benefits for those Federal employees newly covered under social security, second, conforms the provisions of the present civil service retirement and disability system to minimize future differences in contributions and benefits for present employees as compared with those newly covered under social security, third, extends the accrued benefit protection applicable to qualified private plans to the benefits under the civil service retirement system (CSRS), and conforms the provisions of the CSRS and the new Federal thrift plan to the standards required under ERISA (the Employee Retirement Income Security Act of 1974), and fourth, provides for the voluntary election by current Federal workers to be covered under social security and the provisions of the CSRS and Federal thrift plan applicable to new employees.

The objectives of the FAIR program are consistent with those set forth in the March 1980 report of the universal social security coverage study group (chaired by Joseph W. Bartlett) which also studied retirement options for Federal employees covered under social security. The following objectives are also fully compatible with the views expressed by the Speaker, THOMAS P. O'NEILL, JR., the chairman of the Committee on Post Office and Civil Service, WILLIAM D. FORD, and the chairman of the Committee on Ways and Means, DAN ROSTENKOWSKI, in their February 18, 1983 Dear Colleague letter dealing with social security coverage and the future changes to the civil service retirement system necessitated by social security coverage.

The purposes and objectives of FAIR are:

First, to provide Federal employees with a supplemental staff retirement program coordinated with social security which is comparable to good retirement programs operated by major employers in the private and State and local government sectors in order, first, that the Federal Government will remain competitive with other employers with which it must compete for qualified employees, and second, that retirement program and social security benefits combined will provide a reasonable level of benefit adequacy at all preretirement income levels;

Second, to provide Federal employees with enhanced portability of retirement benefits which will permit greater flexibility in retirement planning and which will instill in the system a greater measure of equity as between short-service and long-service employees;

Third, to strengthen the financing of the civil service retirement and disability system by maintaining the one system for both old and new employees, by requiring full dynamic normal costs to be contributed on behalf of new employees as well as current employees, by requiring full employer contributions to amortize the initial unfunded liability over 40 years as a level percentage of payroll, and by providing the opportunity for enhanced investment earnings of the system;

Fourth, to assure Federal employees that their accrued pension benefits will not be diminished by extending to the civil service retirement and disability system the requirement added by ERISA which prohibits private pension plans from reducing accured pension benefits;

Fifth, to encourage individual retirement savings and to promote flexibility in retirement planning by providing to all Federal employees access to individual thrift retirement accounts (TRA's) in which they have a free market choice of investment and in which there is 100 percent immediate vesting of employee contributions and for new employees employer matching contributions up to 3 percent of basic pay;

Sixth, to restore the defensibility of Federal employee retirement benefits and maintain the affordability of the civil service retirement and disability system by providing for a more rational benefit structure, particularly as it relates to early retirement and postretirement COLA's;

Seventh, to provide a revised retirement program structure which is not disruptive to the present system of providing benefits, which is relatively simple to administer, and which is easily understood by employees; and

Eighth, to provide for comparability between the retirement system features (taking into account social security, civil service retirement, and the new Federal thrift plan) for old and new employees with respect to; first, contributions made by and benefits received by such old and new employees, and second, the employer normal costs for all retirement and disability benefits computed on a dynamic basis for such old and new employees.

As a result of FAIR, an additional, direct benefit will accrue to the financial health of the social security old age, survivors, and disability trust funds. Since current employees may make an irrevocable election to come under both social security and the provisions of the CSRS and Federal thrift plan applicable to new employees, an additional employee and employer contribution of 5.7 percent of pay for each employee making the election will be made to the social security trust funds beginning in 1984. A high percentage of current employees can be expected to make the election on account of the following considerations—the combined contribution rate for employees earning in excess of the social security maximum taxable wage base would be somewhat less than their current 7 percent rate, so-

called windfall social security reductions would be restored for current employees covered under the new system for 10 years or more, in most cases disability benefit levels would be increased, portability under social security would be available, the 3 percent employer matching contribution under the Federal thrift plan would be available, the new social security leveling option would be available, and all benefits already accrued would be protected.

In general, enactment of the FAIR program will enhance the financial soundness of both the social security and civil service retirement trust funds and will instill into the system of Federal benefits new elements of equity, comparability, portability, and affordability.

TITLE I OF FAIR—FEDERAL THRIFT PLAN

In designing a new supplemental retirement program for Federal employees newly covered under social security, both defined contribution and defined benefit approaches were considered (the present CSRS is of the defined benefit type). Neither approach standing alone was considered adequate to simultaneously meet the many objectives outlined above. In addition a defined benefit plan (if it is to meet ERISA standards) cannot, because of the redistributional aspects of social security, be devised to totally replicate current CSRS benefit replacement levels in every individual circumstances. A combination of both approaches, however, was found to provide the necessary mix of benefit adequacy, equity, flexibility, portability, and affordability.

The Federal thrift plan acting as a defined contribution supplement to social security and the basic defined benefit civil service retirement arrangement provides:

First, flexibility in retirement planning—for example, funds for earlier retirement or COLA supplementation;

Second, individual incentive for savings and capital accumulation;

Third, a source of funds for auto, mortgage, and educational loans;

Fourth, individual employee choice in selecting investment and annuity programs offered by qualified financial institutions, and

Fifth, portability—through permitted rollover of employee contributions and employer distributions from the civil service and other pension plans, and the continued investment by the individual of thrift retirement account accumulations after the termination of Federal employment.

TITLE I—FEDERAL THRIFT PLAN

Title I of the FAIR Act adds new Subchapter IV, Sections 8361 through 8370—the provisions of the Federal Thrift Plan—to Title 5, U.S.C.

Section 8361—Coverage and definitions

The employees and officials in all branches and agencies of the Federal Government (including civilian, foreign, postal, judicial, congressional, and military service) are immediately eligible to participate on a voluntary basis in the Federal Thrift Plan (FTP). The one exception to the general coverage rule excludes employees already covered under similar defined contribution plans (for example, employees participating in the defined contribution plans maintained by the Federal Reserve Board and the Smithsonian Institution).

Under the rules establishing the Federal Thrift Plan, plan participants may establish one or more Thrift Retirement Accounts (TRAs) in a "qualified investment program" maintained by an "investment or financial institution".

Employees who participate in the Federal Thrift Plan by establishing and contributing to Thrift Retirement Accounts (TRAs) during their working years continue, even after termination of federal employment, to be considered plan "participants" who direct the investments in their TRAs. Upon the death of a participant who was maintaining one or more TRAs who was an active or separated employee, the designated beneficiary with respect to each TRA is given the same status as a "participant" who may elect to continue such TRAs and direct the investments in such accounts (or, in the alternative elect a lump-sum or survivor annuity).

The establishment of the Federal Thrift Plan is provided for under section 8362.

Section 8363—Contributions and transfers among TRA's

Annual employee contributions: Employee participants may contribute up to 10% of basic pay each year to Thrift Retirement Accounts of their choosing. Employing agencies would deduct from basic pay the amount or percentage of pay elected by the employee to be withheld and transmit such amounts to the TRA designated by the employee. Employees could change their TRA designation once a year (or more often if permitted by regulations).

"Catch-up contributions": As permitted under current law applicable to private plans, employees who do not make the full 10% contribution in a year may make the balance of such contributions in any later year.

Federal employer contributions: Each year the employing agency will match on a dollar for dollar basis the actual amount of employee contributions made in such year, up to a maximum amount equal to 3% of the basic pay of such employee. Employees newly covered under Social Security (termed post-83 employees) and current employees electing post-83 status are eligible for matching employer contributions. Employees newly hired or employed after a break-in-service become eligible for matching employer contributions after completing one year of service. Employing agencies transmit the matching contributions to the TRA then currently designated by the employee. The employee has an immediate and fully vested interest in the amount of employer contributions made to his or her account.

"Rollovers" among TRAs: A plan participant while designating only one TRA at any one time to receive employee and employer contributions, may establish one or more additional TRAs and transfer some or all of the amounts in any TRA to any other TRA. For example, a participant might initially designate a particular "money fund" as the TRA to receive employee and employer contributions and periodically transfer amounts in such an account to other TRA programs (e.g. involving stocks, bonds, certificate of deposits, mortgages, annuities or other forms of investment) offered by the same or another financial institution. From time to time the participant may wish to transfer funds for a TRA which allows the employee to make a home, automobile, or educational loan within the guidelines set forth under the Federal Thrift Plan. At retirement the participant may wish to rollover his or her thrift retirement accumulations into a TRA offering a fixed or variable annuity.

While the terms of the Federal Thrift Plan do not restrict the number of TRAs a participant may maintain or the timing or frequency of transfers among a participant's accounts, the financial institution offering a TRA program is not prohibited from establishing such restrictions or instituting penalties for early withdrawal or transfer.

"Rollovers" from other plans: Lump sum distributions to Federal Thrift Plan participants from other tax-qualified private or governmental pension, profit-sharing, thrift, etc., plans may be transferred and deposited to the credit of a TRA selected by the participant. If an employee who separates from Federal service elects to withdraw his or her accumulated employee contributions from the defined-benefit Civil Service Retirement and Disability System, the total amount of such accumulation is automatically transferred to a Thrift Retirement Account of the employee's own choosing. The availability of these rollover provisions afford employees with a new means of pension portability and a deferral of taxes on such accumulations until later distributed.

Section 8364—Information to participants

The Board of the Federal Thrift Plan is required to prescribe regulations under which participants would be allowed to receive information about the particulars of thrift retirement programs offered by the various financial institutions in order that such persons may make informed investment choices among such programs.

Section 8365—Qualified investment programs

In order for a TRA program offered by an "investment or financial institution" to be eligible as a "qualified investment program" under the Federal Thrift Plan, it must meet the following requirements. First, the program must be operated in accordance with the ERISA exclusive purpose rule of providing benefits to participants and beneficiaries and defraying reasonable administrative expenses.

Second, the program must meet any participant safeguards set forth in regulations, including the ERISA fiduciary standards requiring prudence and prohibiting self-dealing. The following fiduciary and enforcement provisions of ERISA are incorporated and made applicable to the Federal Thrift Plan by reference (sections 401(b), 404, 405, 406(b), 408, 409, 410, 413, 504, and 502(a)(1)(B), (a)(2), (a)(3), (a)(5), (e), (f), (h), (i), (k)).

Third, participating financial institutions must at least annually provide participants with information on the status of their TRAs (the Board also has authority to receive such information, generally in summary form for all TRAs maintained by each participating financial institution).

Fourth, participating financial institutions would be required to provide participants with ERISA-like "summary plan descriptions" which describe the general features of the Federal Thrift Plan and the

particular features of the TRA programs offered by such an institution.

Fifth, participating financial institutions are prohibited from distributing amounts to participants unless (1) the participant is eligible for disability or retirement benefits under another Federal Government pension plan or workers compensation program, (2) the participant has been separated from federal service for at least 31 days, or (3) the participant has attained age 59½. Upon the death of a participant, the designated beneficiary or beneficiaries are eligible to receive distributions from the participant's TRAs. Regulations of the Board would provide for procedures by which participants and beneficiaries would obtain written evidence of their eligibility for TRA distributions which in turn could be presented to and automatically accepted by the financial institution from which a distribution is requested.

Financial institutions offering qualified investment programs may (but are not required to) provide loans to participants from their thrift accounts for purposes of, (1) purchasing an automobile, (2) making a down payment on a home or a home improvement, (3) meeting the educational expenses of any member of the family, (4) meeting general expenses in the case of hardship, or for any other purpose if the participant is otherwise eligible for a cash distribution (e.g. in the event of retirement, disability, separation, or death). In order to encourage the maintenance of TRAs basically for retirement purposes, the amount of a loan is limited (1) to the amount of the employee's own contributions and (2) with respect to employer contributions and investment earnings, to the tax-qualified plan limits described in section 72(p)(2) of the Internal Revenue Code (i.e. $50,000 loan limit with the requirement of a 5 year repayment schedule, except in the case of home loans). The interest rate to be applied to such participant loans is equal to the revised interest rate used to determine the investment earnings on the assets of the Civil Service Retirement and Disability System.

Under the Federal Thrift Plan a participant has a 100% vested interest (i.e. a "nonforfeitable right" as that term is defined under ERISA section 3(19)) in the amount in each of the TRAs maintained for such person regardless of whether the source of the amount is from employee contributions, employer contributions, investment earnings, or rollover transfers from other plans.

In accordance with regulations of the FTP Board, the "investment or financial institutions" that may participate in the Federal Thrift Plan by offering "qualified investment programs" include (but are not limited to) banks, trust companies, savings and loan associations, credit unions, registered investment companies (mutual funds), securities broker-dealers, insurance companies, and real estate trusts.

The qualified investment programs offered by such institutions may include any investment generally permissible under a private tax-qualified pension plan (or more familiar to some would be the investments offered by such institutions with respect to individual retirement accounts—IRAs). By way of illustration such investments may include, but are not limited to stocks, corporate bonds, Treasury issues, certificates of deposit, time deposits, mutual funds, mortgage funds, real estate funds, annuities, etc.

Section 8366—Enforcement

In order to enforce the fiduciary and other standards applicable to investment programs, the Board of the Federal Thrift Plan may exercise the investigative and civil enforcement authority similar to that provided the Secretary of Labor under ERISA.

The Board may utilize the facilities and services of any Federal agency to carry out its functions.

Section 8367—Audits

The ERISA-like audit and annual report requirements under Chapter 95 of Title 31, U.S.C. (as originally enacted under PL. 95-595, the Federal Pension Plan Reporting and Disclosure Act) are applicable to the Federal Thrift Plan.

Section 8368—FTP Board

The Federal Thrift Plan Board is composed of the Director of the Office of Personnel Management (or the Director's delegate) who serves as Chairman, the Secretary of the Treasury (or the Secretary's delegate), and the Director of the Office of Management and Budget (or a delegate).

Under section 8369, the Board is authorized to prescribe any regulations necessary to carry out the provisions of the Federal Thrift Plan.

Section 8370—Tax qualification

Comparable to the situation for private plans, the Federal Thrift Plan is considered to be a tax qualified plan which meets the requirements of section 401(a) of the Internal Revenue Code and is considered to be a tax qualified trust which is exempt from tax under section 501(a) of such Code.

While employee contributions are made to the Federal Thrift Plan on an after tax basis (and are not again taxed when distributed), the remainder of a participants' interest in a TRA is taxable at the time of distribution in the same manner as a distribution from a private tax qualified plan (i.e. as ordinary income unless distributed as a lumpsum in which case a special 10-year income averaging method applies; special tax rules also apply in the case of annuities). Taxes on all investment income earned under a participant's TRA are, therefore, deferred until the time they are actually distributed.

Section 8371—Appropriation

This section provides that appropriations be made to each employing agency to meet the employer matching contributions.

Effective Date—Federal thrift plan

The provisions of Title I establishing the Federal Thrift Plan are effective on the date of enactment, and employee and employer matching contributions to Thrift Retirement Accounts (TRAs) would be allowed beginning January 1, 1984.

TITLE II—AMENDMENTS TO CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM

PART A—COVERAGE

Section 201—Definition of post-83 employee

Employees (including elected and appointed officials) currently covered under the Civil Service Retirement and Disability System (including those hired before mandatory Social Security coverage begins on January 1, 1984) continue to accrue pension benefits under their old CSRS formula (e.g. for general employees 1.5% per years of service for the first 5 years, 1.75% for the next five year, and 2% thereafter; special categories have varying accrual rates).

Except for the special categories, employees subject to CSRS hired in 1984 or later and who are covered under Social Security by reason of the 1983 Social Security Amendments are defined to be "post-83 employees' and for years of service after 1983, would accrue CSRS pension benefits (in addition to Social Security) at the rate of 1.15% for each such year of service.

Unless they make an irrevocable election to be treated under the new provisions for "post-83 employees", persons employed in the special category positions (whether first employed before or after 1983) would (1) continue to contribute to CSRS under present rules (i.e. their contributions would not be reduced to the 1.3% level as for post-83 employees) and (2) accrue CSRS pension benefits under the currently applicable formula. The special categories include law enforcement officers, firefighters, air traffic controllers, congressional employees, judges, all elected officials and those categories of employees hired before 1984 who are to be covered under Social Security as of January 1, 1984 (e.g. certain Executive Schedule and noncareer appointees in the Senior Executive Service).

Any current employee who is not automatically a "post-83" employee may make an irrevocable election to be treated as a post-83 employee. The election of such post-83 status would not affect any employee's past contributions or benefit accruals, but would change the level of future contributions (1.3%) and future CSRS benefit accruals (1.15%) with respect to any years of post-83 service performed after the election is made. Any employee making such an election would also be automatically covered under Social Security as of the time of the election (this is accomplished as a result of an amendment to the Social Security Act contained in Section 303). Positive results with respect to both employee benefits and the financing of the Social Security and Civil Service systems occur as the number of current employees electing post-83 status increases. Accordingly, a number of incentives (described earlier) are contained in the FAIR legislation in order to encourage current employees to elect post-83 status.

Section 202—Exclusion of new postal workers under CSRS

Officers and employees of the United States Postal Service hired after 1983 and who are covered under Social Security are excluded from the provisions of the Civil Service Retirement and Disability System (but are included in the Federal Thrift Plan, unless covered under a new defined contribution plan established by the Postal Service). The Postal Reorganization Act gives the Postal Service full power and authority to establishing a pension program through collective-bargaining for such new employees (as well as other employees). In the future all pension and disability costs would be borne fully by the Postal Service, without indirect government subsidy, as is consistent with the independent corporate status under which the Postal Service is expected to operate. On the request of the Postal Service the Office of Personnel Management could provide for the transfer to the new postal pension plan of some or all of the benefits and related plan assets for current postal employees.

Section 203—CSRS exclusion of new employees of the District of Columbia

General employees of the District of Columbia hired after 1983 and who are covered under Social Security are excluded from coverage under the Civil Service Retirement and Disability System. This is consistent with the charter given the District of Columbia under Home Rule and will allow the District to establish a plan for general employees just as it has for police, firefighters, teachers, and judges.

PART B—CONTRIBUTIONS TO AND FUNDING OF CSRS

Section 211—Contributions

The employee contribution rate under the CSRS for "post 83 employees" would be reduced to 1.3% of basic pay with respect to service after 1983. By definition "post-83 employees" are covered under Social Security and for such persons earning up to the Social Security maximum taxable wage base the combined 1983 OASDI contribution rate of 5.7% plus the CSRS contribution rate of 1.3% equals the 7% CSRS contribution rate applicable to current employees under present law. Thus, parity is achieved with respect to the initial contribution rates for current and post-83 employees.

As provided under the 1983 Social Security Amendments, the 1984 OASDI contribution of 5.7% applicable to post-83 employees is scheduled to rise in the future—to 6.06% in 1988 and to 6.2% in 1990. Therefore, in order to maintain parity between current and post-83 employees with respect to their future contribution rates, the bill provides for the 7% contribution rate applicable to current employees to be adjusted in the future by the same percentage increase applicable to post-83 employees under OASDI. Post-83 and current employee contribution rates would, as a result, total 7.36% in 1988-89 and 7.5% in 1990 and later years.

Agency contributions would, as under current law, continue to match the level of current employee contributions, but only until regulations are in place which would require full actuarial "normal costs" to be contributed (see section 212).

Section 212—Full actuarial funding required

Under FAIR the financing and solvency of the Civil Service Retirement System and Disability Fund is enhanced (1) by maintaining the one existing Fund to provide benefits for both current and post-83 employees, (2) by requiring that employer contributions (together with employee contributions) be sufficient to meet plan "normal costs" using "dynamic actuarial" assumptions, (3) by requiring 40 year amortization of initial unfunded liabilities, and (4) by providing the opportunity for enhanced investment earning (see section 221). As a result of requiring ERISA-like actuarial funding, agency budgets will on an ongoing basis reflect realistic costs of retirement and disability benefits and any chance that the Civil Service Fund would become technically insolvent would be eliminated.

During the Social Security debate some employee groups expressed their fears that a "new" system for employees covered under Social Security would lead to the "freezing" of the present CSRS and the operation of a wasting trust, thus putting present employee benefits in jeopardy. The continuance of the present CSR Trust Fund under FAIR and the full actuarial funding of benefits for both current and post-83 employees should eliminate such fears since they would have no basis in fact.

As soon as practicable after enactment, OPM is to issue regulations requiring each employing agency to contribute to the CSRS (1) for each post-83 employee, a percentage of basic pay based on the dynamic normal cost of benefits for post-83 employees less the employee contribution rate of 1.3%, and (2) for each employee, the percentage applicable to post-83 employees as in (1) plus the rate of employer contributions to OASID (5.7% in 1984). The above contribution rates will achieve parity with respect to employer contributions for both current and post-83 employees when both Social Security and CSRS contributions are considered.

In addition to the agency and employee contributions made equal to the plan's normal cost, a Federal Government contribution is to be made to the CSR Fund each fiscal year after regulations are in place in the amount required to amortize, in 40 annual installments as a level percentage of payroll, the unfunded liabilty of the CSRS computed as of the first such year.

Federal Government contributions are also to be made with respect to any subsequent net increase in unfunded liability arising from plan amendments, experience gains or losses, or changes in actuarial assumptions. Such contributions are determined annually on a "rolling" basis and are computed so as to be equivalent to the amount of the first installment, as if the cumulative net increase in unfunded liability were to be amortized in level installment over 15 years.

All actuarial determinations of normal cost and unfunded liability are to be made using "dynamic" actuarial assumptions which take into account future expected salary level (including general pay adjustments reflecting inflation) and post-retirement cost-of-living adjustments. This requirement differs from the present law funding basis under which "static" actuarial assumptions ignoring inflation and COLAs are used, thus resulting in the understatement of true actuarial cost levels. The "dynamic" basis is currently prescribed in connection with the actuarial valuation and disclosure of unfunded liabilities required under Public Law 95-595.

PART C—INVESTMENT OF CSR FUNDS

Section 221—Investment board

Consonant with private pension fund practice, the bill establishes a Fund Investment Board for CSRS consisting of the Director of the Office of Personnel Management (or the Director's delegate), the Secretary of the Treasury (or the Secretary's delegate), and the Director of the Office of Management and Budget (or the Director's delegate). It is the function of the Board to determine, in active consultation with the Advisory Panel on Fund Investments, the interest rate at which investments of the Fund are to be made. The membership of the Board is the same as that for the Federal Thrift Plan Board.

The Board is expected to obtain a rate of return on investments in line with private pension investment practices, as if the assets of the CSR Fund were actively managed. The rate of interest on the Treasury obligations in the Fund could not be less than the rate set under present law.

Section 222—Investment advisory panel

An Advisory Panel on Fund Investments is established to advise and assist the Fund Investment Board of the CSRS and the Federal Thrift Plan Board. The seven-member panel is drawn from among individuals generally recognized for their expertise in finance and investment generally and in private or governmental pension funds in particular.

Section 223—Tax qualification and protection of accrued benefits

Comparable to the situation for private plans, the Civil Service Retirement and Disability System is considered to be a tax qualified plan which meets the requirements of section 401(a) of the Internal Revenue Code and is considered to be a tax qualified trust which is exempt from tax under section 501(a) of such code.

Just as for private plans, the tax qualified CSR plan is prohibited from reducing the accrued pension benefits of any participant. This is accomplished by subjecting the CSR System to the provisions of section 411(d)(6) of the Internal Revenue Code.

PART D—CHANGES TO CSRS RETIREMENT BENEFITS

Unless otherwise indicated the provisions under present law relating to CSRS retirment benefits remain unchanged—for example, the immediate eligibility and five-year vesting rules continue to apply with respect to current employees as well as post-83 employees.

Section 231—Indexation of deferred vested benefits

The FAIR bill makes a number of changes with respect to the benefits for employees terminated before retirement in order to overcome the criticism often directed at the present provisions of the Civil Service Retirement System which tend to create benefit disparities favoring high-paid long-service employees while providing few, if any, benefits for shorter-service employees, lower paid employees, and employees experiencing greater job mobility because of occupational or family necessity (e.g. engineers and women). Generally, the following provisions (applicable to the CSRS benefit structure for both current and post-83 employees) instill a greater measure of pension equity and portability to the benefits of such persons: 1) Sec. 231 provides for partial indexing of the deferred benefits of terminated employees, 2) Sec. 236 provides for interest to be paid on accumulated employee contributions, 3) Sec. 235 provides for the tax-free rollover into the Federal Thrift Plan of accumulated contributions that may be withdrawn by a terminated employee, 4) Sec. 237 provides that vested benefits attributable to employer contributions are not forfeited when employee contributions are rolled over, 5) terminated employees may elect a survivor annuity at the time of termination, and 6) the availability of Social Security and the fully vested amounts in the Federal Thrift Plan provide additional elements of benefit equity and portability.

Specifically section 231 provides that the deferred annuity of an employee separating from service will be increased for each year elapsed between the year of separation and the annuity commencement date by the lesser of 1) one-half the increase in the CPI or the increase in average Social Security covered wages, whichever is lower, or 2) 2 percent. This provision does not apply in the event employee contributions are withdrawn (i.e. rolled over into an IRA).

Section 232—Reduction for early retirement

As stated in the May 14, 1983 Washington Post editorial, "Those Federal Pensions," Federal pensions are currently much better than even the most generous private worker plans together with Social Security (e.g. workers can retire at age 55 with 30 years of service on full unreduced pensions).

The FAIR bill takes a comprehensive approach to bringing about a more rational CSRS retirement structure both with respect to deferred retirement benefits (described in section 231) as well as early retirement benefits. The criticism of the Civil Service Retirement System will continue unless the present early retirement provisions are made more defensible and comparable to mainstream practices.

Therefore, section 232 provides that future retirement benefit accruals be reduced by 2% for each year actual age at retirement precedes age 65.

Current employees as well as post-83 employees would be able to retire under the same age-service provisions as under present law, but the amount of benefits based on service after 1983 would be subject to the 2% reduction factor. The 2% rule would not reduce the amount of any employee's benefit which is accured prior to 1984.

The application of the 2% early retirement factor can be illustrated as follows: (1) for a current employee retiring at age 55 with 30 years of service as of January 1, 1985 the 2% factor would only apply to the pension accrual in 1984, thus producing a benefit of 55.85% of high-3 pay (i.e. 1½% for first 5 years, 1¾% for 2nd five years, 2% for 19 years, and the 30th year accrual of 2% times the early retirement factor of 80% at age 55—100% less 2% times 65 less 55); this compares with the 56.25% benefit under present law, (2) for a current employee retiring in 1994 at age 55 with 30 years of service the 80% early retirement factor would apply to the 10 years of post-83 service, thus producing a benefit of 52.25% of high-3 pay compared with 56.25% under present law, (3) employees hired in 1983 as well as post-83 employees' retiring in the year 2014 or later at age 55 with 30 years of service would have their benefit computed as 56% times the 80% early retirement factor at age 55 or 44.8% (of course substantial employee and employer purchased benefits under Federal Thrift Plan accumulations would be available to such persons to supplement the defined-benefit CSRS pension), (4) the typical federal employee retiring at between age 61 and 62 would have post-83 accruals reduced by 6 to 8%; the benefit of such a person with 30 years of service would be 56.09% (versus the present 56.25% of high-3 pay) if retiring in 1985 and 54.65% if retiring in 1994, (5) the benefits of current and post-83 employees retiring at age 65 or later would be 100% of their accrued benefits, since the early retirement reduction factor would not apply.

It might be noted that the 2% early retirement adjustment factor is the same as the factor that currently applies to retirements under age 55. While the new 2% reduction under age 65 for early retirement is not equivalent to an "actuarial reduction," its application in combination with the post-83 benefit accrual formula (discussed in the next section) is designed to produce early retirement benefit levels comparable to the levels found in the better private sector pension plans. The effect of the early retirement reduction is also mitigated for post-83 employees choosing the so-called Social Security leveling option (see section 240) and also for those having Federal Thrift Plan accumulations which can be converted to early retirement annuities.

Section 233—Retirement accrual to be 1.15% for post-83 employee

Under the bill, post-83 employees as well as current employees electing post-83 status accrue CSRS retirement benefits at the rate of 1.15% for each year of service after 1983. The accumulated accrual percentage is applied to high-3 basic pay as is the case under present law. The retirement benefit so computed is then subject to the 2% early retirement adjustment discussed under Section 232. The accrual rates under present law continue to apply to current employees and employees in special occupational categories who do not elect post-83 status.

The following objectives were used to develop the accrual rate, the early retirement factor and other new retirement features of the CSRS as applicable to post-83 employees (who also accrue retirement benefits under Social Security):

(1) Combined retirement benefits from the revised CRS System and Social Security should, when coordinated, provide initial post-retirement income levels close to pre-retirement after tax income levels for "full-career" (30–40) years), moderate-income, employees who retire at age 65 or later. Such benefits should not be less than the benefits provided current employees retiring under similar circumstances.

(2) Post-retirement adjustments should be provided to CSR pensions in order that initial levels of retirement income provided from Social Security and the CSR System not be significantly diminished because of future increases in the cost-of-living. The adjustments should be affordable, and they should be capped for those with above average income in order to maintain the fiscal integrity of the retirement system (see explanation under section 401).

(3) The revised CSRS retirement benefit structure should provide benefits comparable to those found under good retirement programs operated by major employers in the private and state and local government sector.

(4) There should be no reductions in benefits already accrued and no unreasonable reductions in expected benefits for current employees (see section 223 for benefit accrual protection).

(5) The revised CSRS benefit structure should be more equitable than the current one with respect to long-service versus short-service employees, especially as it applies to employees with split-service and occupations requiring job mobility (also see section 231).

(6) The provisions of the revised CSRS should meet ERISA standards and not be inconsistent with Internal Revenue Service regulations concerning the "integration" (coordination) of pension benefits with Social Security.

(7) The modified CSRS should be as simple to administer as possible and not be disruptive to the present system of delivering benefits.

(8) The long-term costs to the Federal Government of the modified CSRS and the new Federal Thrift Plan plus the Government's contribution to Social Security should approximate the Government's cost (i.e. as measured by the dynamic actuarial normal cost) of the CSRS with respect to the retirement benefits for current employees (taking into account revisions with respect to COLAs, early retirement, disability, and deferred vested benefits).

The following replacement rates (after tax post-retirement CSRS and Social Security benefits as a percentage of pre-retirement after-tax income) based on the post-83 1.15% per year of service formula show that the standard-of-living target objectives in (1) above are met with respect to moderate-income full-career employees.

REPLACEMENT RATES AT AGE 65 FOR A SINGLE EMPLOYEE WITH 30 YEARS OF SERVICE

Final pay	$10,000	$20,000	$30,000
Revised system with no thrift plan participation (percent)	93.1	84.5	77.2
Revised system with thrift plan participation (percent)	121.5	111.1	105.1
Current CSRS (percent)	64.7	64.9	61.5

Replacement rates at all income levels under the revised CSRS formula exceed those under the current system for those retiring at age 65 as well as those retiring at 62 when Social Security first become available (see Tables in Appendix which also contains the assumptions used by the Congressional Research Service in developing the rates).

While the current CSRS formula is "back-loaded" (providing lower accruals for shorter-service employees), consistent with the objectives in (5) above the revised formula provides a constant 1.15 percent for each year of service. The simpler formula coupled with the continuation of other benefit computational rules as under present law (e.g. high-3 pay, aggregation and service repurchase rules, etc) meets the objectives in (7) for a simple non-disruptive revision.

The constant formula of 1.15 percent, taking into account Social Security benefits, was found to achieve the target replacement rates without having to resort to a more complex "integrated" formula. A 100 percent Social Security offset formula for determining retirement benefits (as advanced in other proposals) was considered but rejected since the approach would be contrary to current Internal Revenue Service regulations on plan integration (see goal (6) above), would be administratively complex (see goal (7) above), and would require a complicated and potentially inequitable attribution of Social Security benefits, especially with respect to shorter service employees (see goal (5) above). The 100 percent offset approach however, is utilized with respect to coordinating post-83 disability and survivor benefits with Social Security, since the offset approach with respect to such benefits does not violate the IRS integration rules, does not require inequitable attribution rules, and is the only approach guaranteeing the maintenance of current disability and survivor benefit levels (see Part F).

An integrated formula is usually utilized in order to maintain a relatively constant "target" replacement rate at all income levels, since Social Security alone provides higher replacement rates for the lower paid. However, the annuity benefits available from savings accumulations under the Federal Thrift Plan bring the total benefits for employees having above average federal earnings up to the target replacement rates for the lower paid (considering Social Security and CSRS benefits alone), thus allowing the simpler 1.15% formula to be used instead of a more complicated integrated one. For example, the replacement rates for the $40,000, $50,000 and $60,000 case comparable to those shown above at lower income levels amount to 100.7%, 92.7%, and 87.6%, respectively.

The 1.15% formula accompanied by the Federal Thrift Plan is an approach similar to one advanced by the Universal Social Security Coverage Study Group (chaired by Joseph W. Barlett) in its March 1980 report.

Section 234—No post-83 minimum annuity

The minimum retirement annuity under present law is necessitated since employees are not covered under Social Security. Since Post-83 employees are covered under Social Security, a minimum is no longer necessary; thus the minimum is eliminated as being redundant.

Section 235—Rollover of contributions of separated employees into TRA's

Under present law an employee, upon early separation, may withdraw his or her contributions (without interest) resulting in

the forfeiture of the employer purchased part of any deferred annuity. Section 235 provides that future withdrawals by either current or post-83 employees will automatically be rolled-over, tax free, into a TRA of the employee's own choosing. In addition, under section 237 the CSRS is conformed to ERISA so that the employer purchased part of the deferred vested benefit is not forfeited if employee contributions are withdrawn.

Section 236—Interest credited to employee contributions

After 1983 the accumulated value of both a post-83 and a current employee's contributions is to be credited with interest (at the overall earnings rate applicable to the Civil Service Trust Fund). As described in section 235, the accumulated value of employee contributions including interest may be rolled-over by a separated employee into a TRA.

Section 237—Deferred annuity not fully forfeited if employee withdraws contributions

See section 235 for a description of this provision as it applies to both current and post-83 employees.

Section 238—Conform COLA to social security COLA

Effective January 1, 1984 the cost-of-living adjustment under the CSRS is conformed in timing and amount to the COLA adjustment under Social Security. This is a technical amendment included as part of the initiative under FAIR to place all federal retirement and disability programs on the same COLA basis in order to ease the administration of the COLA limitation under section 401.

Section 239—COLA limitation

This is a cross-reference to section 401.

Section 240—Social security leveling option

A new retirement annuity option, termed a Social Security leveling option, is extended to post-83 employees retiring early in order that they may have a more level lifetime income rather than an income which jumps significantly when Social Security benefits become available. By means of the use of this option the effect of the early retirement reduction factor will be mitigated to some extent.

To illustrate the application of this option—a post-83 employee retiring at age 55 with 30 years service would be entitled to a CSRS pension of 34.5% of high-3 pay subject to the early retirement factor of 80% (2% per year reduction under age 65) equal to $5,198 (in the case in which final pay is $20,000 expressed in current dollars); 10 years later at 65 the employee may elect to begin receiving Social Security benefits, thus nearly doubling the employees' retirement income level at such time; in the alternative the employee may elect the Social Security leveling option thus raising the person's initial level of retirement income at age 55 from $5,198 to, say, about $9,000; at 65 when Social Security is elected and CSRS benefits are actuarially reduced under the leveling option, the person's total benefits would continue at the pre-65 level (subject to any applicable indexation).

An employee may elect that the increased CSRS benefit be paid under the leveling option up to any age selected between age 62 and 67 (when Social Security becomes available) at which time CSRS benefits are actuarially reduced to maintain a level income.

PART E—SURVIVOR BENEFITS

Section 241—Separated employees eligible for survivor annuity

Under the provisions of this section both current and post-83 employees who separate with vested benefits before reaching retirement age may elect to have a 50% survivor annuity paid to a spouse. The value of the survivor annuity and the reduced deferred annuity is to be equivalent to the value of the unreduced deferred annuity. This option is an alternative to the provision in present law under which a survivor is paid the lump-sum value of the employee's contributions in the event of the dealth of the separated employee before age 62.

Section 242—Offset of social security survivor benefits

Under FAIR the combined survivor benefits from Social Security and the CSRS are the same as under present law. In order to accomplish this, the CSRS benefits for survivors of post-83 employees are reduced by the amount of survivor benefits to which such persons are entitled under Social Security.

PART F—DISABILITY BENEFITS

Section 251—Disability eligibility

The conditions under which CSRS disability benefits are available for both current and post-83 employees is changed to include that such benefits would not be available as long as the employee is able to render useful and efficient service in a vacant civilian position in a Federal agency within a reasonable commuting distance from the last place of employment. The employee's pay could not be reduced even though the pay in the new position is rated as low as 80% of the pay level of the former position. This provision is consistent with recommendations to the Congress made by the General Accounting Office.

Section 252—Post-83 disability annuities

Generally, the amount of the disability annuity under CSRS to which a current employee may become entitled in the future is unchanged from that under current law.

The amount of the disability annuity to which a post-83 employee may become entitled under CSRS (including Social Security disability, if applicable) is in most cases improved over the disability levels under current law. This is to bring the level of CSRS disability more in line with private sector practices. The CSRS disability amount for payment years prior to the Social Security normal retirement age, presently age 65, is equal to the larger of (A) or (B) reduced by the amount of any disability benefits (including family benefits) the person actually receives under Social Security (see section 254 for Social Security disability offset), where (A) is the actual amount of the employee's accrued early retirement benefit taking into account the early retirement reduction factor (see section 232) and assuming the Social Security leveling option is elected (whether actually elected or not pursuant to section 240), and where (B) is the lesser of (1) 40% of the post-83 employee's high-3 pay, or 50% in the case in which the employee is receiving Social Security disability, or (2) the alternative formula under present law but increased by 10% in the event the employee is receiving Social Security disability.

Upon attaining the normal retirement age under Social Security (presently age 65) the disability benefits of a disabled employee are converted to normal retirement benefits and the individual would in addition be eligible to receive the full amount of Social Security benefits to which the person is entitled.

For situations described in (A) above, the amount of retirement benefits after normal retirement age would continue to be based on the computed amount of the person's benefits received before such age subject to any cost-of-living increases (i.e. the actual amount of the employee's accrued retirement benefit subject to any Social Security leveling option that may have been elected at the time of disability).

For situations described in (B) above, at normal retirement the disability amount is recomputed to be the greater of (1) the amount of the employee's accrued early retirement benefit computed at the time of disability, increased by the amount of any applicable cost-of-living adjustments between the time of disability and the attainment of the Social Security normal retirement age, or (2) the excess of (i) the amount computed under (B) above at the time of disability increased by the amount of any applicable cost-of-living adjustments between the time of disability and the attainment of the Social Security normal retirement age over (ii) a fixed amount of Social Security "offset" computed as the annual Social Security retirement benefit using only the service and basic pay of the employee under Civil Service employment.

Section 253—Employee must apply for social security disability

In order to maintain the integrity of the Civil Service Retirement and Disability System all employees applying for disability benefits under the CSRS must also apply for disability benefits under Social Security, unless exempted from such requirement under regulations prescribed by OPM.

Section 254—Social security disability offset

See explanation of this provision under section 252.

Section 255—Limitation of disability annuity based on excess earnings

In order to encourage the rehabilitation of disabled employees and their return to full time employment, the bill provides for the reduction in the amount of a disabled employee's annuity to keep the combined amount of the disability annuity and the amount of income earned by the disabled employee in other employment at a level not in excess of the final pay of the employee prior to disablement (adjusted for subsequent general pay increases).

This provision does not apply to a person receiving Social Security disability benefits or to a person enrolled in a rehabilitation program as described in section 256.

Section 256—Disability rehabilitation pilot program

Within 180 days after enactment the OPM is to establish a pilot program under which disabled employees (other than those receiving Social Security disability) would be provided vocational rehabilitation and job placement counseling evaluation for purposes of determining the person's suitability for returning to the same occupation or another occupation for which the person is qualified by reason of training or experience.

The OPM may contract with the Secretary of Labor or with any insurance or other experienced vocational rehabilitation organization to provide such a pilot program. Within 5 years OPM would report to the Congress on the effectiveness of such a program together with any recommendations

for legislation to establish a permanent program.

Section 257—Long-term disability coverage for new employees

As under present law, current as well as post-83, employees would not be eligible for CSRS disability benefits until they meet the 5-year service requirement. Under this section employees may purchase long-term disability coverage for the first 5 years of employment, from insurance carriers at group insurance rates, under a Federally sponsored program managed by OPM.

TITLE III—AMENDMENTS TO ERISA, FECA, THE SOCIAL SECURITY ACT, AND THE INTERNAL REVENUE CODE

Section 301—Conform FECA COLA to social security COLA

Beginning January 1, 1985 the cost-of-living adjustment applicable to benefits under the Federal Employee Compensation Act is conformed in timing and amount to the annual COLA adjustment under Social Security. As a matter of transition, no COLA adjustment would be made in 1984 but the January 1985 adjustment would provide a "catch-up" for the change in the CPI from December 1982 applicable to the last adjustment in 1983.

This is a technical amendment included as part of the initiative under FAIR to place all federal retirement and disability programs on the same COLA basis in order to ease the administration of the 60% COLA limitation as provided for under the second bill in the FAIR legislative package.

Section 302—ERISA coverage for new Postal Service pension plans

As stated under section 202, Postal Service employees newly covered under Social Security are excluded from coverage under the Civil Service Retirement and Disability System. Any new pension plan or plans established by the Postal Service for new or other employees would, under this section, be subject to the provisions of the Employee Retirement Income and Security Act of 1974 (ERISA) and the related provisions of the Internal Revenue Code.

Section 303—Social security amendments

This section provides for Social Security coverage for current civil service employees who elect coverage under both Social Security and the revised provisions of the Civil Service Retirement and Disability System applicable to new employees. The so-called "windfall" reduction under Social Security would be made inapplicable to employees electing such coverage in cases in which such employees have 10 or more years of post-83 service.

TITLE IV—COLA'S AND ADMINISTRATION

Section 401—60 percent COLA limitation

The "60% COLA limitation" provided in this section is the specific application to the CSRS of the COLA limitation applicable to all federal retirement programs as contained in the first bill of the FAIR legislative package.

In this instance the COLA increase applicable to CSRS annuities (other than survivor benefits) is limited to 60% of the COLA increase with respect to that portion of an employee's pension which, together with any primary retirement benefits to which the employee is entitled under Social Security or the Military Retirement System, exceeds $10,000. The $10,000 amount applicable in 1984 is increased annually to the same extent that benefits are increased in accordance with the cost-of-living provisions of the Social Security Act.

The 60% COLA limitation applies to the benefits of current as well as post-83 employees. The exclusion of the first $10,000 of retirement income from the 60% COLA limitation will continue to allow 100% COLA increases for that portion of CSRS pensions under $10,000—thus the CSRS pensions of employees who in the past were not covered under Social Security could be viewed as being composed of two parts, the first part up to $10,000 might be termed the "Social Security part" for which the COLA is 100% and the remainder above $10,000 (if any) might be termed the "supplemental pension part" for which the COLA is 60% of the applicable increase.

The application of the 60% limitation can be illustrated as follows: given a retired employee having $4,000 in Social Security benefits, $5,000 in retirement benefits based on military service, and $6,000 in CSRS benefits, the COLA with respect to the Social Security benefits, the military retirement benefits and the first $1,000 of CSRS benefits would be 100% of the applicable cost-of-living formula while the COLA applicable to the $5,000 remainder of CSRS benefits over $10,000 (i.e. $4,000+$5,000+$6,000−$10,000=$5,000) would be limited to 60% of the cost-of-living increase. Assuming a 5% increase in the cost-of-living formula with respect to a particular year, the COLA increase under current law would be 5% of $15,000 or $750 while the new formula would produce a COLA increase of $650 (i.e. 5% [$4,000+$5,000+$1,000]+5%×60×[$15,000−$10,000]). Therefore the average Federal retiree having $15,000 in combined Federal retirement benefits in 1984 would have an effective COLA increase equal to 86.7% of the current level.

The adoption of the 60% COLA limitation is intended to instill an increased measure of defensibility, comparability, and affordability to the system of benefits provided under the CSRS. The effective range of the revised CSRS COLA—from 100% for benefits under $10,000 to 66⅔% for benefits at the $60,000 level—still leaves the CSRS among the most generous of the nation's public and private pension plans in providing post-retirement COLAs. A recent study for the Department of Labor shows that for private pension retirees fortunate enough to actually have automatic and/or ad hoc post-retirement increases, the average increase amounted to only about ⅓ of the increase in the CPI for the period 1973 through 1979.

Section 402—Transfer of administration to OPM

This section brings within the Federal government (OPM) the administration of Federal retirement benefits now administered by the District of Columbia (e.g. in relation to benefits for the Secret Service, the Park Police and others).

SUMMARY OF TITLE I–IV

The second bill, the Federal Annuity and Investment Reform Act, is designed to meet the many objectives enumerated earlier and summarized below.

(1) The revised system will provide initial retirement benefit levels equal to or close to pre-retirement living standards for full-career "post-83" employees at moderate income levels (considering Social Security and CSRS defined benefits only); a similar retirement income target for higher-paid employees is achieved when the annuity income from Federal Thrift Plan accumulations is considered.

(2) The initial retirement income levels for full-career post-83 employees retiring at 62 or later (when Social Security becomes available) are enhanced over current levels and are then fully kept up with the cost-of-living for retirement income levels under $10,000 (indexed after 1984 to rise the same as Social Security benefits) and partially indexed at 60% of the CPI for retirement income levels above the $10,000 limit; the availability of Federal Thrift Plan accumulations would allow for additional COLA supplementation.

(3) The revised 1.15% CSRS formula and the new Federal Thrift Plan are designed to be coordinated with Social Security in order to bring about greater benefit comparability with the pension arrangements offered by major private sector employers; additional benefit comparability is accomplished through the introduction of the 2% early retirement adjustment factor applicable to post-83 service and the 60% COLA limitation above $10,000.

(4) The revised system is much more equitable in the manner in which it treats shorter service and mobile employees as a result of the portability offered by the fully and immediately vested benefits under both the Federal Thrift Plan and Social Security, the introduction of a constant accrual rate which is not "backloaded" as under present law, the payment of interest on employee contributions, the partial indexing of deferred annuities, the tax-free rollover of distribution into TRAs, the nonforfeiture of vested employer-paid benefits, and the availability of a survivor option for terminated employees.

(5) The revised system meets ERISA benefit and funding standards, prohibits reductions in accrued benefits, and extends the tax benefits attendant with tax-qualified plan status to employee distributions from the CSRS and the Federal Thrift Plan.

(6) The revised system provides for parity in the employee contribution percentage rate for current and post-83 employees and for parity with respect to benefits and future employer costs with respect to such employees; the 60% COLA limitation, the 2% early retirement adjustment applicable to post-83 service, the portability features in (4) above, and the provision for voluntary employee contributions to the Federal Thrift Plan apply in the same manner to current employees as well as post-83 employees.

(7) The health of the OASDI trust funds are enhanced by several billion dollars per year as a result of the employee and Federal employer contributions to Social Security on behalf of current employees who elect post-83 status (a large percentage is expected to elect such status due to a number of benefit incentives offered); the added balance to the OASDI trust funds will better enable such funds to restore the past amounts borrowed from the Medicare trust funds, and may also permit additional interfund borrowing to take place from OASDI to Medicare which current projections show may become necessary later in the decade.

H.R. 5753—COLA stabilizer

Over the past few years there has been an expanding debate over the impact that the uncontrolled automatic indexing of federal programs has had on the federal budget, interest rates, the economy, and the income distributions of the working and non-working population. Nearly 90 federal entitlement and non-entitlement programs have their benefits automatically adjusted to increase with inflation, generally as measured by the Consumer Price Index. According to

the Congressional Budget Office nearly one-third of total federal spending is accounted for under indexed entitlement programs. Over the past four years alone the COLAs under these programs have increased program spending by 50%. Retirement and disability programs account for over 99% of all COLA-related entitlement program spending.

In order to help assure long-term program solvency and to regain a measure of fiscal control, my legislation contains a COLA stabilizer which would limit automatic increases after 1983 to the lesser of the increase in national wages (the index used in adjusting the maximum taxable wage under Social Security) or the increase in the Consumer Price Index (or other automatic COLA mechanism that may be applicalbe under a particular program). The stabilizer would apply to all pension, annuity, retirement, disability, or similar programs operated by the federal government including but not limited to the Civil Service Retirement System, the Uniformed Services Retirement System, the Railroad Retirement System, and the Social Security system (retirement programs basing benefits on need would be exempted).

The legislative mechanism whereby the COLA stabilizer would be implemented requires: (1) that the President submit budgets for Fiscal Year 1985 and later which conform to the requirements of the COLA stabilizer; and (2) that the Congress expedite the required implementing legislation submitted by the President in accordance with a special highly privileged House and Senate rule. As a technical matter the Average Hourly Earnings Index published by the Department of Labor is used as the restraint in the COLA stabilizer for the first year of application. In subsequent years a corrective factor would be applied so that in the long run the wage index constraint would conform to the rise in national wages as defined in the Social Security Act for purposes of computing the increase in the maximum taxable wage base.

The refrain that I hear from federal employees concerning their Civil Service benefits and from other retirees concerning their Social Security benefits is that they are willing to accept some adjustments in their future COLAs, if that would help to better guarantee future program solvency, but that they do not want their benefits to be singled out unfairly. That is why under my FAIR legislation the COLA stabilizer would apply uniformly and across the board to civilian federal employees, military and other uniformed personnel, and Social Security recipients as well.

The proposal also introduces a greater measure of equity and fairness to entitlement COLAs when compared with COLAs working members of the population have received in connection with their wages. Analysts have pointed out that benefit recipients fare better than the workers whose taxes and contributions support each system, when wages do not keep pace with inflation. While basic benefits should be kept up with inflation on some basis, retired people should not receive greater cost-of-living protection than working people, yet that is what has happened. In recent years, the average cost-of-living wage increase agreed upon in private sector collective bargaining has been only 60 percent of the increase in the Consumer Price Index, and persons drawing retirement benefits have received fatter annual increases than wage earners in union agreements in 10 out of the past 12 years.

Besides restoring economic equity between the working and non-working generations, the proposed COLA changes will go a long way in helping stabilize the OASDI and other federal retirement system trust funds in the event we again experience irregular periods of economic activity in which prices rise more rapidly than wages. In fact a significant share of the Social Security actuarial imbalance and $150–$200 billion near-term shortfall which gave rise to the 1982 amendments can be directly traced to cost-of-living increases outpacing wage increases in just the past four years.

It should be noted that the actuarial and economic projections relied on by the Congress in shaping the Social Security rescue package do not anticipate a repeat of recent economic experience during which price increases exceeded wage increases. It is only prudent, therefore, that this Congress extend the COLA stabilizer concept so as to provide a meaningful financial safety mechanism for Social Security and all other federal retirement systems. As policymakers who will be held accountable, we should not abdicate our responsibilities by waiting until the next cycle of unfavorable economic conditions when uncontrolled overindexation again creates large unmanageable unfunded pension liabilities. Over $100 billion or about one-fifth of the half-trillion dollar-plus unfunded liability of the Civil Service Retirement Fund arose during just the first several years of the 1980s.

The COLA stabilizer is the true embodiment of the old adage that an ounce of prevention is worth a pound of cure. A triggering of the stabilizer mechanism will not result in a cut in any persons' benefits but would merely limit future benefit increases. For example, if for a particular year the consumer price index were to rise by, say, 11% while wages were to rise by 10%, the 1% difference in benefit increase for a person drawing $400 per month in benefits would amount to $4 per month (i.e., benefits would go up by $40 rather than $44 as would otherwise be provided by a full CPI increase). When viewed at the level of the individual, most would welcome the $40 increase and have little in the way of expectation as to whether the increase would be $40 or $44. However, at the macro level the 1% differential would translate in today's dollars into a $2 billion easing of the strain on all federal old age, disability, and retirement systems.

The COLA stabilizer would be triggered only during times of abnormal economic activity and distress, and as the economy reverts to periods of growth the Congress could always consider ad hoc benefit increases which could provide for some or all of a "catch up" in the $4 monthly difference resulting from the smaller rise in wages. The Congressional review process might also take into consideration the technical deficiencies in the CPI which have allowed benefit increases to overcompensate for inflation in the past.

The economic assumptions used in both the President's budget and the budgets the Congress is considering do not anticipate that wages will rise more slowly than prices as measured by the CPI. The COLA stabilizer would not, as a result, be projected to have an impact on expected future budget items or deficits (although in reality it might if projections prove faulty). Therefore, the COLA stabilizer provision can be discussed and adopted in an atmosphere absent from the shrill rhetoric that is currently associated with the budget process and the size of the federal deficit.

In summary, the FAIR legislation would extend the concept of a fail-safe COLA stabilizer across the board, not just to Social Security (in which the fail safe mechanism was only partially installed as part of the recent Social Security legislation) but to all other federal retirement programs as well. This nation can ill afford another round of unanticipated economic irregularities in which uncontrolled indexation unfairly redistributes income, creates large program deficits and added economic problems, and thereby leaves future Congresses and taxpayers with only much more difficult choices.

APPENDIX

[Provided by Congressional Research Service]

COMPARISON OF CIVIL SERVICE RETIREMENT BENEFITS WITH REVISED SYSTEM

INTRODUCTION

This report is in response to your request of February 4, 1983, for earnings replacement rates for a series of different social security and pension plan alternatives. The option selected for comparison with the present Civil Service Retirement System (CSRS) and the assumptions used were specified by Russell Mueller of your staff. The report provides no cost estimates.

DOCUMENTATION FOR EARNINGS REPLACEMENT ANALYSIS

The following fourteen tables show how much of a worker's earnings would be replaced by retirement income. Replacement rates—the ratio of retirement benefits to preretirement earnings—provide one measure of the adequacy of pension benefits. Because retirement also brings changes in consumption patterns, tax liabilities, work-related expenses and savings rates, most analysts agree that retirees can maintain their preretirement standard of living with pension benefits that replace less than 100 percent of their final year's gross earnings.

The following tables show the estimated retirement income that would be received by workers retiring in 1985: (a) under the present Civil Service Retirement System (CSRS) and (b) under the revised retirement system selected for study. The revised system would include coverage under social security, mandatory participation in a supplemental defined benefit plan, and optional participation in a thrift (savings) plan. Under the defined benefit plan selected a worker would earn a benefit of 1.15 percent of final average salary for each year of participation. Final average salary is defined as that received in the highest 3 consecutive years. Benefits are reduced by 2 percent for each year under age 65 (e.g. a worker retiring at age 62 would receive 94 percent of the benefit payable at age 65). Workers would be required to make contributions not only to social security, but also to contribute 3 percent of salary to the defined benefit plan. In addition, employees could elect to contribute up to 3 percent of salary into a thrift plan. The thrift plan payment would be fully matched by an employer contribution.

The Congressional Research Service calculated both gross and net earnings replacement rates for six hypothetical workers. Gross replacement rates are arrived at by dividing total retirement income by the final year's earnings. Net replacement rates are arrived at by dividing (a) retirement income received after payment of taxes by (b) preretirement earnings after payment of

taxes and contributions for social security, the pension plan, or the thrift plan.

Many assumptions must be made to calculate net earnings replacement rates. The following assumptions were made.

Federal taxes

Several assumptions have been made in order to determine hypothetical Federal tax liabilities as given in this report. For those individuals in their final work year and first year of retirement, a zero bracket amount [1] or, if larger, deductible expenses equal to 23 percent of adjusted gross income was used to compute the appropriate Federal tax liability.

For those persons eligible for the Tax Credit for the Elderly, the appropriate amount was computed based upon the Social Security Amendments of 1983.

The following tax rate schedules were used to compute the Federal tax liability. The tax calculations do not take ino account indexing of the tax rate schedules, the zero bracket amount, or the personal exemption amount, which will go into effect with respect to 1985 taxes.

Tax rate schedule for single individuals for taxable years beginning after 1983

If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400.	11% of the excess over $2,300.
Over $3,400 but not over $4,400.	$121, plus 12% of the excess over $3,400.
Over $4,400 but not over $6,500.	$241, plus 14% of the excess over $4,400.
Over $6,500 but not over $8,500.	$535, plus 15% of the excess over $6,500.
Over $8,500 but not over $10,800.	$835, plus 16% of the excess over $8,500.
Over $10,800 but not over $12,900.	$1,203, plus 18% of the excess over $10,800.
Over $12,900 but not over $15,000.	$1,581, plus 20% of the excess over $12,900.
Over $15,000 but not over $18,200.	$2,001, plus 23% of the excess over $15,000.
Over $18,200 but not over $23,500.	$2,737, plus 26% of the excess over $18,200.
Over $23,500 but not over $28,800.	$4,115, plus 30% of the excess over $23,500.
Over $28,800 but not over $34,100.	$5,705, plus 34% of the excess over $28,800.
Over $34,100 but not over $41,500.	$7,507, plus 38% of the excess over $34,100.
Over $41,500 but not over $55,300.	$10,319, plus 42% of the excess over $41,500.
Over $55,300 but not over $81,800.	$16,115, plus 48% of the excess over $55,300.
Over $81,800	$28,835, plus 50% of the excess over $81,800.

Tax rate schedule for married individuals filing joint return for taxable years beginning after 1983

If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500.	11% of the excess over $3,400.
Over $5,500 but not over $7,600.	$231, plus 12% of the excess over $5,500.
Over $7,600 but not over $11,900.	$483, plus 14% of the excess over $7,600.
Over $11,900 but not over $16,000.	$1,085, plus 16% of the excess over $11,900.
Over $16,000 but not over $20,200.	$1,741, plus 18% of the excess over $16,000.
Over $20,200 but not over $24,600.	$2,497, plus 22% of the excess over $20,200.
Over $24,600 but not over $29,900.	$3,465, plus 25% of the excess over $24,600.
Over $29,900 but not over $35,200.	$4,790, plus 28% of the excess over $29,900.
Over $35,200 but not over $45,800.	$6,274, plus 33% of the excess over $35,200.
Over $45,800 but not over $60,000.	$9,772, plus 38% of the excess over $45,800.
Over $60,000 but not over $85,600.	$15,168, plus 42% of the excess over $60,000.
Over $85,600 but not over $109,400.	$25,920, plus 45% of the excess over $85,600.
Over $109,400 but not over $162,400.	$36,630, plus 49% of the excess over $109,400.
Over $162,400	$62,600, plus 50% of the excess over $162,400.

State and local government income tax assumptions

There is great disparity in the tax structure of State and local governments. For purposes of computing net earnings replacement rates, a general assumption was made that State-local personal income tax liability was 21.5 percent of the Federal income tax liability for single taxpayers, and 22.6 percent for married taxpayers. These rates were derived from an analysis of the relationship of State individual income taxes on specified wages and salaries during calendar year 1975 contrasted to Federal income taxes prepared in 1976 by Lillian Rymarowicz of the Economics Division in the Congressional Research Service. This analysis showed that average State taxes as a percentage of the Federal income tax was 21.5 percent for single taxpayers and 22.6 percent for married taxpayers. This analysis, however, did not include individual income taxes levied by local governments or tax credits for such payments against State income tax liability. Therefore, the ratio would be understated. However, States are beginning to index their individual income tax rates for inflation. This has the effect of lowering tax rates for higher income individuals.

Social security taxes

Social security taxes are based on the Social Security Amendments of 1983. In computing net final year's earnings in 1984, employees are assumed to contribute 5.7 percent of their salaries up to $37,800 for the Old Age, Survivors and Disability Insurance (OASDI) component of social security. Social security benefits are included in taxable retirement income for higher income persons whose taxable income combined with 50 percent of their social security benefits exceed a base amount. The base amount is $25,000 for an individual and $32,000 for a married couple filing a joint return. The amount of benefits included in taxable income is the lesser of one-half of benefits or one-half of the excess of the taxpayer's combined income (i.e., adjusted gross income plus one-half of benefits) over the base amount.

Social security benefits

Benefits shown are for individuals retiring in 1985 at ages 62 and 65 who always had their wages increase in the same proportion as wages in the economy. The determination of benefits, although computed for 1985, assumes a fully mature system in which 35 years of earnings are used in the computation and all wages, including those at the maximum limit, are indexed to average wage growth in the economy. Also, benefits are computed under the provisions of the Social Security Amendments of 1983, which apply to benefit computations in the year 2022 and beyond, i.e. "full" retirement at age 67 with actuarial reductions for benefits taken at ages 62 and 65. Calculations are based on preliminary 1983 Trustees Report assumptions (February 18, 1983).

Defined benefit and thrift plan contributions

Employees contribute 3 percent of salaries as their share of the cost of the defined benefit plan. When employees participate in the thrift (or savings) plan, they are assumed to contribute 3 percent of their salaries. This is fully matched by an employer contribution of 3 percent. The combined 6 percent contribution is assumed to be invested with interest compounded annually in a tax-deferred account.

Interest rate assumptions (1945–84)

Interest on the accumulated thrift plan contributions was compounded annually during the period 1953–1984 according to the interest rate for 10-year constant maturing U.S. Treasury securities. For years 1945–1952, the interest rate was the average rate for new-issue, 3-month U.S. Treasury securities.

INTEREST RATE ASSUMPTIONS (1945–84)

Year	Interest rate	Year	Interest rate
1945	0.375	1965	4.28
1946	0.375	1966	4.92
1947	0.594	1967	5.07
1948	1.040	1968	5.65

Wage histories

Hypothetical wage histories were constructed covering the period 1945–1984 in accordance with the wage indexing series used by the Social Security Administration, i.e., the difference in each year's wage levels was attributable to the growth of average wages in the economy.

FEDERAL CAREER WAGE HISTORIES (1945–84)

Final year's earnings	$10,000	$20,000	$30,000	$40,000	$50,000	$60,000

Calculation of annuity purchased with thrift plan accumulations

In order to determine the amount of an annuity that can be purchased for a given amount of principal, information on life expectancy of the annuitant is needed. The mortality rates used for this analysis were determined by the Office of Personnel Management and are for male civil service workers.

The accumulated value of the thrift plan was converted to an indexed annuity at the time of retirement (i.e. age 62 or 65) assuming a 6 percent interest rate. The annuity is assumed to increase at 4 percent a year. Both the interest rate and the inflation rate are the same as the assumed long-term rates in the economy predicted in the 1982 Social Security Trustees' II-B assumptions.

The taxable portion of the annuity was determined in accordance with Internal Revenue Service regulations, section 1.72-9, using Table I, Ordinary Life Annuity—One Life—assuming no refund feature. The expected return multiples were based on males age 62 and 65.

DISCRIMINATION AT SHORT BROTHERS, BELFAST

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. OTTINGER. Mr. Speaker, on May 18, I sent a letter to Verne Orr, Secretary of the Air Force, protesting the proposed purchase of transport aircraft—(SD330)—from Short Brothers, Ltd., in Belfast, Ireland. Short Brothers, a British Government-owned corporation, has a record of anti-Catholic discrimination. We outlined our protest in the letter, which 26 Members cosigned.

The response from the Air Force made no attempt to refute the statistics of discrimination. They made no reference to the problem of discrimination except to assure us that Short Brothers had received approval from the Fair Employment Agency, a British agency which enforces antidiscrimination laws in Northern Ireland.

The British Ambassador has also defended Short Brothers to Members of Congress, and defended their right to the Air Force contract. However, the Ambassador made no attempt to refute the figures we presented that show Short Brothers' discriminatory practices.

I would like to enter into the RECORD a critique of the British defense of Short Brothers by Rev. Brian Brady of St. Joseph's College in Belfast. Father Brady has provided some of the most cogent proof so far of the anti-Catholic discrimination in Northern Ireland. His arguments are well-substantiated and compelling:

A CRITIQUE OF THE "COVER-UP" OF ANTI-CATHOLIC DISCRIMINATION IN SHORT BROTHERS, BELFAST

(By Rev. Brian J. Brady, St. Joseph's College of Education, Belfast, Northern Ireland, May 26, 1983)

The case study gave facts and figures in support of the allegation that Short Brothers discriminates against Catholics in its employment practices. The allegation stands until the statistics on which it is based are rebutted by equally true facts and figures. So far no such rebuttal has been produced by the apologists for Shorts and I am confident that none can be produced.

On May 10 the British Ambassador assumed the role of apologist for the company. He wrote to Congressional leaders and enclosed briefing material from Shorts. Neither that material nor the Ambassador's covering letter constitute an adequate response to the case against the company. Both documents are really denials of my allegation, in the form of assertions unsupported by hard facts.

I should like to offer some detailed comments on the inadequacies of the package as a "case for the defense" of Shorts. The case has three parts to it:

1. That employment practices in the company satisfy fully the requirements of the Fair Employment Act (NI) 1976 and that the company co-operates completely with the Fair Employment Agency (FEA) in achieving the purposes of the agency.

The supporting "facts" offered are:

a. A photostat of the FEA Certificate that Shorts has signed the Declaration of Intent to promote and protect equality of opportunity in employment.

Response. May I point out that signing the FEA Declaration does not commit the signatory firm to any time scale in remedying its past discriminatory practices. In the case of Shorts the imbalance of Protestants (95%) and Catholics (5%) has not changed one iota in the 4 years since the certificate was granted by FEA.

b. It is pointed out that three unsuccessful complaints of discrimination by individuals employed by the firm made to the FEA are proof that there is no discrimination against employees of the firm.

Response. The allegation made by me was not that Catholics employed by the company were discriminated against. My complaint was that Catholics were excluded (apart from token 5%) from working for the firm at all.

c. Two remedial programs by the company are mentioned:

A program of action to ensure equality of opportunity in the company which is allegedly 15 years in place;

An affirmative action program to remedy the imbalance in the workforce.

Response. Programs must be judged by their results. If these are really serious efforts to remedy an injustice, whose existence is implied by the very existence of the programs, why has the Protestant/Catholic imbalance in the workforce not been ameliorated? It is unacceptable to say that polarisation over the past 14 years is responsible for the imbalance. What was happening during the 32 years between 1937 and 1968? In connection with these programs, may I suggest that the Chairman of FEA, Mr. Bob Cooper, be asked to explain the involvement of his agency in them and to give a statistical account of their success or failure in making Shorts an equal opportunity employer. It is facts and figures from FEA, not worthless certificates, which must be offered.

2. The second item of briefing material issues by Shorts in its defense is a letter to the Managing Director from the Confederation of Shipbuilding and Engineering Unions. The letter denies that the firm pursues a policy of religious discrimination.

Response. The Confederation has never done anything to redress the injustice of Catholics having only 4.8% of the jobs in the shipbuilding, marine engineering and aircraft industries serviced by its unions. The Confederation is not and never has been interested in the employment rights of Catholics. In this context, its letter is a cruel joke.

3. This third line of defense offered by Shorts is the purchase of one 330 aircraft by AVAIR, a subsidiary of the semi-state Irish Airlines (Aer Lingus). Apparently one is expected to infer that Shorts is a fair employer because of semi-state body in the Republic of Ireland purchases its products.

Response. Unfortunately the Government of the Republic of Ireland has not, up to the present, made the absence of anti-Catholic discrimination a condition of giving contracts to N. Ireland firms. Indeed it has caused much distress in the Catholic community in N. Ireland during the past week, by authorizing another of its semi-state bodies (Bord na Mona Peat Development Board) to purchase £¼M worth of goods from Sirocco Engineering of Belfast. Sirocco has 4 Catholic employees in a workforce of 850 to 900 (See copy of my letter to the media on this matter). The Government of the Republic of Ireland, as a defense witness for Shorts, collapses under cross-examination.

The Ambassador's letter is as short on hard data in support of Short's case as is the company's own briefing material. I submit that my original allegation against Short's supported by facts and figures, has not been disproved. The company still stands exposed as a firm which discriminates against Catholics.

Purchasers of Shorts' products must be left under no illusion about their complicity in that anti-Catholic discrimination. It would be most unfortunate if any agency of the U.S. Government should get involved in the purchase of aircraft from Shorts at this time.

Since this paper has been written, eighteen electricians have been hired by Shorts Brothers. Only one is Catholic.●

A TRIBUTE TO THE HIGH SCHOOL ARTISTS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. RAHALL. Mr. Speaker, I would like to take this opportunity to offer my congratulations to all of the high school artists from around the country whose works of art now grace the Cap-

itol tunnel. Their outstanding talent and dedication is reflected in these works of art and they are surely a welcome addition to the tunnel. I would especially like to offer my congratulations to the artist representing the Fourth District of West Virginia, Stephanie Midkiff of Lashmeet, W. Va., who was unable to attend the dedication ceremony and reception last night. Her acrylic "Butterfly Spirit" proudly hangs alongside of the other fine works of art and I am proud to have Stephanie's acrylic representing my congressional district. While I wish that Stephanie and her family could have made it to Washington for the reception, hopefully, she will be able to see her painting hanging in the Capitol tunnel. Once again, my congratulations to all of these fine young artists.●

THE DEDICATION OF A WORLD WAR I MEMORIAL MARKER

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. CONTE. Mr. Speaker, I am submitting for the RECORD a speech made by Massachusetts State Senator John F. Parker at the dedication of a trail memorial marker in honor of World War I veterans. The dedication took place at Bourne National Cemetery at Otis Air Force Base on Cape Cod. More than 400 World War I veterans were on hand for this ceremonial unveiling of a granite World War I trail marker memorial. This monument is 5 feet high and has a bronze plaque with two verses of "Flanders Field" and sponsorship to all veterans of World War I. Mr. Parker's speech was very well received and many were even moved to tears as the senator told stories about the "war to end all wars."

ADDRESS OF STATE SENATOR JOHN F. PARKER AT DEDICATION OF WORLD WAR I MEMORIAL MARKER, NATIONAL CEMETERY, OTIS AIR BASE, BOURNE, MASS.

The year 1914 was a long time ago, almost 70 years and Europe was a long way from America, some 3,000 miles reached only by steamship for there were no swift airlines at that time and in 1914, American seemed safe and isolated from mounting troubles of the European nations and the rising military power of Imperial Germany, under Kaiser Wilhelm.

Even when a little known Serbian Archduke was assassinated, triggering World War I, it made little impression on the United States, for hadn't George Washington told us many decades before to stay out of foreign entanglements and that was good enough for us.

So, when Europe erupted into full-scale warfare in 1914, and German Army hordes decimated the smaller nations and pounded relentlessly at France and Great Britain, we watched and commisserated with Britain and France, but considered no action that might involve the United States in open conflict with Germany. In fact, we did little to prepare this nation for the eventuality of warfare. The terrible tragedy of the Civil War, fought only 50 years before and which killed almost 600,000 young soldiers of the north and south, had dimmed our view of armed conflict. We wanted no more of it and this was reflected in our military forces, both army and navy, far below the standards of the times.

Germany, with its manpower might, its vast submarine and surface fleets was awesome. Nothing in America could compare with this tremendous war machine. It was frightening and as the months rolled on from 1914 into 1915 and 1916, we read about this German jugernaut, that it was grinding down the flower of the armies of England, France, Belgium and other nations of Europe. We read about the submarine fleets that smashed to the bottom, millions of tons of shipping bringing starvation and panic to European nations. We read about the front lines of France, where brave soldiers were killed by the thousands just for a few yards of muddy turf and we heard the term "No Man's Land" which told us that neither side owned the territory, it was just a slaughterhouse.

It was a situation beyond belief. The blood of a whole generation of French, British and German soldiers was being poured out from Flanders to Verdun. The death toll was simply awful and nobody winning anything.

Slowly, America came to realize it had to help Britian and France with food and supplies, and we did. Shipping millions of tons of needed supplies to these nations, until Germany declared unrestricted submarine warfare against all shipping, no matter under which flag the ship was registered.

The great liner Lusitania went down, carrying with it many Americans. The American anguish was very great and continued so, as more ships were torpedoed and our rights to the high seas violated.

Slowly, the great American patriotic giant started to awaken. We were horrified at stories of German atrocities and it all came to a head on April 7, 1917, when President Woodrow Wilson and Congress declared war on Germany and its allies.

On that fateful night before Congress, President Wilson gravely stated: "It is a fearful thing to lead this great peaceful people into war, into the most terrible and disastrous of all wars, civilization itself seeming to be in the balance, but the right is more precious than peace . . ."

One sentence above all stood out, and people remembered from President Wilson's war message, "The world must be made safe for democracy."

President Wilson also summoned the youth of America into the most bloody of all wars in human history up to that time. Before the armistice was signed, millions of men and women entered the armed forces with nearly 2 million reaching France and the Western Front.

The patriotic fever that blanketed America completely baffled the Imperial German High Command. They had calculated that America would not, and could not mount a military presence and power in Europe.

When Congress voted its War Resoluiton in April of 1917, the nation had little idea what this momentous step involved. The general assumption was that the allies needed food and supplies and that there were enough men in France and Britain to do the fighting and it was further thought that most of the American involvement would be on the high seas with the navy doing most of the fighting.

A debate raged in Congress as to whether or not recruits should be drafted and all this time the Big Bertha guns and finely trained German soldiers were grinding down still further British and French divisions in the field and there was a question could Britain and France hold out until American aid arrived.

President Wilson proclaimed that all young men must register for the draft, and on June 5, 1917, nine million men registered.

Then came the burden of creating an army on short notice. National Guard units were mobilized. Training camps were constructed and America rushed into an all-out war effort.

The gigantic American mobilization in the Spring of 1917 would be to no avail if the sea lanes of the Atlantic were blocked. The Germans were sinking almost a million tons of shipping a month and the British Admiralty predicted that unless the losses were stopped, Germany would win the war, as the stepped-up German submarine attack destroyed allied shipping in every sea lane.

No one can ever imagine, unless he was there, in those American destroyers and submarine chasers out on Atlantic duty, how vicious were the elements, as they tracked down German subs in weather beyond description.

Anyone who was in the navy during those perilous days in the bitter cold and through a winter of the worst storms in decades would attest that these were the worst days of their lives. But they went after the enemy, no matter where. Securing sea lanes for shipping and guiding our troop convoys to European ports.

The miracle of all was the transport of more than 2 million soldiers in 1,142 sailings across 3,000 miles of dangerous waters, in what became known as a bridge of ships, as the two navies, Great Britain and the United States so effectively guarded them and brought them safely to their destination with a minimum of losses.

And what about the 2 million men who made it to the other side, the United States soldiers of World War I, the doughboys?

They had left the states to the cheers of the populace. The songs "Over There, Over there, The Yanks Are Coming," "Smile, Darn You Smile," "K-K-K-Katy," and the cry of "Lafayette, We are Here" echoed through Paris as the first contingent of American troops marched down the Champs Elysee on July 4, 1917.

Germany never imagined that America could do what it was doing. Put 2 million combat soldiers in the field, adequately supplied and ready for action.

The Germans had 250 divisions against less than 170 allied divisions and General Pershing was not certain he could handle those odds, but he was insistent that the American presence be on its own, that the war could never be won in the trenches. Someday, somebody had to move forward and break the stalemate, attack the Germans. Trench warfare was not for Black Jack, it was over the top and get it done.

When the fighting mounted, one million two hundred thousand American soldiers hurled themselves across the rugged terrain of the Meuse-Argonne region, against fiercely-defending Germans in what was to become a death struggle for Imperial Germany. For 47 days the Americans attacked through a vast network of barbed wire, deep ravines, dense woods, myriads of shellholes and what not. It was the brutality of war-

fare in all its total savagery. In Belleau Wood alone 8,000 marines were reduced to less than 2,000.

The names of Sedan, St. Mihiel, Chatteau Thierry, The Marne, The Anise River, The Meuse, Montfaucon, Verdun, Metz, Very, are only a few along the way of American Expeditionary involvement in the gigantic struggle to destroy the German armies and the price paid for those victories, and many other on land, sea and in the air, are recorded in blood and bravery on a thousand historical documents about World War I.

No one who was in it will ever forget. The angry seas for the navy, the desperate air battles for our fliers against the Red Baron and other German aces, and the mud, the filth, the stench, the cooties and lice, the desperation, the gas, the incessant shelling and terrible death at a thousand disputed barricades.

No one should ever forget the cost in treasure and manpower before Germany signed the armistice and war ended on November 11, 1918.

From 1914 until the armistice, more than 29 nations were involved in World War I, with a total of 65 million servicemen and women of all nations. An awesome 8 million were killed and other casualties reached 21 million. The devastation and cost were beyond calculation.

United States military losses alone reached 126,000 killed, 234,000 wounded and gassed, 4,500 prisoners and missing. It was the most terrible time of carnage and savagery and destruction ever known up to that time and it should never be forgotten what men and nations can do under the frightful stress of war and how brave and courageous men can be under fire.

It is also proper to take note of the sacrifices by the young men and women of America and Massachusetts who lie in this hallowed resting place and in the cemeteries of France and the world. To perpetuate their memory by the dedication of a suitable monument as an on-going reminder of the hard and difficult days of 65 years ago.

It is well that we remember also Massachusetts' contribution to the winning of World War I.

From this state alone, more than 200,000 men and women went into military service. Massachusetts contributions to the prosecution of the war was second to none among states of the Union.

The 26th Yankee Division, organized in Boston on August 22, 1917, was the first full America division to land in France. It received and effected tremendous casualties in the Meuse-Argonne offensive and elsewhere and spent an unbelievable 210 days on the front lines. Its casualty total reached more than 5,000 gassed, 1,500 wounded, nearly 2,000 killed and again and again its infantry regiments were cited for outstanding service against the enemy.

Massachusetts men were in many other divisions as well and their records in combat are indelibly emblazoned forever in the annals of the magnificent fighting units from every section of the nation. More than 5,000 gave their lives.

The State House in Boston is a repository for many of the memorable honors that came to Massachusetts servicemen during those hectic days of World War I. A memorial to four Massachusetts Chaplains who lost their lives in combat, the names of four men who received the Congressional Medal of Honor; Charles W. Whittlesley, who commanded the famous lost battallion, Michael J. Perkins, Charles Dilboy and Ralph Talbot. A plaque to the memory of Lieutenant Norman Prince, who founded the famed Lafayette Escardrille. The first shell fired against Germany by a Massachusetts National Guard Unit, World War I flags and banners, honor shields and tablets, and above all the magnificent mural of the decoration by France with the Croix De Guerre of the 104th Infantry Regiment of the 26th Divison, the first such distinction to come to an American infantry unit. All of these are now silent reminders of that terrible time so long ago when the flower of our youth went overseas to fight to make the world a safe place for democracy.

Time, in its inexorable march, has taken most of the braver men and women of World War I to the great camp site in the sky and we meet here today, in this month of June, so long after, to dedicate a monument in their honor and memory. It is a fitting thing to do, so noble, so satisfying and so right and just.

To the men and women of World War I, we owe so very much. They did make the world safe for democracy. By facing the enemies of freedom and liberty. They did not fail, and brought victory and peace in their time.

It is little enough to remember them in perpetuity. They knew the tragedy and pity of war. The senselessness of it, the madness, the grief, the tears and heartache that it brought to millions of families of whatever nation, friend or foe.

So, we pay tribute to them, Not as conquerors, but as soldiers, sailors, marines, airmen, nurses of America, who believed in a righteous cause, marched off and did their bit, or more than that, gave their lives in the holocaust of death and destruction of the Western Front or on the high seas.

Permit me to close out this high honor you have given me to be the principal speaker at this dedication by leaving you with an old World War I poem, written by an anonymous soldier-doughboy, who put it this way:

Our country called us to the colors, and we gladly went
With a smile on our lips, and on victory bent.
The Kaiser was our enemy; we all knew that
And we figured he would run when he saw our tin hats.
It didn't work that way, and it was tougher'n hell
Surviving the filth, the gas, the horror and the smell.
The war was no picnic and the casualties ran high
Wonderful young Americans, who were not eager to die.
It should not be forgotten what the doughboys did here
In this frightful world of explosions, agony and fear
Across no-man's land; that terrible blood-red strip
Where sharpnel tore at bodies and machine guns zipped.
Shell holes tell the story, half of them filled with blood,
The sky's afire, the bullets hail as we wallow through the mud
We checked the men still living and then we knew full well
That in those awful moments, more than half the regiment fell.
But we won it for democracy, beating the Germans all the way
And the price was white crosses from Sassions to Seiprechey
So remember us kindly, the doughboys who turned the tide
Ask God to love and keep us, forever at his side.●

CONSTRUCTION OF COAL SLURRY CLOSE TO REALITY

HON. JAMES F. McNULTY, JR.

OF ARIZONIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. McNULTY. Mr. Speaker, the construction of coal slurry pipelines as a mode of delivering cheaper energy to American citizens and lessening our dependence on foreign suppliers is close to reaching reality. H.R. 1010, which provides eminent domain for the construction of coal slurry pipelines has passed both the House Public Works Committee and the Interior Committee, and will soon be scheduled for a vote on the floor.

In light of that fact, I would like to have the following articles reprinted in the RECORD.

[From the Phoenix (Ariz.) Republic, June 25, 1983]

AN OK FOR COAL SLURRY?

If Congress approves coal slurry pipelines—and it now seems closer than at any time in the past 20 years—this would cut the delivery price of Western low-sulfur coals.

More utilities across the country would buy cleaner Western coal, eventually generating greater income and jobs for the West.

Arizona produces 12.5 million tons a year, all on the Navajo Indian reservation.

Coal-fired plants produce more than half of all U.S. electricity.

Railroads, fighting to keep their high-volume coal traffic, have managed to defeat pipeline developers for two decades.

They are still attempting to block the pipelines—carrying a 50-50 mixture of coal and water through mostly underground lines—from crossing railroad rights-of-way.

Western coal and pipeline interests are trying to use the power of eminent domain.

One reason why the bill has a chance of passage is that much of Western agriculture's past fear of losing irrigation water to slurry has been calmed.

Reps. Richard Cheney, R-Wyo., and Morris Udall, D-Ariz., have written a measure that gives the states authority over water used in interstate coal slurry pipelines.

No firm may purchase water for slurry without state approval.

In some cases, moving coal by pipeline is half that of rail rates.

In all instances, the new delivery method offers savings to customers.

Coal slurry pipelines should make both the railroads and slurry lines more cost-efficient.

Such efficiency should help coal better compete with nuclear and oil energy.

The United States has hundreds of years of energy resources in its coal deposits.

Western coal is relatively clean-burning.

After two decades, the time for coal slurry pipelines has finally arrived.

[From the Tucson (Ariz.) Daily Citizen, June 29, 1983]

CONSUMER RELIEF

There's nothing like a little competition to bring down prices. That's why the railroads have fought for years to keep pipelines from being built that would carry coal slurry—a mixture of coal and water.

Such pipelines can't be built without federal eminent domain authority that would allow the pipelines to cross railroad property. A bill now being considered in Congress, the Coal Pipeline Act, would authorize the Secretary of the Interior to grant rights of way for coal slurry pipelines.

Arizona Reps. Morris Udall and James McNulty support the bill because it would give the railroads some competition and an incentive to hold down their coal-hauling rates, which have risen steadily over the past few years. Higher transportation costs are passed on to consumers by the electric companies that use coal to generate power.

In addition, Udall estimates that slurry pipeline projects could create up to 500,000 new private-sector jobs.

The railroads have succeeded for nearly 20 years in blocking coal slurry pipelines. But this year, with coal companies, utilities, consumer groups and labor all working for the bill, that opposition finally could be derailed.●

H.R. 2817, A BILL TO AMEND THE CLEAN WATER ACT

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. DYSON. Mr. Speaker, I was asked to testify before the House Public Works Subcommittee on Water Resources on H.R. 2817, a bill I introduced earlier this year that would provide funds for the cleanup of the Chesapeake Bay.

The testimony follows:

TESTIMONY OF CONGRESSMAN ROY DYSON

Mr. Chairman and distinguished members of the Subcommittee, I am here today to testify on behalf of H.R. 2817, a bill I introduced earlier this year that would amend the Clean Water Act to provide for the enhanced water quality of the Chesapeake and Narragansett Bays.

The Chesapeake Bay in one of our nation's most cherished and valuable natural resources. It is the largest and most productive estuary in the contiguous United States, with a drainage area of nearly 64,000 square miles in size, that includes parts of 6 states and the District of Columbia. Its primary tributaries, the Susquehanna, the Potomac and the James River, are major river systems in their own right.

The Bay's significance extends beyond its size, to its importance for the seafood, waterborne commerce and water-oriented industries that are vital to the middle Atlantic states. I am particularly aware of this because of my responsibilities as the representative of Maryland's First Congressional District, which surrounds the largest portion of the Cheaspeake Bay.

These local interests are complemented by the impact that the Bay has on the nation as a whole. Its fishing production is surpassed only by that in the Atlantic and Pacific Oceans, with an annual dockside value in excess of $100 million. Commercial shipping interests carried nearly 239 million tons of cargo via the Chesapeake in 1981, estimated at nearly $27.5 billion.

One of the Bay's most valuable roles is its function as a wildlife and aquatic habitat. Its tributaries are important places of reproduction for a variety of species of anadromous fish, like the shad and striped bass. In fact, almost 90 percent of the striped bass along the Atlantic Coast spawn in the Chesapeake's waters.

These facts indicated why the environmental quality of the Bay is so important to the region and the nation. As you probably know, next month the Environmental Protection Agency completes its seven-year, $27 million study of the Chesapeake Bay's water quality. The study answers many of the most pressing questions about the condition of the Bay, but those answers only point to how much more remains to be done.

Research findings have identified three areas of serious concern: Toxics, nutrient enrichment and declining Bay grasses. These findings indicate that the main stem of this 195-mile long estuary is losing oxygen. In addition, the upper reaches of the main tributaries are considerably more stressed than scientists originally thought. All of these trends—the decline of the Bay grasses; the increased nutrient and attendant loss of oxygen; and the continued loading of toxic chemicals and heavy metals into Bay waters—portend serious problems by the end of the century.

The Bay grasses that once stretched from shore to shore are nearly gone. Commercial landings of striped bass plunged from five million pounds in 1973 to less than one million pounds in 1979. Shad, once harvested in huge numbers, and now so scarce that there is a rule against catching and keeping them in Maryland. In general, the fish that migrate each year to spawn in the Chesapeake Bay are disappearing.

This decline in water quality and subsequent loss of aquatic life has been principally the result of non-point source pollution; that is, agricultural and urban runoff, usually from heavy rainfall. Each year the Bay receives 400 million gallons of sewage and some 2,000 tons of metals and symbolic compounds, including sediments, fertilizers and herbicides.

Given the EPA findings, it is essential that we have a shared federal and state commitment to clean up the Chesapeake Bay. Management strategies for the Bay have been developed. A massive data base has been assembled to define trends in water quality variables and living resources over a 30 year time period for the Bay and its tributaries. There is only the need to establish a mechanism for implementing the Bay management strategies and to monitor their environmental results. I believe my legislation would provide that mechanism and the incentive for the states of Maryland, Pennsylvania and Virginia to develop and implement an interstate Bay Management Plan.

My legislation will provide a maximum of $10 million in federal funds in each of the next four fiscal years to help the states turn their water pollution reduction plan into action. The federal grant money, to be administered by the EPA, will cover up to 55 percent of the total cost of implementing the plan in each state. Therefore, each state would have to contribute at least 45 percent.

The federal commitment to a healthier Chesapeake Bay must not end merely because the states are now the first line of defense against this water pollution problem. As the country's largest and most productive estuary, the Chesapeake Bay is as much a federal concern as a local one.

My bill also includes a $3 million authorization to insure that the EPA continues to conduct research and monitor changing conditions in the Bay. Special attention would be paid to the effect of pollutant loadings on the dwindling striped bass population.

Mr. Chairman, I am pleaded to note today that my bill has received the support the entire Maryland and Virginia Congressional delegations and over half of the members from Pennsylvania, three of whom are members of this subcommittee. In addition, the governors of Pennsylvania, Maryland and Virginia have all publicly endorsed the bill.

This high level of interest from federal and state officials in the Chesapeake Bay region represents an unprecedented effort to deal with the Bay's problems. We have begun to recognize that there is a mutual interest among the needs of all parties in the region. Residents on the Bay worry about non-point source pollution harming the aquatic life. Farmers who live near the Bay or in the Susquehanna Valley are concerned with finding ways to save money on fertilizer and improving their productivity by preventing further soil erosion. Problems such as these have too often been seen as being mutually exclusive and therefore incapable of a comprehensive solution. My bill initiates the kind of coordinated approach that begins the process of dealing with runoff and its harmful effect not only on the Chesapeake Bay, but on our farmland.

Finally, my legislation would provide $1.5 million in each of five fiscal years for the EPA to conduct research assessing the principal factors having an adverse effect on the environmental quality of the Narragansett Bay in Rhode Island. My bill also requires the Administrator of EPA to establish a mechanism for improving the collection, storage, analysis and dissemination of water quality data on the Narragansett Bay.

Mr. Chairman and fellow Colleagues, the Clean Water Act is our nation's major legislative vehicle to improve water quality. The Chesapeake Bay, as our nation's largest and most productive estuary, warrants protection under its statutes. My legislation represents an important first step towards improving the Bay's water quality and assuring future generations that the Chesapeake Bay will continue to be a productive center for economic development and aquatic life. I urge its inclusion in this year's reauthorization of the Clean Water Act. Thank you, Mr. Chairman. I would gladly answer any questions you may have.●

A TRIBUTE TO RICHARD W. MacWHORTER

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. COURTER. Mr. Speaker, I would like to take this opportunity to pay tribute to Richard W. MacWhorter, who has recently received the Silver Star for his meritorious service in the U.S. Army during the Second World War.

Mr. MacWhorter earned this honor for his unwavering courage and heroism during the Battle of the Bulge. While holding a line of defense in Echternach, Luxembourg, the Germans counter-attacked and surrounded his unit, Company E of the 12th Infantry Battalion. He was subsequently captured, and he spent the next few months as a prisoner of war.

As a first lieutenant and the commander of unit 1542, Mr. MacWhorter saw combat in the Rhineland, Ardennes, and Central Europe. He was supposed to receive the Silver Star in 1947, but until now it was never given to him.

Mr. MacWhorter has been decorated many times for his valor on the field of battle. Prior to this honor, he had been awarded the European-African-Middle Eastern Service Medal, the American Service Medal, the Distinguished Unit Badge, and the Victory Medal.

After so many years of waiting, it is gratifying to see Mr. MacWhorter receive what is rightfully his. As Americans, we owe him a deep debt of gratitude for his service to the United States. I know his family and friends would like to join us here today in extending to him our deepest thanks and appreciation and to wish him many years of health and happiness.●

ABORTION: ONE WOMAN'S ORDEAL

HON. ALAN B. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MOLLOHAN. Mr. Speaker, I would like to submit for the consideration of my colleagues an article in the Washington Times outlining one woman's ordeal caused by her decision to abort her baby. It provides, I think, valuable insight on the abortion issue.

[From the Washington Times, Aug. 3, 1983]

WOMEN FORM WEBA TO FIGHT ABORTIONS

NANCYJO MANN ON THE HORROR OF HAVING AN ABORTION

(Every year for the past 10 years, 1.5 million women have had an abortion. For many, according to Nancyjo Mann, founder and president of Women Exploited By Abortion (WEBA), having an abortion only began their problem. Mann was interviewed by Washington Times staff writer and columnist Tom Diaz.)

Q: Tell us about your experience with abortion and its consequences.

A: My experience goes back to 1974, the month of October, 30th day—the day that I killed my baby girl. It was a second trimester abortion, I was 5½ months pregnant.

I went to the doctor because family members had pressured me, had encouraged me. There was no "Nancy maybe you should reconsider," because it was not my idea in the first place, it was theirs.

My husband had walked out the door and deserted us. The responsibility of three children was just too much for him. I went to my mother and my brother and asked, "What am I going to do?" And my mother said "It's obvious, Nancy, no man's going to want you with three children, let alone the two you already have. You're probably not going to amount to a hill of beans and you're probably going to be on welfare the rest of your life."

And following those three positive, uplifting statements, she said "You're going to have to have an abortion." Then she called one of the leading ob/gyns in the Midwest, and he said, "Absolutely, no problem. Bring her on in."

Q: Did he know at the time how far you were along?

A: Absolutely. He does all kinds of second trimesters, no problem.

I went in and I asked, "What are you going to do to me?" All he did was look at my stomach and say, "I'm going to take a little fluid out, put a little fluid in, you'll have severe cramps and expel the fetus."

I said, "Is that all?" He said, "That's all."

It didn't sound too bad. But what that doctor desscribed to me was not the truth.

I went to the hospital and 60 ccs of amniotic fluid were drawn out, and a saline solution injected. Immediately the needle went through the abdomen I hated Nancyjo, I hated myself. With every ounce of my being I wanted to scream out "Please, stop don't do this to me." But I couldn't get it out.

Once they put in the saline there's no way to reverse it. And for the next hour and a half I felt my daughter thrash around violently while she was being choked, poisoned, burned and suffocated to death. I didn't know any of that was going to happen. And I remember talking to her and I remember telling her I didn't want to do this, I wished she could live. And yet she was dying and I remember her very last kick on her left side. She had no strength left.

I've tried to imagine us dying that kind of death, a pillow put over us, suffocating. In four minutes we'd pass out. We'd have that gift of passing out and then dying. but it took her an hour and a half just to die.

Then I was given an intravenous injection to help stimulate labor and I went into hard labor for 12 hours. And at 5:30 a.m. on the 31st of October I delivered my daughter whose name is now Charmaine Marie. She was 14 inches long. She weighed over a pound and a half. She had a head of hair and her eyes were opening.

I got to hold her because the nurses didn't make it to the room in time. I delivered my girl myself. They grabbed her out of my hands and threw her, into a bedpan. After they finished and took her away in the bedpan, they brought a lady in to finish her last hours of labor lying next to me. She had a healthy baby boy.

That was tough.

I like Nancyjo, I liked me, prior to the abortion. But shame and remorse and guilt set in—I mean, when you get a hold of your own daughter and you see what you did. She was not a "fetus." She was not a "product of conception." She was not a "tissue adhering to the uterine wall." She was my daughter and I got to hold her, at only 5½ months, 22 weeks. So those are cheap, inhuman words to use around me.

I chose to be sterilized because I couldn't cope with the idea that I could possible kill again. It was too devastating. It was not something you go around telling people, that you just killed your baby, no problem. I was ashamed, totally ashamed.

Q: But some people would say that although this experience obviously had a great impact on you, it is not characteristic of most other women who have abortions. Is your case unusual?

A: No, my case is not unusual at all. People want to say "Oh, but Nancy, you're the extreme." That's not true. In fact there are so many more of us than there are the other. The emotional hurt is so deep. You do not discuss your abortion, the suction machines and the needles and everything else, over a cup of tea and a cookie. Women just don't do this. The pain is just too deep and too great.

I'm sure there are women out there who are never fazed, never, by their abortion. But I would say that 98, 99 percent of them are fazed, whether it's for a small period of time or for the rest of their life, whether they suffer only a small degree or die from their abortions.

Q: How did WEBA—Women Exploited By Abortion—get started?

A: About one year ago I was talking to another recording artist who was pro-life. I asked what pro-life meant and he said he was anti-abortion. I said "Hank, I had an abortion in 1974. I was 5½ months pregnant. It hurt so bad for so long."

He just about drove the car off the road. And he said, "Nancy, you've got to tell the story." So, a year ago I went public, founded WEBA.

Q: How many members do you have?

A: I'm a 10-month-old corporation and in 10 months I've gone from being two people, my vice president and myself, in two states, Virginia and Iowa, to now having 34 states with approximately 10,000 women in my group.

Q: What are some of the effects of abortion on women?

A: I have women who cannot vacuum their carpets. They have to have the neighbor or their husbands do it while they're at the grocery store, because of the suction sound. You see, the suction machine (used in many abortions) makes that sucking sound—it's 29 times more powerful than the vacuum we use in our home. The majority of the women aren't put to sleep. It's done without being put to sleep. It's heartbreaking to me that they can't run a vacuum cleaner—that's a deep wound.

One psychological effect we see almost all the time is guilt. Others are suicidal impulses, a sense of loss, of unfulfillment. Mourning, regret and remorse. Withdrawal, loss of confidence in decisionmaking capabilities. They feel that maybe they've made a wrong decision, maybe they can't make another decision right in their life. Lowering of self esteem. Pre-occupation with death. Hostilities, self-destructive behavior, anger and rage. You can lose your temper quickly. A despair, helplessness, desire to remember the death date which is really weird but you do that. You remember these dates very strongly. A preoccupation with the would-be due date or due month. My daughter was due in early March, so in early March it's there.

An intent interest in babies but a thwarted maternal instinct. Women really are interested in babies, but I have many members who can't hold children. A hatred for anyone connected with abortion. Lack of desire to enter into a relationship with a partner, loss of interest in sex, an inability to forgive self, feeling of dehumanization, nightmares, seizures and tremors, frustrations, feeling of being exploited. And child abuse. We see a lot of child abuse.

I want you to understand that I do not come from any right to life organization.

We are connected with no one. We remain neutral. But we are the ones they are all arguing about and discussing and debating. We are the voice of experience.

I told Congressman (Henry A.) Waxman, D-Calif., at a recent hearing, "Have you ever had your cervix dilated and the womb ripped open? Have you ever had tubes stuck inside of you and everything sucked out? Have you ever had needles stuck through your abdomen? Have you ever felt your baby thrash around and die? Have you ever had hard labor, delivered and held your baby? Because if you haven't, sir, you can't intelligently talk to me about this. We are the voice of experience. We've all had this done to us."

And that's a fact. So we held our own ground, our own turf, our own territory.

Q: What is it that your organization does as a voice of experience?

A. We are a support group for those women who hurt—physically, emotionally, mentally and spiritually—from their abortions. We are there when the phone rings at 3 in the morning and someone is suicidal because maybe it was four years ago on that day and they still can't cope with it. We cry with them and talk with them. We are a support group. We also are a political group. I am classified as that, and I guess the strongest thing of what I intend to do—I intend to shut the abortion industry down. I intend to shut the abortion-on-demand industry down.

We also have rape victims and incest victims among our members—the other 3 percent (not abortion-on-demand). And every one of them is getting ready to go public, to speak very publicly—their full names, ages, everything. They're not ashamed. They know what happened to their lives. They became victims of an industry that is making lots of money, that was supposed to be a quick answer.

And now they're under psychiatric care, psychological care. Because of the abortion, not the rape and incest. They overcame the rape and the incest. Sure they needed help, but they overcame that. But they have had a very difficult time overcoming killing that innocent baby.

They heard of WEBA and they contacted us. And two of them were so brutally beaten they couldn't make it to the hospital in time. Pure rapes, I'm not talking about just a strong sexual aggressiveness. I'm talking about women who were brutally beaten, true rape victims.

Q: You talked about political activity. What's been your experience here in the Congress?

A: I testified two weeks ago before Rep. Waxman, Barbara Mikulski and a few other members of Congress. It was a stacked hearing—14 to 1 doesn't sound very balanced to me. But I went in very open and honest with them, they sat very intently and very amazed at the story I had to tell about my organization, myself and my constituency, WEBA.

Barbara Mikulski said "I've never heard this side." I said, "No, Pandora's box got opened up 10 years ago and now you're just starting to see it." I predict that in five years we will see an epidemic of mental and nervous breakdowns among the women of this country. People are not going to know why and I'm going to be able to tell you why: because they've had an abortion, that's why.

It's a quick solution. Abortion is not an ending of problems, it's the down payment for a whole new set of problems. That's what it is. It doesn't get rid of them.

Q: Have congressmen been exposed to your view, the voice of experience?

A: No. I hear time and time again, "I've never heard this side before." "Are there many more like you?" they ask. And my answer is this. Take the 15 million of us who have, by legal abortion-on-demand, killed our babies. I will give 2 million or 3 million to Planned Parenthood, NOW or whoever they want. I will give another 2 million or 3 million who have two or three abortions without open remorse.

And justification to oneself is important here, by the way. I don't know how many women I told to go have abortions. Justification. It's like, if you can have a few more, go do what you did and kind of justify it, it makes it better. It makes it not quite so bad.

That still leaves 9 million of us who've been hurt in one way, shape or form or the other—psychologically, physically, emotionally or spiritually.

Q: So you believe that there are—by conservative estimate—perhaps 10 million women who suffered as you did?

A: I believe by very conservative there's 8 million who have been hurt.

Q: Where can they write or call? Or what can they do if they need somebody, such as your organization?

A: They can call or they can write. The address is WEBA, 1553 24th St., Des Moines, Iowa 50311. Or they can reach me at 515-255-0552, my business phone. If they hurt, if they're at a certain state, I may have a state representative where a girl can be with them and talk with them. I get so many women who have written me to say, "Thank God, there is somebody that I can now finally pour the whole thing out to."

And I'm thankful that I am a Christian because I couldn't carry that load. If you could read my mail . . . It started off where I'd get two and three letters a day and now they're wrapping it in bundles to bring to me. And I get mail from all over the world.

Q: Within 10 months this has happened?

A: In 10 months. There is such a need. No one thought 10 years ago of the aftermath. We're the aftermath.●

HAZLETON ALL-AMERICAN GIRLS SOFTBALL TEAM WINNER OF PENNSYLVANIA STATE CHAMPIONSHIP

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. HARRISON. Mr. Speaker, for the first time in its history, the All-American girls softball team of Hazleton has won the Pennsylvania State Championship.

That, of course, is quite an achievement in itself. In addition, the State championship carries with it an invitation to participate in the National Championship Tournament to be held in Tulsa, Okla., from August 11 through August 14.

The All-American Girls Softball League started in 1978 with 8 teams and now consists of 18. There are currently 300 girls in the league, all members of the Amateur Softball Association. The girls are all from Hazleton and the surrounding area.

Throughout the years, they have participated in tournaments throughout Pennsylvania. In 1980, the All-American girls won first place trophy for best marching unit in the annual funfest parade. They actively participate in assisting charitable organizations, most recently be a benefit game for the cause of the United Rehabilitation Services.

The purpose of the league is to provide wholesome activity for girls between the ages of 8 and 15. The girls are sponsored by local businesses and organizations, who pay a yearly fee to help defray the cost of uniforms. The extraordinary expenses associated with the trip to Tulsa will be defrayed by contributions from the general public in the Hazleton community.

Because of their own efforts and the help of the community, these outstanding young women will represent the All-American Girls Softball Team at the National Championship in Tulsa: Melissa Butala, Janene Dagostino, Patti Seliga, Marine Sandrock, Tina Davis, Donna Yachera, Tanya Piehota, Janene Wallace, Kelly Ragan, Tammy Sukel, Francine Scarcella, Karen Ritz, Wendy McGarry, and Chris Seliga.

In acknowledging these outstanding young women, Mr. Speaker, we must also pay tribute to their coaches: Tom King, Janet Victor, Carol and John Sukel. It should also be noted that Mrs. Sukel is the chairman of the league and that Paul J. Paternoster is their public relations coordinator.

As these young women depart for Tulsa, they carry with them the best wishes and high hopes of the greater Hazleton community. It is my honor, Mr. Speaker, to join in this tribute to them and to share the story of this outstanding community endeavor with my friends and colleagues in the House.●

LEGISLATOR JOSEPH ADAMO

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 3, 1983

● Mr. MORRISON of Connecticut. Mr. Speaker, I am pleased and honored to have this opportunity to join with the Connecticut Police Chiefs Association in congratulating Connecticut State Representative Joseph Adamo of West Haven, whom the CPCA has chosen as the 1983 "Outstanding Legislator of the Year."

As first-term Democrat from West Haven's 116th District, Representative Adamo spearheaded the efforts of

many State representatives and the CPCA in obtaining the passage of Public Act 83-212, "An Act Requiring Just Cause for Police Chiefs Dismissals." The requirement of proving "just cause" is designed to remove any possibility of politics entering into the decision to dismiss a police chief in Connecticut.

Representative Adamo is a member of the Labor and Public Employees Committee of the Connecticut General Assembly. In that capacity he has worked tirelessly and successfully for legislation to protect the rights of workers and to improve Connecticut's unemployment compensation benefits. Representative Adamo was also instrumental in the passage of tough new drunk driving legislation.

In a very short time, Representative Adamo has shown outstanding leadership capabilities and has impressed his constituents and colleagues with his dedication and hard work. The designation as "Outstanding Legislator of the Year" is one which Representative Adamo has earned by his work each and every day of his first term, and I know that I speak for his entire district when I say that he is truly deserving of this honor.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, August 4, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 5

9:30 a.m.
Joint Economic
To hold hearings on the employment/unemployment situation for the month of July.
